Basis for making rates to points which are not shown as destinations in this sheet.

Whenever you have calls for through rates to points on other lines not quoted in this or other tariffs, and have not the necessary information to arrive at the correct rates, you will please consult your General Passenger Agent by letter or wire, as the urgency of the case may require, and if not time do to either, you may construct the through rate on the following basis: Find the nearest point this side of the place to which you wish rate, and to which you have the through rate; add three (3) cents per mile (except as noted hereafter) for the distance between the two points, adding, in all cases, to make rate figured on mileage

end in 0 or 5, and if the through rate so made does not exceed the rate which you have or can make by the use of rate sheet to a point beyond, which can be reached via the same route, it will be the rate to use. If, however, the rate to a point beyond is less, you may sell at that rate. Following is a list of roads over which the rate per mile is greater or less than three cents, and must be used in figuring rates on mileage to points situated on lines mentioned below:

Arkansas and Louisiana. . ----------5c
Atlantic Coast Line:
In Virginia, South Carolina, Georgia and Alabama. . ----------3c
In North Carolina. . ----------3¼c
In Florida ----------3c
(Except to St. Johns and Lake Eustis Branch, between Astor, Leesburg and Lane Park; Sanford and Tavares Branch between Sanford and Tavares; Sanford and St. Petersburg Branch, between Sanford and St. Petersburg; Tampa and Thonotosassa Branch, between T. & T. Junction and Thonotosassa; St. Cloud Sugar Belt, between Kissimme and Narcoossee; Fla. Mid. R. R., between Kissimme and Apopka; Homosassa Branch, between Ocala Homosassa; Oviado Branch, between Sanford and Lake Charm; Tiger Bay Branch, between Winston and Tiger Bay.) ----------3½c
Atchison, Topeka & Santa Fe Ry.
In Colorado ----------4c
(Except Pueblo to Canyon City and Rockvale, inclusive.) ----------5c
New Mexico ----------4c
(Except White Water to Santa Rita and Fierro, inclusive.) ----------5c
Arizona ----------5c
Coast Lines ------ Ask General Passenger Office.

B. & O. R. R.
- Allegheny to Akron ---------- 3c
- Butler to Foxburg ---------- 3½c
- Foxburg to Kane ---------- 4c

Bangor and Aroostook R. R. ---------- 3½c
Carson & Colorado Ry. --Do not figure on mileage.
Corvallis & Eastern R. R. ---------- 4c
Chicago, Rock Island & Pacific, in Colorado------ 4c
Colorado Midland Ry ---------- 6c
Canadian Pacific.
- East of Vanceboro ---------- 3 1-3c
- Vanceboro to Megantic ---------- 4c
- Megantic and Newport to Montreal -------- 3 1-3c
- Montreal to Smith Falls ---------- 3 1-3c
- Montreal to Quebec ---------- 3c
- Smith Falls to Detroit, with branches west of Toronto ---------- 3c
- Montreal to Renfrow, with branch lines (except Prescott Branch.) ---------- 3 1-3c
- Prescott Branch ---------- 4c
- Renfres to Port Arthur and Sault Ste Marie--3c
- Port Arthur to Western Boundary of Manitoba, including all lines in Manitoba---- 3c
- Western boundary of Manitoba to Dunmere Junction, including branches in Assiniboia south of the main line ---------- 3½c
- Main line and all branches, Dunmere Junction to Pacific Coast (including Kootenay Steamer Line) ---------- 4c
- Prince Albert Branch ---------- 4c
- Northwestern Section in Assiniboia -------- 4c

Carrabelle, Tallahassee & Georgia ---------- 5c
Chicago & Alton Ry., Mexico to Cedar City ------ 3c
Chicago & Northwestern, Neb. and Wyo. Div.; in Wyoming and South Dakota (Black Hills District) ---------- 4c
Denver and Rio Grande, between Pueblo and Denver ---------- 4c

Denver and Rio Grande, between Pueblo and Salida ----------4½c
Denver and Rio Grande, between Pueblo and Trinidad ----------5c
Denver and Rio Grande, between all other points ----------6c
Duluth, South Shore and Atlantic, in Michigan---4c
Duluth, Missabe & Northern ----------3½c
El Paso & Southwestern R. R. ----------5c
East Tennessee & Western North Carolina ------4c
East Broad Top ----------3½c
Farmerville & Powhaten ----------4c
Florida East Coast ------Do not figure on mileage.
Frisco System.
Salem Branch, Cuba to Salem ----------4c
Aurora Division, Aurora to Greenfield------4c
Chadwick Branch, Springfield to Chadwick--4c
Bloomfield Branch, Salem to Aquilla -------4c
Deering Branch, Talipoosa to Deering ------4c
Caligoa Branch ----------4c
Georgetown & Western R. R. ----------3½c
Great Northern Ry.
Blaine, Wash., to Brownsville, B. C. --------4c
Great Falls, Mont., to Sweet Grass, Mont. ----4c
Jennings, Mont., to Morrissey Junc., B. C.---7c
Gila Valley, Globe & Northern ----------6c
Grand Trunk, Toronto to Montreal ----------3 1-3c
Grand Trunk, points east of Montreal --------3 1-3c
Grand Trunk to other points—Do not figure on mileage.
Gulf & Ship Island R. R. ----------3½c
Hancock and Calumet ----------4c
Louisiana Western Ry., Cypremort Branch ------4c
Louisville & Nashville.
Louisville & Nashville, Beardstown to Springfield, Ky. ----------4c
Louisville & Nashville, East of Pensacola --4c
Louisville & Nashville, Clarksville to Gracey-4c
Louisville & Nashville, Glasgow Junction to Glasgow ----------5c

Louisville & Nashville, Glasgow Junction to Mammoth Cave. (See Mammoth Cave R. R.)
Louisville & Nashville, Elmore to Wetumpka ----------5c
Louisville & Nashville, Prattville Junction to Prattville ----------5c
Louisville & Nashville, Selma to Flomatom--5c
Louisville & Nashville, Guthrie to Elkton----5c
Louisville & Nashville, Sandy Hook to Tuscumbia ---------- ----------4c
Louisville & Nashville, Iron City to Pinckney ---------- ----------4c
Louisville & Nashville, Owensboro to Adairville, Ky. ----------3½c
Missouri Pacific Ry., in Colorado ----------4c
Missouri Pacific Ry., Lebanon Branch, Jefferson City to Bagnell ----------4c
Missouri Pacific Ry. in Colorado.

Missouri Pacific Ry., Sedalia Branch, Sedalia to Warsaw ----------4c
Morgan's La. & Texas, St. Martinsville Branch--4c
Mammoth Cave R. R., Glasgow Junction to Mammoth Cave ----------$1.25
Minneapolis & St. Louis, in South Dakota ------4c
Maricopa & Phoenix and Salt River Valley------6c
Manitoba & Northwestern ----1st class 4c, 2d class 2c
Mason City and Ft. Dodge Ry ----------4c
Monongahela River, West Virginia and Pittsburg ----------4c
Midland Ter. R. R. of Col. ---Do not figure on mileage
New York Central & Hudson River R. R.
Main Line, Buffalo to New York ----------2c
Penna. Division, Corning and North --------2c
Adirondack Division ----------3c
Penna. Division, south of Corning ----------3c
R. W. & O. Division and Putnam Division ---3c
Harlem Division, between New York and Chatham ----------2½c

New York, New Haven & Hartford ----------2½c
New York, Providence & Boston. (See N. Y., N. H. and H.) ----------2½c
Nashville, Chattanooga & St. Louis.
Fayetteville to Columbia and intermediate --4c
Fayetteville to Jeff. and intermediate ------4c
Cowan to Tracy City and intermediate ----4c
Elora to Fayetteville and intermediate ------3¼c
Dickson to Allons Creek and intermediate--3 3-4c
Oregon Pacific ----------4c
Oregon Short Line in Utah, Idaho and Montana--4c
In Wyoming. ----------5c
Paragould Southwestern Ry--5c in Arkansas 4c in Mo.
Pecos Valley & Northeastern, in New Mexico ----4c
Pecos & Northern Texas, in Texas ----------3c
Pennsylvania R. R. --------Do not figure on mileage.
Pine Bluff Arkansas River R. R. ----------5c
Quebec Central --------1st class 3 1-3c, 2nd class 2½c
Quebec Southern ----------3 1-3c
Rio Grande Southern ----------6c
Saranac & Lake Placid ----------10c
Seaboard Air Line in Virginia ----------3c
Seaboard Air Line, in North Carolina, 1st class 3¼c, 2d class 2 3-4c.
Seaboard Air Line, in South Carolina ----------3c
(There are no second class rates in Virginia and South Carolina.)
Southern Pacific ----------Do not figure on mileage
Sonora Railway ----------1st class 5c, 2nd class 3½c
San Pete Valley ----------4c
Santa Fe, Prescott & Phoenix ----------6c
Southern Railway.
All points in North Carolina ----------3¼c
Except line, Marion to Earle, N. C. --------3½c
Embreeville Junc., Tenn., to Treaty, Tenn --4c
Knoxville, Tenn., to Middleborough, Ky ----3½c
Rogersville Junction to Rogersville, Tenn--5c
St. Louis & Hannibal ----------4c
Virginia & Southern Ry ----------4c
Union Pacific.
In Kansas and Nebraska ----------3c

Wyoming, east and south of Cheyenne ------4c
Colorado ------4c
Wyoming, west of Cheyenne ------5c
Utah (except Park City Branch) ------4c
Utah, Park City Branch ------5c

Advise your General Passenger Agent at the close of the day's sales of any rates made by you, stating how figured, that he may notify you if not correct, and protect your report to the auditor. Please be sure and get a correct understanding of the above. If in doubt, advise your General Passenger Agent at once.

I. C. C. No. 30.

Supplement No. 1. No. 265. Through rates of fare from Saint Louis.

Effective February 15th, 1905.

Make following corrections and additions in through fares from St. Louis, Mo.

By order interested lines.

George Morton,
Compiler.

(*Bill of Lading.*)

Special attention is called to the rules and regulations on the face and back of this bill of lading.

DURHAM & SOUTHERN RAILWAY COMPANY.

R. I. Cheatham, General Manager, Durham, N. C.;

E. Thomason, Auditor, Durham, N. C.

*The shipper may elect to accept the conditions printed or written on the face and back hereof, and the reduced rates applying thereunder, or may, as provided below, require the carriage of the property at carrier's liability.

If the shipper elects not to accept the said reduced rates and conditions, his failure to sign the Acceptance Clause provided below will be accepted as notice of such intention, and the property will be at the carrier's liability, limited only as provided by common law, by the laws of the United States and of the several states, in so far as they may apply. Property thus carried will be charged twenty (20) per cent. higher (subject to a minimum increase of one (1) cent per hundred pounds) than if shipped subject to the printed conditions printed or written on the face and back hereof.

Received by the Durham & Southern Railway Company, at Durham Station, 9/5, 1906, from Blackwell's Durham Tobacco Co., the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned and destined as indicated below, which said carrier agrees to carry to said destination if on its own road, or otherwise to deliver to another carrier on the route to said destination.

In consideration of the rate charged, under the conditions of this Bill of Lading, it is mutually agreed as to each carrier, severally, but not jontly, of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the conditions, whether printed or written, on the face and back thereof, all of which are agreed to by the

shipper as owner or agent for the owner, and accepted for himself and his assigns as just and reasonable, as evidenced by the signing of this bill of lading by the shipper as owner, or agent for the owner.

Not Negotiable.—If the word *"Order"* is written immediately before or after the name of the party to whose order the property is consigned, the surrender of this Bill of Lading, properly endorsed, shall be required before the delivery of the property at destination, as provided by Section 8 on the back hereof.

DURHAM & SOUTHERN RAILWAY.

Conditions.

1. No carrier or party in possession of all or any of the property herein described shall be liable for any loss thereof or damage thereto by causes beyond its control; or by floods, fire, jettison, ice, collision, delay or quarantine; or by robbers, riots, strikes or stoppage of labor; or by leakage, breakage, chafing, loss in weight, decay, vermin, changes in weather, heat, frost or wet; or for country damage on cotton or from any cause if it be necessary or is usual to carry such property upon deck or upon open cars.

2. No carrier is bound to carry said property by any particular train or vessel, or in time for any particular market, or otherwise than with as reasonable dispatch as its general business will permit. Every carrier shall have the right, in case of necessity, to forward said property by any carrier between the point of shipment and the point to which the rate is given. All additional risks and increased expenses incurred by reason of change of route in cases of necessity shall be borne by the owner of the goods, and be a lien thereon.

3. No carrier shall be liable for loss or damage not

occurring on its portion of the route, nor after said property is ready for delivery to consignee. The amount of any loss or damage for which any carrier becomes liable shall be computed at the value of the property at the place and time of shipment under this bill of lading, unless a lower value has been agreed upon or is determined by the classification upon which the rate is based, in either of which events such lower value shall be the maximum price to govern such computation. Claims for loss or damage must be made in writing to the agent at point of delivery promptly after arrival of the property, and if delayed for more than thirty days after the delivery of the property, or after due time for the delivery thereof, no carrier hereunder shall be liable in any event. Any carrier or party liable on account of loss or damage to any of said property shall have the full benefit of any insurance that may have been affected upon or account of said property.

4. All property shall be subject to necessary cooperage, baling and repairs at owner's cost. Each carrier over whose route cotton is to be carried hereunder shall have the privilege of compressing the same, and shall not be held responsible for deviation or unavoidable delays in procuring such compression.

Grain in bulk, consigned to a point where there is an elevator may (unless otherwise expressly noted herein, and then if it is not promptly unloaded) be there delivered, and placed with other grain of the same kind, without respect to ownership, and if so delivered shall be subject to a lien for elevator charges in addition to all other charges hereunder. No carrier shall be liable for differences in weight or for shrinkage of any grain or seed carried in bulk.

5. Property not removed by the person or party entitled to receive it within twenty-four hours after its arrival at destination may be kept in the vessel, car, depot or place of delivery, of the carrier, at the sole risk of the owner of said property, or may be, at the option of the carrier, removed and otherwise

3119

stored at the owner's risk and cost, and there held subject to lien for all freight and other charges. The delivering carrier may make a reasonable charge per day for the detention of any vessel or car and for use of track after the car has been held forty-eight hours for unloading, and may add such charge to all other charges hereunder, and hold said property subject to a lien therefor. Property destined to or taken from a station or wharf at which there is no regularly appointed agent shall be entirely at risk of owner when unloaded from or loaded into a car or vessel; and when received from or delivered on private or other sidings or wharves shall be at owner's risk until the cars are attached to and after they are detached from trains, or until loaded into and after unloaded from vessel.

6. No carrier hereunder will carry or be liable in any way for any documents, specie, or for any article of extraordinary value not specifically rated in the published classification, unless a special agreement to do so and a stipulated value of the articles are endorsed hereon.

7. Every party, whether principal or agent, shipping inflammable, explosive or dangerous goods, without previous full written disclosure to the carrier of their nature, shall be liable for all loss or damage caused thereby, and such goods may be warehoused at owner's risk and expense or destroyed without compensation.

8. If the word "order" is written hereon immediately before or after the name of the party to whose order the property is consigned, without any condition or limitation other than the name of a party to be notified of the arrival of the property, the surrender of this bill of lading properly indorsed shall be required before the delivery of the property at destination. If any other than the aforesaid form of consignment is used herein, the said property may, at the option of the carrier, be delivered without requiring the production or surrender of this bill of lading.

9. Owner or consignee shall pay freight, and average, if any, and all other charges accruing on said property, before delivery and according to weights as ascertained by any carrier hereunder; and if upon inspection it is ascertained that the articles shipped are not those described in this bill of lading, the freight charges must be paid upon the articles actually shipped, and at the tariff rates and under the rules provided for by published classification.

10. This bill of lading is signed for the different carriers who may engage in the transportation, severally but not jointly, each of which is to be bound by and have the benefits of the provisions thereof; and in accepting this bill of lading, the shipper, owner and consignee of the goods and the holder of the bill of lading agree to be bound by all of its stipulations, exceptions and conditions, whether printed or written.

11. If all or any part of said property is carried by water, such water carriage shall be performed subject to statutory acts, and to all the conditions, whether printed or written, contained in this bill of lading, including the condition that no carrier by water shall be liable for any loss or damage resulting from explosion, accident to boilers or machinery, or from any latent defects in hull, machinery or appurtenances, existing before, at the time, or after shipment or sailing on the voyage, or unseaworthiness, provided the owners have exercised due dilligence to make the vessel seaworthy; nor shall negligence be presumed against any carrier.

The carrier shall have liberty to transfer, to tranship, to lighter, to call at any port or ports, to tow and be towed, to deviate, to assist vessels in distress, to navigate without pilots, and to load and discharge goods at any time.

If goods are landed by agreement between any of the parties hereto, and carrier at any other than the regular wharf, station or landing of the carrier, each separate package or article shall be at the risk of the owner immediately upon such discharge.

It is agreed that if any goods are sold short of ultimate destination, each carrier that has completed his part of the transportation shall have earned his agreed-upon proportion of the through freight, and the same with the charges advanced, shall be due and payable out of the proceeds thereof; and for any distance carried each carrier shall, on the same basis, have earned and be entitled to freight, with charges advanced for such part of the transportation as has been accomplished.

12. In case of quarantine, the goods may be discharged at risk and expense of owners into quarantine depot or elsewhere, as required by quarantine regulations or authorities, or for the carrier's dispatch, or at nearest available point in carrier's judgement, and in any such case carrier's responsibility shall cease when goods are so discharged, or goods may be returned by carriers at owner's risk and expense to shipping point, earning freight both ways. Quarantine expenses, of whatever nature or kind, upon or in respect to goods shall be borne by the owners of the goods or be a lien thereon. The carrier shall not be liable for loss or damage accasioned by fumigation or disinfection or other acts required by quarantine regulations or authorities, even though same may have been done by carrier's officers, crew, agents or employees, nor for detention, loss or damage of any kind occasioned by quarantine or the enforcement thereof.

13. Any alteration, addition or erasure in this bill of lading, which shall be made without the special notation hereon of the agent of the carrier issuing this bill of lading, shall be void.

N. B.—All claims for loss or damage to freight, or for overcharge under this Bill of Lading, will be promptly investigated upon application to E. Thomason, Auditor, Durham, N. C., with original Bill of Lading and freight bill attached.

Not Negotiable.

(22,026.)

An ordinance to create a Municipal Bridge and Terminals Commission and to make an appropriation to pay the expense and outlays which may thereby be incurred.

Be it Ordained by the Municipal Assembly of the City of St. Louis, as follows:

Section One. The Commission is hereby created to be known as the "Municipal Bridge and Terminals Commission." Said Commission shall consist of the Mayor of St. Louis, the President of the Board of Public Improvements and seven citizens, to be appointed by the Mayor of St. Louis; the President of the Board of Public Improvements and seven citizens to be appointed by the Mayor within ten days from the time this ordinance goes into effect and to be confirmed by the Council. Said citizens must be taxpayers and qualified voters of the City of St. Louis; they shall be selected with special reference to their knowledge of the subject referred to this Commission, and to their reputation for intelligence and impartiality, and one of their number must be appointed out of the membership of the Business Men's League, one out of the membership of the Merchants' Exchange of St. Louis and one out of the membership of the St. Louis Manufacturers' Association.

Seection Two. The duty of the said "Municipal Bridge and Terminals Commission" shall be: First—To investigate and determine the nature and extent of the hindrances to the commerce of St. Louis, whether as regards delay or inconvenience in the handling of freight, or disadvantageous charges or methods of shipping or billing of freight, or in any other regard. Second—After the Commission shall have determined what hindrances and disadvantages to St. Louis commerce do in fact exist, then the Commission shall further determine what must be done to correct said existing hindrances to the commerce of St. Louis. The Commission shall determine and announce what portion of the necessary remedial action shall be undertaken by the City of St. Louis as a municipality, and what portion by the citizens thereof or by associations

of citizens, to the end that all the people of St. Louis may know the facts as they exist, and being convinced as to the best way to remedy the situation may all unite their efforts to accomplish practical relief. Third—The Commission shall further prepare and cause to be introduced into the Municipal Assembly such ordinances as may be necessary to enable the City of St. Louis to do its part towards the correction of existing hindrances to the commerce of the city, as far as may seem to the Commission to be right and proper for the municipality to undertake, such as constructing, acquiring, operating or controlling bridges, trackage, transfer boats or other transportation facilities.

Section Three. The Mayor shall be Chairman of the Municipal Bridge Terminals Commission. The Commission may make all rules for its guidance and procedure within the limits of this ordinance; it may employ a secretary, and may engage such assistance and advice from the civil engineers or railway experts or may employ such counsel as it deems expedient. The Commission shall be the sole judge of the propriety of any expenditure within the limits of the appropriation made in section number six of this ordinannce, and the acounting and disbursing officers of the City of St. Louis shall honor the warrants of the Chairman and Secretary of the "Municipal Bridge and Terminals Commission" up to the amount of said appropriation.

Section Four. No member of the Commission shall be paid for his services, but he may be paid actual expense when traveling on the business of the Commission and by its order.

Section Five. The Commission shall complete its duties and report to the Municipal Assembly in as short a time as the circumstances will permit. If the Municipal Assembly should determine any time by joint and concurrent resolution that the Commission should be discontinued. the Commission shall thereafter make no further appropriation of money for any reason, but shall forthwith report and adjourn sine die.

Section Six. There is hereby appropriated out of the

municipal revenue of the City of St. Louis the sum of twenty-five thousand dollars for the expenses and outlays which may be required for the objects and purposes of this ordinance. Approved April 8, 1905.

St. Louis Bridge Company.

St. Louis and Illinois Bridge Company.

An Act

To Incorporate the St. Louis and Illinois Bridge Company. Approved February 5, 1864.

Be it enacted by the General Assembly of the State of Missouri, as follows:

Section 1. That Noman Cutter, Joseph Cabot, E. O. Stanard, Edward C. Pike, John H. Lightener, Hugh McKittrick, S. G. Read, Rufus Fitch, George D. Hall, John H. Beach, Chas. Miller, H. A. Doan, John H. Bowen, E. H. Sterling, James H. Wear, James R. Blackman, Clinton O. Dutcher, John H. Siegrist, Wm. D'Oench, C. Reuss, Robert Heinrichshoffen, Jacob Woodburn, Chas. F. Meyer, Robert H. Ober, Chauncey I. Filley, B. R. Bonner, Charles H. Howland, and E. H. E. Jameson, and their associates and their successors, are hereby constituted a body corporate and politic, by the name of the St. Louis and Illinois Bridge Company, for the purpose of constructing a bridge with all machinery, fixtures, toll-houses, and other buildings and erections necessary and proper for the passage of persons and property over the Mississippi River at the city of St. Louis; and the said company, by their corporate name shall have perpetual succession and shall be capable in law of purchasing, taking, holding, using, selling, pledging, conveying and disposing of real estate or other property, whether personal or mixed, so far as the same may be necessary for the purpose herein mentioned, may have a common seal; may sue and be sued, plead, and be impleaded, defend and be defended against, contract and be contracted with; may make such by-laws, rules and regulations, appoint such officers, agents, and servants, and generally do all such acts and things, not inconsistent with the laws and constitution of the State

of Missouri and of the United States, as may be requisite and proper for the due execution and management of the work to be done, and for conducting the business of said company.

Sec. 2. All powers of said corporation shall be exercised by a board of directors, and such officers and agents as they may elect and appoint. Said board shall consist of nine directors who shall be selected annually by a majority in interest of the stockholders present, and voting in person or by proxy, at such time and place as shall be prescribed by the by-laws, and who shall hold their offices until their successors are elected and qualified. Previous to such election the corporators herein named shall constitute the board of directors, five of whom shall constitute a quorum to do business. They may, at any time after the passage of this act, cause books to be open for subscriptions to the capital stock of said company, at such time and place and in such manner as may be by them prescribed.

Sec. 3. The capital stock of said company shall be one million dollars, which shall be divided into ten thousand shares of one hundred dollars each; and said capital stock may be increased to four million dollars. When three hundred thousand dollars shall be subscribed the corporators shall call a meeting of the stockholders, for the purpose of electing a board of directors, at such time and place as they may fix and appoint, of which election thirty days' notice shall be given in two daily newspapers published in the City of St. Louis.

Sec. 4. It shall be lawful for said corporation to borrow money at any rate of interest, and to mortgage the franchises and property; and to issue bonds secured by said mortgage, and to sell the same at any agreed rate of discount; and for railroad corporations, in their corporate capacity, to subscribe to the capital stock of said company.

Sec. 5 The said company shall have the same right to acquire title to lands necessary for the construction of said bridge, and for the approaches to it from public highways, and the same power to take material from lands in the neighborhood for the construction thereof,

and the proceedings therein shall be conducted in the same manner, as is provided in the "Act to Authorize the Formation of Railroad Associations and to Regulate the Same," approved December 13, 1855; and said company shall also have the right to protect the banks of the river above and below the bridge, so far as may be necessary to keep the channel within the opening of the bridge for the passage of vesssels, and for that purpose to acquire, condemn and take lands and material in the manner aforesaid.

Sec. 6. The said bridge shall be constructed of stone, iron, and wood, but mainly of iron and stone. The company shall have power to determine and may determine and decide, by a vote of the majority in interest of stockholders, what kind of a bridge shall be built, whether suspension, tubular, draw, or otherwise; but, whatever kind it may be, it shall be so constructed as not to obstruct or impede the navigation of the river. If a draw bridge shall be decided upon, it shall be built of sufficient capacity for a common wagon and a foot-passenger way, and may also be built of sufficient capacity for a railroad track or tracks for the passage of trains of freight and passengers, with spans not less than two hundred feet in length over the water, and shall have at least one draw, with two openings not less than one hundred feet in width each, for the passage of steamboats or other vessels. It shall be properly attended and managed, so as to afford safe and easy passage for all persons and property; and every railroad train drawn by steam power shall, on approaching said bridge, stop its speed and come to a standstill on the bank before entering upon the passage of the bridge. (Repealed.)

Sec. 7. When said bridge is completed, the said company shall be entitled to demand and receive tolls for crossing the same, and to fix rates of toll, of which a schedule shall be kept conspiculously posted at each end of the bridge; which rates, however, shall never exceed the following, to-wit: For each foot passenger over five years of age, 5 cents; for every person on horseback, 20 cents; for every gig, buggy, or other traveling carriage, drawn by one animal, 40 cents; for every cart, or wagon drawn

by one animal, 40 cents; for every cart or wagon drawn by two animals, 60 cents; for every cart or wagon drawn by three animals, 80 cents; for every cart or wagon drawn by four animals, 100 cents; for every cart or wagon drawn by more than four animals, 10 cents extra for each animal; for every pleasure carriage drawn by two animals, 60 cents; for every pleasure carriage drawn by three or four or more animals, 100 cents; for each head of cattle, horses, mules, or other animals, 10 cents; for each head of sheep or swine, 3 cents. And should said bridge be built with railroad tracks, the said company is hereby authorized to make such terms and rates with railroad companies, for the passage of trains of freight and passengers, as may be agreed upon between said St. Louis and Illinois Bridge Company and the said railroad companies; and in case of disagreement the amount of compensation to be paid for passage over said bridge as aforesaid shall be determined by five referees, two of them to be appointed by each of said corporations, and the fifth by the other four.

Sec. 8. For purposes of taxation, all property owned by this corporation shall be taken and deemed as personal property, in the shape of stock in the hands of the stockholders; and the same shall be assessed and taxed as stock only, and the stockholders shall be liable for the amount of their stock.

Sec. 9. All acts and parts of acts inconsistent with or repugnant to this act are hereby repealed.

Sec. 10. This act shall be taken as a public act, and shall be in force from and after its passage.

An Act

To Amend an Act Entitled "An Act to Incorporate the St. Louis and Illinois Bridge Company," Approved February 5, 1864.

Approved February 20, 1865.

Be it enacted by the General Assembly of the State of Missouri, as follows:

Sec. 1. The sixth section of said act is hereby repealed,

and the following inserted in lieu thereof: "Section 6. The said bridge shall be built of such materials and upon such plans as the board of directors shall decide to be most suitable for the uses required of it; and it shall be of sufficient capacity to accommodate all the different kinds of travel, both common road and railroad travel, as well as foot passengers, that may require to cross upon it; and it shall be sufficiently high to admit of steamboats, and all other river crafts passing under it at all ordinary stages of the river, when the chimneys, pipes, and other projections are lowered down; and the spans of the bridge between the piers and abutments shall be sufficiently wide to admit of all river crafts being easily navigated through them; the piers shall be so constructed as to obstruct the free flow of the current as little as possible; the approaches to said bridge may pass over all wharves, streets, and other public highways, and may occupy portions of the same in such manner as to obstruct the same as little as possible. The board of directors shall have power to appoint a bridge police, which shall have and exercise upon said bridge and its approaches the same powers as are exercised by the police of the City of St. Louis."

Sec. 2. That the following words are and they are hereby added to the fourth section of said act, viz: "And the City of St. Louis may subscribe for any amount of said stock, not to exceed one million of dollars, and the County of St. Louis may subscribe to any amount of said stock, not to exceed half a million dollars and they may borrow money for that purpose, and may issue bonds for the payment of the same, which bonds shall be made payable twenty years after date, and shall bear interest at a rate not greater than seven per cent per annum."

Sec. 3. Section first of said act is amended as follows: "Strike out the names of Charles Miller, E. G. Sterling, James H. Wear, S. G. Read and John H. Siegrist, and insert in the lieu thereof Truman J. Homer, Carlos S. Greely, J. D. Barlow, E. W. Fox and John M. Krum."

Sec. 4. All acts or parts of acts inconsistent with this act are hereby repealed. This act is to take effect and be in force from and after its passage.

An Act

To Empower the Persons Mentioned in An Act of Incorporation Passed by the General Assembly of the State of Missouri, Entitled "An Act to Incorporate the St. Louis and Illinois Bridge Company;" Approved February 5, 1864; to Form a Corporation and Build a Bridge Across the Mississippi River at St. Louis.

Approved February 16, 1865.

Be it enacted by the people of the State of Illinois, represented in the General Assembly:

Sec. 1. That the persons named in the act of incorporation granted by the general assembly of the State of Missouri, entitled, "An act to incorporate the St. Louis and Illinois Bridge Company," approved February 5, 1864, shall have the right to organize and form a corporation in accordance with said act, to construct, maintain and use a bridge for railroad and other purposes, over that portion of the Mississippi River at the City of St. Louis within the jurisdiction of the State of Illinois, subject to the conditions, terms and modifications herein set forth; provided, that said bridge shall not be located more than one hundred feet north or south of the dyke or causeway upon which the ordinary travel is now conducted, and which connects Bloody Island, opposite the City of St. Louis aforesaid, with the main Illinois shore.

Sec. 2. Whenever three hundred thousand dollars shall be subscribed the said persons named in the first section of said act passed by the General Assembly of the State of Missouri, or any five of them, shall call a meeting of the stockholders; and a majority in interest of said stockholders, in accordance with said act, shall elect nine directors, who shall fix and determine the location of said bridge; and thirty days' notice shall be given of the time and place of such election in two daily papers published in said City of St. Louis, and in one daily or weekly newspaper published respectively in the counties of St. Clair and Madison, in the State of Illinois.

Sec. 3. Should said bridge be built with railroad tracks, the said company shall suffer and permit the railroad companies whose termini are now on Bloody Island, opposite the City of St. Louis aforesaid, or which may thereafter terminate there, to cross upon said bridge with their cars, locomotives and trains, upon such terms and rates as may be agreed upon between the St. Louis and Illinois Bridge Company and the said railroad companies; and in case of disagreement as to the amount of compensation to be paid for passage as aforesaid, the same shall be determined by five referees, two of whom shall be appointed by each of said corporations, and the fifth shall be appointed by the four referees; and in case said companies cannot agree as to said referees, or if either party shall fail or refuse to make such appointment, either party may apply to the judge of the St. Clair County Circuit Court, upon giving to the opposite party ten days' notice in writing of such intended application, for the appointment of five referees to fix said compensation, and he shall have full powers to make such appointment for the party refusing to appoint referees as hereinbefore provided; and the said referees so appointed shall have power to fix and determine said compensation, and shall furnish a copy of their award to each of the parties; and either party may appeal from such decision to the St. Clair County Circuit Court of the State of Illinois, according to the laws regulating appeals from justices of the peace, and may also appeal to the Supreme Court, under the laws of the State of Illinois, provided, that any such appeal shall not effect the right of any railroad company to pass over said bridge during the pendency of such appeal, if the compensation fixed by said referees shall be duly tendered; and provided further, (that) in case said St. Louis and Illinois Bridge Company hinder or prevent any such railroad company from the use of said bridge upon tender of the compensation fixed as aforesaid, the said St. Louis and Illinois Bridge Company shall forfeit all rights and privileges under this charter.

Sec. 4. And be it further enacted, that any railroad company whose terminus is now on Bloody Island aforesaid shall have power of becoming incorporated in said

bridge company, and to take and subscribe, or acquire by subsequent purchase, stock not to exceed one-sixth part of the capital stock of said Bridge Company which may be created from time to time, either by subscription or purchase; whenever such railroad company shall, by an order of its board of directors, make an order to that effect, and subscribe and secure to be paid the amount necessary, it shall be deemed in law an incorporator in said company hereby chartered to such an extent, and shall have and enjoy all the rights belonging or appertaining thereto.

Sec. 5. The said company shall have power to acquire title to all lands necessary for the construction of said bridge, and for the approaches thereto from railroad and highways, and the said company shall also have the right to protect the banks of the river above and below the bridge, so far as may be necessary to keep the channel within the opening of the bridge.

Sec. 6. The said company shall power to condemn, under the laws of the State of Illinois, all such lands and other property as may be necessary for the construction of said bridge and the approaches thereto from railroads and other public highways, and also all such lands and property as may be necessary and proper to protect the banks of said river above and below said bridge; provided always, that no lands shall be condemned for bridge purposes or other purposes, before mentioned, which have already been condemned or acquired for the use of any railroad terminating on Bloody Island aforesaid.

Sec. 7. Said corporation may borrow money at any rate of interest, and may mortgage their franchises and property and issue bonds secured by said mortgage, and sell the same at any agreed rate of discount.

Sec. 8. The said company shall not make any discrimination or exercise any partiality in fixing the rates for carrying persons or freight or trains over said bridge, but the same shall be just, equal and uniform as to all persons and corporations; and in case of violations of this section the person or corporation aggrieved shall have the right to recover from the company three times the amount so im-

properly charged, before a justice of the peace where the amount is under one hundred dollars, and in circuit court when the amount is over that sum.

Sec. 9. The stock of this company shall be deemed as personal property, and the stockholders shall only be liable to the creditors of said company to an amount equal to the amount of stock held by them respectively.

Sec. 10. This act shall be deemed and taken as a public act, and be in force from and after its passage.

Extract from the Congressional Act

To Authorize the Construction of Certain Bridges, and to Establish Them as Post Roads.

Approved July 25, 1866.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

* * * * * *

Sec. 2. And be it further enacted, That any bridge built under the provisions of this act may, at the option of the company building the same, be built as a draw-bridge, with a pivot or other form of draw, or with unbroken or continuous spans; provided, that if the said bridge shall be made with unbroken or continuous spans, it shall not be of less elevation in any case than fifty feet above extreme high water mark, as understood at the point of location, to the bottom cord of the bridge, nor shall the spans of said bridge be less than two hundred and fifty feet in length, and the piers of said bridge shall be parallel with the current of the river, and the main span shall be over the main channel of the river, and not less than three hundred feet in length; and provided also, that if any bridge built under this act shall be constructed as a draw-bridge, the same shall be coustructed as a pivot draw-bridge, with a draw over the main channel of the river at an accessible and navigable point, and the span of not less than one hundred and sixty feet in length in the clear on each side of the central or pivot pier of the draw, and the next adjoining spans to

the draw shall not be less than two hundred and fifty feet; and said spans shall not be less than thirty feet above low-water mark, and not less than ten above extreme high-water mark, measuring to the bottom of the bridge, and piers of said bridge shall be parallel with the current of the river; and provided also, that said draw shall be opened promptly upon reasonable signal for the passage of boats whose construction shall not be such as to permit of their passage under the permanent spans of said bridge, except when trains are passing over the same; but in no case shall unnecessary delay occur in opening the said draws during or after the passage of trains.

Sec. 3. And be it further enacted, That any bridge constructed under this act and according to its limitations, shall be a lawful structure, and shall be recognized and known as a post route, upon which also no higher charge shall be made for the tramsmission over the same of the mails, the troops, and the munitions of war of the United States than the rate per mile paid for their transportation over the railroad or public highways leading to the bridge.

* * * * * * * *

Sec. 10. And be it further enacted, That any company authorized by the Legislature of Missouri may construct a bridge across the Missouri River at the City of Kansas upon the same terms and conditions provided for in this act.

Sec. 11. And be it further enacted, That the "St. Louis and Illinois Bridge Company," a corporation organized under an act of the general assembly of the State of Missouri, approved February fifth, eighteen hundred and sixty-four, and an act amendatory of the same, approved February twentieth, eighteen hundred and sixty-five, and also confirmed in its corporate powers under an act of the legislature of the State of Illinois, approved February sixteenth, eighteen hundred and sixty-five, or any other bridge company organized under the laws of Missouri and Illinois, be and the same is hereby empowered to erect, maintain, and operate a bridge across the Mississippi River, between the city of St. Louis in the State of Missouri, and the city of East St. Louis, in the State of Illinois, subject to all the

conditions contained in said act of incorporation and amendments thereto, and not inconsistent with the following terms and provisions contained in this act; and in case of any litigation arising from any obstruction or alleged obstruction to the free navigation of said waters, the cause may be tried before the district court of the United States of any state in which any portion of said obstruction or bridge touches.

Sec. 12. And be it further enacted, That the bridge authorized by the preceding section to be built shall not be a suspension bridge or draw-bridge, with pivot or other form of draw, but shall be constructed with continuous or unbroken spans, and subject to these conditions: First, that the lowest part of the bridge or bottom cord shall not be less than fifty feet above the city directrix at its greatest span; second, that it shall have at least one span five hundred feet in the clear, or two spans of three hundred and fifty feet in the clear of abutments. If the two latter spans be used, the one over the main steamboat channel shall be fifty feet above the city directrix, measured to the lowest part of the bridge at the center of the span; third, no span over the water at low-water mark shall be less than two hundred feet in the clear of abutments.

* * * * * * *

Illinois and St. Louis Bridge Company (No. 1)

An Act

To Incorporate the Illinois and St. Louis Bridge Company
Approved February 21, 1867.

Be it enacted by the people of the State of Illinois represented in the general assembly:

Sec. 1. That Joseph Gillespie, John M. Palmer, Jesse K. Dubois, William Shephard, John Williams, William R. Morrison, L. A. Parks, Levi Davis, T. B. Blackstone, H. C. Moore, Peter H. Willard, R. P. Tansey, Gustavus A. Koerner, C. P. Heaton, L. B. Boomer, Fred. T. Krafft, L. B. Parsons, John Baker, A. H. Lee, and their associates, successors, and assigns be and are hereby created a body corporate and politic, under the name and style of the Illinois

and St. Louis Bridge Company, for the purpose of constructing and maintaining a toll-bridge, from any point or place on the Mississippi river opposite to the city of St. Louis, to the western line of the state, with suitable approaches to such bridge, and all convenient appendages and structures for the same.

The said company shall have power to make and use a common seal, and the same to alter or renew at pleasure, and such other powers, rights, privileges and immunities as may be necessary or useful for the purpose of this act; provided, that there shall be at least fifty thousand dollars expended during the year 1867 in the construction of said bridge.

Sec. 2. The capital stock of said company shall be one million dollars, and be divided into shares of one hundred dollars each; and may be decreased from time to time, as a majority of the stockholders may direct, and shall be issued and transferred in such manner, and under such conditions as the directors of said company shall, by the by-laws thereof, prescribe.

Sec. 3. The corporate powers of said company shall be vested in and exercised by a board of directors, consisting of such number of persons, not less than three nor more than thirteen, as the stockholders of said company may from time to time direct. The said directors shall be chosen by the stockholders at such time and place as may be fixed by the by-laws of said company, and shall hold their offices for one year, and until their successors are elected and qualified. They shall elect one of their number president of the said company, and may fill any vacancy in the said board, occasioned by death, resignation, or otherwise, for the unexpired portion of the term of office so becoming vacant, and may make such rules, by-laws and regulations, and appoint such officers and servants, as they may from time to time deem expedient; provided, that at least one-half of the directors shall be residents of the state of Illinois.

Sec. 4. The persons named in the first section of this act are hereby appointed commissioners, who, or a majority of them, are authorized to open, or cause to be opened, sub-

scription books for the stock of said company, at such time and place within or without this state as they may think proper; and when three hundred thousand dollars shall be subscribed, the said commissioners, or any three of them, may call a meeting of the stockholders, by giving ten days' notice in some newspaper published in St. Louis, or personal notice to each of the stockholders, of the time and place of such meeting; and at the same meeting he stockholders may elect directors and transact other business; stockholders' meetings may be held without as well as within the state.

Sec. 5. The said corporation may transport on said bridge and approaches thereto persons and property by steam or otherwise, and may allow others so to do; and said bridge and approaches may be used for every description of travel, passage, and transportation, under such rules and regulations, and for such tolls as the directors of the said corporation may prescribe. The said corporation may take, receive, and collect such tolls for travel, passage, or transportation over said bridge and approaches, or either of them, or any part of either of them, as its directors may from time to time fix and establish; provided, the rates charged for ordinary travel shall never exceed the following, to-wit: for each foot passenger over five years of age, five cents; for every person on horseback, twenty cents; for every gig, buggy, or other traveling carriage, drawn by one animal, forty cents; for every cart or wagon drawn by one animal, forty cents; for every cart or wagon drawn by two animals, sixty cents; for every cart or wagon drawn by three animals, eighty cents; for every cart or wagon drawn by four animals, one hundred cents; for every cart or wagon drawn by more than four animals, ten cents extra for each animal; for every hundred pounds of freight over two thousand pounds, five cents; for every pleasure carriage drawn by two animals, sixty cents; for every pleasure carriage drawn by three or four or more animals, one hundred cents; for each head of cattle, horses, mules, or other animals, ten cents; for each head of sheep or swine, five cents.

Sec. 6. The said corporation shall have power to acquire title to lands necessary for the construction of said bridge and approaches, and the same power to take materi-

als from lands in the vicinity for the construction and maintenance thereof; and for such purposes shall have and may exercise all the powers conferred by any of the laws of this state for acquiring right of way for railroads, public roads, or other public uses, under which the said corporation may take and acquire property, heretofore taken or acquired for such uses, as well as other property.

The said corporation shall have the exclusive right for twenty-five years of constructing a bridge, opposite to the said City of St. Louis (in the county of St. Clair) over so much of said river as is within the jurisdiction of this state, and shall also have the right to protect the banks of the same so far as may be necessary to keep the channel within the opening of the bridge, and for that purpose may take and acquire lands and materials in the manner aforesaid; provided, if the bridge herein authorized is not commenced in two years, and completed in five years, this act shall be null and void.

Sec. 7. Any railroad company, town, city or county, shall have power to take and subscribe for and to purchase and hold stock of said company, and may make such contracts and execute such securities or other instruments as said railroad companies, towns, cities, or counties may deem expedient relative to such subscription or purchase, or to the construction or uses of said bridge.

Sec. 8. The said corporation may consolidate its property and franchises with the property and franchises of any bridge company authorized by the laws of Missouri to construct a bridge, so as to connect with the one herein authorized, and for that purpose the said corporation may make and execute all such agreements as it may deem expedient; and after such consolidation the corporation created thereby shall have all the powers herein granted.

Sec. 9. The said corporation may borrow money at any rate of interest, and issue its bonds or other evidences of its indebtedness bearing such rate of interest, and payable at such time or times, and at such place or places, as its directors may think proper; and may secure such bonds or other indebtedness by mortgage or deed of trust of the property,

tools, and franchises in such manner as said directors may think fit, and may sell such bonds or other evidences of indebtedness at any rate of discount agreed upon by said directors.

Sec. 10. This act shall be deemed a public one, and shall take effect from and after its passage.

Illinois and St. Louis Bridge Company (No. 2).

An Act.

To authorize the consolidation of the St. Louis and Illinois Bridge Company with the Illinois and St. Louis Bridge Company.

Approved March 19, 1868.

Whereas, The stockholders of the St. Louis and Illinois Bridge Company, a corporation organized under an act of the general assembly of the state of Missouri, entitled "An Act to Incorporate the St. Louis and Illinois Bridge Company," approved February 5, 1864, and an act amendatory thereto entitled, "An Act to Amend an Act Entitled, 'An Act to Incorporate the St. Louis and Illinois Bridge Company,'" approved February 5, 1864, which last act was approved February 20, 1865, and the stockholders of the Illinois and St. Louis Bridge Company, a corporation organized under an act of the general assembly of the state of Illinois, entitled, "An Act to Incorporate the Illinois and St. Louis Bridge Company," approved February 21, 1867, have agreed to consolidate and amalgamate the said corporations; therefore,

Be it enacted by the general assembly of the state of Missouri, as follows:

Section 1. The said St. Louis and Illinois Bridge Company is hereby authorized to form such consolidation with the said Illinois and St. Louis Bridge Company in such manner and upon such terms as the said St. Louis and Illinois Bridge Company shall deem proper; and, when so consolidated, to take the corporate name of and be known as the Illinois and St. Louis Bridge Company.

Sec. 2. When said consolidation shall be effected the said consolidated company shall thereby and thenceforth be clothed with all the powers and privileges granted to the said St. Louis and Illinois Bridge Company by the acts before mentioned.

Sec. 3. When said consolidation shall be effected, the secretary of the said consolidated company shall file in the office of the recorder of deeds of the county of St. Louis, a certificate that the said companies have effected the consolidation authorized by the act, which certificate, or record thereof, shall be taken in all courts as conclusive proof of such consolidation.

Sec. 4. This act shall take effect from and after its passage.

Certificate of Consolidation.

(Missouri.)

St. Louis, March 9, 1869.

Whereas, It was provided in the act of the general assembly of the state of Missouri, approved March 19, 1868, entitled, "An Act to Authorize the Consolidation of the St. Louis and Illinois Bridge Company, with the Illinois and St. Louis Bridge Company," that when such consolidation was effected the secretary of the consolidated company should file in the office of the recorder of deeds for the county of St. Louis, a certificate of such consolidation; And, whereas, the said corporation did, on the 9th day of July, eighteen hundred and sixty-eight, effect the consolidation authorized by said act; now, therefore, I, John A. Dillon, secretary of said consolidated company, do hereby certify that the aforesaid companies had, on the day before mentioned, effected the consolidation of said companies authorized by the act aforesaid, and said consolidated company did take the name of the "Illinois and St. Louis Bridge Company."

In witness whereof, I have hereunto subscribed my name as such secretary, and affixed the seal of said company, this 9th day of March, 1869.

(Seal.) John A. Dillon, Secretary.

State of Missouri, County of St. Louis, ss.

Be it remembered, That on this 11th day of March, eighteen hundred and sixty-nine, before me, the undersigned, a notary public within and for the county of St. Louis aforesaid, came John A. Dillon, who is personally known to me to be the same person whose name is subscribed to the foregoing instrument of writing as secretary of the Illinois and St. Louis Bridge Company, and he then and there acknowledged the same to be his act and deed as secretary, as aforesaid, and the act and deed of said bridge company, by him as their secretary, for the purposes therein mentioned.

In testimony whereof, I have hereunto set my official signature, and affixed my notarial seal, at office in St. Louis, county and state aforesaid, this day and year last above written.

(Seal.) S. V. Papin,
Notary Public in and for St. Louis County, Mo.

Filed and recorded March 11, 1869.

Julius Conrad, Recorder.

State of Missouri, County of St. Louis, ss.

I, the undersigned, recorder of said county, certify the foregoing to be a true and complete copy of an instrument of writing of consolidation of the Illinois and St. Louis Bridge Company, and of the certificate of acknowledgment, and of the date of filing thereof, as fully as the same remains of record in my office, in book 381, page 80.

Witness my hand and official seal, this 13th day of March, 1869.

(Seal.) Julius Conrad, Recorder.

An Act.

Amendatory of an Act approved July 25, 1866, entitled, "An Act to Authorize the Construction of Certain Bridges and to Establish them as Post-Roads."

Approved July 20, 1868.

Whereas, The St. Louis and Illinois Bridge Company, organized under the laws of the state of Missouri, and the Illinois and St. Louis Bridge Company, organized under an

act of the general assembly of the state of Illinois, have been consolidated in pursuance of the authority granted to said Illinois and St. Louis Bridge Company, in their act of incorporation, and by authority granted to the St. Louis and Illinois Bridge Company by an act of the general assembly of the state of Missouri, approved March 19, 1868; Therefore,

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled:

Section 1. That the company formed by this consolidation, under the name and style of the Illinois and St. Louis Bridge Company, is hereby recognized and declared to be a corporation by that name, with full power and authority to construct a bridge across the Mississippi river opposite the city of St. Louis, in conformity to the act of which this act is amendatory, with all the rights, privileges, and powers granted and conferred by the several acts of the general assembly of the states of Missouri and Illinois to the respective companies, by the consolidation of which the said Illinois and St. Louis Bridge Company was formed, not inconsistent with the provisions of the act to which this act is amendatory; And provided further, that in constructing said bridge there shall be one span of at least five hundred feet clear between the piers.

Sec. 2. And be it further enacted, That the said corporation may execute a mortgage and issue bonds, payable principal and interest, in gold; and their bridge across the Mississippi river, and approaches thereto, when constructed, shall be a post-road to carry the mails of the United States, and enjoy the rights and privileges of other post-roads.

Sec. 3. And be it further enacted, That said corporations may hold their meetings in either the state of Illinois or the state of Missouri, as the board of directors may elect; and the directors may be citizens of any of the United States; and the said corporation may sue and be sued in any circuit court of the United States; Provided, that nothing in this act, or in any other previous legislation affecting the premises, shall be so construed as to deprive the legislatures of the states of Illinois and Missouri of the right to regulate

the tolls and fares which may be charged by said company for the use of said bridge; Provided, further, that the tolls now fixed by the legislatures of Illinois and Missouri shall not be increased.

Tunnel Railroad of St. Louis.
St. Louis Tunnel Railroad Company.
Articles of Association.

We, the undersigned, intending hereby to form a company for the purpose of constructing, maintaining, and operating a railroad for public use in the conveyance of persons and property, in pursuance of the laws of the state of Missouri, do for that purpose make and sign these present articles of association; and we do hereby state that the name of said company shall be the St. Louis Tunnel Railroad Company; that the number of years said company is to continue shall be five hundred years; that the places from and to which said road is to be constructed, maintained and operated are as follows: From the terminus of the bridge of the Illinois and St. Louis Bridge Company, at or near Third street, in the city of St. Louis, to a place between Poplar street and Cerre street; and between Eighth street and Tayon avenue, in the city of St. Louis, so as to make suitable connection with the track of the Missouri Pacific Railroad and the track of any other railroad and for the necessary side-tracks in said city; that the length of said road, as near as may be, is to be two miles, and the name of the only county in the state of Missouri through or into which said road is made or intended to be made is the county of St. Louis; that the amount of capital stock of said company is to be one hundred thousand dollars, and the number of shares of which said capital stock shall consist is to be one thousand, and that the names and places of residence of the directors of said company, five in number who shall manage its affairs for the first year and ,until others are chosen in their places, are: Gerard B. Allen, William Taussig, James H. Britton, John R. Lionberger, Carlos S. Greeley, all residing in said city of St. Louis.

In witness whereof, each of us have subscribed to these articles of association his name, place of residence and the

number of shares of stock he agrees to take in said company, the thirtieth day of October, one thousand eight hundred and seventy-two.

Be it remembered that on the day of the date hereof personally appeared before me, a notary public, in and for the county aforesaid, Gerard B. Allen, William Taussig, James H. Britton, John Jackson, Carlos S. Greeley, Barton Bates, John R. Lionberger, Julius S. Walsh, James B. Eads, George C. Fabian, all and each of who are personally known to me to be the same persons whose names are signed to the foregoing articles of association as parties thereto, and they severally acknowledged that their names so signed to said articles are their true and genuine signatures and that the same is the act of each of them for the purpose in the said articles of association expressed.

In witness whereof, I have hereto set my hand and affixed my official seal, this thirty-first day of October, in the year eighteen hundred and seventy-two.

(Seal.) James M. Carpenter,
Notary Public, St. Louis County, Missouri.

State of Missouri, County of St. Louis, ss.

James H. Britton, William Taussig and John R. Lionberger, being duly sworn, depose and say, and each for himself, says, that these deponents are three of the directors of the St. Louis Tunnel Railroad Company named in the foregoing articles of association; that upwards of one thousand

dollars of stock for every mile of railroad proposed to be made pursuant to said articles of association is in good faith subscribed to said articles of association, and that one thousand dollars, being five per cent, is paid thereon, in good faith, and in cash to the directors named in said articles of association; and that it is intended in good faith to construct, maintain and operate the road mentioned in said articles of association.

James H. Britton,
William Taussig,
John R. Lionberger.

Subscribed and sworn to before me this second day of November, A. D. 1872.

Notary Public, St. Louis County, Missouri.

Filed November 8, 1872.

Eugene F. Weigel,
Secretary of State.

An Ordinance

Granting Permission to the St. Louis and Illinois Bridge Company to use a Portion of the Wharf and Portions of Certain Streets and Alleys.

No. 6442—Approved March 14, 1868.

Whereas, The directors of the St. Louis and Illinois Bridge Company have filed with the city register a duly authenticated copy of their proceedings, showing that they are about to commence the construction of a bridge over the Mississippi river at St. Louis, in pursuance of the charters incorporating said company; and, whereas, the said directors have also filed with the city register a duly authenticated statement of the chief engineer of said company, showing the location or site of the said bridge and the approaches thereto; and, whereas, the said Bridge Company contemplate the construction of a tunnel from a point between Second and Third streets, running westward under streets and alleys for a convenient railroad approach to said bridge; and, whereas, it is represented by said bridge company, that while said bridge and the approaches thereto are in course

of construction it will be necessary to use and occupy portions of the wharf and portions of certain streets and alleys, and also to build over certain streets and alleys; therefore, Be it ordained by the city council of the city of St. Louis, as follows:

Section 1. That permission and consent of the city of St. Louis is hereby granted to the St. Louis and Illinois Bridge Company to use and occupy for the construction of the western abuttment pier of the bridge which said company is about to build over the Mississippi river at St. Louis, so much and such portions of the wharf fronting on said river between Washington avenue and Green street as may be necessary for the convenient and safe handling of machinery, material, and working of mechanics and laborers in the construction and erection of a suitable and permanent pier for said bridge; provided, however, that the St. Louis and Illinois Bridge Company leave at all times at least one space twenty-six feet wide on the wharf between Washington avenue and Green street free from obstruction for the accommodation of traffic.

Sec. 2. That permission and consent of the city of St. Louis is also granted to said Bridge Company to construct and build said bridge from said western abuttment pier in a westward direction over the streets and alleys to Third street, and to use temporarily while constructing said bridge such parts and portions of the streets and alleys, along the line of said bridge, as may be necessary for the convenient and safe handling of material and the working of machinery, and of mechanics and laborers, employed by said company while constructing said bridge and the approaches thereto; provided, that no more of the wharf, streets and alleys, or the use thereof is by this ordinance granted, or intended to be granted, to said St. Louis and Illinois Bridge Company than is necessary to enable said company conveniently and safely to construct said bridge and the proper appurtenances thereto, and that said St. Louis and Illinois Bridge Company never, at the same time, occupy more than one street and alley between the wharf and Third street for the above specified purposes.

Sec. 3. That permission and consent is also granted to said Bridge Company to construct a tunnel by open or subterranean excavation for a railroad approach to said bridge from a point between Second and Third streets, in a westward direction under the streets and alleys to its western terminus; provided, that said company, before commencing the construction of said tunnel, shall file with the city engineer a duly authenticated copy of the survey or plan of said tunnel, showing its course, size, and western terminus; and that where the tunnel emerges into the open street as at its western terminus on Eleventh street, between Clark avenue and Pacific Railroad track, whereby part of the street is occupied by the double track or by enclosure of the tunnel mouth, said St. Louis and Illinois Bridge Company must acquire, for street purposes, so much additional ground alongside said Eleventh street, between Clark avenue and Pacific Railroad track, as to leave the original width of said Eleventh street between above mentioned limits unimpaired.

Sec. 4. If, in the course of the construction of said tunnel, it shall be necessary to make an open cut in any street or alley, or cut under or through any main or district sewer, or water pipe, or gas pipe, it shall be the duty of said Bridge Company, before making any such cut, and before severing any sewers or water pipe, or gas pipe, to notify the mayor and city engineer, and to reconstruct and rebuild such street, alley, sewer or water pipe, or gas pipe, in such manner as the mayor and city engineer may direct, and under the supervision of the city engineer without prejudice to the convenience of the public, and all at the proper cost and expense of said Bridge Company.

Sec. 5. No privilege conferred by this ordinance to St. Louis and Illinois Bridge Company shall be so construed as to be supposed to be granted hereby to said company permanent or temporary use of private property for the purpose above specified, unless such privilege is acquired by said Bridge Company from the respective owners of such property.

Sec. 6. This ordinance to take effect as soon after its passage as the St. Louis and Illinois Bridge Company shall have filed with the city register their bond, of two hundred

thousand dollars, for the purpose of securing the city against any damages that might be caused by the construction of said bridge, tunnel, and approaches, or by the use of the same for railroad purposes wherefor the city might be made liable.

AN ORDINANCE

Amendatory of Ordinance No. 6442, entitled, "An Ordinance Granting Permission to the St. Louis and Illinois Bridge Company to use a Portion of the Wharf, and Portions of Certain Streets and Alleys."

No. 8088—Approved July 11, 1872.

Be it ordained by the city council of the city of St. Louis:

Section 1: The third section of the ordinance entitled: "An ordinance granting permission to the St. Louis and Illinois Bridge Company to use a portion of the wharf, and portions of certain streets and alleys," approved March 14, 1868, is hereby amended by adding thereto the following words: The western terminus of said tunnel may be located at any point south of Clark avenue and between the east line of Eighth street and the west line of Twelfth street; provided, that the width of street, part of which may be occupied by the double track or inclosure of the tunnel mouth, shall not be diminished by such tracks and tunnel mouth to less than a width of sixty feet on one side thereof, or of thirty feet on each side thereof; and the said bridge company shall, at its own expense, pay for so much additional land as may be necessary to maintain the said width of street of sixty feet on one side of the tunnel mouth or open cut, or thirty feet on each side thereof.

Sec. 2. The tunnel may be made by causing the excavation to be made without disturbing the surface of the highways, or it may be made by making an open cut constructing the arched way, and then covering the same in such manner as to leave the streets in the same and as good conditions as they were before the work was commenced, except where ventilating shafts are made, four feet wide and ten feet long between cross streets, as provided for in section third of this ordinance, and excepting one hundred

feet of the distance at the western outcome of the tunnel, where the roadway may be made in an open cut which shall be protected by good and sufficient barricades of stone and iron to prevent injury to persons and property.

Sec. 3. The said Illinois and St. Louis Bridge Company is hereby authorized to make openings for lighting and ventilating said tunnel in the streets traversed by the same, of not more than four feet in width, and ten feet long, at points on the line of said tunnel not nearer than three hundred feet from each other; but such openings shall not be located at the crossing of any street, or so as to impede the travel on or use of such streets, and shall be enclosed by a substantial iron railing not less than four and one-half feet high, each to be surmounted by a gas lamp so constructed as to reflect its light downward. The city reserves the right to order the closing of the openings authorized by this section, whenever the same prove to be injurious and obnoxious to the owners and residents of property on said proposed line of the tunnel.

Sec. 4. Nothing in this ordinance shall be so construed as to relieve the said company from any provisions and restrictions provided in ordinance No. 6442, to which this ordinance is amendatory.

Sec. 5. Any violation of this ordinance or the ordinance to which this is amendatory, shall subject the said Bridge Company to a fine of not less than one hundred dollars, nor more than five hundred dollars.

Sec. 6. This ordinance to take effect so soon after its passage as the St. Louis and Illinois Bridge Company shall have filed with the city register their bond of two hundred thousand dollars for the purpose of securing the city against any damage that might be caused by the construction of said bridge, tunnel and approaches, or by the use of the same for railroad purposes wherefor the city might be made liable.

AN ORDINANCE

To Transfer the Powers, Rights and Privileges Granted by the City of St. Louis, by Ordinance No. Sixty-Four

Hundred and Forty-Two, entitled, "An Ordinance Granting Permission to the St. Louis and Illinois Bridge Company to Use a Portion of the Wharf, and Portions of Certain Streets and Alleys," and by Ordinance No. Eight Thousand and Eighty-Eight, Amendatory thereof, to and Confer Upon the St. Louis Tunnel Railroad Company, to and Over Such Parts of the City Mentioned therein as Lie West of the East Line of Third Street.

No. 8101—Approved November 29, 1872.

Whereas, The Illinois and St. Louis Bridge Company have requested the city of St. Louis to transfer to and confer upon the St. Louis Tunnel Railroad Company, all the rights, powers and privileges over such portions of the streets and alleys mentioned in said ordinances as lie west of the east line of Third street, which were conferred on the St. Louis and Illinois Bridge Company, or the consolidated company of the Illinois and St. Louis Bridge Company, by the said ordinances, subject to all the obligations and restrictions imposed upon or assumed by said St. Louis and Illinois Bridge Company, or the Illinois and St. Louis Bridge Company; now, therefore,

Be it ordained by the city council of the city of St. Louis, as follows:

Section 1. All the rights, powers and privileges conferred by said ordinance of the city of St. Louis, numbered sixty-four hundred and forty-two, and by said ordinance numbered eight thousand and eighty-eight, amendatory thereof, upon the St. Louis and Illinois Bridge Company, or upon the said Illinois and St. Louis Bridge Company, over such portions of the streets and alleys embraced in said ordinances as lie west of the east line of Third Street, in said city, are hereby transferred to, conferred upon, and vested in the said St. Louis Tunnel Railroad Company as fully and completely as originally conferred upon and granted to said bridge companies; the said St. Louis Tunnel Railroad Company, however, assuming all the obligations of the said bridge companies with and to said city, and being subject to all the conditions and restrictions imposed upon said bridge companies, or either of them, by said ordinances, as far as that portion of said city mentioned in

said ordinances lying west of the east line of Third street is concerned.

Sec. 2. The bond required to be filed by the sixth section of said ordinance numbered eight thousand and eighty-eight, shall be executed jointly by the said St. Louis Tunnel Company and the said Illinois and St. Louis Bridge Company, to the city of St. Louis.

Sec. 3. The said Tunnel Railroad Company is hereby authorized to construct its open cut, from the mouth of the tunnel at Clark Avenue, to where it enters the middle of block No. four hundred and twenty-four, provided that said open cut shall be enclosed by an iron picket fence, at least five feet high, so constructed as to screen passing locomotives from view from the street, and that where it intersects Spruce street said Spruce street shall have a substantial bridge constructed over it on such grade as the city engineer may direct; provided, further, that if at any time the city may deem it necessary to widen that portion of Eighth street lying east of the said open cut, to a width of sixty feet, that the additional ground necessary for said widening in blocks four hundred and seventeen, and one hundred and eighty-seven, shall be acquired at the expense of said Tunnel Railroad Company.

Decree of Sale (Missouri)

October 17, 1878.

United States of America, Eastern District of Missouri, sct.
In the Circuit Court of the United States, in and for said District.

Be it remembered, That on the 17th day of October, A. D. 1878, at a regular stated term of the Circuit Court of the United States in and for the eastern district of Missourt, begun and held at the city of St. Louis, in said district on Monday the 16th day of September, in said last named year the following among other proceedings were had and appear of record, to-wit:

John Pierpont Morgan, et al.
vs.
The Illinois & St. Louis Bridge Co., et al. } 551.

Cross-bill brought by John A. Stewart and Solon

Humphreys, trustees of the first mortgage against the Illinois and St. Louis Bridge Company and others, and

Cross-bill brought by Solon Humphreys and John A. Stewart, trustees of the second mortgage, against the Illinois and St. Louis Bridge Company and others..

The said original bill and the said cross-bill coming on to be heard upon the original bill, the several cross-bills and the respective answers thereto, and the proofs therein, and the several parties to the same being heard upon argument of counsel, and it appearing to the court that the said original bill and the respective cross-bills were filed by the complainants therein for the common purpose of securing a sale of the Illinois and St. Louis Bridge and other properties mentioned in said mortgages, and the deed supplemental to said mortgages, and it appearing to the court that all parties claiming the legal title to said premises are before the Court, and that a full and perfect title may be obtained under the said proceedings instituted by said trustees of the first and second mortgages.

It is therefore ordered by the Court, the said trustees of the first and of the second mortgages assenting hereto, that said cross-bills and the proceedings thereunder proceed concurrently before said Court with said original bill, and thereupon the Court proceeded to hear the said causes upon the bills and exhibits thereto, and the respective answers filed to the original and cross-bills, and upon consideration of the premises, the Court doth order, adjudge and decree as follows:

First. That the first mortgage set out and described in said cross-bill of said Stewart and Humphreys, as trustees of said first mortgage, was by the Illinois and St. Louis Bridge Company, on the 7th day of April, 1870, duly executed and delivered to said Stewart, Humphreys, and one William M. McPherson, since deceased, as trustees, whereby the said Bridge Company conveyed to said trustees the said bridge and its approaches, with its appurtenances, franchises, and other property in said first mortgage described, to secure the payment to the holders thereof, of four thousand bonds, each for the sum of one thousand dollars, in gold coin of the United States, or two hundred pounds of British sterling, with interest thereon at the rate

of seven per cent per annum, payable semi-annually in like gold coin, which bonds were dated April 1, 1870, and were by said company sold and disposed of to divers persons and parties; that there now remains outstanding and unpaid of the said bonds the amount of three million nine hundred and thirty-five thousand dollars, together with interest thereon from the 1st day of April, eighteen hundred and seventy-eight; that said Illinois and St. Louis Bridge Company on the 2nd day of February, 1874, executed and delivered to said complainants Stewart and Humphreys, trustee, its supplemental deed, whereby it conveyed to said trustee certain lots and parcels of ground in St. Louis and East St. Louis, not included in the first and second mortgages of said company, upon which lots of ground the said bridge was constructed, or being adjacent thereto, in trust primarily for the same uses and purposes, and upon the same trusts as declared in said first mortgage, and secondarily and subject to the trusts declared in said first mortgage for the same uses and purposes and upon the same trusts as declared in the second mortgage made by said company; that default has been made by said bridge company in the performance of the conditions of said first mortgage in the non-performance by said company of the provision in said mortgage contained, requiring said Illinois and St. Louis Bridge Company to set apart and furnish certain sums of money yearly for a sinking fund, wherewith to purchase bonds secured by said mortgage, which default entitled the said complainants John A. Stewart and Solon Humphreys, trustee of said first mortgage, to a decree of foreclosure upon their cross-bill; that said bonds now outstanding and unpaid, with the interest thereon from the first and paramount mortgage upon the premises and property conveyed by said first mortgage and said deed supplemental thereto, and described in the cross-bill of said trustees of said first mortgage.

And said Court finds that there is now, on the 17th day of October, 1878, due on said first mortgage for principal and interest the sum of four million, ninety-six thousand five hundred and seventy-one 83-100 dollars ($4,096,-571.83) in gold coin of the United States and which said sum it is now ordered by the Court shall within ten days from this date be paid by the said Illinois and St. Louis

Bridge Company in said gold coin with interest from the said 17th day of October, 1878, at seven per centum per annum, and if said bridge company shall not pay the same within said ten days, then the mortgages or trustees of any mortgage upon said property subsequent to said first mortgage may pay the same within ten days thereafter, and upon such payment, with costs, the said complainants Stewart and Humphreys, trustees of the said first mortgage, shall satisfy and discharge said mortgage debt, interest, and costs, and in default of such payment of said indebtedness and costs within the period so limited by the said parties before mentioned, or any of them, the equity of redemption under said first mortgage is forever barred and foreclosed.

Second. That the second mortgage in said cross bill of said Humphreys and Stewart, as trustees of said second mortgage, particularly described in said cross bill of said Stewart and Humphreys, as trustees of the first mortgage mentioned, was executed and delivered by said Illinois and St. Louis Bridge Company to said Solon Humphreys and John A. Stewart, as trustees on the 15th day of May, 1871, for the purpose of securing the payment of the principal and interest of two thousand other bonds executed by said Illinois and St. Louis Bridge Company, each for the sum of one thousand dollars in gold coin of the United States, or two hundred pounds British sterling, of even date with said mortgage, and particularly set out in said cross bill brought by said Humphreys and Stewart, as trustees of said second mortgage, which said bonds were disposed of to divers persons and parties by said bridge company; that there now remains outstanding and unpaid of said bonds, the sum of two million of dollars in gold coin of the United States, with interest thereon from the first day of January, 1875; that same now forms the second mortgage and lien upon the property described in the said cross bill, being the property conveyed by the said second mortgage and the deed supplemental thereto; that default has been made by said Illinois and St. Louis Bridge Company in the performance of the conditions of said second mortgage through the non-payment of the semi-annual interest accruing upon said second mortgage bonds from the 1st day of January, 1875, as the

same became payable, and that by reason of such default, the said complainants, Humphreys and Stewart, as trustees of the second mortgage, are entitled to have a decree of foreclosure herein. And the court doth find that there is now on this 17th day of October, 1878, due on said second mortgage for principal and interest the sum of two million five hundred and ninety-three thousand two hundred and fifty-five and 83/100 dollars ($2,593,255.83) in gold coin of the United States, which sum it is now ordered by said court shall, within ten days from this date, be paid by the said Illinois and St. Louis Bridge Company, in said gold coin, with interest thereon at seven per cent per annum, and if said bridge company shall not pay such amount within said ten days, then the mortgages or trustees of any mortgage subsequent to said second mortgage, or any one in behalf of them, or either of them, may pay the same within ten days thereafter, and upon such payment with costs the said complainants, Humphreys and Stewart, trustees of said second mortgage, shall satisfy and discharge said mortgage debt so secured by said second mortgage, together with interest and cost, and in default of such payment of said parties or any one in their behalf within the period so limited, their equity of redemption under said second mortgage is forever barred and foreclosed.

Third. That the said bridge company after the making of its said first and second mortgages and said deed supplemental thereto, having made its third mortgage, dated the 2nd day of March, 1874, whereby it conveyed to said complainant Humphreys and said defendants Taussig and Vail, the same premises as trustee to secure the payment of certain indebtedness therein described, did on the first day of January, 1875, execute and deliver to said Solon Humphreys and John Pierpont Morgan as trustees, its fourth mortgage in said original and in said cross bills mentioned, whereby said bridge company conveyed the same premises in said first and second mortgages, and the deed supplemental thereto mentioned, subject to the prior liens of said first, second and third mortgages mentioned to secure the payment of certain indebtedness therein mentioned.

Fourth. That in default of the payment of the amounts so decreed to be paid as secured by said first mortgage and

said second mortgage with costs of suit within the times fixed as aforesaid, the court doth order and decree, that said bridge, its approaches and appurtenances, franchises and other property included in, mentioned and described in said first and second mortgages and in said deed supplemental to said two mortgages, shall be sold by Ezekiel W. Woodward, who is appointed commissioner for that purpose, and that the same shall be sold as an entirety.

Fifth. It is further ordered by the court, that said commissioner shall proceed to sell said premises before mentioned at the east front door of the court house on Fourth street, between Market and Chestnut streets, in the city of St. Louis, at public auction, to the highest and best bidder, on the 20th day of December, 1878, between the hours of twelve o'clock in the forenoon and four o'clock in the afternoon of that day; that at such sale the said commissioner shall exact from the purchaser thereof, the sum of fifty thousand dollars in gold as soon as the property is struck off to him, as earnest money, and if such purchaser shall fail to do so within one hour from the time the same is struck off to him, then such failure shall be deemed a withdrawal of the bid of such purchaser, and no bid from such defaulting purchaser shall thereafter be received, and the said commissioner shall forthwith proceed again to offer said premises for sale under the provisions of this decree, requiring from the purchaser the like amount of earnest money to be paid over to him; that said commissioner shall, prior to said sale, give notice of the time and place of sale and of the property to be sold by advertisement published in one newspaper in each of the cities of St. Louis and New York at least five weeks before the day of sale.

And it is further ordered and decreed that said premises and property shall be sold upon the further terms and conditions, to-wit: That the purchaser shall, upon the confirmation of sale, first pay in cash the costs of this suit and the expenses of sale, including the commissions to the trustees and fees of the solicitors, and counsel therein, as may be determined by the court or some judge thereof; that said purchaser also pay in cash in addition to and over his bid the amount that shall be outstanding of the debts, obligations and certificates of the said receivers, amounting to the

sum of three hundred and seventy thousand dollars ($370,000.00), more or less, in gold, as the same shall be ascertained by the court or some judge thereof, or procure the same to be taken up and surrendered to the said commissioner, to be by him returned to the court for cancellation, and that the balance of said bid shall be paid in cash at the confirmation of the sale, should said sale be confirmed; but if such purchaser should be a bondholder, or represent bondholders under said first mortgage, upon such confirmation, he may, at his option, turn in upon the balance remaining due of his bid first mortgage bonds secured by said first mortgage, at a rate bearing the same proportion to the face value as the said balance of his bid bears to the entire debt adjudged to be due on said first mortgage and the residue necessary to pay the other first mortgage bondholders their proportion of said bid upon each bond whose bonds have not been so turned in in payment, said purchaser shall pay in cash, provided, however, that should said bridge property, rights and franchises be purchased by a bondholder, or the representatives of bondholders under said first mortgage, then at any time within thirty days after said sale, any bona fide holder of bonds secured by said first mortgage shall have the right to become a joint purchaser thereof to the extent and in the proportion to the bonds so held by him, bear to the whole number of said bonds outstanding upon paying his said pro rata share of said purchase-money, together with all obligations, costs and expenses hereinbefore expressed, and that result from said purchase under said first mortgage; and in case the bid of the purchaser shall exceed the entire debt so found to be due on said first mortgage and the amount of said costs and expenses, then the purchaser, after paying the cash necessary to pay said costs and expenses, to provide for the said debts, obligations and certificates as so ascertained, and to provide moneys sufficient to pay the bondholders holding first mortgage bonds not turned in, and turning in the first mortgage bonds held by him at the above rate, may for the residue of his bid turn in bonds secured by said second mortgage at a similar rate to that provided for the first mortgage bonds and the remainder of his bid necessary to pay his proportionate part to any bondholders holding second mortgage bonds whose bonds

were not turned in, said purchaser shall pay in cash, and provided, that if said purchaser shall be a bondholder or represent in said purchase bondholders under said second mortgage, then at any time within thirty days after said sale, any bona fide bondholder of the bonds secured by said second mortgage, shall have the right to become a joint purchaser to the extent, and in the proportion that the bonds so held by him bear to the whole number of said bonds outstanding, upon paying his said pro rata share of the purchase money, together with all the obligations, costs and expenses hereinbefore expressed and that may result from said purchase under said second mortgage.

Sixth. The court doth further order and decree that the said commissioner shall make a report of said sale and the proceedings thereunder and shall prepare and report a draft of the deed proposed to be executed by him to the purchaser of said sale, all of which shall be subject to approval and confirmation of the court or some judge thereof.

Seventh. The court doth further order and decree that all questions of cost and allowance, the amount of debts, obligations and certificates of receivers outstanding, the amount in the hands of receivers, and all other questions not disposed of in the foregoing decree, are reserved until the further action of the court or some judge thereof.

Order of Court and Confirmation of Sale.
February 17, 1879.

And now on this day, before the Hon. Samuel Treat, one of the judges of this court, at chambers in the city of St. Louis, comes Ezekiel W. Woodward, the commissioner appointed by decree of this court in this cause, and presents this report of sale thereunder, dated January 22, 1879, and thereupon, on hearing counsel for the several parties and the purchaser,

It is ordered that said report of sale and the sale therein referred to, be and the same hereby are in all things confirmed, and that Daniel W. Paul, Esquire, of the city of St. Louis, be, and he hereby is appointed auditor to examine and verify the accounts of said receivers, and to ascertain and report to this court the amount of the net receipts of

the bridge remaining in the hands of said receivers at the time of the sale thereof, also the amount of the net receipts of said bridge received by said receivers thereafter until the first day of the next term of this court, and also the amount of the debts, obligations and certificates of the said receivers, outstanding on the day of said sale and the amount of any that has been since discharged by them, also the amount of the net receipts of the tunnel remaining in the hands of said receivers from the time of their taking possession thereof until the time of delivery thereof by them to the Tunnel Railroad of St. Louis, also the amount of the expenses attending the foreclosure and sale of said bridge and said tunnel.

Also that said auditor ascertain and report the number of first mortgage bonds and receivers' indebtedness turned in by said purchaser in paying for said bridge and the amount or sum payable to the holders of such bonds not so turned in and still outstanding and payable, and it is further ordered that said auditor report on the first day of the next term of this court.

DECREE.

Ordering Conveyance to Purchaser.

March 29, 1879.

And now on this twenty-ninth day of March, A. D. 1879, at a stated term of this court, come the said parties, and the trustees in said mortgages respectively, and the said receivers in said cause, and Anthony J. Thomas, the purchaser of the premises sold by virtue of the former decree herein, by their respective counsel and present the report of the auditor, Daniel W. Paul, pursuant to the order made herein February 17, 1879, confirming the sale so made to said Thomas (all of said parties waiving exceptions to said auditor's reports), and also present the petition of said Thomas verified March 13, 1879, and it having been made to appear to the Court that said Thomas purchased the said premises for and on behalf of an association of the holders of said first mortgage bonds of said Illinois and St. Louis Bridge Company and other persons, and that said associa-

tion has entered into a contract with a new corporation known as the St. Louis Bridge Company to procure the transfer to it of the said premises for the purposes of a plan of reorganization, and that there have been turned in on account of said purchase and deposited with the special commissioner appointed by a former decree in this cause, in pursuance of the terms of said decree, 3821 of said first mortgage bonds, and all coupons due and unpaid up to the day of sale, belonging to said 3821 bonds, and satisfactorily release and discharge of the debts, obligations and certificates of said receivers outstanding on the day of sale, and not since paid by said receivers out of moneys in their hands part of the income of said bridge, prior to said sale, and that there are still outstanding 124 of said first mortgage bonds, and that no holder of said last named first mortgage bonds, has become a joint purchaser with said Thomas of the premises so sold under the provisions of said decree.

It is ordered, adjudged, and decreed that the amount of the debts, obligations, and certificates of said receivers outstanding on the day of said sale, payable by said purchaser under the provisions of said decree, is hereby ascertained and fixed at the sum of $346,134.76, and that the said debts, obligations, and certificates have been taken up and discharged by said purchaser; and that the said commissioner execute to said purchaser a deed for the premises so sold, in the form reported by him in his report of sale heretofore confirmed, and that said defendant, the Illinois and St. Louis Bridge Company, join in the execution thereof as therein provided, and that thereupon said receivers deliver to said purchaser and his assigns possession of the premises thereby conveyed, and also transfer and deliver to him and them all personal property remaining in their hands, acquired for and used by them, in the operation of said premises as is in said petition mentioned.

And it further appearing to the Court, that the total amount of said first mortgage bonds outstanding on the said day of sale was 3945, each for the sum of $1,000, with interest from April 1, 1878, and that there have been turned in by or on account of said purchaser and deposited with said commissioner, in pursuance of the former decree herein, 3821 of said bonds with the coupons for the interest

thereon from the date aforesaid, to-wit: April 1, 1878, and that the expenses of the foreclosure proceeding herein, which are hereby allowed and charged upon the proceeds of said sale, amount to $47,542.18, making the net proceeds of sale of said premises the sum of $1,942,457.82, and the share or proportion thereof applicable to each such bond with the reservation hereinafter made, the sum of $494.91, it is ordered, adjudged, and decreed that said purchaser or his assigns shall pay over to said John A. Stewart and Solon Humphreys, trustees of said first mortgage, for each bond, that, at the expiration of said three months, the holder thereof shall not have joined and united with said association, the said sum of $494.91, as the proportionate part coming to the holder of said bond of the proceeds of said sale, for the benefit of such holder, the premises so conveyed and delivered being hereby charged with a lien in favor of any and all holders of said first mortgage bonds not so turned in for the amount so payable thereon, and upon the further condition, that any or all of such last mentioned holders of said 124 first mortgage bonds, as are so advised, may within said three months join and unite with said association and bring in their bonds, and the same shall be accepted and admitted by said association to all the privileges and benefits thereof. At the expiration of said three months, such right shall cease and determine.

And it is further ordered that the said commissioner deposit with the clerk of this court the evidences of the discharge of the indebtedness of said receivers deposited with him, as mentioned in the said auditor's report, the same to be cancelled by said clerk, and also that he stamp or mark upon each of said first mortgage bonds so deposited with him, as evidence of the payment so made upon said bonds, that the same with the interest coupons thereof falling due on and after October 1, 1878, up to the day of sale, have been paid and discharged to the amount of $494,91 out of the proceeds of the sale of the property mortgaged to secure the payment of the same; and after having so stamped or marked said bonds, that said commissioner return the same to said purchaser or his assigns, and report his acts and proceedings thereunder to this court.

And it is further ordered, adjudged, and decreed that the said expenses of foreclosure of said bridge are hereby allowed at the sum of $47,542.18; and the said commissioner is hereby directed to pay the same out of the earnest money deposited in his hands within said period of three months, and that the balance of said earnest money not so applied to be repaid to said purchaser after the payment of such further costs herein as may accrue in said cause since the 17th day of March, 1879.

And it is further ordered, adjudged and decreed that the said receivers pay over to said purchaser and assigns the net receipts of said bridge received since said day of sale to the 17th of March, 1879, being the sum of $88,878.22, as ascertained and reported by said auditor, taking from said purchaser proper vouchers therefor, and filing the same in the office of the clerk of this court, and that the said receivers do also transfer to said purchaser all uncollected claims and accounts due to them on account of the business of said bridge from the day of sale to the 17th day of March, 1879, and not yet collected, and that they retain in their possession until the further order of this court, or some judge thereof, the net receipts of the said tunnel during their possession thereof, being the sum of $94,267.46, as ascertained and reported by said auditor; and that the repayment of said receivers by themselves, as trustees, of the sum of $17,635.43, with interest thereon at seven per cent. per annum, out of the moneys in their hands as such receivers as appears by their accounts presented to the court, be and the same is hereby approved, and that the accounts of said receivers be and the same are hereby approved and allowed, and that upon complying with the several acts and things herein by them required to be done, said receivers be discharged from the further administration of their trust, except in respect of their custody of the moneys last above mentioned, reserving, however, for the further consideration of this ocurt, all outstanding liens or demands against said bridge company or the proceeds of the sale thereof, now before the court for adjudication and undetermined, which said demands may, if allowed, change the pro rata due on said first mortgage bonds as hereinbefore stated.

TUNNEL RAILROAD OF ST. LOUIS.
ARTICLES OF ASSOCIATION.
TUNNEL RAILROAD OF ST. LOUIS.

We, the undersigned, intending to form a company for the purpose of constructing, maintaining, and operating a standard or broad gauge railroad for public use in the conveyance of persons and property in pursuance of the laws of the state of Missouri, do for that purpose make and sign these present articles of association, and we hereby state that:

1. The name of said company shall be the Tunnel Railroad of St. Louis.

2. The number of years that said company is to continue is five hundred years.

3. The places from and to which said road is to be constructed, maintained, and operated are as follows:

From a place on the eastern boundary line of the state of Missouri, opposite to the city of St. Louis, where the present bridge over the Mississippi river, called the Illinois and St. Louis bridge, crosses said line, thence to a place near Poplar street in said city, and to the western limits of said city; so as to make suitable connection with the tracks of the Union Depot Company of St. Louis, the Missouri Pacific, the St. Louis, Iron Mountain and Southern, and other railroads having termini in the said city; together with the necessary side tracks in said city.

4. The length of said road as near as may be is six miles.

5. The name of the only county in the state of Missouri through or into which said road is made or intended to be made is the city of St. Louis.

6. The amount of the capital stock of said company shall be one million two hundred and fifty thousand dollars ($1,250,000) and the number of shares of which said capital stock shall consist shall be twelve thousand five hundred (12,500) of one hundred dollars ($100) each; and,

7. The names and places of residence of the directors of said company, five in number, who shall manage its affairs for the first year and until others are chosen in their places,

are Julius S. Walsh, William Taussig, Norbert S. Chouteau, William S. Humphreys, and Robert B. Whittemore, all of the city of St. Louis.

In witness whereof, each of us have subscribed to these articles of association his name, place of residence, and the number of shares of stock he agrees to take in said company, the 16th day of December, in the year of our Lord one thousand eight hundred and seventy-eight.

Julius S. Walsh, St. Louis, twelve; William Taussig, St. Louis, twelve; Norbert S. Chouteau, St. Louis, twelve; W. S. Humphreys, St. Louis, twelve; and R. B. Whittemore, St. Louis, tweive.

State of Missouri, City of St. Louis, ss.

Be it remembered that on the respective herein mentioned days, personally appeared before me, a notary public in and for the city and county of St. Louis, state aforesaid, to-wit: William Taussig, W. S. Humphreys, R. B. Whittemore, on the 16th day of December, A. D. 1878, Julius S. Walsh and Norbert S. Chouteau on the 17th day of December, A. D. 1878, all and each of whom are personally known to me to be the same persons whose names are subscribed to the foregoing articles of association as parties hereto, and each of them acknowledged the same to be his act and deed for the purposes therein mentioned.

In witness whereof, I have hereunto set my hand and affixed my official seal this 17th day of December, in the year of our Lord one thousand eight hundred and seventy-eight.

Qualified January 15, 1877, for a term expiring February 14, 1882.

(Seal.)

Geo. C. Fabian,
Notary Public for the City and County of St. Louis, Missouri.

State of Missouri, City of St. Louis, ss.

William Taussig, Julius S. Walsh, and W. S. Humphreys, being sworn, say and each for himself says, that these deponents are three of the directors of the Tunnel Railroad of St. Louis, named in the foregoing articles of association; that upwards of one thousand dollars ($1,000.00) of stock

for every mile of railroad proposed to be made, pursuant to said articles of association, has been in good faith subscribed thereto and five per cent paid in cash thereon to the directors named in said articles of association, and that it is intended in good faith to construct, maintain and operate the standard or broad gauge road mentioned in said articles of association.

William Taussig,
Julius S. Walsh,
W. S. Humphreys.

Subscribed and sworn to before me this 17th day of December, A. D. 1878. Qualified January 15, 1877, for a term expiring February 14, 1882. Witness my hand and notarial seal.

(Seal.) George C. Fabian,
Notary Public for the City and County of St. Louis, Missouri.

Filed in the office of the Secretary of State of Missouri, December 18, 1878.

An Act.

Authorizing the Construction of a Bridge Over the Mississippi River, at St. Louis, Missouri.

Approved February 3, 1887.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the Saint Louis Merchants' Bridge Company of St. Louis, Missouri, a corporation created by the laws of the state of Illinois, or its assigns, or successors, or any legally incorporated railroad company or companies which may be associated with it therein, to build a bridge as hereinafter described, and maintain the same across the Mississippi river at some suitable point between the present St. Louis bridge, known as the Eads bridge, St. Clair county, Illinois, and the mouth of the Missouri river; Provided, that no bridge shall be constructed across the Mississippi river within two miles above or two miles below the bridge heretofore constructed and known as the Eads bridge. Said bridge shall be constructed

to provide for the passage of railway trains, and, at the option of the persons by whom it may be built, may be used for the passage of wagons and vehicles, for the transit of animals, and for foot passengers.

Sec. 2. That any bridge built under this act and subject to its limitation shall be a lawful structure, and shall be recognized and known as a post route, upon which also no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States, than the rate per mile paid for the transportation over the railroad or public highways leading to the said bridge; and it shall enjoy the rights and privileges of other post roads in the United States.

Sec. 3. That if the bridge shall be made with unbroken and continuous spans, it shall have at least two channel spans of not less than five hundred feet clear width each, and one span of three hundred feet clear width of channel way; provided, That said bridge may have two spans of not less than seven hundred and fifty feet each clear width of channel way, if thought best, instead of three spans as aforesaid, the said channel ways to be measured at right angles to the current at any and all stages of water, and said span or spans shall not be of less elevation in any case than fifty feet above high water mark, as understood at the point of location, to the bottom chords of the bridge, and the piers of said bridge shall be parallel with the current of the river, and there shall not be less than fifty feet at high water mark from the surface of the water to the bottom chords of said bridge.

Sec. 4. That the piers of all high channel spans shall be built parallel with the current of the river at that stage of water which is most important for navigation; and riprapping or other protection for imperfect foundations which will materially lessen the waterway shall not be employed in the channel ways of the high spans, and piers which will produce cross currents or bars dangerous to navigation shall not be constructed; and if, after construction, any piers or protection walls are found to produce the above mentioned effects, the nuisance shall be abated or corrected by or at the expense of the persons owning said bridge.

Sec. 5. That in case the approaches to channel-spans, or raft passages in said bridge be found dangerous or difficult of access by any important class of river traffic, the secretary of war shall order the construction of such sheer-booms, guide-piers, or other similar device as will obviate the difficulty with sheer-boom, guide-pier or other device shall be paid for by the persons owning or operating said bridge.

Sec. 6. That the persons owning, controlling or operating the bridge authorized by this act shall maintain, at their own expense, from sunset to sunrise, throughout the year, and during heavy fogs, such lights or other signals as the light-house board shall prescribe, and shall, during the season of navigation, have posted in a conspicuous place on or near the bridge the clear-head-room under the channel span on that day, the figures expressing this height to be not less than two feet high, and to be readily visible from any point in the channel of the river for a stretch of three thousand feet above and one thousand feet below the bridge.

Sec. 7. That no bridge shall be erected or maintained under the authority of this act which shall at any time substantially or materially obstruct the free navigation of said river; and if any bridge erected under such authority shall, in the opinion of the secretary of war, obstruct such navigation, he is hereby authorized to cause such change or alteration of such bridge to be made as will effectually obviate such obstruction; and all such alterations shall be made and all such obstructions be removed at the expense of the persons owning or controlling said bridge; and in case of any litigation arising from any obstruction or alleged obstruction to the free navigation of said river, caused or alleged to be caused by said bridge, the case may be brought in the circuit courts of the United States of Missouri or Illinois, in whose jurisdiction any portion of said bridge may be located.

Sec. 8. That all railroad companies desiring the use of said bridge shall have and be entitled to equal rights and privileges relative to the passage of railway trains over the same, and over the approaches thereto, upon payment of a reasonable compensation for such use, and in case the owner or owners of said bridge and the several railroad companies

or any one of them, desiring such use shall fail to agree upon the sum or sums to be paid, and upon the rules and conditions to which each shall conform in using said bridge, all matters at issue between them shall be decided by the secretary of war upon a hearing of the allegations and proofs of the parties.

Sec. 9. That any bridge authorized to be constructed under this act shall be built and located under and subject to such regulations for the security of navigation of said river as the secretary of war shall prescribe; and the said company or corporation shall submit to the secretary of war, for his examination and approval, a design and drawings of the bridge and a map of the location, giving for the space of one mile above and one mile below the proposed location of the bridge, the topography of the banks of the river, the shore-lines at high and low water, the direction and strength of the current at low, medium and high water stages, and the soundings, accurately showing the bed of the stream, the location of any other bridge or bridges, and shall furnish such other information as may be required for a full and satisfactory understanding of the subject; and until the said plan and location of the bridge are approved by the secretary of war the bridge shall not be built; and should any changes be made in the plan of said bridge during the progress of construction, such change shall be subject to the approval of the secretary of war.

Sec. 10. That in case the construction of the bridge authorized in this act be not commenced within two years and completed within seven years from the date of its approval, then this act shall be null and void.

Sec. 11. That whereas a principal reason for giving authority to build the bridge herein contemplated is to secure reasonable rates and tolls for corporations and individuals for passing over the same, the St. Louis Merchants' Bridge Company, or its successors or assigns, shall not agree or consent to the consolidation of this bridge with any other bridge across the Mississippi river, or to the pooling of the earnings of this bridge company with the earnings of any other bridge company on said river, nor shall any person who is or may be a director or manager of any other bridge

over said river be a director or manager of the bridge herein provided for: Provided, That if this provision of this act shall at any time be violated in any of these particulars, such violations shall without legal proceeding, at once forfeit the privilege hereby granted, and said bridge shall become the property of the United States, and the secretary of war shall take possession of the same in the name and for the use of the United States.

Sec. 12. That the right to alter, amend or repeal this act is hereby expressly reserved. And it is further provided that no bridge shall be constructed across the Mississippi river within two miles above or two miles below the bridge herein authorized.

An Ordinance

No. 14,078—Approved July 9, 1887.

Authorizing the St. Louis Merchants' Bridge Terminal Railway Company to Construct, Maintain and Operate a Railroad over, Through and Along Certain Streets and Alleys, and over and Through Certain Blocks and Parts of Blocks in the City of St. Louis.

Be it ordained by the municipal assembly of the city of St. Louis, as follows:

Section 1. That Seth W. Cobb, Charles C. Rainwater, John D. Perry, John H. Gilkeson, John R. Holmes, and their associates, successors and assigns when duly incorporated, according to the provisions of article II of Chapter 21 of revised statutes of Missouri under the name of the St. Louis Merchants' Bridge Terminal Railway Company, are hereby authorized to construct, maintain and operate a railway with double track, standard gauge, with all necessary sidings and turnouts, along, across and over the streets and intersecting streets, alleys and city blocks in following out the route herein described. Provided that the tracks of said company shall be so laid as not to injure or destroy any tracks now laid by any other corporation; and provided, further that the location of the route of said railway shall not in any manner interfere with any unfor-

feited rights of way heretofore granted by the municipal assembly of the city of St. Louis hereby reserves the right to regulate by proper ordinance enacted, the rate of fare for passenger and the rate per hundred pounds for freight for the transportation of local freights less than car load lots, and of local passengers, transported over so much of its railway tracks as may be constructed, maintained and operated within the limits of the city of St. Louis. Provided, that the fare for all passengers carried or transported from point to point, within the city limits, shall not exceed five cents each.

Sec. 2. The railway herein provided for shall consist of a double track line, which shall begin in city block 439, thence across city blocks 432, 429, 422, 419, 148, 161, 160, 77, 52, 41, and across north and south alleys in said blocks over and across Tenth, Ninth, Eighth, Seventh, Sixth streets, Broadway, Fourth street, Third street, Second street, Main street across Plum street, across city block No. 1, across Commercial alley to the levee; thence along the levee to near the foot of Wash street, thence in a northwestwardly direction across city block 18, across Commercial alley, across Carr street, across city block 19 and north and south alley in same, to the intersection of Main and Biddle streets, thence northwardly along Main or First street, over and across Ashley, O'Fallon, Dickson, Florida, Mullanphy, Howard, Mound, Brooklyn, Labeaume, Tyler, Chambers and Madison streets; provided that said road shall consist of a single track on Main street from the north side of Biddle street to the north side of Florida street; thence north on Main street across Clinton street in a northeastwardly direction across Exchange square and across North Market street to Hall street, thence north on Hall street across Warren street, Montgomery street, St. Louis avenue, Wright street, Palm street, Branch street, Dock street, Buchanan street, Angelrodt street, Destrehan street, Mallinckrodt street, Salisbury street, Bremen avenue, Angelica street, Penrose street and Ferry street; provided the railway company herein authorized to lay its tracks on Hall street, between Bremen avenue and the St. Louis Water Works, shall fill said street to the grade established by the city, the full width of said street, from building line to building line;

thence in a northwestwardly direction across and through the grounds of the St. Louis Water Works west of all the engine and pumping houses of said works and near the western boundary thereof; across Douglas street through city block 2498 east, across May street, through city block 2497 west, and east and west alley in the same to or near where McKissock and Grand avenues intersect, thence north along McKissock avenue to Adelaide avenue, over and across John, Gano, Prairie, DeSoto, Talcott, Withers and Adelaide avenues, thence across block 3417 in a northwestwardly direction to Bulwer avenue, across Ruth avenue, across city block 3420, and across Harris avenue, thence north on Bulwer avenue to Bircher street, over and across Hawthorn, Athlone, Holly, Clarence, Pope, and Carrie avenues, thence in an eastern and northern direction to any point on the Mississippi river south of the chain of rocks. The line of said railway shall also begin at or near a point on Bulwer avenue, where said line crosses Pope avenue, thence over and across city block 3463 and east and west alley in same, across Carrie avenue, across city block 3475, and east and west alley in same, across Gypsey street, across city block 3476, and east and west alley in same, across Prescott street, across city block 3477, and north and south alley in same, to Bircher street, thence along Bircher street, across Ouida avenue and Broadway, to or near the intersection of said Bircher street with Florissant avenue, thence in a western and northerly direction over, across, and along the intervening streets, alleys and public highways to or near the point where the Natural Bridge road crosses the western city limits, over and across Florissant and Newstead avenues, running north of Bircher street, through city blocks Nos. 4400, 4401 and 4402, over and across Marcus avenue, running north of Bircher street, through city block numbered 4392, over and across Snead avenue, running north of Bircher street, over and across Bircher street through city block No. 4379, over and across King's Highway, through city blocks Nos. 4378 and 4377, over and across Calvary avenue, through city blocks numbered 4375 and 4374, over and across Semple avenue, through city blocks numbered 4355 and 4343, over and across Goodfellow and Darby avenues to the intersection of the Natural

Bridge road with the new city limits; provided that said Terminal Railroad shall cross Broadway, formerly Bellefontaine avenue, and Florissant avenue by overhead bridges, or by tunnels under said avenues, in the manner and at the height or depth prescribed by the board of public improvements; and provided, further that they shall file with the board of public improvements, within six months after the passage of this ordinance, a full and complete profile of the line of their railroad herein authorized, showing the grades and general alignment, and wherever in the opinion of said board, it may be necessary for the public safety, in addition to the requirements of sections 3 and 4 of this ordinance, to make crossings over or under public streets, the construction of such over or under crossings shall become obligatory upon said Terminal Railway Compauy, in addition to the bridges above mentioned. It is hereby stipulated and agreed by the St. Louis Merchants' Bridge Terminal Railway Company, for itself, its successors and assigns, that in the event of the failure or neglect of the St. Louis Merchants' Bridge Company, its successors and assigns, to construct a bridge across the Mississippi river at St. Louis, as provided for in "An act authorizing the construction of a bridge over the Mississippi river at St. Louis," approved February 3, 1887, and have the same completed within seven years from and after the said 3d day of February, 1887, and then in that case all the rights, privileges and franchises granted by this ordinance shall cease and become void, and so much of tracks as are herein authorized to be laid on the streets, avenues, highways, alleys and public places of the city of St. Louis, as may have been actually laid or constructed, shall be absolutely surrendered, quit-claimed and given over to the city of St. Louis. And the railway herein provided to be constructed and maintained shall be commenced within one year after the approval of this ordinance, and shall be completed within five years from February 3, 1887, and nothing herein shall authorize the construction of any part of said railway that shall not have been completed within five years from February 3, 1887.

Sec. 3. The railway herein authorized shall be elevated across Seventh street and until it reaches city block 19,

along said portion of its route, and wherever it runs along or across streets and alleys, it shall be constructed on wrought iron columns on masonry footings or foundations, which columns and footings shall be so placed as to interfere in the least possible manner with the use of the streets and alleys over or through which it runs and along the levee the western columns shall be placed upon the curb line, but in no place shall any column be placed between the curb lines, or in the roadway of any street, or alley, except the Levee. The distance from the surface of any street, or of any cross street, or any alley, except Eighth, Ninth and Tenth streets and Commercial alley, in city block 19, to the underside of any transverse or longitudinal girder shall not be less than 14 feet, except where said elevated railway crosses block 148, where the clearance under said elevated railway to the underside of any transverse or longitudinal girder, shall not be less than 19 feet, and such portion of the road where said elevated railway crosses over any steam railroad tracks, the clearance under said railway as herein provided to be built shall be determined by the board of public improvements, but in no case shall said clearance be less than 14 feet. That part of the tracks of said railway company, at the intersection of Main and Biddle streets, and north thereof, shall be laid and maintained on the grade of the streets and avenues as now established by city ordinance, and on the grade even with the surface of the street or avenue that may hereafter be established by the city ordinance; and the rails to be used in the construction and maintenance of said surface road, on all streets or cross streets and avenues that may now be, or that shall hereafter be reconstructed with granite or other material, shall be of a pattern known as "flat rail," and shall be laid and maintained to the satisfaction of the board of public improvements, or in accordance with plans presented by said company, and approved by said board; and whenever the streets through or over which its surface road runs are now or shall be hereafter paved, or the pavement changed, the said company shall have the space between its rails, between its tracks, and for two feet on the outside of the tracks, paved with such material as said streets are or shall be paved with, and keep the same in good repair at its own cost and ex-

pense, and to the satisfaction of the board of public improvements. Said company, its successors and assigns, shall, in the construction of its railway, also construct all sewers, culverts and bridges on the line of its railway, wherever necessary, at its own cost and expense, which work shall be done under the supervision of and to the satisfaction of the board of public improvements.

Sec. 4. Before said railway shall be constructed, said company shall submit to the board of public improvements a detailed drawing and specification of the elevated part of its tracks, showing the height of the proposed structure from the surface of the roadway to the underside of any transverse or longitudinal girder, together with such other detailed drawings and specifications of the structure as may be required by the board of public improvements for its further information; and if, in the opinion of the board of public improvements, any part of the proposed work should be altered or changed from the plan proposed, to meet the exigencies of any particular place or locality, the board of public improvements shall, by order, require such changes to be made. And if expedient to use stone columns instead of iron, this may be done, but if stone is used, the columns shall be of neat cut stone, and constructed on a plan first submitted to and approved by said board of public improvements. Until the plan of construction has been submitted to, and is approved by the board of public improvements, the streets shall not be interfered with, but after its approval the street commissioner shall permit the work to be carried out in strict compliance with the plans and specifications approved by the board of public improvements. All damage or injury done to the streets and alleys in the construction of the work shall be properly repaired by the railway company to the satisfaction of the street commissioner.

Sec. 5. Said Merchants Bridge Terminal Railway Company its successors, or assigns, shall, within sixty days after the completion of the St. Louis Merchants Bridge, connect its railway with the said bridge proposed to be built over and across the Mississippi river by the St. Louis Merchants Bridge Company, a corporation organized under the laws of

the State of Illinois, and by an act of congress of the United States, authorized to build such bridge, and for the purpose of making such connection, the said St. Louis Merchants Bridge Terminal Railway Company, its successors or assigns, shall construct, maintain and operate a double-track railway from some point on its main line between North Market street and the Chain of Rocks to said St. Louis Merchants Bridge, and the said St. Louis Merchants Bridge Terminal Railway Company, its successors or assigns, shall, within sixty days after the location of the bridge proposed to be constructed across the Mississippi river at St. Louis, Missouri, by the St. Louis Merchants Bridge Company, its successors or assigns, select and locate a route to connect its railway with said bridge and its approaches, and shall apply to the municipal assembly of the city of St. Louis for power and authority to construct, maintain and operate its railway over the route so selected, and over and across the streets, alleys and city blocks on said route; and when so authorized by proper ordinance, said St. Louis Merchants' Bridge Terminal Railway Company shall, within sixty days after the approval of the ordinance, construct, maintain and operate its railway in connection with said bridge and its approaches.

Sec. 6. The said St. Louis Merchants Bridge Terminal Railway Company, its successors or assigns, shall receive from any other railroad company, person, firm or corporation, and deliver to any other railway company, person, firm or corporation that shall hereafter have connection with its tracks within the city of St. Louis, including the return of the empty cars free of charge, any and all cars loaded, and also shall receive from any railway company, person, firm or corporation that shall hereafter have connection with its tracks within the city of St. Louis, including the return of the empty cars free of charge, and deliver the cars to any other railway company, person, firm or corporation that shall hereafter have connection with its tracks, including the return of the empty cars free of charge, as also to receive in car-load lots of freight from any person, firm or corporation that shall hereafter have connection with its tracks, and transfer the car to any person, firm or corporation that shall

hereafter have connection with its tracks, including the return of the empty cars free of charge, for which service it may charge therefore a sum of money not to exceed $1.00 for each car so transported to any station initial or terminal point on the line of its railway within the limits of the city of St. Louis; that it shall receive and deliver to any connecting railway at its terminals or any railway company, person, firm or corporation that shall hereafter have connection with its tracks, which service the said St. Louis Merchants' Bridge Terminal Railway Company shall do and perform without discrimination or delay, and within a reasonable time after written notice shall have been given to its proper officer or agent for the service required; and whenever the net profits of the said St. Louis Merchants Bridge Terminal Railway Company shall in any one year exceed 8 per centum on the capital actually invested by said company, earned from its passenger and freight traffic, including the fixed charge herein provided for transferring, switching or pulling cars, and including the compensation received from all other railroad companies having connection with it for running their trains, locomotive engines and cars, loaded or empty, over its railway tracks, side tracks, switches, turnouts and turn-tables, as provided for in section 9 of this ordinance, then the charges for transferring, switching or pulling and returning cars for the persons, corporations and railways aforesaid, shall immediately be reduced for the ensuing year to such a sum per car as will produce, from the number of cars so transported during the previous year, not more than 8 per centum per annum on the capital actually invested by said company; and in consideration of the rights and franchises hereby granted under the provisions of this ordinance, the St. Louis Merchants' Bridge Terminal Railway Company, its successors and assigns, covenants and agrees that it will file with the comptroller of the city of St. Louis, on the first day of January of each year a full and complete statement of the earnings and expenses of the said company for the year next preceding, subscribed and sworn to by its president and secretary.

Sec. 7. Said Merchants' Bridge Terminal Railway Company shall when required and authorized, as provided for in this section, connect its track by switches and side tracks with

any other railroad, depot, warehouse, factory, store, lumber, coal or stockyard or depot yards, or any commercial or manufacturing establishment of any individual or corporation located adjacent to the railway of said company; but no such switches or side tracks shall be laid along or across any alley, street, or public highway unless authority be first granted by the municipal assembly by proper ordinance enacted.

Sec. 8. Said Merchants' Bridge Terminal Railway Company shall not operate its trains of cars or locomotive engines on that part of its surface track within the old city limits at a rate of speed exceeding six miles per hour, and shall not stand any cars, locomotive or train of cars on its surface track opposite to, upon or across any street or highway, when not in motion, longer than five minutes at one time, and, when moving, the bell of the locomotive engine shall be constantly sounded; and if the train be backing, a man shall be stationed on the top of the rear car to give danger signals; and no train shall, at any time, be moved unless it be manned with experienced brakemen at their posts, who shall be so stationed as to see the danger signals from the locomotive engines; and the said Merchants' Bridge Terminal Railway Company shall, at its own cost and expense, maintain and keep watchmen and erect and maintain gates at the crossings of such streets as may be designated by the street commissioner. Said Merchants' Bridge Terminal Railway Company shall conform to and comply with all ordinances of the city of St. Louis now in existence or hereafter enacted; any violation of the provisions of this section by said Merchants' Bridge Terminal Railway Company, its agents or servants, shall be deemed a misdemeanor, and, upon conviction thereof in any court of competent jurisdiction, the party so convicted shall be fined for each offense not less than the sum of twenty-five dollars, nor more than one hundred dollars.

Sec. 9. Said Merchants' Bridge Terminal Railway Company shall, whenever requested, receive and transport, without delay or discrimination, all the cars, loaded or empty, of other railroads connecting with it, upon the terms, conditions and rates herein provided; and shall also permit any

other railroad company, having connection with it, to run its trains, locomotive engines and cars, loaded or empty, over its railway tracks, side-tracks, switches, turn-outs and turntables, for such reasonable compensation and under such reasonable rules and regulations as may be agreed upon by the said St. Louis Merchants' Bridge Terminal Railway Company and any other railroad company desiring to use said right of way, tracks, side-tracks, switches, turn-outs and turntables, subject to conditions herein named governing the movement of locomotive engines and trains of cars over its tracks and appurtenances; and in the event said companies cannot agree upon said compensation or rules or regulations, then the same or such part thereof as they may be unable to agree upon, shall be fixed and determined by two disinterested arbitrators, one to be chosen by each party; and in the event said arbitrators cannot agree, then they shall select a third, whose decision in the premises shall be final; and in the event either of said railway companies shall fail or refuse, for the period of ten days, after being thereunto requested in writing by the other party, to select an arbitrator, as herein provided, then such compensation, rules or regulations shall be determined by the railroad commissioners of the state of Missouri, after receiving satisfactory evidence of such failure or refusal, and their decision as to said matters shall be final.

Sec. 10. Said company shall, within sixty days after the approval of this ordinance, file with the city register its acceptance of the provisions hereof, and shall accompany the same with its bond in the sum of $50,000, with two or more good and sufficient sureties, owners of unincumbered real estate situated in the city of St. Louis, to be approved by the mayor and council, conditioned that it will comply with all requirements and conditions of this ordinance, and hold the city of St. Louis harmless from any claim or damages arising out of the construction, maintenance and operation of its railway authorized by this ordinance. And if at any time said bond shall become impaired by reason of recovery thereon, in any court of competent jurisdiction, or by reason of the insolvency or death of any one of the sureties therein, then and in that event said company shall renew said

bond, so that at all times the sum thereof shall be $50,000, with surety as aforesaid; and all renewals of said bond shall be made within ten days after notice in writing by the mayor. Any failure to comply with the provisions of this section of this ordinance by the said company, its successors or assigns, shall work a forfeiture of all the rights and privileges herein granted.

Sec. 11. In consideration of the rights and privileges herein granted to the said St. Louis Merchants' Bridge Terminal Railway Company, its successors or assigns, to construct, maintain and operate its railway, as authorized by Section 1 of this ordinance, said company shall, at the time of filing its acceptance of the provisions of this ordinance with the city register, pay into the treasury of the city of St. Louis the sum of $5,000, and shall, on the first day of January, 1894, and every year thereafter, on the first day of January, pay into the treasury of St. Louis the sum of $5,000, until the expiration of the time for which the right and franchise is herein granted, which sum of money shall become absolutely the property of the city of St. Louis, and this shall be in addition to all other taxes that are now or may be hereafter required by law.

The St. Louis Merchants' Bridge Terminal Railway Company shall pay into the city treasury, for each bridge hereafter constructed across its railroad tracks between Twelfth street and Eighth street, the sum of $15,000, said payments to be made within thirty days after the construction of the bridge or bridges is commenced.

And the said St. Louis Merchants' Bridge Terminal Railway Company shall, within two years after the completion of said St. Louis Merchants' Bridge and connection of said railway with said bridge, as herebefore provided, erect or cause to be erected at some point between Bremen avenue and its southern terminus, a passenger depot that shall not cost less than $200,000, plans for which shall have been approved by the board of public improvements.

Sec. 12. The rights and privileges hereby granted shall continue for the term of fifty years from and after the approval of this ordinance.

IN THE SUPREME COURT OF MISSOURI.

Before Court En Banc.

April Term, 1904.

State of Missouri Ex-Information
Edward C. Crow, Attorney General,
Informant,

vs.

Terminal Railroad Association of
St. Louis, *Respondent.*

AMENDED PETITION.

Now at this day comes Edward C. Crow, Attorney General of the state of Missouri, who in this behalf, prosecutes on the part of the state, consent of the Court first being had and obtained so to do, and files this, his amended information, herein, and informs the Court and charges that respondent is a railroad corporation organized under the general railroad laws of the state of Missouri, with a capital stock of fifty million dollars ($50,000,000) for the purpose of building, owning, and operating a standard gauge railroad in the state of Missouri; that from and at all times after the — day of July, 1898, the tracks and lines and road operated by respondent were and now are in part located as follows: Beginning at the west end of Eads Bridge at the foot of Washington avenue in the city of St. Louis, Missouri thence running with a double track standard gauge road in a southwesterly direction through a tunnel to Spruce and Eighth streets, thence westerly to the present Union Station at Eighteenth and Twenty-first streets and Clark and Market streets, in the city of St. Louis, at which point connections were then and ever since have been and now are made with the tracks, lines of road and termini of the Wabash Railroad Company, the St. Louis, Kansas City and Colorado Railroad Company, the Missouri Pacific Railway Company, the St. Louis, Iron Mountain and Southern Railway Company, the St. Louis and San Francisco Railway Company and all other roads entering St. Louis from the south, west and north; also, from the place of beginning at the west end of Eads Bridge at the foot of Washington

Avenue in the city of St. Louis; thence easterly across the Mississippi river over and upon said bridge with a double track standard gauge road to a place in the state of Illinois opposite the city of St. Louis, and into the city of East St. Louis, where track connections were then and ever since have been and now are made with the tracks, lines of road and termini of the Illinois Transfer Railroad Company, the East St. Louis Connecting Railway, the East St. Louis Belt Railway Company, the East St. Louis and Carondelet Railway Company, the Cleveland, Cincinnati, Chicago and St. Louis Railway Company, the Louisville and Nashville Railway Company, the Baltimore and Ohio Southwestern Railway Company, the Wabash Railroad Company, the St. Louis, Vandalia and Terre Haute Railway Company, the Chicago and Alton Railway Company, the Illinois Central Railway Company, the Southern Railway Company, the Toledo, St. Louis and Western Railway Company, the Mobile and Ohio Railroad Company, and all other roads entering East St. Louis from the north, east and south; that in addition to the aforesaid main lines of tracks of the standard gauge railroad, said respondent was on said date and ever since has been and now is the owner of and ever since has operated and is now operating various switches, side tracks, spurs, branches, depots and cross-overs leading to and from the various public and private warehouses, depots, storage houses and manufacturing and business establishments in the city of St. Louis, and which said switches, branches, spurs and side tracks are now and at all times herein mentioned have been properly connected with the said main lines and tracks of respondent, so as to enable the said respondent, as a common carrier for hire, to run, pull, haul and carry, transfer and switch the products so manufactured and stored in said warehouses, storehouses and other places, from said warehouses, storehouses, depots, manufacturing establishments and other places to and upon the tracks, lines, roads and termini of the various railroads entering and running into the city of St. Louis, and so as to enable respondent, as a common carrier for hire, to run, pull, haul and convey freight and articles of trade and commerce from the tracks, lines and termini of the various railroads entering and running into and through said city

of St. Louis, to and into said warehouses, storage houses, depots, manufacturing establishments and other places in said city; that the total length of the lines and tracks of respondent in the state of Missouri, including the Eads bridge, which spans the Mississippi river at the foot of Washington avenue in St. Louis, which respondent operates and controls by virtue of a perpetual lease to it granted, is about one hundred miles.

Informant further states that the St. Louis Terminal Railway Company was incorporated under the laws of the state of Missouri on the 9th day of November, 1892, with a capital stock of $1,500,000, divided into 15,000 shares of the par value of $100 each, said corporation to continue for a term of fifty years from and after the date of its incorporation. Said corporation was organized for the purpose of constructing, maintaining and operating a standard gauge railroad, beginning at or near the intersection of McKissock avenue and Grand avenue in the city of St. Louis, state of Missouri, thence in a westerly and northwesterly direction in the county of St. Louis, state of Missouri, thence southerly and southeasterly to a point near Ivory Station on the St. Louis, Iron Mountain and Southern Railroad Company, in said county of St. Louis; also, beginning at the point first named above at or near said intersection of McKissock avenue and Grand avenue, thence to a point on the northern boundary limits of the city of St. Louis, near the Chain of Rocks, thence through the county of St. Louis to a point on the north bank of the Missouri river in the county of St. Charles, between the city of St. Charles and the mouth of the Missouri river, passing through the county of St. Louis, through the city of St. Louis and into the county of St. Charles, a total distance of about thirty-five miles.

Informant further states that the "Merchants Bridge," which spans the Mississippi river at St. Louis, was constructed by the St. Louis Merchants Bridge Company, a corporation organized under the laws of.....; that said bridge spans said river parallel with the aforesaid "Eads Bridge," said bridge being constructed for the use of railroad companies in the transfer of freight and passengers across the Mississippi river at St. Louis.

Informant further states that the St. Louis Merchants Bridge Terminal Railway Company is a regularly incorporated railroad company, under the railroad corporation laws of the state of Missouri, and was on the 17th day of August, 1893, prior thereto and ever since has been and now is the owner of a standard gauge railroad in the state of Missouri, and has been ever since, prior to and now is conducting and operating said road in said state; that the lines of track and road of the said St. Louis Merchants Bridge Terminal Railway Company on said date and at all times thereafter and now commence at the present Union Station in the City of St. Louis, Missouri, situated between Eighteenth and Twenty-first streets and Market street and Clark avenue, running thence eastwardly with double track, standard gauge railroad to and across block 419 and Eighth street, thence to and across block 148 and Seventh street, thence to and across block 161 and Sixth street, thence to and across block 160 and Broadway, thence to and across block 77 and Fourth street, thence to and across block 52 and Third street, thence to and across city block 41 and Second street, thence to and across city block number 1 and Plum street to Poplar street and thence to the wharf on the west bank of the Mississippi river by elevated road, and thence northeastwardly along said wharf and across and along city block 13, Carr street, Biddle street, First street and from First street diagonally across North Market street and Hall street in a northerly direction and thence eastwardly from Hall street to the "Merchants Bridge" at the foot of Ferry Street in the said City of St. Louis, thence across the Mississippi River over and upon the said "Merchants' Bridge" to the state of Illinois and the city of East St. Louis opposite the said city of St. Louis where its lines and tracks are and at all times herein mentioned were connected with the lines of railroad and tracks owned and operated by the said Illinois Transfer Railroad Company, the East St. Louis Connecting Railway Company, the East St. Louis Belt Railway Company, the East St. Louis and Carondelet Railway Company, the Cleveland, Cincinnati, Chicago and St. Louis Railway Company, the Louisville and Nashville Railway Company, the Baltimore and Ohio Southwestern Railway Company, the

Wabash Railroad Company, the St. Louis, Vandalia and Terre Haute Railway Company, the Chicago and Alton Railway Company, the Illinois Central Railway Company, the Southern Railway Company, the Toledo, St. Louis and Western Railway Company, the Mobile and Ohio Railroad Company, and all other railroads traversing the State of Illinois from the north, east and south into the city of East St. Louis; also, beginning at the west end of said Merchants Bridge at the foot of Ferry street in the said city of St. Louis, Missouri, thence westerly and southwardly with a standard gauge road through the city of St. Louis, for a distance of about twenty-five miles, intersecting and connecting with the tracks and lines and switches of the Wabash Railroad Company, the St. Louis, Kansas City and Colorado Railroad Company, the Missouri Pacific Railway Company, the St. Louis, and San Francisco Railway Company, the St. Louis, Iron Mountain and Southern Railway Company, the St. Louis, Keokuk and Northwestern Railway Company, the Missouri, Kansas and Texas Railway Company and all other railroads entering the said city of St. Louis from the north, west and south; also, from said Union Station, hereinbefore mentioned, westward to the termini of the said Wabash Railroad Company, the St. Louis, Kansas City and Colorado Railroad Company, the Missouri Pacific Railway Company, the St. Louis and San Francisco Railway Company, the St. Louis, Iron Mountain and Southern Railway Company and all other railroads entering the said city of St. Louis from the north, west and south, thereby and thereat making railroad connections with said companies; that in addition to the aforesaid roads and lines of track the said St. Louis Merchants Bridge Terminal Railway Company owns and controls and operates various numbers of side tracks, branches and switches, extending to the various freight depots, private and public warehouses, storehouses and manufacturing establishments and other places where articles of trade and commerce are stored or to be stored and manufactured, which said branches, switches and side tracks are all properly connected with the main lines and road of the said company, so as to enable said company, as a common carrier for hire, to pull, haul, carry, transfer and convey freight and articles

of trade and commerce to and from said warehouses, storage houses, manufacturing establishments and other places upon the tracks and termini of the various railroads entering the city of St. Louis; that in addition thereto, the said St. Louis Merchants Bridge Terminal Railway Company holds and controls a lease from the St. Louis Merchants Bridge Company by which it controls and operates in perpetuity the bridge of said company over and across the Mississippi river at St. Louis hereinbefore described as "Merchants Bridge," that the total length of the lines of road and railroad tracks of said St. Louis Merchants Bridge Terminal Railway Company in this state is about fifty miles.

Informant further states that on the 2nd day of January, 1892, a contract and agreement was entered into between the St. Louis Terminal Railway Company as party of the first part and the St. Louis Merchants Bridge Terminal Railway Company as party of the second part, both of said companies being the corporations hereinbefore described bearing the respective names aforesaid. By the terms of said lease and agreement, it is stated that the St. Louis Terminal Railway Company is the owner of a certain line of railroad in the state of Missouri, between the point of intersection of the tracks of the two respective companies to said lease, in the city of St. Louis, and the point of connection of the tracks of the said St. Louis and San Francisco Railway at a point near Arlow Station, in the county of St. Louis. Said lease also provides that the St. Louis Merchants Bridge Terminal Railway Company owns, controls and operates a railroad extending from a point near the Union Depot in the city of St. Louis to and over the bridge across the Mississippi river to the state of Illinois, to a point in the state of Illinois, opposite said city of St. Louis, known as the "Merchants Bridge" and thence from said "Merchants Bridge" to a point of connection of the tracks of both parties to said agreements at or near the intersection of Morin avenue and Florissant avenue in said city of St. Louis, at which last named point the line of railroad owned, controlled and operated by the said St. Louis Merchants Bridge Terminal Railway Company intersects, joins and connects with the line of railroad of the St. Louis Terminal Railway Company.

By the terms of said lease and in consideration of the conveyance and the agreements therein contained and hereinafter mentioned, the St. Louis Terminal Railway Company leased, demised and let unto the said St. Louis Merchants Bridge Terminal Railway Company, its successors and assigns, free from all liens, and encumbrances of every kind, excepting a certain mortgage in said lease described and hereinafter mentioned for the full term of forty years from and after the 2nd day of January, 1892, the line of railroad of the said St. Louis Terminal Railway Company as the same then existed or may at any future time be located, constructed, maintained or operated or acquired between the point of intersection of the tracks of the said parties at or near the intersection of Morin avenue and Florissant avenue in the city of St. Louis to a point of connection of the railroad of the said St. Louis Terminal Railway Company with the St. Louis and San Francisco Railway near Arlow Station aforesaid and all the real estate, right of way, double track and cross-overs in said lease provided to be purchased or constructed together with the right, privilege and franchise of maintaining and operating said part of said railroad, and regulating, fixing, collecting and receiving all freights, tolls and charges for the use thereof, for the transportation of persons and property upon or over the same as it then was or as it may be at any time in the future constructed, maintained or acquired.

Said lease also provided that the said St. Louis Terminal Railway Company, for the purpose of obtaining the necessary funds with which to construct that part of the line of railroad so leased as aforesaid; to the said St. Louis Merchants Bridge Terminal Railway Company agrees to and promises to make and issue its bonds in the sum of one million five hundred thousand dollars, in the denomination of one thousand dollars each, which bonds are to run for a period of forty years from the first day of January, 1893, with the right to the said St. Louis Terminal Railway Company to redeem any or all of said bonds after a period of twenty years from the date thereof, said bonds to bear interest at the rate of six per cent per annum, with interest coupons attached, payable on the first days of July and January of each year; and to secure the payment of said

bonds, the said St. Louis Terminal Railway Company further agreed to execute a first mortgage or deed of trust upon so much of its said railway as by the terms of said agreement are leased to the said St. Louis Merchants Bridge Terminal Railway Company, with all the real estate, right of way, double track and cross-overs as the same then were or may be at any time thereafter constructed, maintained or operated or acquired together with all the rights, privileges and franchises thereto belonging. And in consideration of the several promises, undertakings and agreements therein set out to be kept and performed by the said St. Louis Merchants Bridge Terminal Railway Company in said lease covenanted and agreed that it would so soon as the bonds and guarantees aforesaid are executed, transfer and deliver said bonds to the St. Louis Merchants Bridge Terminal Railway Company, as the property of the said St. Louis Merchants Bridge Terminal Railway Company, and that it would cause to be assigned, transferred and delivered to such trustees as the said St. Louis Merchants Bridge Terminal Railway Company should designate in trust for the said St. Louis Merchants Bridge Terminal Railway Company, 333 full paid shares of the capital stock of the said St. Louis Terminal Railway Company, said shares to be part of those already subscribed for and issued, and said St. Louis Terminal Railway Company further covenanted in said lease and agreed that no other or further shares of its capital stock should be subscribed for or issued than those already subscribed for, to-wit: 350 shares. The said St. Louis Terminal Railway Company further agreed to and with said St. Louis Merchants Bridge Terminal Railway Company that it would keep up its organization and renew its corporate existence as a railroad corporation under the laws of the state of Missouri during the lifetime of the lease, and that it will in its own name and at the request and expense of the said St. Louis Merchants Bridge Terminal Railway Company institute and prosecute such suits and proceedings of every kind whatsoever, and do and perform all such acts and things as may be deemed necessary by the said St. Louis Merchants Bridge Terminal Railway Company in order to secure the necessary right of way and depot grounds for the use of said

railroad, or which may be deemed necessary by the said St. Louis Merchants Bridge Terminal Railway Company in order to preserve and protect all the rights of the said St. Louis Merchants Bridge Terminal Railway Company under said agreement. And in consideration of the several promises, undertakings and agreements therein set out and contained in said lease to be kept and performed by the said St. Louis Terminal Railway Company, the said St. Louis Merchants Bridge Terminal Railway Company, by the terms of said agreement, covenanted and agreed to and with the said St. Louis Terminal Railway Company: First, that it would guarantee the payment of the interest on said bonds amounting to $1,500,000 so issued and secured by the mortgage or deed of trust as hereinbefore mentioned.

Second, that its successors and assigns would, within a period of two years from the date of said lease acquire and convey to the said St. Louis Terminal Railway Company, such real estate for its right of way, of a width of not less than fifty feet, from the point of intersection of the tracks of the respective parties to said lease at or near the intersection of Morin avenue and Florissant avenue, in the city of St. Louis, to a point of connection of the St. Louis Terminal Railway Company with the St. Louis and San Francisco Railway Company near Arlow station, and that it would construct the railroad of the said St. Louis Terminal Railway Company to consist of first class, double track railway, standard gauge, and it shall be of such character as shall by the said St. Louis Merchants Bridge Terminal Railway Company be deemed necessary to form a continuous railroad from and to points hereinbefore described.

Third, that it, the said St. Louis Merchants Bridge Terminal Railway Company, its successors and assigns, will after the completion of said road and during the continuance of said lease make such additions to the property, construct such side tracks and erect such stations as in the opinion of the said St. Louis Merchants Bridge Terminal Railroad Company be necessary or beneficial to the said property, the cost of which shall be repaid to it by the said St. Louis Terminal Railway Company at the expiration of said lease, and as a further security for the payment of such cost, the

said St. Louis Merchants Bridge Terminal Railway Company shall be entitled to the compensation, use and enjoyment of said railroad until the same is paid.

Fourth, that said St. Louis Merchants Bridge Terminal Railway Company will, out of the earnings and rates of said railroad or from its own funds pay to the said St. Louis Terminal Railway Company the sum of five hundred dollars per annum for the purpose of keeping up its organization and will pay all taxes assessed against the said St. Louis Terminal Railway Company; a copy of which said agreement is herewith filed and marked Exhibit "A" and made a part of this information.

Informant further states that both the respondent and the St. Louis Merchants Bridge Terminal Company were on the —— day of August, 1893, for a long time prior thereto, at all times since and now are, equipped with engines and freight and passenger cars and all other necessary facilities to do and at all such times were and now are doing a general railroad business in the state of Missouri, operating their respective lines of road in this state, carrying, hauling, and conveying passengers and freight thereupon and therefrom, as common carriers for hire, to and from points and stations upon and along their respective roads, which said points, stations and places are common to each of said roads and as such are connected by suitable connections, facilities and stations by each of said roads.

Informant further states that on said 17th day of August, 1893, said respondent and the St. Louis Merchants Bridge Terminal Railway Company, owning and operating the roads heretofore described and transacting the business described, each being equipped with proper motive power, engine, freight and passenger cars and other facilities necessary for the transacting of their respective business, and as such were competing with each other in said business and in the carrying and conveying of freight and passengers over their respective roads between various stations, places and depots thereupon, as well as in the transfer of freight and passengers from and to the termini of the various railroads entering the state of Missouri at the city of St. Louis and all roads centering in the said city of St. Louis from all directions, and that said companies now

engaged in and ever since said 17th day of August, 1893, have been so engaged in conducting said business as aforesaid; but not in competition with each other for the reasons hereinafter stated.

Informant further states that on the 17th day of August, 1893, an agreement was entered into between the "St. Louis Merchants Bridge Terminal Railway Company," the "Terminal Railroad Association of St. Louis" and the "St. Louis Terminal Railway Company," all of which are the corporations by those names hereinbefore described. The general nature of said agreement and contract was to cause the Terminal Railroad Association of St. Louis to be successor to all the rights of the said St. Louis Merchants Bridge Terminal Railway Company in and to the lease which it held from the said St. Louis Terminal Railway Company, under date of January 2d, 1892, hereinbefore described. By the terms of said agreement, so made on the 17th day of August, 1893, the said Terminal Railroad Association of St. Louis succeeds to all the rights of the purchasers of the $1,500,000 of first mortgage bonds so executed by the said St. Louis Terminal Railway Company described in said lease dated January 2d, 1892, and said Terminal Railroad Association of St. Louis became the assignee of the said St. Louis Merchants Bridge Terminal Railway Company in said contract and lease. The following further things were therein agreed upon by the parties to said lease:

First. The St. Louis Merchants Bridge Terminal Railway Company transferred, assigned and set over unto the said Terminal Railroad Association of St. Louis, the said contract dated January 2d, 1892, and all right, title and interest in and to the same and all leasehold interests, stocks, bonds and other property of every nature and kind described in said contract and had or acquired by the said St. Louis Merchants Bridge Terminal Railway Company.

Second. The said Terminal Railroad Association of St. Louis agreed and undertook to fully carry out and perform and discharge all and singular the obligations assumed by the said St. Louis Merchants Bridge Terminal Railway Company under the provisions of said prior contract, with like force and effect and to all intents and purposes as if

the said Terminal Railroad Association of St. Louis had been and was the party of the second part in said lease and contract. And the said Terminal Railroad Association of St. Louis further agreed to cancel the guarantee of the said St. Louis Merchants Bridge Terminal Railroad Company on all of the bonds of the said St. Louis Terminal Railway Company, so executed under and by virtue of the terms of said prior lease aforesaid and to endorse its own guarantee thereon, to-wit: The guarantee of the Terminal Railroad Association of St. Louis; and said St. Louis Terminal Railway Company released the said Merchants Bridge Terminal Railway Company from any and all obligations assumed by it in said prior contract and accepted in lieu thereof, the obligations of the said Terminal Railroad Association of St. Louis to perform the things in said prior contract specified and imposed upon the said St. Louis Merchants Bridge Terminal Railway Company; a copy of which said agreement is herewith attached, marked Exhibit "B" and made a part hereof.

Informant further charges that on the 17th day of August, 1893, an agreement was made and entered into by and between the St. Louis Merchants Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, both being the corporations by the respective names as hereinbefore set out; the terms of such agreement between such companies being in substance as follows: The St. Louis Merchants Bridge Terminal Company granted to the said Terminal Railroad Association of St. Louis, the right to perpetual use of all tracks, side tracks, switches, turn outs, turn tables, yards and depots and all other terminal facilities of whatsoever nature and kind then owned or which may afterwards be owned, possessed, controlled or acquired by said St. Louis Merchants Bridge Terminal Railway Company, in the city of St. Louis; provided such use so granted shall not exclude the use of said facilities by said Merchants Company.

Said Terminal Railroad Association accepted the grant of said right to perpetual use of said terminal facilities from the said St. Louis Merchants Bridge Terminal Railway Company and in payment and compensation therefor, guaranteed the payment of all liabilities of the said St. Louis

Merchants Bridge Terminal Railway Company, and further agreed to endorse on or before September 1st, 1893, or if not presented by said date, as soon thereafter as such bonds are presented, its guarantee of payment upon $3,500,000 of five per cent, first mortgage bonds of said Merchants Company, bearing date of October 1st, 1890, commencing with coupons due on April 1st, 1894. It is further agreed under the terms of such contract that all bills receivable, all bonds, choses in action and all other assets of whatever nature, kind or description now belonging to or afterwards acquired by the said St. Louis Merchants Bridge Terminal Railway Company shall be used in the discharge and payment of its then present and future liabilities, so far as such assets may be sufficient for that purpose. The said Terminal Railroad Association of St. Louis, by the terms of said agreement, subscribed for 4,384 shares of the capital stock of said St. Louis Merchants Bridge Terminal Railway Company and the said St. Louis Merchants Bridge Terminal Railway Company therefore sold, transferred, assigned and set over to the said Terminal Railroad Association of St. Louis the said 4,384 shares of its capital stock full paid and non-assessable; a copy of which said lease and agreement is hereto attached marked Exhibit "C" and made a part hereof.

Informant further states that the lines of road of the St. Louis Terminal Railway Company and the lines of road of the respondent are natural competitors with each other in the general railroad business in this state, the lines of road of said companies being parallel and competitive in the carrying of freight and passengers from various points throughout the state of Missouri into and through the city of St. Louis and to and from the wharf on the west bank of the Mississippi river at St. Louis.

Informant further states that since the execution of the lease aforesaid of the St. Louis Terminal Railway Company to the St. Louis Merchants Bridge Terminal Railway Company, and since the contract by and between the said St. Louis Merchants Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis and the St. Louis Terminal Railway Company hereinbefore described, wherein the said Terminal Railroad Association of St. Louis

acquired all of the rights, privileges, powers, property and franchises of whatsoever character of the said St. Louis Terminal Railway Company, and acquired 333 shares of the capital stock of said St. Louis Terminal Railway Company of St. Louis, the said Terminal Railway Association of St. Louis has acquired the remaining number of shares of stock of the said St. Louis Terminal Railway Company subscribed, issued and outstanding; which number of shares so outstanding and so owned and controlled by the said Terminal Railroad Association of St. Louis is three hundred and fifty, and that by virtue of the contracts and agreements aforesaid no other or further shares of said stock are to be subscribed and issued, so that by virtue of the contract and leases aforesaid, the said Terminal Railroad Association of St. Louis now is the owner of and in control of all the property rights, privileges, appurtenances, franchises and equities of whatsoever kind belonging to the said St. Louis Terminal Railway Company, and in addition to the ownership of said shares of stock, the said Terminal Railroad Association owns and controls $1,500,000 of first mortgage six per cent bonds of the said St. Louis Terminal Railway Company, due January 1st, 1933.

Informant further charges that in addition to the 4,384 shares of the stock of the said St. Louis Merchants Bridge Terminal Railway Company so acquired by the terms of the contract aforesaid by and between said Terminal Railroad Association of St. Louis, and the said St. Louis Merchants Bridge Terminal Railway Company, the said Terminal Railroad Association of St. Louis has acquired 13,416 additional shares of stock of the said St. Louis Merchants Bridge Terminal Railway Company, and that the said Terminal Railroad Association of St. Louis now owns and controls 17,800 shares of the capital stock of said St. Louis Merchants Bridge Terminal Railway Company; that the total number of shares of the capital stock of the said St. Louis Merchants Bridge Terminal Railway Company now issued and outstanding is 29,395, and that of said number, the said Terminal Railroad Association of St. Louis now owns the said sum of 17,800 shares as aforesaid; which said shares so held by the said Terminal Railroad Association of St. Louis is more than a majority in the interest of the

stock of said company subscribed, issued and outstanding.

Informant further states that the said bridges which span the Mississippi river at St. Louis being on the said 17th day of August, 1893, prior thereto and ever since, so connected with the tracks and terminal facilities and equipments of the various railroads entering St. Louis from the east, west, north and south, were then, ever since have been and now are the natural instruments of competition and rivalry in the railway freight and passenger business; that the two companies, the St. Louis Merchants Bridge Terminal Railway Company and respondent, owning and operating their respective lines of road and equipment as aforesaid and controlling and operating respectively the said "Merchants" and "Eads" bridges, with their respective lines of road as aforesaid, each connecting and joining the termini of the various trunk lines entering the state of Missouri at said city of St. Louis from East St. Louis and elsewhere and each of said Terminal Railway Companies being on said 17th day of August, 1893, equipped with motive power, engines, freight and passenger cars, so operating their respective lines of roads and tracks by means of and with their respective engines and equipment, were competitors in the railroad business in the state of Missouri, they being, each for itself, engaged in pulling and conveying freight and passenger cars across their respective bridges from the termini of the various railroads, with which each have terminal connections as aforesaid; that said competition and rivalry in business between said companies existed free, open and unrestrained from the organization and commencement of business by the said St. Louis Merchants Bridge Terminal Railway Company continuously until the said 17th day of August, 1895, the date of the execution of the lease and agreement aforesaid and the date of securing control of said Merchants Bridge Terminal Railway Company by the respondent, and that respondent by an understanding and agreement with said company through its officers, agents and servants, has since said date unlawfully formulated, fixed and established the railroad tariffs and rates to be paid the said St. Louis Merchants Bridge Terminal Railway Company by all railroads, corporations, persons and individuals doing business with it, and that

such tariffs, charges and prices so fixed and established by the respondent have been unlawfully adopted by the said St. Louis Merchants Bridge Terminal Railway Company, its officers, agents and servants to the great detriment and gross injury of the general public of the state of Missouri, and that by reason of the said respondent so fixing and establishing and maintaining the tariff, freight and passenger charges demanded by and to be paid to the said Merchants Bridge Terminal Railway Company, competition between said companies has become and now is, stifled and destroyed.

Said tariffs and charges so fixed, ordained and established by respondent applying to all the properties and services rendered or to be rendered by the said St. Louis Merchants Bridge Terminal Railway Company from any and all points where connections are made by the lines of road of the respondent and where like service may be by it performed, so that the said respondent is now and has since the said date fixed, regulated and maintained the tariffs of all freight and passenger business conducted by said two companies in the state of Missouri upon their lines of road and railway facilities, so as aforesaid constructed and operated. That said respondent has, since said date, through its officers, agents and servants, formulated the business policy to be pursued by the said St. Louis Merchants Bridge Terminal Railway Company, and said St. Louis Merchants Bridge Terminal Railway Company has, through its officers, agents and servants, accepted and carried out the business policy so formulated for it by respondent. That by reason of the premises aforesaid, the respondent has obtained control and ever since said date has maintained control over the road, property, franchises, equipment and appurtenances of the said St. Louis Merchants Bridge Terminal Railway Company in the state of Missouri, and has since said date does now as aforesaid, fix the tolls, tariffs and charges to be paid to the said St. Louis Merchants Bridge Terminal Railway Company for its services in conveying freight and pasengers, freight and passenger cars and doing a general railroad business from the various railroads centering in St. Louis and passing into the Union Station or the several depots in said city and in

the transfer and conveyance of freight and pasengers from the east, north, south and west routed through St. Louis, with a destination beyond said city.

Informant further charges that by reason of the premises aforesaid, the said Terminal Railroad Association is in control of the roads, property, franchises and equipments of the said St. Louis Merchants Bridge Terminal Railway Company in the state of Missouri, that respondent dictates, formulates and controls the policy and business of said St. Louis Merchants Bridge Terminal Railway Company, fixes, regulates and controls the passenger and freight tariffs and charges on all passengers and freight pulled, hauled and conveyed by the said St. Louis Merchants Bridge Terminal Railway Company in the said state of Missouri and the right to fix, regulate and control the price to be paid by all railroad companies running into the said city and desiring to use the tracks of said St. Louis Merchants Bridge Terminal Railway Company as an entrance to and as an outlet from, said city; that the object of such control by said respondent is to prevent and avoid the competition of the roads, tracks and terminal facilities of the said St. Louis Merchants Bridge Terminal Railway Company.

Informant further charges that by reason of the premises aforesaid the said contract, so executed on the 17th day of August, 1893, by and between respondent and the St. Louis Merchants Bridge Terminal Railway Company, having been made by and between competitive roads as aforesaid, is illegal and void, that said contract is in violation of and in conflict with the provisions of section 17 of article 12 of the Constitution of the state of Missouri; that said lease so made is in conflict with and violative of section 1062 of the Revised Statutes of 1899 of Missouri, and is in conflict with and violative of the public welfare and public policy of the state of Missouri. And which said provision of the Constitution and the statutes last above referred to prohibit the consolidation of competing lines of railway.

Informant further charges that the said acts and conduct of the respondent in fixing and formulating and so agreeing to formulate the freight and passenger tariff and railway charges of the said St. Louis Merchants Bridge Terminal Railway Company as aforesaid and the accept-

ance and carrying out of the same by the said latter company through is officers, agents and servants, constitutes an unlawful agreement, combination and conspiracy in violation of section 17, article 12 of the Constitution of Missouri, and contrary to and in violation of the statutes and common law of this state.

Informant further charges that the acts and conduct of the said respondent in securing and obtaining all of the subscribed, issued and outstanding capital stock of the aforesaid said St. Louis Terminal Railway Company, the said St. Louis Terminal Railway Company being a competing corporation, is in conflict with the provisions of section seventeen (17) of article twelve (12) of the Constitution of Missouri, and of section 1062 of the Revised Statutes of the state of Missouri, and is in conflict with and violative of the public welfare and public policy of the state of Missouri, for the reason that by means of the ownership of all the outstanding capital stock of said company, the said respondent has absolute and full control of all the property of the said St. Louis Terminal Railway Company and by virtue thereof fixes, regulates and controls all tolls, fares and charges to be paid for the use of its tracks, engines, switches, side tracks, depots and other terminal facilities, by the various railroads entering St. Louis and desirous of running their trains over the tracks of the said St. Louis Terminal Railway Company, in their entrance into said city, and unlawfully fixes the passenger and freight tariff in the carrying and conveyance of freight and passengers over its lines of roads as aforesaid.

Informant further charges that by reason of the premises aforesaid, wherein the respondent has become the owner of 17,800 shares of the capital stock of the said St. Louis Merchants Bridge Terminal Railway Company, said shares being more than sufficient to control the policy of said company, the said Terminal Railroad Association of St. Louis is now exercising control over the property of the said St. Louis Merchants Bridge Terminal Railway Company, which said St. Louis Merchants Bridge Terminal Railway Company is a competitive road with the said respondent.

Informant further charges that the respondent has no right or authority in law to acquire and has no authority

to hold the stock aforesaid, of the companies aforesaid, the respondent and said companies being competitive roads in the terminal railroad business of said city.

Informant further charges that by reason of the premises aforesaid the respondent had no right or authority to make and enter into the said lease and contract with the said St. Louis Merchants Bridge Terminal Railway Company, dated August 17, 1893, as aforesaid, and that respondent had no right or authority to make and enter into the said lease and contract with the said St. Louis Terminal Railway Company, and the said St. Louis Merchants Bridge Terminal Railway .Company, dated August 17th, as aforesaid.

Informant further charges that by reason of all the premises aforesaid, respondent has exercised its powers, franchises and privileges of a corporation in an unlawful, unauthorized and illegal manner as aforesaid, that it has abused its corporate powers, and grossly offended against the Constitution and laws of the state of Missouri to the great injury, damage, detriment and prejudice of the people of said state; that it is still so abusing its corporate powers and franchises in the manner aforesaid, and is now grossly, willfully and unlawfully so offending against the Constitution and laws of the state of Missouri, to the great damage, detriment, injury and prejudice of the people of said state; that respondent has usurped and is still unlawfully and willfully usurping the rights, franchises and privileges aforesaid not conferred upon it by law, and, in the manner aforesaid respondent still usurps, the illegal and unwarranted rights and privileges aforesaid, in contempt of and to the great damage and prejudice of the state of Missouri aforesaid.

Wherefore, the informant herein, who prosecutes in this behalf for the state of Missouri, prays that said respondent, the Terminal Railroad Association of St. Louis, be excluded from all corporate rights, privileges and franchises under the laws of the state of Missouri, and that its certificate of incorporation, under and by virtue of the laws of the state of Missouri, be declared forfeited and that due process of law may be awarded against the said respondent, ousting

it of all and every of its corporate rights, privileges and franchises.

And for further cause of action, informant charges and states that the respondent, Terminal Railroad Association of St. Louis was on the 17th day of August, 1893, prior thereto and ever since has been and now is, organized as a railroad company under the general railroad corporation laws of the state of Missouri, and as such has been and now is the owner of a standard gauge railroad in the state of Missouri, conducting and operating said roads in said state, and has been ever since, prior to and now is doing a general railroad business in the state of Missouri; that the St. Louis Merchants Bridge Terminal Railway Company is a regularly incorporated railroad company, under the railroad corporation laws of the state of Missouri, and was on the 17th day of August, 1893, prior thereto and ever since has been and is now the owner of a standard gauge railroad in the state of Missouri and has been ever since prior to and now is conducting and operating said roads in said state, and as such was then and now is doing a general railroad business in said state; that the said respondent and the said Merchants Bridge Terminal Railway Company have been during said time and now are each for themselves engaged in the conveyance and carrying of freight and passengers along, over and upon their respective lines of road; that during all of said times said companies and their respective roads were and now are fully equipped with engines, freight and passenger cars and other necessary equipment for the execution and performance of the business for which they were incorporated, and as such have been conducting their said business.

Informant further states that certain of the roads, lines and tracks of the St. Louis Merchants Bridge Terminal Railway Company now and at all times hereinbefore mentioned, commence at the present Union Station, in the city of St. Louis, Missouri, situated between Eighteenth and Twenty-first streets and Market street and Clark avenue, running thence eastwardly, with double track to and across block 419 and Eighth street; thence to and across block 161 and Sixth street; thence to and across block 161 and Sixth street; thence to and across block 160 and Broadway;

thence to and across block 77 and Fourth street; thence to and across block 52 and Third street; thence to and across city block 41 and Second street; thence to and across city block number 1 and Plum street to Poplar street and thence to the wharf on the west bank of the Mississippi river by elevated road and thence northeasterly along said wharf across and upon city block 18, Carr street and Biddle street, First street and from First street diagonally across North Market street and Hall street in a northerly direction, and thence easterly from Hall street to the "Merchants Bridge" at the foot of Ferry street in said city of St. Louis, thence across the Mississippi river over and upon the "Merchants Bridge" to the state of Illinois and the city of East St. Louis, directly opposite the city of St. Louis, Missouri. The total length of tracks and road operated by said company being about fifty miles.

Informant further states that certain of the lines of road of the respondent now and at all times hereinafter mentioned begin at the present Union Station in the city of St. Louis, Missouri, situated at Eighteenth and Twenty-first streets and Market street and Clark avenue, running thence by double track northeasterly across city block 427 to Eighth and Spruce streets, thence through what is known as the "St. Louis Tunnel" in a northeasterly direction to "Eads Bridge" at the foot of Washington avenue in said city, thence across the Mississippi river upon the said "Eads Bridge" to the state of Illinois and the city of East St. Louis, directly opposite the said city of St. Louis, Missouri. The total length of tracks and road operated by the said respondent being about one hundred miles.

That respondent holds and owns a lease on said "Eads Bridge" whereby it is granted the use and occupancy of said bridge in perpetuity and whereby it is now and at all times herein mentioned has been occupying, controlling and operating the same. That the Merchants Bridge Terminal Railway Company holds a lease upon the said "Merchants Bridge" whereby it is granted the perpetual use and occupancy of said Merchants Bridge, which spans the Mississippi river at St. Louis and is now and at all times herein mentioned has been operating and using said bridge under said lease.

That respondent and the St. Louis Merchants Bridge Terminal Railway Company are now and at all times hereinbefore mentioned were, each for itself, engaged in hauling and carrying freight and passengers for hire as common carriers from St. Louis, Missouri, to East St. Louis, Illinois, and from East St. Louis, Illinois, to St. Louis, Missouri, and as such own and operate parallel and competing lines of road in this state.

That on the .... day of ....., 1893, the respondent, well knowing that the St. Louis Merchants Bridge Terminal Railway Company was its competitor in business, they each owning and operating parallel and competing lines of road in this state, unlawfully purchased and secured control of 4,384 shares of the capital stock of the said St. Louis Merchants Bridge Terminal Railway Company; that since said date the respondent has unlawfully purchased and acquired 13,416 additional shares of the capital stock of the said St. Louis Merchants Bridge Terminal Railway Company, so that the said respondent now owns and controls 17,800 shares of the capital stock of said company; that the total number of the shares of stock of said St. Louis Merchants Bridge Terminal Railway Company issued and now outstanding is 29,395, so that the total number of such shares so acquired and held by respondent constitutes more than a majority in interest of the stock of said company subscribed, issued and outstanding.

Informant further states that on the .... day of ....., 1893, respondent, well knowing the premises aforesaid, through its officers, agents, servants and stockholders, entered into an agreement and understanding with the said St. Louis Merchants Bridge Terminal Railway Company, its officers, agents, servants, stockholders, by which the said respondent was given the right to formulate, fix, establish and maintain the freight and passenger tariffs and prices to be charged by the said St. Louis Merchants Bridge Terminal Railway Company for all freight and passengers carried by it upon its lines of road; that all such freight and passenger tariffs, fares and charges so fixed and formulated by the said respondent for the St. Louis Merchants Bridge Terminal Company have been accepted, adopted and maintained by the said last named company, its agents, officers,

servants and stockholders; that said respondent, well knowing the premises aforesaid, has, ever since said date, formulated, fixed, controlled and regulated the said freight and passenger tariffs and charges of the said St. Louis Merchants Bridge Terminal Railway Company in the state of Missouri for the carrying and conveying of freight and passengers upon and over its lines of road hereinbefore described and referred to and does now fix, formulate and maintain the same, to the great damage and detriment of the people of the state of Missouri.

That since the said .... day of ....., 1893, the respondent, pursuant to an understanding and agreement by it made with said company, has and does now, through its officers, agents, servants and stockholders, formulate the business policy to be pursued by the said St. Louis Merchants Bridge Terminal Railway Company and the said St. Louis Merchants Bridge Terminal Railway Company has through its officers, agents, servants and stockholders, accepted and carried out the business policy so formulated for it by respondent, and is now carrying out the same.

Informant further charges that by reason of the premises aforesaid the said contract and agreement so accepted on the 17th day of August, 1893, by and between respondent and the St. Louis Merchants Bridge Terminal Railway Company, haveing been made between parallel and competing roads as aforesaid, is illegal and void; that said contract is in violation of and in conflict with the provisions of section 17, article 12 of the Constitution of the state of Missouri; that said contract and agreement so made is in conflict with and violative of section 1062 of the Revised Statutes of 1899 of Missouri, and is in conflict with and violative of the law of public welfare and public policy of the state of Missouri.

Informant further charges that the said acts and conduct of the respondent in fixing and formulating the freight and passenger tariffs and charges to be demanded by the said St. Louis Merchants Bridge Terminal Railway Company as aforesaid, and the acceptance and carrying out of the same by the said latter company, through its officers, agents, servants and stockholders, constitutes an unlawful agreement, combination and conspiracy in violation of sec-

tion 17, article 12 of the Constitution of Missouri and contrary to and in violation of section 1062 of the Revised Statutes of the state of Missouri and contrary to and in violation of the common law of this state.

Informant further charges that the acts and conduct of the said respondent in securing and obtaining control of 17,800 shares of the capital stock of the said St. Louis Merchants Bridge Terminal Railway Company, said shares being more than sufficient to control the policy of said company, is in conflict with and violative of section 17, article 12 of the Constitution of Missouri, and section 1062 of the Revised Statutes of 1899 of Missouri, and in conflict with and violative of the public welfare and public policy and common law of the state of Missouri, said shares being more than sufficient to control the policy of said company, and the ownership and control of said shares of stock by the said respondent being sufficient to and enables it to exercise control over, and said respondent is now exercising control over the property of the said St. Louis Merchants Bridge Terminal Railway Company.

Informant further states that by reason of the premises aforesaid the respondent had no right or authority in law to make and enter into said contract and agreement with said St. Louis Merchants Bridge Terminal Railway Company, dated August 17, 1893, as aforesaid; that it had no right to purchase the 17,800 shares of the capital stock of the said St. Louis Merchants Bridge Terminal Railway Company or any part of said shares, and that it had and has now no right to formulate, fix and maintain the freight and passenger tariffs to be charged by the said St. Louis Merchants Bridge Terminal Railway Company for the conveyance and carrying of freight and passengers over its lines of road; that it had and now has no authority in law to enter into the agreement and understanding to formulate, supervise and direct the business policy of the said St. Louis Merchants Bridge Terminal Railway Company.

Informant further charges that by reason of the premises aforesaid respondent has exercised its powers, franchises and privileges of a corporation in an unlawful, unauthorized and illegal manner as aforesaid; that it has abused

its corporate powers and grossly offended against the Constitution and laws of the state of Missouri, to the great injury, damage and detriment and prejudice of the people of said state; that it is still so abusing its corporate powers and franchises in the manner aforesaid and is now grossly, willfully and unlawfully so offending against the Constitution and laws of the state of Missouri, to the great damage, detriment and injury and prejudice of the people of said state; that respondent has usurped and is still unlawfully, willfully and illegally usurping the rights, franchises and privileges aforesaid, not conferred upon it by law, in contempt of and to the great damage and prejudice of the people of the state of Missouri.

Whereof, the informant herein, who prosecutes in this behalf for the state of Missouri, prays that said respondent the Terminal Railroad Association of St. Louis, be excluded from all rights, privileges and franchises under the laws of the state of Missouri, and that its certificate of incorporation, under and by virtue of the laws of the state of Missouri, be declared forfeited and that due process of law may be awarded against said respondent, ousting it of all and every of its corporate rights, privileges and franchises.

Attorney General.
Assistant Attorney General.

IN THE SUPREME COURT OF MISSOURI
In Banc
October Term, 1903.

State of Missouri, Ex-Informatione
Edward C. Crow, Attorney General,
Informant.

vs.

Terminal Railroad Association,
of St. Louis,
Respondent.

Comes now respondent, and, having heard the information read, protesting that the matters therein alleged are by no means sufficient in law to put it upon plea thereto, answering, says:

1. As to the matters and things set forth in the first, second, third and fourth paragraphs of the information, it is true that the Tunnel Railroad of St. Louis was incorporated on the day, under the laws, for the term of years, with the capital stock, for the purposes, and as in the information stated; that soon after its incorporation it acquired and took possesion of the property and franchises of a former corporation, the St. Louis Tunnel Railroad, which property and franchises consist as in the information stated; that said property and franchises were leased in perpetuity to the Wabash, St. Louis & Pacific Railroad and the Missouri Pacific Railway Company, but respondent denies that the Terminal Railroad of St. Louis ever at any time acquired the lease of said property or operated or controlled the same.

Respondent admits that said property known as the Tunnel, or Tunnel Railroad, and its franchises have been controlled and operated by respondent since respondent began business in October, 1889, but respondent denies that it acquired the same through or by means of the consolidation of the property and franchises of the Union Railway and Transit Company and property and franchises of the Tunnel Railroad of St. Louis.

Respondent admits that by the terms of said lease the Tunnel Railroad of St. Louis was and is required to preserve and maintain its corporate existence, and that the expense thereof is, by the terms of the lease, required to be paid by the lessee.

Respondent denies that the stock of the Tunnel Railroad of St. Louis is deposited with or held by the Mercantile Trust Company of New York, as trustee, with the right in said company to vote the same at each annual stockholders' meeting of the Tunnel Railroad of St. Louis, and denies that the stock of the Tunnel Railroad of St. Louis, or any part thereof, belongs to the respondent herein, or that the Mercantile Trust Company of New York or this respondent has, or ever had, any interest whatsoever, directly or indirectly, of any character, in any of the stock of the Tunnel Railroad of St. Louis.

Respondent admits that the St. Louis Bridge Company is a corporation organized under the laws, at the time, for

the term of years, with the capital stock, for the objects and purposes, and as stated in the information; and that the St. Louis Bridge Company, soon after its organization, acquired the bridge known as "Eads Bridge," which is located as in the information stated.

Respondent admits that shortly after the St. Louis Bridge Company was organized the Eads Bridge was leased in perpetuity to the Wabash, St. Louis & Pacific and Missouri Pacific Railway Companies.

2. As to the matters and things set forth in paragraphs five to fourteen, both inclusive, of the information, respondent denies that on the 10th day of October, 1889, or at any time, the Terminal Railroad of St. Louis acquired the lease of said bridge, or at any time operated the same, and denies that under the terms of the consolidation of the Union Railway and Transit Company and the Terminal Railroad of St. Louis this respondent acquired the lease of said bridge.

Respondent admits that since it began business in October, 1889, it has been the lessee and in control and operation of said bridge.

Respondent denies that all of the stock of said St. Louis Bridge Company is held by the Mercantile Trust Company of New York, as trustee, or in any other capacity, with the right in said Trust Company to vote the same at the annual meetings of the stockholders of said Bridge Company, or for any purpose whatever; and respondent denies that all of the stock of said St. Louis Bridge Company, or any part thereof, belongs to respondent.

Respondent avers the fact to be that the stock of the St. Louis Bridge Company is divided into three classes, to-wit: $2,490,000 of first preferred, $3,000,000 of second preferred and $2,500,000 of common, and that said common stock is held by said Mercantile Trust Company of New York in trust, with the right to vote the same at all meetings of the stockholders of said St. Louis Bridge Company.

Respondent avers that it has no interest whatever, directly or indirectly, in any of the stock of the St. Louis Bridge Company.

Respondent admits that by the terms of the lease of said bridge, held by respondents, the St. Louis Bridge Company is required to keep its corporate powers in existence, and for that purpose respondent is required to pay the expense thereof as part of rental charges.

Respondent admits that the Union Railway and Transit Company of St. Louis was incorporated at the time, under the laws, with the capital stock, for the objects and purposes, and as in the information stated; that the Union Depot Company of St. Louis was organized at the time, for the term of years, with the capital stock, for the purposes, and as in the information stated; that said Union Railway and Transit Company of St. Louis on the 24th day of July, 1889, adopted a resolution accepting the provision Article II of Chapter 21 of the then Revised Statutes of the state of Missouri, as in the information stated.

Respondent admits that the Terminal Railroad of St. Louis was incorporated at the time, under the laws, for the term of years, with the capital stock, for the purposes, and as in the information stated, and that the capital stock of said Terminal Railroad of St. Louis was increased at the times and to the extent in the information stated.

Respondent admits that on the 26th day of July, 1889, an agreement of consolidation was entered into between said Union Railway and Transit Company of St. Louis and said Terminal Railroad of St. Louis, whereby said companies were wholly consolidated, forming respondent, the Terminal Railroad Association of St. Louis, with a total authorized capital stock of $7,000,000, which was subsequently increased to $12,000,000, and subsequently to $50,000,000, at the times and as in the information stated.

3. As to the matters and things set forth in the fifteenth paragraph of the information respondent denies that on the 26th day of July, 1889, it was in control of the property, franchises and effects of the St. Louis Bridge Company, Tunnel Railroad of St. Louis, Union Depot Company of St. Louis, Union Railway and Transit Company of St. Louis, and Terminal Railroad of St. Louis; but respondent avers the fact to be that on or about the 10th day of October, 1889, it did acquire control and possession, and since

that date has had control and possession, of all the property of the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, and since said date has operated said properties.

Respondent admits that the properties mentioned in said fifteenth paragrah of the information constituted a large part of the termini, switching and car storage facilities of the nature and designed for the uses in said fifteenth paragraph of the information set forth.

4. As to the matters and things set forth in the sixteenth to the twenty-fourth paragraphs, both inclusive, of the information, respondent admits that the St. Louis Merchants Bridge Terminal Railway Company was incorporated at the time, for the term of years, and with the capital stock as in the sixteenth paragraph of the information stated, and that the capital stock of said company was subsequently increased as in said paragraph stated.

Respondent admits that the articles of incorporation of the St. Louis Merchants Bridge Terminal Railway Company were amended as in the seventeenth paragraph of the information stated.

Respondent admits that the St. Louis Terminal Railway Company was incorporated under the laws, at the time, with the capital stock, for the term of years, for the purposes, and as in the eighteenth paragraph of the information stated.

Respondent admits that a contract and agreement was entered into between the St. Louis Terminal Railway Company and the St. Louis Merchants Bridge Terminal Railway Company on the date and in substance as in the nineteenth to twenty-fourth paragraphs of the information stated.

5. As to the matters and things set forth in the twenty-fifth paragraph of the information, respondent denies that upon the organization of the St. Louis Merchants Bridge Terminal Railway Company, or by means of the railway properties, franchises, privileges, or services to it belonging, or in said paragraph twenty-fifth of the information mentioned, there was provided any means of competition with any of the facilities of respondent, or that the St. Louis

Merchants Bridge Terminal Railway Company was originally intended to be a competitor of respondent, with respect to railway traffic in the city of St. Louis.

6. As to the matters and things set forth in the twenty-sixth paragraph of the information, respondent admits that now, and ever since the commencement of business by it, it has controlled and operated the railway tracks, side tracks, warehouses and other terminal facilities in said paragraph twenty-sixth of the information stated, and has used the same for the purposes therein stated; but respondent denies that the aggregate amount of trackage owned or controlled by it is as in said paragraph stated.

7. As to the matters and things set forth in the twenty-seventh paragraph of the information, respondent admits that the railway of said St. Louis Merchants Bridge Terminal Railway Company is located substantially as in said paragraph stated, and that said Railway Company owns various side tracks connecting with various industrial establishments in said city of St. Louis, and that said terminal properties of said Railway Company are used substantially for the purpose in said twenty-seventh paragraph stated; but respondent denies that said St. Louis Merchants Bridge Terminal Railway Company is lessee of the St. Louis Merchants Bridge.

Respondent admits that the tracke of said Bridge Company are connected with the tracks of said St. Louis Merchants Bridge Terminal Railway Company, and are used in connection therewith in the conduct of its business over said bridge; but respondent denies that the total mileage of said St. Louis Merchants Bridge Terminal Railway Company is as in the information stated.

8. As to the matters and things set forth in the twenty-eighth paragraph of the information, respondent admits that said St. Louis Merchants Bridge Terminal Railway Company was incorporated for the purpose of engaging in the same character and kind of business as that of respondent; but respondent denies that said company was organized to compete with respondent in the terminal railroad and transfer business in the city of St. Louis.

9. As to the matters and things set forth in the twenty-ninth, thirtieth and thirty-first paragraphs of the information, respondent admits that on the 13th day of August, 1893, an agreement was entered into between the St. Louis Merchants Bridge Terminal Railway Company, this respondent, and the St. Louis Terminal Railway Company, the general nature and effect of which are as in said paragraphs stated.

10. As to the matters and things set forth in the thirty-second and thirty-third paragraphs of the information, respondent admits that on the 13th day of August, 1893, an agreement was entered into between it and said St. Louis Merchants Bridge Terminal Railway Company, the nature and effect of which are as stated in part in said paragraphs.

11. As to the matters and things set forth in the thirty-fourth paragraph of the information, respondent admits that it has acquired all the shares of stock of the St. Louis Terminal Railway Company, and that by virtue of its ownership of said stock it controls all of the property, rights, privileges and franchises of said St. Louis Terminal Railway Company, as well as the bonds of said company, as in said paragraph stated.

12. As to the matters and things set forth in the thirty-fifth paragraph of the information, respondent admits that it owns the stock of the St. Louis Merchants Bridge Terminal Railway Company to the extent in said paragraph stated.

13. As to the matters and things set forth in the thirty-sixth paragraph of the information, respondent denies that it is in control of the roads, property and franchises of the said St. Louis Merchants Bridge Terminal Railway Company in the city of St. Louis; that it dictates, formulates and controls the policy and business of said St. Louis Merchants Bridge Terminal Company, fixes, regulates and controls the tolls, charges and price to be paid on all freight and freight cars handled, transferred or conveyed by said St. Louis Merchants Bridge Terminal Railway Company in the said city of St. Louis, and the right to fix, regulate or control the price to be paid by all railroad companies

running into the said city and desiring to use the tracks of said St. Louis Merchants Bridge Terminal Railway Company as an entrance to and as an outlet from said city.

14. As to the matters and things set forth in paragraphs thirty-seven to forty-two, both inclusive, of the information, respondent denies that said contract of the 13th day of August, 1893, between it and said St. Louis Merchants Bridge Terminal Railway Company is in any manner illega. or void, or in violation of or in conflict with the provisions of Section 17 of Article 12, or of any other section or article, of the Constitution of the state of Missouri; or that it is in conflict with or violative of Section 1062 of the Revised Statutes of Missouri, or of any other section of said statutes; or that it is in conflict with or violative of the public welfare or of the public policy of the state of Missouri.

Respondent further denies that any of its acts or conduct, in any manner or at any time, have been or are in conflict with or violative of the public welfare or of the public policy of the state of Missouri.

Respondent denies that it is now exercising, or has at any time exercised, control over the property of the St. Louis Merchants Bridge Terminal Railway Company, or that said St. Louis Merchants Bridge Terminal Railway Company is a competitive road with respondent, with respect to railway traffic in the city of St. Louis.

Respondent denies that it had no right or authority in law to acquire or hold the stock of the said St. Louis Merchants Bridge Terminal Railway Company, or of any of the companies the ownership of the stock of which by the respondent is charged in the information and admitted herein.

Respondent denies that it and any of said companies are competitive roads in the terminal railway business in said city of St. Louis.

Respondent denies that it had no right or authortiy to make or enter into the said contract with said St. Louis Merchants Bridge Terminal Railway Company. Respondent avers that it had full right, authority and power to make and enter into said contract and leases, and that the same are in all respects valid.

Respondent denies that it has in any manner exercised any of its powers, franchises, or privileges of corporation in any unlawful, unauthorized or illegal manner at any time; denies that it has abused any of its corporate powers, or in any manner offended against the Constitution of the laws of the state of Missouri; denies that it has usurped any rights, franchises or privileges not conferred upon it by law.

15. As to the matters and things set forth in the forty-fourth to forty-eighth paragraphs, both inclusive, of the information, respondent admits that the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, are corporations organized and existing under the laws of the state of Missouri, but avers that the Union Railway and Transit Company of St. Louis, and the Terminal Railroad of St. Louis were heretofore, as in the information stated and as in this return admitted, consolidated, forming respondent, the Terminal Railroad Association of St. Louis.

Respondent admits that it is a corporation organized under and by virtue of the laws of the state of Missouri, at the time and for the purposes in part as in the information stated, and that it owns, controls and operates certain terminal properties and facilities in the city of St. Louis, as herein and in the information stated.

Respondent admits that the St. Louis Transfer Railway Company is a corporation organized under the laws, at the time, with the capital stock, and for the purposes in the information stated, and that its line of railway is constructed substantially as in the information stated.

Respondent denies that it now has, or at any time has had, any control whatsoever over said St. Louis Transfer Railway Company, or that it has at any time, in any way or in any manner, dictated the policy or regulated, fixed or controlled the tolls, rates or charges of said company in the rendition of any service whatsoever.

Respondent denies that it is now or that it at any time ever has been the owner of any of the stock of said St. Louis Transfer Railway Company.

16. Further and fully answering, respondent avers and states the facts to be that prior to the year 1874 there were

few industries located in or in the neighborhood of St. Louis which had railway connections, and the freight and passenger traffic between the various railway lines then entering the city of St. Louis and the city of East St. Louis, and between such railway lines and the industries located in St. Louis, was handled by means of wagons and ferries. For the purpose of facilitating the handling of freight and passenger traffic between and in said cities, there was constructed in 1874 a railway bridge across the Mississippi river between said cities, commonly known and hereinafter referred to as the Eads Bridge, which bridge subsequently became and now is the property of the St. Louis Bridge Company. Concurrent with the construction of the Eads Bridge, and for use in connection therewith, there was constructed a tunnel commonly known and herein referred to as the Tunnel, from the western terminus of the Eads Bridge, at or near Washington avenue in St. Louis, to a point at or near Eighth and Poplar streets in said city, which tunnel subsequently became and now is the property of the Tunnel Railroad of St. Louis. The Tunnel was designed to be used in connection with the Eads Bridge, so that railway trains might make a continuous passage over the bridge and through the tunnel, which continuous passage was and is essential to the use of the bridge and tunnel for railway traffic. The Eads Bridge and Tunnel and the terminal facilities connected therewith were operated for a period of five years after construction continuously at a loss, and about the year 1879 various mortgages severally covering the Eads Bridge and Tunnel were foreclosed, and these properties severally and respectively became the properties of the St. Louis Bridge Company and the Tunnel Railroad of St. Louis. While the Eads Bridge and Tunnel were nearing completion it became manifest for the operation of these properties and the handling of railway traffic in the city of St. Louis, that it was essential there should be constructed and maintained, in connection with the Eads Bridge and Tunnel, a system of railway terminals consisting of main, lead and side tracks, a union station for passengers, and freight stations and warehouses for handling the commerce of the city of St. Louis. To accomplish these objects the Union Railway and Transit Company of St.

3215

Louis and the Union Depot Company of St. Louis were organized under the laws of Missouri, relating to union depot and terminal companies, the former for the purpose of making a continuous and connected route for trains through the tunnel and over the bridge and the railways constructed or to be constructed approaching the entrance to the tunnel, and the further purposes of constructing and operating terminal facilities in connection with the Eads Bridge and Tunnel; and the latter company for the purpose of constructing passenger and freight stations for use in connection with the operation of the Eads Bridge and Tunnel and the properties of the Union Railway and Transit Company of St. Louis. Subsequently the Terminal Railroad of St. Louis was organized, under the laws of Missouri relating to union depot and terminal companies, for the purpose of acquiring additional terminal facilities to be used in connection with the railway facilities of the Eads Bridge and Tunnel, the Union Depot Company of St. Louis and the Union Railway and Transit Company and the Terminal Railroad of St. Louis severally leased all of their properties in perpetuity to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, and thereafter, and until 1881, the properties of these four companies were operated under one control and management, and on the 1st day of July, 1881, all of these properties were leased to the Wabash, St. Louis and Pacific Railway Co. and the Missouri Pacific Railway Company, and were operated by said lessees until October, 1889.

17. Further fully answering, respondent avers and states the facts to be that the operations of the Eads bridge and tunnel and of the terminal properties to be used in connection therewith, as hereinabove specified, from the date of the completion of the Eads bridge and tunnel, in 1874, up to the year 1889, had been without profit at any time to any of the various operating companies. In the last named year the railway traffic at and between the cities of St. Louis and East St. Louis, and in and in the neighborhood of St. Louis, had greatly increased, and the city of St. Louis had become an important gateway for the passage of a large part of the through railway traffic of the country. A number of trunk lines had their termini either in St.

Louis or East St. Louis, and it was important to these lines that traffic be directed to the St. Louis gateway.

The city of St. Louis was then growing rapidly in population and in commercial importance; a large number of manufacturing and industrial plants were seeking locations in the West, and it was to the interest of St. Louis and of the railway lines entering the city to encourage the location of such industries in and in the neighborhood of this city. To this end it was essential that the St. Louis terminal facilities should be made adequate and should be economically operated. The high values and restricted quantites of land available for terminal railway facilities in and in the neighborhood of St. Louis made it practically impossible for each railway company to own and operate a separate and independent system of terminals, and had such separate ownership and operation been possible the operation thereof would have caused inconvenience and delay, and the expense incident thereto would have imposed heavy and unnecessary burdens upon the railway lines and the commerce of St. Louis. The then existing facilities were insufficient for the proper handling of the expected increase in freight and passenger traffic; the capital invested in the terminal properties having proven unremunerative, the companies then operating these properties were unwilling to make further investment or to continue to carry, unassisted, the risk of loss incident to further operation.

Believing the preservation and enlargement of the terminal system was essential to the proper conduct of their business, and this could be effected only by the cooperation of all railway lines, and to prevent the properties which had been developed by the Bridge, Tunnel, Union Depot, Union Railway and Transit, and Terminal Companies from passing under the control of a single interest which would endeavor to operate these properties upon the basis of profit earning, and which might exact burdensome rates and tolls, divert traffic, and discourage the location of industries in and in the neighborhood of St. Louis, a number of railway lines agreed to form respondent company, the stock of which would be owned in severalty in equal interest by all railway lines desiring the use of the terminal system and willing to assume the risks and burdens incident to

its control and operation, and the properties of which would be available for the use of all railway lines and shippers, without discrimination. With these objects in view, in 1889, respondent company was formed by the consolidation of the Union Railway and Transit Company of St. Louis and the Terminal Railroad of St. Louis, and the issue of stock of respondent, equally divided among the Missouri Pacific; St. Louis, Iron Mountain & Southern; Wabash; St. Louis & Pacific; Cleveland, Cincinnati, Chicago & St. Louis; Ohio & Mississippi, and Louisville & Nashville Railroad Companies, then termed proprietary companies and hereinafter so designated, in connection with the railway lines which subsequently became proprietary companies of respondent company.

In order that respondent company might from time to time obtain necessary funds for the enlargement of its facilities, it was essential that its security should be guaranteed in some form by the proprietary companies; and to the end that the proprietary companies might be protected in such guarantee it was essential that they should be granted the use in perpetuity of the facilities of the respondent. Accordingly it was agreed that respondent should take over the lease of the bridge and tunnel, acquire the stock of the Union Depot Company, erect new passenger and freight stations, and greatly enlarge the facilities for the handling of traffic between the railway lines and between such lines and industrial plants then and thereafter to be located in and in the neighborhood of St. Louis; that all of these properties should be operated for the equal and joint use and benefit of the proprietary companies and such other railway lines as might desire to become proprietary companies, and in the interest of facilitating the handling and increasing railway traffic in and in the neighborhood of St. Louis; that the properties should be operated upon a safe and economic basis; and that the rates and charges should be so regulated that the revenue therefrom should be sufficient only to meet expenses of operation, repairs, improvements, maintenance and fixed charges.

In conformity with this understanding and agreement, from time to time various other railway lines entering the city of St. Louis or East St. Louis have been admitted

as proprietary lines of respondent, on equal terms and with equal stock ownership, so that now the following railway lines: The Missouri Pacific Railway Company; St. Louis, Iron Mountain & Southern Railway Company; Wabash Railroad Company; The St. Louis, Vandalia & Terre Haute Railroad Company; Baltimore & Ohio Southwestern Railroad Company; Cleveland, Cincinnati, Chicago & St. Louis Railway Company; Louisville & Nashville Railroad Company; St. Louis & San Francisco Railroad Company; The Chicago, Rock Island & Pacific Railway Company; Southern Railway Company; Illinois Central Railroad Company; The Chicago & Alton Railway Company; Chicago, Burlington & Quincy Railway Company, and Missouri, Kansas & Texas Railway Company have become and now are proprietary lines of respondent company, owning in severalty each a like amount of the stock of respondent company, and all bound in severalty by an agreement with respondent, whereby each is granted the right in perpetuity to use jointly with the others all the terminal facilities at any time owned or controlled by respondent, and in consideration for such use each of the proprietary lines is bound to pay such tolls and charges as will enable respondent to meet its fixed charges and expenses of operation, repair, improvement and maintenance. The said proprietary lines constitute all of the principal railway lines entering the cities of St. Louis and East St. Louis.

18. Further fully answering, respondent avers and states the facts to be that, in keeping with the policy inducing, as in the preceding paragraph stated, the formation of respondent company, and in furtherance of the purposes and objects therein outlined, respondent has from time to time for the purpose of increasing its terminal facilities, borrowed large sums of money, issuing therefor its bonds, secured by mortgages upon its property, and further secured by the agreement of the proprietary lines to forever make use of the terminal facilities of respondent. By reason of the premises, the interests of each and all of the proprietary lines have become identified in perpetuity with the interests of respondent, under terms and conditions whereby the railway facilities of respondent are operated at all times on the basis of practically actual cost, and open at all times

to the equal joint use of the proprietary lines, and of such other railway lines as may from time to time desire such use. The purpose and effect of such union of interests and joint use of propertiies were, are, and will at all times continue to be subservient to the best interests of the public and of the commerce of the city of St. Louis. In furtherance of this purpose, large sums of money have been recently invested by respondent in the enlargement and extension of its facilities, and respondent now has in course of construction and erection betterments and improvements which will cost many millions of dollars. It is the intention of respondent to continuously enlarge and increase its facilities, so that the same will at all times be commensurate with the demands of railway traffic in and in the neighborhood of the city of St. Louis.

19. Further fully answering, respondent avers and states the facts to be that the bridge known as the Merchants bridge, and hereinafter so called, was completed about the year 1890, across the Mississippi river at a point near the northern limits of the city of St. Louis, by the St. Louis Merchants Bridge Company, under an act of Congress requiring the bridge to be open for the use of all railway companies. The railway of the St. Louis Merchants Bridge Terminal Railway Company (a company organized under the laws of Missouri relating to union depot and terminal companies), hereinafter referred to as Merchants Company, was constructed by that company in the year 1890, connecting with the Merchants bridge and extending southwardly to a point at or near Seventh and Gratiot streets, in the city of St. Louis. The properties of the Merchants Company have at no time had any direct connection with any of the railway lines entering the city of St. Louis, are not and at no time have been competing properties with the properties of respondent in the handling of freight and passenger traffic originating at and destined to any point in the state of Missouri. There are no industries located on the railway line of the Merchants Company which are reached by the railway lines of respondent. The railway tracks of respondent, as well as the railway tracks of the Merchants Company, are constructed in part over and along the streets of the city of St. Louis, and under ordinances

of said city which compel the granting of the use of the railway tracks of each company to any and all railway companies desiring such use.

The freight and passenger traffic in St. Louis is large and has been steadily increasing since the construction of the Eads bridge in 1874; the volume and growth of this traffic are largely due to the facilities afforded by respondent for the handling of such traffic on the basis of practically the cost of operation. Few of the railway lines entering the city of St. Louis have direct connection with any other railway line entering the city, or connection with any industry not located upon or adjacent to its own right-of-way. To facilitate the public convenience and safety in the transmission of freight and passengers in the city of St. Louis and between the various railway lines entering the city and industrial plants located therein, to secure to such industries direct railway connections, and to prevent the unnecessary expense and inconvenience attending the accumulation of a large number of stations, warehouses and terminal yards, and to the end that all industrial plants might be served without discrimination and at like cost for like service, it was desirable and to the best interests of all railway lines and of all persons needing and using terminal facilities in St. Louis, and especially to the end that rapid and economic handling of freight and passenger traffic might be accomplished without change of cars or motive power, that respondent should be permitted to exercise the rights, secured by said ordinances of the city of St. Louis, to operate trains over the facilities of the Merchants Company; and, accordingly, on August 13, 1893, a trackage contract was entereed into between respondent and the Merchants Company whereby respondent was permitted, in connection with other railway companies desiring such use, to move trains and cars over the facilities of the Merchants Company.

20. Further fully answering, respondent avers and states the facts to be that, at the time said contract was entered into, the Merchants Company had no passenger station in the city of St. Louis and had no connection with or means of access to the union passenger station or freight stations which respondent then had in said city, or to the new union

passenger station which respondent was then erecting. To enable the Merchants Company to obtain access to this new union passenger station for the use of such railway companies as might desire to enter the same over the facilities of the Merchants Company, respondent caused to be constructed and now maintains a connection between the southern terminus of the Merchants Company and the new union passenger station.

21. Further fully answering, respondent avers and states the facts to be that the operation of a single union passenger station open to all railway lines, at which change of passengers and baggage may be effected without transfer, and the maintenance of a system of terminals by which freight originating at industries in the city of St. Louis having railway connection, destined to any railway line, or entering the city upon any railway line destined to any such industry, and freight between such industries, may be handled by a single movement, without change of motive power, and for a single charge, are objects which have been and could only be accomplished by the agreement between respondent and the Merchants Company herein referred to, and have resulted in the rendition of railway service with greater facility and dispatch and at less expense than similar services are or can be rendered in any other large city, and have caused substantial and permanent growth in the commerce of the city.

22. Further fully answering, respondent avers and states the fact to be that when the agreement of August 13, 1893, was entered into the only means of access to the new union passenger station in the city of St. Louis, which was then nearing completion, for trains crossing the Mississippi river at St. Louis, was through the tunnel; that the use of the tunnel for such purpose was a source of much complaint and annoyance; that by the making of said agreement and the construction of connections between the union passenger station and the tracks of the Merchants Company, hereinabove referred to, passenger trains crossing the river are now enabled to arrive at and depart from the union passenger station without passing through the tunnel. The several railway lines entering the city of St. Louis from the north,

in order to reach the union passenger station and to connect with the railway lines entering the city from the south and west, find it convenient to use the facilities of the Merchants Company and of respondent. Such use required a joint agreement between such railway lines on the one part and the respondent and Merchants Company on the other. A large number of industries are so located in and in the neighborhood of the city of St. Louis that connection between the same and the trunk railway lines can only be effected by the use of the facilities of both the respondent and the Merchants Company; and to afford said railway lines and industrial plants such needed facilities without discrimination and with dispatch it is essential that at all times respondent and Merchants Company shall co-operate.

23. Further fully answering respondent avers and states the facts to be that its acquisition of the stock and bonds of the St. Louis Terminal Railway Company, which respondent avers it acquired in the year 1893, was to enable respondent to construct and operate a line of railway connecting the various lines of railway entering St. Louis from the south, west and north, and thus enabling respondent to handle with greater facility and convenience traffic to, from and between such railways. At the time such acquisition was effected, the line of said St. Louis Terminal Railway Company had not been constructed, and neither it, said St. Louis Terminal Railway Company, nor said Merchants Company, was financially able to construct the line of said St. Louis Terminal Railway Company; that the line of said railway company has been constructed and completed by respondent, and forms a necessary and proper extension of the system of terminals respondent now and since its incorporation has been endeavoring to develop and complete, and furnishes many desirable locations for industrial plants.

24. Further fully answering, respondent avers and states the facts to be that in August, 1893, when the agreements between respondent and the Merchants Company, herein referred to, were entered into, the lease of the Merchants Bridge to the Merchants Company, referred to in the information, had been cancelled; that the earnings of the

Merchants Company were, and since its incorporation had been, insufficient to meet its operating expenses and the rent due and payable under the terms of said lease.

25. Further fully answering, respondent avers and states the facts to be that the railway tracks in this state owned by respondent are in no sense competitive with the railway tracks owned by the Merchants Company, but the tracks of respondent and of the Merchants Company are so constructed as to constitute a continuous line of railway; and the system of one forms a complement to and extension of the system of the other. No part of the traffic originating at or destined to any points on the tracks of the Merchants Company reaches any one of the railway lines entering St. Louis without passing over the facilities owned by respondent. The facilities of the Merchants Company are and can be of no practical value to it, to the commerce of St. Louis, or to local or through railway traffic unless operated in connection with the facilities of respondent company.

26. Further fully answering, respondent avers and states the facts to be that provisions of the state constitution and of the statutes referred to in the information cannot, do not, and were not intended to apply in any manner to properties or companies of the character of respondent or of the Merchants Company; that the properties of the two companies separately constituted and separately operated are not competitive; that the scarcity of lands in St. Louis available for terminal facilities, the fixed location of the many industrial plants in and about the city requiring railway connections, the large number of railways entering the city, the necessity for connection between such railways and between such railways and such industrial plants, and the importance of making such connections with a single and continuous movement, and for a single charge, make it practically impossible to maintain separate and distinct systems of terminals. The policy of the law and public interests are best subserved by the operation and maintenance of a system of terminals for the common and equal use of all shippers, and which afford all industries

railway connections without discrimination and at equal rates and charges.

27. Further fully answering, respondent avers and states the fact to be that it was organized and exists under and by virtue of the laws of the state of Missouri, relating especially to union depot and terminal companies, for the purpose of maintaining and operating railway facilities for public convenience and safety, and for the transmission of freight and passengers in and in the neighborhood of St. Louis, between the various railway lines entering said city and industrial plants therein, and between such plants and such railways, in such manner as to prevent the unnecessary expense, inconvenience and loss attending the accumulation of a large number of passenger and freight stations; that respondent does not own or operate cars for the transportation of freight, but merely receives and delivers such cars of freight as are destined to or billed from points on its terminal facilities and from or to some one of the railways whose lines connect with respondent's terminal facilities; nor does respondent own or operate trains for the carriage of passengers, but merely furnishes motive power for the movement of passenger trains of various railway lines into and out of the union depot of the city of St. Louis; that being so organized and so existing, it operates and controls a large system of terminals in and in the neighborhood of the city of St. Louis, which system is the result of thirty years of growth and development and the expenditure of large sums of money. It is the policy and purpose of respondent from time to time to add to and enlarge its system of terminals, and as rapidly as the demands of commerce require; to this end it has recently increased its authorized bonded indebtedness to $50,000,000, and has expenden several million dollars in the acquisition of new facilities. The interest on its bonded indebtedness has been guaranteed proportionately by the proprietary lines hereinbefore referred to, and in consideration for, as well as protection against, loss on account of such guarantee, it has been agreed between respondent and the proprietary lines that respondent's facilities shall be forever used by the proprietary lines; in no other way can the acquisition, operation and maintenance of necessary and

adequate terminal facilities in the city of St. Louis be effected.

28. Further fully answering, respondent avers and states the facts to be that copies of the agreement of August, 1893, were duly filed with and in the office of the Railroad and Warehouse Commission of the state of Missouri, on or about the day of their execution, and ever since have been matters of public record and notice; that no question has ever been raised by the state of Missouri as to the validity of said agreements. Relying upon the validity of these agreements and the means afforded thereby to the respondent and Merchants Company of enlarging their respective facilities for the joint operation and more expeditious and convenient handling of traffic, respondent and Merchants Company have so developed their facilities as to avoid incurring unnecessary expense in the construction, maintenance and operation of tracks, and have so adjusted their tracks that trains may readily pass without interruption from one system to the other, thus affording to all industries alike railway service, regardless of location, on either system. Such enlargement of their respective systems and adjustment of tracks have been in the interest of economy, advantageous to the railway lines, to the public and to shippers, and in keeping with the public policy as expressed in the statutes in the state of Missouri, and as construed by its administrative officers.

29. Further fully answering, respondent avers and states the facts to be that all of its acts herein set forth have been done in good faith and in keeping with public policy, in harmony with the constitution and statutes of Missouri, and for the purpose of acquiring, developing, maintaining and operating adequate terminal facilities at and in the neighborhood of the city of St. Louis, for the purpose of developing the commerce of the city and meeting its requirements, affording ready and convenient methods for the handling of freight and passenger traffic, and at all times operating the facilities with economy. Its tolls and charges have at all times been so regulated that the revenue therefrom has been adequate only to make needed improvements and repairs and pay the cost of maintenace, operation

and interest on bonded indebtedness. No dividends nor profits in any form have ever been paid at any time to any of its stockholders. Its properties are, and by the terms of the agreements hereinbefore referred to must forever be, operated without the purpose of producing profit, but solely for the handling of railway traffic at and in the neighborhood of the city of St. Louis.

Wherefore, having fully answered, respondent prays that its rights, franchises and corporate powers be confirmed as heretofore exercised and enjoyed.

Terminal Railroad Association of St. Louis,
By M. F. Watts,
H. S. Priest,
Martin L. Clardy,
W. M. Williams,
Its Attorneys.

IN THE SUPREME COURT OF MISSOURI,
COURT IN BANC.

October Term, 1903.

State ex inf. Attorney General,
Informant,
vs.
The Terminal Railroad Association of St. Louis,
Respondent.

OPINION OF COURT.

This is a proceeding on information of the Attorney General, the object of which is to exclude the respondent corporation from all corporate franchises, and to annul its charter, on the ground that it has violated the law of this state which prohibits a railroad company from consolidating with another company which owns or controls a parallel or competing line.

The information sets out in chronological order the several corporations that have been chartered to handle the terminal railroad business in St. Louis. From its statements the following facts may be gathered:

In 1874 the structure now known as the Eads bridge across the Mississippi was finished. The railroad tracks over that bridge extending from the east to the west entered a tunnel under Washngton avenue, in St. Louis, which ran west and southwest until it merged at a point near Eighth and Poplar streets. In that year a Union Depot Company was chartered which erected a union depot and passenger station with switch tracks, yards, etc., at a point near Twelfth and Poplar streets. From that date on there were various companies chartered under the general railroad law whose object was to construct, maintain and use railroad track for the purpose of handling cars and trains of the various railroad companies coming into and out of the union depot from the south and west, and also from the east over the Eads bridge. Through these corporations, rights-of-way were acquired, tracks and switch yards necessary for this business were constructed connected with the tracks of the Union Depot Company entending from Compton avenue on the west to the properties of the Union Depot Company, thence east and through the tunnel and across the Eads bridge, by means of which trains of all railroads coming from the several directions above indicated were received by the agencies of the terminal company at the various termini of the railroads, and drawn into the premises of the union depot and in like manner trains departing from the city were taken charge of at the union depot by the terminal company and drawn over its tracks and delivered to the railroad companies at their respective termini, and there were also constructed switch tracks and spurs reaching to private business establishments located in the vicinity, or along the general course, of the terminal tracks. The union depot and passenger station and all its equipments were subsequently moved farther west, and now occupy blocks between Eighteenth and Twenty-first streets.

In 1889 the several corporations owning the terminal rights and properties above mmentioned consolidated and took the name of the "Terminal Railroad Association of St. Louis," the original authorized capital stock of which was $7,000,000.00, which in 1893 was increased to $12,000,000.00, and in 1903 to $50,000,000.00. That con-

solidated corporation was organized under the general railroad law of this state. It is the respondent in this suit. The respondent thus became the owner of all the rights and properties above mentioned, including those of the Union Depot Company, all of which, in the language of the information, "constituted the larger part of the terminal, switching and car storage facilities subject to use by persons and corporations engaged in business in St. Louis, and by them in transferring and switching the products so dealt in or manufactured by them to and from the railroad tracks and lines of railroad companies running into, through and from said city, and to and from the various factories, manufacturing establishments, freight depots, warehouses, private tracks and switches, and other places in said city from the factories, storage warehouses, depots, railroad tracks and switches in said city to the place of distribution or delivery depot in said city, and in switching and conveying the freight and passenger cars from and to the switches, side tracks, depots, warehouses and termini of the various railroads running into said city." This condition continued until August 17, 1893, when the respondent, by agreement of that date with the St. Louis Merchants Bridge Terminal Railroad Company, acquired control and practical ownership of the properties of that company. It is that agreement that forms the chief ground of the charge in the information that the respondent has violated the law.

The structure known as the Merchants bridge is a railroad bridge spanning the Mississippi about two miles north of the Eads bridge, its west end being at Ferry street in St. Louis. The St. Louis Merchants Bridge Terminal Railway Company, which we will hereinafter call the Merchants Terminal, was incorporated under the general railroad law of this state in 1887. The object declared in its articles of association was to construct and maintain a standard gauge railroad within the limits of the city from the union depot to the northern city limits; and from a point where it crosses North Market southwardly to Carr street; and from Ferry street eastwardly across the Merchants bridge into the state of Illinois; also from the point where it crosses Pope avenue northwardly to the intersection of Morin and Florissant avenues, in all fifteen miles.

In 1892 the Merchants Terminal Company acquired from another corporation called the St. Louis Terminal Railway Company a line of railroad which was to be constructed from a point near the northern limits of the city running north and westward and then southwestward, belting the city to Arloe station in St. Louis county, which is a station on the St. Louis & San Francisco Railroad. The design of this road was, when it should be completed, to furnish all persons and corporations in the city who might have use therefor "railroad connections, tracks, switches, freight cars, terminal and railroad terminal facilities, including depots, warehouses, car storage therein, switching facilities, and railroad track and terminal connections with the various railroads running into the city," and in this respect the design was to compete with the respondent in doing that business.

On August 17, 1893, the respondent entered into an agreement, the particulars of which are set out in the information and a copy filed as an Exhibit, the result of which was to give the respondent the practical ownership and control of the properties of the Merchants Terminal Company, and, with the other properties held by respondent, to give to respondent control of all instrumentalities now in operation in the city designed for handling the terminal business of the railroads centering in St. Louis.

The conclusion drawn by the Attorney General from those facts is that the respondent, The Terminal Railroad Association of St. Louis, has violated the law as ordained in Section 17, Article XII, of the constitution of this state and as declared in Section 1062, R. S. 1899.

The respondent demurs to the information, assigning as grounds therefor that the information does not show:

1. That respondent's road and that of the Merchaants Terminal are parallel or competing lines.

2. That they are railroads within the meaning of Section 17, Article XII of the constitution, or of Section 1062, R. S.

3. It does show that the properties of the respondent are such as it was authorized to acquire and use by the

provisions of Sections 1164-1165, and the amendments thereof, by the Act of the General Assembly of 1903.

I.

The clause in the constitution which it is contended has been violated is found in Section 17, Article XII, which section is as follows:

"No railroad or other corporation, or the lessees, purchasers or managers of any railroad corporation, shall consolidate the stock, property or franchises of such corporation with, or lease or purchase the works or franchises of, or in any way control, any railroad corporation owning or having under its control a parallel or competing line; nor shall any officer of such railroad corporation act as an officer of any other railroad corporation owning or having the control of a parallel or competing line. The question whether railroads are parallel or competing lines shall, when demanded, be decided by a jury, as in other civil issues."

In 1875 when the convention which framed our constitution was in session there were already lines of railroads running through the state which were parallel and competing, not parallel in a strictly governmental sense and not competing at all points, but parallel as that word had come to be used in a commercial sense as applied to railroads, and competing between principal termini for the business of carrying freight and passengers between those points. And it required then but little foresight to discern that other lines of railroads in a like sense parallel and susceptible of being used in a like sense in competition would be constructed crossing or traversing the state in all directions. The history of those times tells us that the people were already awakened to the advantage that competing roads would afford them and to the necessity of preserving that advantage. It was in view of the condition then existing and conditions then to be reasonably anticipated that the clause in the constitution above quoted was adopted. Courts should not lose sight of those conditions when construing that clause. In the language of the Attorney General, it "must be construed in the light of its practical, popular and general sense, with the view of protecting the public against adversities and injuries which would naturally follow in the ab-

sence of this inhibition." And we make free to quote from the Attorney General again when he says: "The spirit and object of the constitutional inhibition must be regarded, it will not do to juggle with its technical meaning."

Going back to the date when the constitutional convention was in session and viewing the physical and commercial conditions as they were at that date we must conclude either that a system of terminal railroad appliances such as the information shows has, since then, been involved in St. Louis, had not then been conceived by the members of the convention, or else that they did not understand that they were affecting that class of public utilities when they adopted the clause now under consideration. Because if they had such traffic appurtenances in mind and if they intended to include them in the inhibition, they would have used words more apt to express such intention. The words as used are sufficient to forbid a consolidation of railroad companies whose lines are parallel or competing in the sense above mentioned tracking the state through its length or its breadth, they need no other words of explanation to give them that effect and that is the effect that we would naturally conclude the framers of the constitution intended them to have.

We have a right to presume that a system of terminal railway appliances as a public utility was not altogether here unknown to the members of the constitutional convention, though such a system was then in an undeveloped stage of existence, because, as early as 1871, the General Assembly had passed an act looking to the formation of such a system and, as the information shows, such a system was, in 1875, in a formative state in St. Louis. The act of 1871 amended from time to time as to the General Assembly seemed necessary to meet the wonderful growth of the city and its railroad traffic, has been preserved in our statutes and is now embodied in sections 1164-1165, R. S. 1899, and Acts 1903, p. 130. The Act of 1871 (Sess. Acts, 1871, p. 59) starts out with a declaration of the advantage to be attained and the disadvantages to be overcome by its enactment: "In order to facilitate the public convenience and safety in the transmission of goods and passengers in large cities from one railroad to another and to prevent the unnecessary ex-

pense, inconveniences and loss attending the accumulation of a number of stations." Corporations to do the kind of traffic that the respondent is now engaged in doing were authorized to be found. Thus when the convention was in session there were in the state, corporations engaged in carrying over their railroads freight and passengers from one city to another, and other corporations engaged in transferring the cars brought by a railroad to its terminus in a city to some other point in the same city or to a common terminus of all railroad traffic in that city. The characters of the business of the two kinds of corporations were essentially different though both related to railroad traffic. The one was railroad business in its ordinary meaning, the other railroad business of a special character. A law might naturally be designed with reference to the one without being intended to affect the other. The statute expressly authorizes the formation of a corporation to handle the traffic of all railroads approaching the city and, to that end, to use a common track, to that extent therefore merging all the railroads in one; and it also authorizes the railroad companies to make such a combination among themselves. There is to be found in the Act of 1871 and its amendments, express authority for railroad companies parallel and competing or otherwise to unite or, if the term is preferred, consolidated, after they reach the city, so as to throw all their terminal business under a joint management. Thus at the time the constitutional convention was in session there was a law expressly permitting railroad companies to consolidate their properties and interests to this extent, and there was in fact, according to the averments in the information such a consolidation of interests, by railroad companies, in operation in this city, therefore before we can say that the framers of the constitution intended this section to apply to corporations engaged in strictly terminal business, or to railroad companies uniting in a common terminal system, we must say that they intended to forbid the formation of such a union terminal system as the statute had expressly authorized.

The history of the railroad terminal business as disclosed in the information and the acts of the General Assembly affecting the same, show that neither the men engaged in the

business nor the members of the General Assembly from first to last have ever put such an interpretation on the constitution.

The main purpose in the minds of the members of the convention in adopting this section was to preserve to the people who might have a choice of railroads between two points, the advantage in rates that would accrue to them from competition between rival companies. We must not lose sight of that purpose in our consideration of this subject.

The purpose of the statute of 1871 and its amendments as proclaimed in its preamble and as shown by its provisions is to obviate the necessity of every railroad having its own passenger station, freight depot and switch yard, involving the expense and inconvenience of moving passengers by means of omnibuses, and other such vehicles, to other stations in the city, and the unloading and hauling of freight from the terminus of one road to that of another or to the consignee's place of business in the city or from the manufactory to the railroad terminus all of which as appears in the now almost forgotten history of railroad traffic in the past, was accomplished at the great inconvenience and expense of the passenger and the shipper.

The purpose of the General Assembly was to allow such combination among the managers of the railroads entering the city as to reduce to the minimum the number of tracks, bring all the trains to one terminus, all freight to a common point for distribution, all cars to a common yard. It expressly authorized two or more railroad companies to do this and it put no limit to the number that might so combine.

The railroad companies in this state have for thirty years past been acting on the theory that they had the right to do that and so they have unless we can say that the framers of the constitution intended to forbid them doing so.

The purpose of the statute is not only not in conflict with the purpose of the constitution but is in aid of it. We have between our two greatest cities, St. Louis and Kansas City, four or five railroads which in the sense above mentioned are parallel and competing lines for the traffic between those two cities. Suppose a manufacturing concern in the north-

ern part of the city has a switch track to its establishment connecting it with the Merchants Terminal tracks and desires to make shipments of its products to Kansas City, the business of the concern is of such magnitude as to make its patronage an object of rivalry between all the railroad companies reaching that market. But if the Merchants Terminal Company can deliver the cars which are loaded on the switch at the manufacturers' establishment to one railroad only that railroad has a practical monopoly of the business of that manufacturer. But if the whole terminal system is open to the shipper he may invite bids on his freight and employ the railroad that will take it at the lowest rate. That is the system that this respondent has established, and it is bound to serve all railroad companies approaching St. Louis on the same terms; in the language of the information (paragraph 10) "the general object and purpose being to provide the most ample and convenient connections, accommodations and terminal facilities in St. Louis for all railroads now entering, or hereafter to enter the same, and all individuals and companies doing business with said railroads." The state has ample power to hold the respondent to a faithful performance of that public duty, to prevent favoritism and to prevent extortion.

We gather from the information that all along the lines of the terminal tracks, intersecting the city from north to south, from east to west, and belting it on the west, there are manufacturing and other business concerns with switch tracks or spurs into their premises which enables the shipper to load the cars on the switch tracks on his premises and have them delivered to any railroad that reaches the city. A more effectual means of keeping competition up to the highest point between parallel or competing lines could not be devised. The destruction of the system would result in compelling the shipper to employ the railroad with which he has switch connection or else cart his product to a distant part of the city; at a cost possibly as great as the railroad tariff.

St. Louis is a city of great magnitude in the extent of its area, its population, and its manufacturing and other business. A very large number of trunk line railroads converge in this city. In the brief of one of the well informed coun-

sel in this case it is said that St. Louis is one of the largest railroad centers in the world. Suppose it were required of every railroad company to effect its entrance to the city as best it could and establish its own terminal facilities, we would have a large number of passenger stations, freight depots and switch yards scattered all over the vast area and innumerable vehicles employed in hauling passengers and freight to and from those stations and depots. Or suppose it became necessary in the exigency of commerce that all incoming trains should reach a common focus, but every railroad company provide its own track; then not only would the expense of obtaining the necessary rights of way be so enormous as to amount to the exclusion of all but a few of the strongest roads, but, if it could be accomplished, the city would be cut to pieces with the many lines of railroad intersecting it in every direction, and thus the greatest agency of commerce would become the greatest burden.

This is what our General Assembly as early as 1871 to some extent at least foresaw and attempted to relieve against, and we cannot believe that the constitutional convention in 1875 was less appreciative of the conditions then present or in prospect, and hence we cannot believe that the convention, when it said that two lines of railroads that were parallel or competing should not be brought under one ownership or management, meant that two lines, used exclusively for bringing the trains from the several railroad termini in the city or at the city's border to a common terminus, should not be so consolidated; because as we have seen the consolidation of the terminal facilities promotes the competition that this clause in the constitution was designed to preserve.

What we have above said is intended to apply to the respondent only in reference to the charge in the information that it has violated the clause of the constitution forbidding the consolidation of railroad companies whose lines are parallel or competing; we hold that that constitutional inhibition was not intended to apply to companies owning lines of railroads used alone in terminal business.

II.

The information charges that the roads owned by the respondent in 1893 and those owned by the Merchants Terminal Company were parallel or competing lines. That is the statement of a conclusion which depends for its correctness on the facts from which it is drawn. The words in the constitution descriptive of the lines are "parallel or competing." The conjunction "or" is there used to co-ordinate the two words which it connects, as equivalent, the one of the other. The law makers were concerned, not so much with the figure the lines of the roads would make when traced on the map, as they were with the commercial relation the lines bore to each other; the desideratum was to preserve the competition.

The two railroad bridges crossing the river are parallel, whether they could have been used in 1893 by their respective owners in competition with each other, depends on the facilities that each had for receiving and delivering trains from the various railroads approaching St. Louis from the east aimed for the Union Station or trains departing from the Union Station destined to the east.

The information gives us to understand that the respondent company was, already in 1893, before it acquired the right to use the Merchants Terminal tracks equipped to do that business, and it specifies the lines of railroad and appurtenances that constituted that equipment, but it does not show that the Merchants Terminal Company was equipped to do a like business. In that important particular this case differs from East St. Louis, etc., Ry. v. Jarvis, 15 Am. & Eng. Ry. Cases (N. S.) 459, to which we are referred. In that case there were two belt lines which crossed and tapped all the railroads north of Cahokia Creek terminating in East St. Louis, and the two companies were in fact actively engaged in competing with each other for the same business. The Court said: "It appears that in 1884 these two companies were cutting rates buying business and losing money, and upon the advice of a mutual friend.....the two companies concluded to put the two properties under the same management and as a result, the leases in question

were made." No such condition is shown in the case at bar.

In paragraph 26 of the information the lines of road owned and operated by the respondent at the date of the organization of the Merchants Terminal and thence down to the date of the agreement of consolidation complained of, are given, but in the next paragraph when the lines of the Merchants Terminal are given the present tense only is used. These lines are described as commencing at the Merchants Bridge thence going southwardly crossing certain streets and blocks described by name and number until it crosses block 419 and Eighth street, the description of the course then given is in these indefinite words "thence westerly to the present Union Station." Whether the Merchants Terminal Company before the contract complained of had independent connection with the Union Station, or whether trains coming over the Merchants Bridge could have been delivered in the premises of the Union Station or trains destined for the east could have been taken thence over the route of the Merchants Terminal independent of the appliances of the respondent the information does not say. It says the Merchants Terminal Company had a perpetual lease of the Merchants Bridge, but what connections it had on the east bank of the river or what facilities it had for receiving and delivering trains on that side it does not say. It does not say that before or at the time of the contract assailed the Merchants Terminal was in actual competition with the respondent in the hauling of trains, or that it had the means or equipment to compete with respondent for the business. The fact that connection is now made between the Merchants Terminal tracks and of the Union Station do not justify the inference that such connection existed before the Merchants Terminal passed under the control of the respondent.

The Merchants Terminal could not have been a competing line unless it had such connection, and it could not have become a competing line unless it had the right and power of acquiring such connection. The essential facts to constitute the Merchants Terminal a competing line with that of the respondent are not stated in the information, at most they are left to inference, but since the information is aimed

at the line of the respondent it must be construed contra proferentem.

The facts stated in the information do not justify the conclusion therein drawn that the Merchants Terminal was at the time of the consolidation complained of, a competing line with the lines of the respondent.

III.

It is argued that the contract of August 17, 1893, whereby the consolidation was effected was ultra vires, and that it was against public policy. This assails the validity of the act of consolidation on grounds independent of the constitutional provision above discussed.

The Attorney General in his brief says: "And it has been time and again held that contracts made by and between quasi public corporations, whereby the corporate powers and duties of the one are delegated to the other, and where an attempt is made to alien either absolutely or conditionally the franchises essential to the performance of its public duties, are ultra vires and absolutely void." And authorities are cited in the brief which support the proposition.

Of course a statute can not authorize the doing of an act which the constitution forbids. Since, however, we have concluded that the consolidation complained of is not within the range of the constitution inhibition we may now consider it in the light of the statute.

There is no controversy in this suit between individuals and the corporation, it is the state through its law officer that is here calling the corporation to the bar and demanding judgment of extinguishment of its corporate life on the ground that it has committed an act beyond its corporate power, and an act contrary to public policy.

It might be conceded without affecting the result, that in 1893 the respondent had not the corporate power to purchase the stock of the Merchants Terminal Company, but its act in that respect, even if ultra vires, was not for that reason necessarily against public policy. The effect of it was, according to the information, to put all the terminal railroad business under one management, but in so far as

that concerned public policy it was in line with the policy declared in the preamble to the act of 1871 and repeated in every revision since that date. In 1903 Sections 1164, 1165 were amended expressly conferring on such terminal railroad companies the corporate power to acquire and hold the stock of other such companies. Sess. Acts, 1903, p. 130.

The General Assembly is the source of corporate power and it is also the authority to declare the public policy of the state. Until the General Assembly has spoken on the subject, it is the province of the courts to judge whether or not a given act is contrary to public policy in the light of the common law, but after the law making power has declared the public policy, the courts must enforce the policy as so declared.

If it be conceded that in the 1893 the acquisition by the respondent of the stock of the Merchants Terminal was against public policy, it is not so now because in 1903 the General Assembly expressly authorized it.

What right, therefore, has the state now to demand the annullment of the respondent's charter on the ground that it has done an act which it had no corporate power to do and which was then contrary to the public policy, when the state itself has since the act was done conferred on the respondent the right to do it and declared that it is in the interest of the public? In so far as it appears from the information, the state alone is interested in this matter, and since the state before this information was filed has expressly authorized the doing of the act in question, the court would not be justified in condemning the act as unlawful or against public policy.

The second count in the information relates to the acquiring by respondent of the property of the St. Louis Transfer Railway Company. What has already been said in reference to the first count applies with equal effect to this count.

The demurrer is sustained and ouster denied. Brace, Burgess and Fox, J. J., concur. Robinson, C. J., Gantt and Marshall, J. J., dissent.

AGREEMENT.

Terminal Railroad Association of St. Louis; St. Louis, Vandalia and Terre Haute Railroad Company; Pittsburgh, Cincinnati, Chicago and St. Louis Railway Company; Terre Haute and Indianapolis Railroad Company; and Volney T. Malott, Receiver Terre Haute and Indianapolis Railroad Company.

Dated February 13, 1902.

Admission of St. Louis, Vandalia and Terre Haute Railroad Company to membership in Terminal Railroad Association of St. Louis:

This agreement, made this thirteenth day of February in the year nineteen hundred and two, between the Terminal Railroad Association of St. Louis, as first party; The St. Louis, Vandalia and Terre Haute Railroad Company, as second party; The Pittsburgh, Cincinnati, Chicago and St. Louis Railway Company and the Terre Haute and Indianapolis Railroad Company as third party, and Volney T. Malott, receiver of the Terre Haute and Indianapolis Railroad Company, covenanting and acting herein as such receiver, as fourth party, witnesseth:

Whereas, under date of October 1, 1889, a certain agreement was entered into between said Terminal Railroad Association of St. Louis, as first party, and the Missouri Pacific Railway Company, the St. Louis, Iron Mountain and Southern Railway Company, the Wabash Railroad Company, the Ohio and Mississippi Railway Company, the Cleveland, Cincinnati, Chicago and St. Louis Railroad Company, and the Louisville and Nashville Railroad Company, as second party, a copy of which said agreement is hereto attached, marked Exhibit "A" and made a part hereof, with like force and effect as if the same were herein fully set forth, and is hereinafter referred to as Exhibit "A" and;

Whereas, The Terre Haute and Indianapolis Railroad Company, hereinafter designated "Terre Haute Company," and the St. Louis, Vandalia and Terre Haute Railroad Company, hereinafter designated "Vandalia Company," although designated as among the parties of the second part

in said agreement, did not as was contemplated therein, execute the same or become a party thereto; and

Whereas, The Baltimore and Ohio Southwestern Railroad Company, since the execution of said agreement, has become a party thereto, as successor of the Ohio and Mississippi Railway Company, and is now a party to said agreement, with like force and effect as if it had been originally a party thereto; and

Whereas, said Volney T. Malott is now the receiver of said Terre Haute Company, under appointment of the circuit court of the United States in and for the district of Indiana, in an action brought by the bondholders of the Terre Haute and Peoria Railroad Company against said Terre Haute Company, and as such receiver is in possession of all the property of said Terre Haute Company, including all property leased, operated or controlled by that company, at the date of his appointment as receiver, to-wit, November 13, 1896; and

Whereas, at the date of the appointment of Volney T. Malott as receiver as aforesaid, said Terre Haute Company was in possession of and operating the property of said Vandalia Company, under an agreement between said companies made in 1868, and continuously since his appointment as receiver as aforesaid, as such receiver, has been in possession of and operating the property of said Vandalia Company under the terms of said agreement; and

Whereas, said Vandalia Company with the consent of the Terre Haute Company, desires to become a party to said agreement Exhibit "A", with like force and effect as if it had become originally a party thereto, its rights and obligations thereunder, however, to become effective only as and from the day of the date hereof; and

Whereas, The railways of said Terre Haute and Vandalia Companies constitute a continuous line of railway between the city of East St. Louis and the city of Indianapolis, connecting at said last named city with the Pittsburgh, Cincinnati, Chicago and St. Louis Railway, said three lines of railway constituting one continuous and through line of railway between the cities of East St. Louis and Pittsburgh; and

Whereas, It is considered by said three companies to be advantageous to their interest and it is their desire that the said Vandalia Company should become a party to this agreement and to said agreement Exhibit "A", and

Whereas, Said Terminal Association of St. Louis hereinafter designated "Terminal Company" and all of the parties of the second part to said agreement Exhibit "A", are willing and have consented that said Vandalia Company shall, on the terms and conditions herein set forth, become a party to said agreement; and

Whereas, Said Volney T. Malott, receiver, as aforesaid, as such receiver, under authority and direction of said circuit court of the United States, and with the consent of said court, evidenced by certified copy of its order, hereto attached, becomes a party thereto, for the purpose of performing as such, the covenants and obligations hereof and of said agreement Exhibit "A", but only so long as he may be receiver as aforesaid and only to the extent that such covenants and obligations effect the operation by him as such receiver of the railroads of said Terre Haute and Vandalia Companies.

Now, therefore, it is agreed between the parties hereto, as follows:

1. Said Terminal Company, each and every of the stockholders thereof having thereto consented, in consideration of the guaranty of said Pittsburgh, Cincinnati, Chicago and St. Louis Railway Company, and the Terre Haute Company, and of the obligations herein assumed by said Vandalia Company, does hereby agree to cause to be transferred and delivered to said Vandalia Company, one-seventh of the issued stock of said Terminal Company; said one-seventh being the proportion of such stock now held severally by each of the six parties of the second part to said agreement Exhibit "A," and does hereby, on and from this date, admit said Vandalia Company to the joint use with the parties of the second part to said agreement Exhibit "A", of all the terminal facilities of said Terminal Company in like manner and to a like extent, as if said Vandalia Company had at this date, executed said agreement Exhibit "A", as party of the second part, it being understood that such right is not

transferable to any extent whatever, but is to remain as appurtenant to the railroad of said Vandalia Company; it being understood and agreed that should the Vandalia Company be at any time hereafter consolidated with other railroad companies of Illinois and Indiana or with such companies and the Pittsburgh, Cincinnati, Chicago and St. Louis Railway Company, the provisions hereof shall inure to the benefit of and be binding upon such consolidated company and said stock of said Terminal Company, herein referred to, shall be transferred and delivered to such consolidated company.

2. In consideration of said transfer and delivery of said stock and such admission thereby to membership as a proprietary line of said Terminal Company, said Vandalia Company hereby assumes the obligations of said agreement Exhibit "A", which it would assume if it now executed said agreement, and accepts the right of joint use herein granted and the terminal facilities of said Terminal Company, and hereby covenants and agrees that it will forever make use of the terminal facilities of said Terminal Company, for all passenger and freight traffic within its control, through, to and from St. Louis, and destined to cross the Mississippi river at St. Louis, and to pay therefor as in said agreement Exhibit "A" provided.

3. It is hereby declared to be the intention of the parties hereto and the purpose of the execution of this agreement, that said Vandalia Company, as consideration for and upon acceptance of said stock by said Vandalia Company and the execution of this agreement, shall be and does hereby become a party to said agreement Exhibit "A" and with like force and effect as if it had executed the same as of October 1, 1889, the date upon which said agreement was executed by the parties thereto, save and except that said agreement shall become effective, be binding upon and inure to the benefit of the parties hereto, only as and from the day of the date of the execution and delivery hereof.

4. The stock of said Terminal Company to be issued as herein contemplated shall in form and conditions of issue correspond in all respects with the certificates of stock heretofore severally issued to said parties of the second part to said agreement Exhibit "A".

5. Upon the execution and delivery hereof, or so soon thereafter as can be conveniently done, two shares of said stock shall be transferred to such party as said Vandalia Company may designate as a director of said Terminal Company, to represent the interest therein of said Vandalia Company and for the purpose only of qualifying such person as director, and the remaining shares of said one-seventh of said stock shall be transferred to said Vandalia Company, and thereupon such party so designated by said Vandalia Company shall be elected a member of the board of directors of said Terminal Company.

6. And said Volney T. Malott does hereby execute this agreement as a party thereto and as receiver as aforesaid, being directed and authorized hereunto by order and decree of said circuit court of the United States for the purpose only of covenanting and agreeing that he, as such receiver aforesaid, will observe and perform the covenants and agreements hereof and of said agreement Exhibit "A", but only so long as he is receiver as aforesaid and only to the extent that said covenants and agreements effect the operation by him, as such receiver, of the railroad of said Terre Haute and Vandalia Companies.

7. And the said Terre Haute Company, for itself and its successors and assigns, as lessee of the Vandalia Railroad, does hereby authorize and give its consent to said Vandalia Company to execute this agreement and said agreement Exhibit "A", and in consideration of the benefits accruing to them as owners of lines of railway which, with the railway of said Vandalia Company, form a continuous line, the said Terre Haute Company and the Pittsburg, Cincinnati, Chicago and St. Louis Railway Company become parties to this agreement for the purpose of guaranteeing and they do hereby for themselves, their successors and assigns, guarantee unto said Terminal Company and unto its successors and assigns, that said Vandalia Company will faithfully and at all times comply with each and every obligation upon it imposed hereunder, and under the provision of said agreement Exhibit "A", to which it hereby becomes a party of the second part.

8. This agreement is executed under proper corporate action of the Terminal Railroad Association of St. Louis,

the said Terre Haute Company, the said Vandalia Company, and the said Pittsburgh, Cincinnati, Chicago and St. Louis Railway Company, as evidenced by certified copies of the respective proceedings of the directors of said respective companies hereunto attached.

In testimony whereof, the parties have caused this agreement to be executed by their proper officers in five parts, as of the day and year first above written.

AGREEMENT.

Terminal Railroad Association of St. Louis and St. Louis and San Francisco Railroad Company,

Dated June 9, 1902.

Admission of St. Louis and San Francisco Railroad Company to membership in the Terminal Railroad Association of St. Louis.

This agreement, made this 9th day of June, 1902, between the Terminal Railroad Association of St. Louis (here-

inafter designated "Terminal Company"), as first party, and the St. Louis and San Francisco Railroad Company (hereinafter designated the "Frisco Company") as second party; witnesseth:

Whereas, On the date of October 1, 1889, a certain agreement was entered into between said Terminal Company, as first party and the Missouri Pacific Railway Company, the St. Louis, Iron Mountain and Southern Railway Company, the Wabash Railroad Company, the Ohio and Mississippi Railroad Company, the Cleveland, Cincinnati, Chicago and St. Louis Railway Company, and the Louisville and Nashville Railroad Company, as second party, a copy of which said agreement is hereto attached, marked Exhibit "A", and made a part hereof with like force and effect as if the same were herein fully set forth, and is hereinafter referred to as exhibit "A"; and

Whereas, The Baltimore and Ohio Southwestern Railroad Company, since the execution of said agreement has become a party thereto as successor to the Ohio and Mississippi Railroad Company, and is now a party to the said agreement, with like force and effect as if it had been originally a party thereto; and,

Whereas, The St. Louis, Vandalia and Terre Haute Railroad Company did, on the 13th day of February, 1902, become a party to said agreement, and is now a party to said agreement with like force and effect as if it had been originally a party thereto; and,

Whereas, said Frisco Company desires to become a party to said agreement exhibit "A" with like force and effect as if it had been originally a party thereto, its rights and obligations thereunder, however, to become effective only as and from the day of the date hereof; and,

Whereas, Said Terminal Company, and all the parties of the second part of said agreement exhibit "A", are willing and have consented that said Frisco Railway Company shall, on the terms and conditions herein set forth, become a party to said agreement; and,

Whereas, unanimous consent of all the directors of said Terminal Company, evidenced by the adoption of a resolution by the board of directors, has been given to the admis-

sion of said Frisco Company as a party of the second part to said agreement;

Now, therefore, it is agreed between the parties hereto as follows:

1. Said Terminal Company, each and every of the stock holders and each and every of the directors thereof, having thereto consented, in consideration of the obligations herein assumed by said Frisco Company, does hereby agree to cause to be transferred and delivered to said Frisco Company two thousand and fifty-eight (2058) shares of the capital stock of said Terminal Company, said 2058 shares being the proportion of such stock now held severally by each of the parties of the second part to said agreement exhibit "A", and does hereby, on and from this date, admit said Frisco Company to the joint use with the parties of the second part to said agreement exhibit "A", of all the terminal facilities of said Terminal Company, in like manner and to like extent as if said Frisco Company had upon the day of the date hereof executed said agreement exhibit "A", as party of the second part, it being understood, however, that such right is not transferable to any extent, but is to remain as appurtenant to the railroad of said Frisco Company.

2. In consideration of said transfer and delivery of said stock, and such admission to membership as a proprietary line of said Terminal Company, said Frisco Company hereby assumes the obligations of such agreement exhibit "A", with like force and effect as if it had been an original party of the second part to said agreement, and accepts the right of joint use herein granted by said Terminal Company, and hereby covenants and agrees that it will forever make use of the terminal facilities of said Terminal Company for all passenger and freight traffic within its control, through, to, and from St. Louis and destined to cross the Mississippi river at St. Louis, and to pay therefor as in said agreement exhibit "A" provided.

3. It is hereby declared to be the intention of the parties hereto, and the purpose in the execution of this agreement, that said Frisco Company, as consideration for and upon acceptance of said stock, and the execution of this agree-

ment, shall be and does hereby become a party to said agreement exhibit "A", with like force and effect as if it had executed the same as of October 1, 1889, the date upon which said agreement was executed by the then parties thereto, save and except that said agreement shall become effective, be binding upon, and inure to the benefit of said Frisco Company only as and from the day of the date of the execution and delivery hereof.

4. The stock of said Terminal Company to be issued as herein contemplated shall, in form and conditions of issue, correspond in all respects with the certificates of stock heretofore severally issued to said parties of the second part to said agreement exhibit "A".

5. Upon the execution and delivery hereof, or so soon thereafter as can be conveniently done, two (2) shares of said stock shall be transferred to such party as said Frisco Company may designate as a director of said Terminal Company, to represent the interests therein of said Frisco Company, and for the purpose only of qualifying such person as director; and the remaining shares of said stock to be issued to said Frisco Company as herein contemplated, shall be transferred to said Frisco Company, and said Terminal Company shall cause the party designated by said Frisco Company to be elected a member of the board of directors of said Terminal Company.

In Testimony Whereof, the parties hereto have caused this agreement to be executed by their proper officers, in duplicate, as of the day and year first above written.

Terminal Railroad Association of St. Louis,
By Julius S. Walsh, President.
St. Louis and San Francisco Railroad Company,

"Admission" Agreement.

Terminal Railroad Association of St. Louis and Chicago Rock Island and Pacific Railway Company, and St. Louis, Kansas City and Colorado Railroad Company.

Dated December 16, 1902.

Admission of Chicago, Rock Island and Pacific Railway Company.

This agreement made this sixteenth day of December, 1902, between Terminal Railroad Association of St. Louis (hereinafter called the Terminal Company), party of the first part, and the Chicago, Rock Island and Pacific Railway Company (hereinafter called the Rock Island Company) and St. Louis, Kansas City and Colorado Railroad Company (hereinafter called the Colorado Company), parties of the second part, witnesseth:

Whereas, On the first day of October, 1889, a certain agreement was entered into between the Terminal Company, as first party, and the Missouri Pacific Railway Company, St. Louis, Iron Mountain and Southern Railway Company, Wabash Railway Company, Ohio and Mississippi Railway Company, Cleveland, Cincinnati, Chicago and St. Louis Railway Company, and Louisville and Nashville Railroad Company, as second parties, a copy of which said agreement is hereto attached marked exhibit "A", and made part hereof, with like force and effect, as if the same were herein fully set forth, and is hereinafter referred to as exhibit A; and

Whereas, Since the execution of said agreement, exhibit A, Baltimore and Ohio Southwestern Railroad Company (as successor of said Ohio and Mississippi Railway Company), St. Louis and San Francisco Railroad Company, and St. Louis, Vandalia and Terre Haute Railroad Company have severally become and now are parties to said agreement exhibit A, as parties of the second part thereto; and

Whereas, The Rock Island Company desires to become a party to said agreement exhibit A, its rights and obligations thereunder, however, to become effective only as and from the day of the date hereof; and,

Whereas, The Terminal Company and all of the parties of the second part to said agreement exhibit A are willing and have consented that the Rock Island Company shall, on the terms and conditions herein set forth, become a party to said agreement A; and

Whereas, Unanimous consent of all the directors of the Terminal Company, evidenced by the adoption of a resolution by its board of directors, has been given to the admission of the Rock Island Company as party of the second part to said agreement exhibit A;

Now, therefore, it is agreed between the parties hereto as follows:

1. The Terminal Company, each and every of the stockholders and each and every of the directors thereof having thereto consented, in consideration of the obligations herein assumed by the Rock Island Company, does hereby agree to cause to be transferred and delivered to the Rock Island Company two thousand and fifty-eight (2058) shares of the capital stock of the Terminal Company, said two thousand and fifty-eight (2058) shares being the proportion of such stock now held severally by each of the parties of the second part to said agreement exhibit A, and does hereby, and from this date, admit the Rock Island Company to the joint use with the parties of the second part to said agreement exhibit A of all the terminal facilities of the Terminal Company, in like manner and to like extent as if the Rock Island Company had at this date executed said agreement exhibit A as party of the second part; it being understood, however, that such right is not transferable to any extent, but is to remain as appurtenant to the railroad of the Rock Island Company.

2. In consideration of said transfer and delivery of said stock, and of such admission thereby to membership as a proprietary line of the Terminal Company, the Rock Island Company hereby assumes the obligations of said agreement exhibit A with like force and effect as if it had on this date executed as party of the second part said agreement exhibit A, and accepts the right of joint use herein granted by the Terminal Company, and hereby covenants and agrees that it will forever make use of the terminal facilities of the Ter-

minal Company for all passenger and freight traffic within its control, to and from St. Louis and destined to cross the Mississippi river at St. Louis, and to pay therefor as in said agreement exhibit A provided.

3. It is hereby declared to be the intention of the parties hereto, and the purpose of the execution of this agreement, that the Rock Island Company, as consideration for and upon acceptance of said stock and the execution of this agreement, shall be and does hereby become a party to said agreement exhibit A with like force and effect as if it had executed the same as of October 1, 1889, the date upon which said agreement was executed by the then parties thereto, save and except that said agreement shall become effective, be binding upon and inure to the benefits of the Rock Island Company only as and from the day of the date of the execution and delivery hereof.

4. The stock of the Terminal Company to be issued as herein contemplated shall, in form and condition of issue, correspond in all respects with the certificates of stock heretofore severally issued to said parties of the second part to said agreement Exhibit A.

5. Upon the execution and delivery hereof, or so soon thereafter as can be conveniently done, two shares of said stock shall be transferred to such party as the Rock Island Company may designate as a director of the Terminal Company to represent the interests therein of the Rock Island Company and for the purpose only of qualifying said person as director; and the remaining shares of said stock to be issued to the Rock Island Company as herein contemplated, shall be transferred to the Rock Island Company, and the Terminal Company shall cause the party designated by the Rock Island Company to be elected a member of the board of directors of the Terminal Company.

8. It is understood that the Rock Island Company is the owner of all the stock of the Colorado Company, and the Colorado Company, as part of the system of the Rock Island Company, shall be entitled to exercise and enjoy the joint use of all the terminal facilities of the Terminal Company herein conferred upon the Rock Island Company; and the Colorado Company hereby covenants and agrees that it will forever make use of the terminal facilities of the Terminal

Company for all passenger and freight traffic within its control to and from St. Louis and destined to cross the Mississippi river at St. Louis and to pay therefor as in said agreement exhibit A provided.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers, in triplicate as of the day and year first above written.

SUPPLEMENTAL AGREEMENT.

Missouri Pacific Railway Company and others, Proprietary Companies, Pittsburg, Cincinnati, Chicago and St. Louis Railway Company and Terre Haute and Indianapolis Railroad Company, Guarantors of St. Louis, Vandalia and Terre Haute Railroad Company, Terminal Railroad Association of St. Louis; Chicago and Alton Railroad Company, Guarantor of Chicago and Alton Railway Company; Chicago, Burlington & Quincy Railroad Company, Guarantor of Chicago, Burlington and Quincy Railway Company.

Dated January 16, 1903.

Supplementary to agreement October 1, 1889, providing for use of facilities of Terminal Railroad Association of St. Louis:

An agreement made this sixteenth day of January, in the year one thousand nine hundred and three, between the

Missouri Pacific Railway Company, St. Louis, Iron Mountain and Southern Railway Company, Wabash Railroad Company, the St. Louis, Vandalia and Terre Haute Railroad Company, Baltimore and Ohio Southwestern Railroad Company, Cleveland, Cincinnati, Chicago and St. Louis Railway Company, Louisville and Nashville Railroad Company, St. Louis & San Francisco Railroad Company, the Chicago, Rock Island and Pacific Railway Company, Southern Railway Company, Illinois Central Railroad Company, the Chicago and Alton Railway Company, Chicago, Burlington and Quincy Railway Company, and Missouri, Kansas and Texas Railway Company, hereinafter termed, for convenience, proprietary companies, of the first part; the Pittsburg, Cincinnati, Chicago and St. Louis Railway Company, hereinafter termed the Panhandle Company, and Terre Haute and Indianapolis Railroad Company, hereinafter termed the Terre Haute Company, of the second part; Terminal Railroad Association of St. Louis, hereinafter termed the Terminal Association, of the third part; the Chicago and Alton Railroad Company and Chicago, Burlington and Quincy Railroad Company, of the fourth part:

The Terminal Association is a corporation organized under the laws of the state of Missouri, by an agreement of consolidation made on the 26th day of July, 1889, between Union Railway and Transit Company of St. Louis, and Terminal Railroad of St. Louis, and duly filed for record in the office of the secretary of state of the state of Missouri.

The Terminal Association was so organized for the purpose of acquiring title to and possession of various terminal railroad facilities in St. Louis and East St. Louis, and to secure to the various railroad companies owning or operating railroads entering said cities an efficient and economical method for interchanging passenger and freight traffic at the points named.

By an agreement, dated October 1, 1889, between the Terminal Association, of the first part, and the Missouri Pacific Railway Company, St. Louis, Iron Mountain and Southern Railway Company, Wabash Railroad Company, Ohio and Mississippi Railway Company, Cleveland, Cincinnati, Chicago and St. Louis Railway Company and Louisville and Nashville Railroad Company, of the second

part, the Terminal Association granted to each of said companies, and each of said companies accepted, a right forever, of joint use with each other and with such other companies as might be admitted, as proprietary lines, to joint use thereof, of all terminal properties of the Terminal Association then held or that might thereafter be acquired in said St. Louis and East St. Louis, for passenger and freight, express and mail business, and for the interchange of the same between each other and with the public, the right granted to each proprietary company to remain as appurtenant to the railroad then owned by such proprietary company; and each of said proprietary companies, parties to said agreement, agreed forever to make use of the bridge and terminal properties of the Terminal Association for all passenger and freight traffic within its control through, to and from St. Louis and destined to cross the Mississippi river at St. Louis.

By said agreement it was provided that the rates of toll or charges should be fixed, subject as therein provided, so as to produce a sum sufficient each year to pay the fixed charges of the Terminal Association, including rentals, taxes and assessments, the expenses of maintaining the corporate organization of the Terminal Association and interest and dividends on such bonds or preferred stock not then contemplated as might become necessary to be thereafter issued for the purpose of future extensions and betterments to the properties of the Terminal Association, and each of the proprietary companies, parties thereto, agreed by article XIII thereof to pay its proportion of any deficiency, provided that the total gross sum which any one of the proprietary companies, parties thereto, should be called on to pay in any one year towards making up any deficit in the net earnings to meet the fixed charges should not in any one year exceed one-seventh of one million dollars, which was therein stated to be in excess of the entire fixed charges assumed under said agreement, and provided, further, that the tolls to be levied on traffic, as contemplated in said agreement, should at no time be so great as to place any proprietary company using said terminals at a disadvantage in respect to its traffic that may be in competition with that of other lines.

Since the execution of said agreement, Baltimore and Ohio Southwestern Railroad Company, as successor of said Ohio and Mississippi Railway Company; St. Louis and San Francisco Railroad Company, the St. Louis, Vandalia and Terre Haute Railroad Company, hereinafter called the Vandalia Company, the Chicago, Rock Island and Pacific Railway Company, Southern Railway Company, Illinois Central Railroad Company, the Chicago and Alton Railway Company, hereinafter called the Alton Company, Chicago, Burlington & Quincy Railway Company, hereinafter called the Burlington Company, and Missouri, Kansas and Texas Railway Company have severally become parties to said agreement; the obligations of the Vandalia Company under said agreement have been duly guaranteed by the Panhandle Company and the Terre Haute Company; the obligations of the Alton Company thereunder have been duly guaranteed by the Chicago and Alton Railroad Company, and the obligations of the Burlington Company thereunder have been duly guaranteed by Chicago, Burlington and Quincy Railroad Company.

The proprietary companies, as parties of the first part, and the Terminal Association, as party of the third part (the parties hereto of the second and fourth parts consenting, as evidenced by their execution hereof), desire to make this agreement, but subject in all respects to the agreement of October 1, 1889, and to the guaranty agreement hereinafter described.

Now, therefore, for a valuable consideration, it is agreed, each of the proprietary companies agreeing for itself only and not for the others, and to and with the Terminal Association, the Terminal Association agreeing to and with each of the proprietary companies severally, as hereafter in this supplemental agreement set forth;

First. Nothing in the agreement of October 1, 1889, shall prevent any proprietary company from maintaining a passenger station for commuter or suburban service.

Second. Each proprietary company shall have the right to use any facilities it may own or control for interchanging its own traffic only with the Terminal Association or any other carrier.

Third. The Terminal Association shall accept traffic offered to it at any junction, connection or incline, and shall handle and deliver the same with promptness and dispatch at the point of interchange designated by the delivering line. The tariff of the Terminal Association shall be so regulated that there shall be no difference in the rate on trans-river traffic by reason of the fact that such traffic is handled by bridge or by ferry; and when a proprietary company owns or operates an incline or tracks directly connecting therewith, the tariff shall be divided upon an equitable basis between the Terminal Association and the proprietary company or companies furnishing such property or service; this division of the tariff shall be made by the board of directors of the Terminal Association or by arbitration, as provided in the agreement of October 1, 1889.

Fourth. The Terminal Association may, if it so elects, maintain and operate adequate facilities for ferry transfer at any point or points within the present corporate limits of the city of St. Louis and also to, from and between existing inclines owned or operated by any proprietary company or companies within such corporate limits; in the event the Terminal Association does not maintain and operate such facilities, any proprietary company or companies, owning or operating such incline or inclines, may maintain and operate a ferry transfer for its or their own traffic.

Fifth. In the event any proprietary company shall make default in the performance of any obligation imposed upon or assumed by it herein or in the agreement of October 1, 1889 (or in the guaranty agreement of December 16, 1902, between the proprietary companies, the Terminal Association and the trustees in the general mortgage of the Terminal Association of that date, to all the provisions of which guaranty agreement this agreement is subject), which default shall entitle the Terminal Association to exclude the proprietary company so in default from the use of the properties of the Terminal Association, then and thereupon the stock of the Terminal Association held or owned by the proprietary company so in default shall be surrendered to the Terminal Association and distributed pro rata among the remaining proprietary companies. Such surrender of stock shall not release or discharge the proprietary company

so in default from any obligation hereunder or in the agreement of October 1, 1889, or in the guaranty agreement, imposed upon or assumed by it, or from liability from damage resulting to the Terminal Association or any of the other proprietary companies from such default.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers in one or more parts, each part to be deemed an original, as of the day and year first above written.

Duly acknowledged by all the parties before notaries public in proper state and county.

District of Columbia. Baltimore and Ohio Railroad. Elimination of grade crossings, construction of new terminals, etc.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Baltimore and Ohio Railroad Company, and the Terminal Company incorporated as provided in this Act, be, and each of them is hereby, empowered and authorized to locate, construct, maintain, and operate new terminals and new lines of railroad to accommodate the traffic of the said Baltimore and Ohio Railroad Company, in connection with its Washington Branch Railroad and Metropolitan Branch Railroad within the District of Columbia and in the City of Washington, as hereinafter provided. The said new terminal and terminal tracks shall occupy the streets, avenues, public reservations, and property belonging to the United States, and such of the lands and property belonging to others as may be acquired by either of said companies, situate and lying within the area bounded as follows, to-wit: Beginning at the intersection of the south line of N street north and a line forty feet from the east building line of Delaware avenue and parallel thereto; thence along said line parallel to the easterly build-

Location of new terminals and tracks.

ing line of Delaware avenue and forty feet therefrom to the west line of First street east; thence by said west line of First street east to the north line of C street north; thence by said north line of C street north to the east line of North Capitol street; thence north by said east line of North Capitol street to the south line of Massachusetts avenue; thence by a straight line to the intersection of the west line of First street east and the south line of H street north; thence to the point of beginning, or so much of this area as may be found to be necessary for proper terminal facilities and agreed upon between the Baltimore and Ohio Railroad Company and the Commissioners of the District of Columbia: Provided, That no portion of any street shall be closed under authority of this act until said railroad company shall have secured control of the property abutting upon said portion to be closed, it being the intent hereof that no property owner shall be deprived of egress from or ingress to his property.

Proviso. Access to private property not to be impaired.

The main lines of railroad connecting said new terminals and terminal tracks within the present lines of railroad of said Washington Branch and said Metropolitan Branch shall be located as follows: From the south side of H street said lines shall run by a masonry viaduct of width sufficient for five tracks, but not exceeding in width eighty feet, with such turn-outs and sidings to adjoining property as may at any time hereafter be constructed under the authority of this Act, northerly along the middle of Delaware avenue to the north line of N street; thence northerly still in Delaware avenue, with five main tracks, but with the right to locate and construct sidings in Delaware avenue to and into adjoining property, including all of square numbered seven hundred and forty-eight, and crossing Florida avenue overhead by means of a two-span plate-girder bridge, or by masonry arches, to the north side of Florida avenue; thence by diverging lines crossing over New York avenue by means of a two-span plate-girder bridge or bridges over the same, or by masonry arches; the one line, with two or more tracks, by the most practicable route in a general and northeasterly direction, to a point of connection with the present tracks of the Washington Branch Railroad north of Winthrop Heights Station, and the other

Location of connecting lines between terminals and present lines.

line with two or more tracks, in a northerly direction by the most practicable route, to a point of connection with the present tracks of the said Metropolitan Branch Railroad at or near Rhode Island avenue extended.

Location of roundhouses, etc.

Sec. 2. That said companies be, and each of them is hereby, authorized and empowered to locate, construct, maintain, and operate, outside of the city limits and south of V street, yard tracks, switches, roundhouses, shops and other structures necessary or proper for the accommodation of locomotives and cars for the conduct of its business or for the purpose of a freight yard; and also to locate, build, maintain, and operate, beyond the city limits, a branch track of "Y" for the passage of trains directly to and fro between the Metropolitan Branch and the Washington Branch without entering the city: Provided, That said roundhouses and shops shall be located within said "Y" as far eastwardly as in the judgment of the Commissioners of the District of Columbia it is practicable.

Branch track or "Y."

Streets to be vacated, etc.

Sec. 3. That to accomplish the purposes of this Act the following named streets in the subdivision of Eckington east of the right of way of the Metropolitan Branch of the Baltimore and Ohio Railroad Company shall be completely vacated and abandoned by the public and closed to public use, namely: Q, R, Third between New York avenue and Florida avenue, Fourth, Fifth, and Randolph streets; S and Seaton streets west of Sixth street; and Sixth street south of U street and Seventh street between New York avenue and Brentwood road shall not be opened. The Brentwood road shall also be closed between S street and Florida avenue. New York avenue and Florida avenue shall be carried under said railroad, as provided in the first section of this Act. T and V streets shall be carried under by a subway, or over the Metropolitan Branch Railroad by a bridge or viaduct. Between the north line of M street and the south line of G street all the tracks hereinbefore authorized shall be elevated and carried on a masonry viaduct, which said viaduct shall be so constructed with arches or bridges as to permit each and every intersecting street or avenue in the city to be passed and continued under the same through arched openings or spaces of sufficient clearance to permit the free and unobstructed use of said streets

Elevated tracks.

and avenues, in the form and manner and of the dimensions shown and indicated on the plan and profiles agreed upon between the said Baltimore and Ohio Railroad Company and the Commissioners of the District of Columbia, and now on file in the office of the Engineer Commissioner: Provided, That M street may be crossed by a metal bridge instead of a masonry arch, if desired, in order to avoid any change in the grade of said street.

Proviso. Metal bridge.

The following-named streets within the city limits shall be completely vacated, abandoned, and closed, namely: N street, between Second street east and Third street east, and Delaware avenue shall be closed and abandoned between the south line of Florida avenue and the north line of M street; E street between First street and North Capitol street; D street between First street and North Capitol street, and Delaware avenue between F street and C street, it being the intention of this Act that all streets, avenues, ways, and alleys within the area to be occupied and used for terminals and terminal tracks, as shown on said plan filed in the office of the Engineer Commissioner, shall be completely vacated, abandoned, and closed, and the use thereof and of any public reservation or street spaces of the United States within said area be granted to the said railroad company or terminal company constructing such terminals for the purposes of the same, except that Massachusetts avenue and F street shall be carried under said terminals by means of arches, in accordance with plans approved by the Commissioners of the District of Columbia.

Vacated streets in city.

The Commissioners of the District of Columbia are hereby authorized and directed to cause all streets, avenues, ways and alleys to be closed, as provided in this Act and in accordance with the intent therof; and also to make such changes in the existing lines and grades of any street, avenue, or way as may be reasonably required, deemed necessary, or advisable in the construction of the works hereby authorized.

Authority to close streets, etc.

That such portions of the structures carrying T and V streets over and under the tracks of the Baltimore and Ohio Railroad Company as lie within the limits of the right of way of said company shall be built and paid for by said company; and that so much of the change of grade at M

street and Florida avenue as may be necessary to carry said highways under the line of the railroad within the limits of the right of way of said company shall be paid for by the railroad company. The approaches, however, to said T street, V street, Florida avenue, and M street, and all of the work not within the right of way at said points shall be made and constructed by and under the supervision of the Commissioners of the District of Columbia and paid for from funds available for the purpose.

Location of fire engine house.

Sec. 4. That the Baltimore and Ohio Railroad Company shall, before taking possession of the ground now owned by the United States in square six hundred and eighty-three, secure and convey to the United States a tract of ground containing not less than twenty-one thousand square feet, which location shall be subject to the approval of the Commissioners of the District of Columbia and the Sergeant-at-Arms of the United States Senate, and locate thereon a fire-engine house at a cost of not less than thirty thousand dollars and stables at a cost of not less than fifteen thousand dollars; or, if said company prefers, it may have the said buildings erected by the Commissioners of the District of Columbia by depositing the amounts stated above with the said Commissioners and Sergeant-at-Arms, respectively, and when such buildings have been accepted by the District of Columbia and the Sergeant-at-Arms of the Senate, respectively, or the amounts necessary for their construction deposited as aforesaid, it shall have authority to remove said structures on the ground aforesaid. And the Baltimore and Ohio Railroad Company shall have the right to condemn such land in the city as is hereinbefore required, and for said purposes the provisions of section eleven of this Act are hereby made applicable to the provisions of this section.

Location of additional passenger, stations, etc.

Sec. 5. That in addition to the main or terminal station or depot, to be located as hereinbefore provided, the Baltimore and Ohio Railroad Company, or the terminal company incorporated as provided in this Act, may from time to time hereafter construct, establish, and maintain such additional stations or depots, for passengers or freight, as the company may deem necessary or useful in the conduct of its business, or for the accommodation of the freight and

passenger traffic passing over the lines of railroad authorized by this Act, at such point or points within said District as the Commissioners of the District of Columbia shall approve: Provided, That no such station or depot within the city limits shall be located east of Second street east, and west of North Capitol street, and it shall be lawful for either of said companies to acquire, by gift, purchase, or condemnation, any land adjacent to any street or avenue along or upon which the lines of railroad and works hereby authorized shall be located, and hold and improve the same in such manner as it may deem necessary or beneficial to accommodate or promote the traffic on said railroad, and to extend and construct tracks of railroad into and upon any lands so acquired and connect the same with the tracks on such adjacent street or avenue: Provided, however, That no grade crossing of any street or avenue within the city of Washington shall be thereby created, but such connecting tracks shall be elevated and carried over the portion of such street or avenue crossed in such manner as not to obstruct the free use thereof, and the plans of such connecting tracks and elevated structure shall in every case be first filed with and approved by the Commissioners of the District of Columbia. And it shall be lawful for said companies, or either of them, subject to the same conditions and restrictions, to attend and construct, from time to time, branch tracks or sidings from the lines of railroad authorized by this Act into any lot or lots adjacent to any street or avenue along which said lines of railroad are located, upon the application of the owner or owners of such lot or lots, to enable such owners to use their property for the purpose of coal, wood, or lumber yards, manufactories, warehouses, and other business enterprises.

Provisos. Qualification.

Adjacent land may be acquired.

No grade crossing to be created, etc.

Sidings for manufactories, etc.

Sec. 6. That if it should at any time be deemed necessary or advisable in the construction of the works hereby authorized to lay temporary tracks on any street or avenue to accomodate the business of the Baltimore and Ohio Railroad Company pending the completion of such works, the said company may lay such temporary tracks, subject to the approval and under the direction of the Commissioners of the District of Columbia, and shall remove the same and restore every such street or avenue to its former condition,

Temporary tracks authorized.

to the satisfaction of such Commissioners, within sixty days after the time fixed for the completion of the works hereby authorzed.

Plans.

Sec. 7. That it is the intention of this Act that the location and construction of the new terminals, terminal tracks, viaduct, and railroad lines hereby authorized within the city of Washington shall be substantially in accordance with the plans agreed upon by and between the Commissioners of the District of Columbia and the Baltimore and Ohio Railroad Company, which plans, with the accompanying drawings, maps, and tracings, signed by the Commissioners and by the chief engineer of such railroad company, are filed in the office of the Engineer Commissioner of said District; but that the company constructing said works shall be authorized to make such minor changes or modifications of or departures from said plans, drawings, maps, and tracings as it may reasonably require or deem necessary, advisable or advantageous and as the Commissioners shall approve and agree to; and in case of any change or modification of or departure from the present plans the Baltimore and Ohio Railroad Company shall submit the new plans to the said Commissioners for their approval, and shall file duly authenticated copies of said plans, after approval, with the Commissioners.

Changes.

Approval.

Approval of construction.

All work of construction authorized by this Act which shall affect in any way the existing streets or avenues of the city or District not hereby abandoned and closed shall be done to the satisfaction and subject to the approval of the Commissioners of the District of Columbia, who are authorized to exercise such supervision over the same as may be necessary to secure the proper construction and maintenance thereof. The company shall also deposit with the Collector of Taxes of the District of Columbia such sums of money as the Commissioners of said District may reasonably require to cover the cost of District inspection.

Deposit for inspection.

Completion of work.

Sec. 8. That of the works hereby authorized the viaduct and main lines of railroad thereon and extending therefrom to their points of connection with the Washington Branch Railroad and Metropolitan Branch Railroad, respectively, shall be completed, and said new terminals shall be ready

for occupancy, within five years from the date of the passage of this Act.

Removal of present tracks.

From and after the expiration of five years from the date of the passage of this Act all rights of the Baltimore and Ohio Railroad Company to maintain and operate the present tracks of its Washington Branch Railroad within the limits of the city of Washington, and the present tracks of its Metropolitan Branch Railroad south of the northern line of New York avenue, also extending from the north line of New York avenue to the north line of Q street, and west of the east line of Third street to said north line of New York avenue, shall cease and determine; and the said railroad company shall thereupon, within such reasonable time as the Commissioners of the District of Columbia shall prescribe, remove all such tracks and structures connected therewith from the streets, avenues, public reservations, or other property of the United States on all the lines to be abandoned as aforesaid.

Company to deed to United States right of way, etc., of Washington Branch Railroad, etc.

Said Baltimore and Ohio Railroad Company shall also immediately execute, acknowledge and deliver to the Commissioners of the District of Columbia a deed, in due form of law, granting, conveying, assigning and transferring to the United States of America all the estates, right, title, and interest that it, the said Baltimore and Ohio Railroad Company, has in, to, or out of the lands included within the limits of the roadway or right of way of the Washington Branch Railroad of said company from the west line of Second street to Winthrop Heights Station and of the Metropolitan Branch for the continuation of Third street from Q street south to New York avenue of an even width as north of Q street, subject, however, as to so much of said lands as lie north of Florida avenue and outside of the limits of the city of Washington, to the continued maintenance and use of the present tracks of said railroad company thereon, for the purpose of reaching its yard and roundhouse at Trinidad, until its new yard in or near Eckington and its roundhouse, authorized by this Act, shall be ready of use, but not exceeding six years from the date of the passage of this Act; said company, however, to have the right to remove its tracks and structures from the lands so granted within sixty days after the expiration of its right to maintain and use its tracks thereon.

Appropriation for payment to company.

In consideration of the surrender by the Baltimore and Ohio Railroad Company, under the requirements of this Act, of its rights under the several Acts of Congress heretofore passed, and under its several contracts with the municipal authorities of the city of Washington authorized by said Acts of Congress, and in consideration of the large expenditures required for the construction of the new terminals, viaduct and connecting railroads, as required by this Act, to avoid all grade crossings of streets and avenues within the city of Washington, and, further, in consideration of the grant and conveyance to the United States of the lands included within the limits of the roadway and right of way of the Washington Branch Railroad, which can be used for a street or avenue for the public benefit, the sum of one million, five hundred thousand dollars, to be paid to said railroad company toward the cost of the construction of said elevated terminals, viaduct and structures within the city of Washington, shall be, and is hereby, appropriated, one-half to be paid out of any money in the Treasury of the United States not otherwise appropriated, the other half to be paid out of the revenues of the District of Columbia. The sum so appropriated shall be paid upon presentation of a certificate by the Commissioners of the District of Columbia that the said viaduct has been completed as required by this Act.

Payment of half chargeable against the District.

In order to provide for the one-half of said amount chargeable to the District of Columbia, the Commissioners thereof shall, on the first day of July following the passage of this Act, and annually thereafter, pay over to the Treasurer of the United States, out of the revenues of the District of Columbia, the sum of one hundred and fifty thousand dollars, to be invested by the said Treasurer in interest-bearing bonds of the United States or the District of Columbia, until the full sum of seven hundred and fifty thousand dollars, as provided herein, shall have been paid.

Property taxable.

Sec. 9. That the property occupied by the Baltimore and Ohio Railroad Company, or by the proposed terminal company, under authority of this Act, together with the improvements which may be put thereon, shall be subject to tax by the District of Columbia the same as other property in the District of Columbia: Provided, That no assessment,

Proviso. Basis of taxation.

valuation, or tax shall be made or levied on the railroad or terminals located, constructed, or maintained under the authority of this Act in excess of that which would or could be lawfully made, laid or levied if said railroad and terminals were so located, constructed, and maintained without the use of bridges, viaducts, retaining walls, and other structures necessary or properly employed to elevate the same as required by this Act, it being the true intent and meaning hereof that the railroad and terminals hereby authorized shall be assessed and valued for purposes of taxation and taxed on the same basis as if the same were not constructed and maintained by means of such bridges, viaducts, retaining walls, and other structures.

Organization of terminal company in District.

Sec. 10. That if, for the purpose of constructing and owning the terminals, viaducts, railroads, depots, stations, and other works authorized by this Act, or any part thereof, the Baltimore and Ohio Railroad Company shall deem it expedient or advisable that a terminal company in its interest to be created and organized in the District of Columbia, the said Baltimore and Ohio Railroad Company, or some person thereto authorized on its behalf by resolutions of its president and directors, together with other persons not less than seven in number, of whom a majority shall be residents of the District of Columbia, shall cause a certificate of incorporation to be executed and recorded in accordance with the provisions of the general incorporation Act of Congress for the District of Columbia relating to railroad companies, being sections six hundred and eighteen to six hundred and seventy-six, both inclusive, of the Revised Statutes relating to the District of Columbia, with such capital stock, not to exceed five million dollars fully paid up, and under such corporate name as may be set forth in such certificate. The corporation so formed shall be vested with all the authority, rights, and privileges granted by said general Act, but the Baltimore and Ohio Railroad Company, or such persons as it may designate by resolution of its president and directors, shall be entitled to subscribe for and hold all the stock of said corporation, without advertisement or allotment, as provided in said sections six hundred and twenty-one and six hundred and twenty-two of said Revised Statutes. Said corporation

R. S. D. C. secs. 618-676, pp. 74, etc. Capital stock.

Powers of corporations, etc.

shall also be vested with and enjoy all the authorities, rights and privileges herein granted, so far as the same are applicable to or exercisable in its undertaking, as set forth in its said certificate of incorporation, and it shall be bound by all the limitations and provisions of this Act. Said corporation shall have the further powers to contract with the Baltimore and Ohio Railroad Company for the use or operation of its railroad and works by the last named company, or for the lease of the same, on such terms as may be agreed upon between the two companies, and shall also have the right and power, exerciseable at any time, to sell and convey all its railroad, works, and property to the said Baltimore and Ohio Railroad Company in consideration of the latter company assuming all its debts and liabilities and agreeing to repay to every stockholder the amount of money actually paid in on the stock held by him.

On the execution, delivery, and recording of the deed of conveyance, pursuant to and in consummation of such sale, the said terminal company shall *ipso facto* be dissolved and its corporate existence shall cease.

In the event, however, that the said terminal company shall not be organized under the provisions of this Act then the privileges, powers, and duties herein conferred and imposed shall devolve exclusively upon the Baltimore and Ohio Railroad Company.

Acquiring land for terminals, etc.

Sec. 11. That the Baltimore and Ohio Railroad Comanpy and the terminal company incorporated as herein provided shall be authorized and empowered, from time to time, to acquire, and hold, in fee simple, all lands and property required for the terminals, stations, yards, railroad facilities, and other works authorized by this Act either by purchase or by condemnation, as provided in sections six hundred and forty-eight to six hundred and sixty-three, both inclusive, of the Revised Statutes, relating to the District of Columbia: Provided, That in every case in which an assessment of damages or an award shall have been returned by the appraisers, the company upon paying into court the amount so assessed or awarded, may enter upon and take possession of the lands and property covered thereby, irrespective of whether exceptions to said assessment or award shall be filed or not, and the subsequent proceed-

Proviso.

Right of entry on deposit of appraisers' award.

ings shall not interfere with or affect such possession, but shall only affect the amount of the compensation to be paid.

Line outside city limits authorized.

Sec. 12. That the Baltimore and Ohio Railroad Company and the terminal company, incorporated as provided in this Act, be, and they are hereby, authorized and empowered to locate, construct, maintain, and operate outside of the limits of the city of Washington a line of railroad with one or more tracks extending from a connection with the Washington Branch Railroad and with the railroad authorized by the foregoing sections of this Act north of Winthrop Heights Station by such route as the company may select as most practicable, and be approved by the Commissioners of the District of Columbia, to a connection with the Baltimore and Potomac Railroad and with the said Baltimore and Ohio Railroad Company's Shepherds Branch at or near Bennings Station; and in the location, construction, maintenance, and operation of the line of railroad authorized by this section the said companies may exercise all the authorities, rights, privileges, and franchises by this Act conferred upon and vested in them in respect of the lines of railroad authorized by the foregoing sections of this Act, outside of the limits of the city of Washington: Provided, That whenever in the construction of said line of railroad it shall be found necessary to cross any existing public highway of the District of Columbia the company shall submit to and file with the Commissioners of the District of Columbia proper plans showing the intended crossing, shall obtain the approval of the same by the said Commissioners, and shall construct such crossing only in conformity with such approved plan. Every such highway crossing shall be either over or under grade where practicable without increasing the grades on said railroad or causing unreasonable expense in construction; and for the purpose of avoiding grade crossings the Commissioner of the District of Columbia shall be fully authorized and empowered to change the grade of any such public highway so as to pass the same over or under said railroad, and to deflect or divert any such highway so as to pass over or under said railroad at a different point of crossing, and to close so much of the said highway as is abandoned; and the company shall acquire, by purchase or

Proviso. Highway crossings, approval of plans.

Relocating highways.

condemnation, at its own expense, all lands required to relocated such highways, and shall pay the cost of all new construction or work required to restore any such highway raised, depressed, deflected or relocated as above provided, all of which construction and work shall be done to the satisfaction and subject to the approval of the said Commissioners.

Repeal.

Sec. 13. That all existing laws or parts of laws inconsistent with the provisions of this Act are hereby repealed to the extent to which they are so inconsistent, but to no further or other extent.

Amendment.

Sec. 14. That Congress reserves the right to alter, amend, or repeal this Act.

Approved, February 12, 1901.

February 28, 1903. (Public, No. 122.)

Chap. 856.—An Act to provide for a union railroad station in the District of Columbia, and for other purposes.

District of Columbia. Union Railroad station. Philadelphia, Baltimore and Washington Railroad, etc. New terminal and track privileges granted to.

BE IT ENACTED BY THE SENATE AND HOUSE OF REPRESENTATIVES OF THE UNITED STATES OF AMERICA IN CONGRESS ASSEMBLED, That the Philadelphia, Baltimore and Washington Railroad Company (a corporation duly created by consolidation and merger of the Philadelphia, Wilmington and Baltimore Railroad Company and the Baltimore and Potomac Railroad Company, their respective capital stocks, railroads, properties and franchises), or the terminal company provided for in section ten of the Act of Congress approved February twelfth, nineteen hundred and one, entitled "An Act to provide for eliminating certain grade crossings of railroads in the District of Columbia, to require and authorize the construction of new terminals and tracks for the Baltimore and Ohio Railroad Company in the city of Washington, and for other purposes," be, and each of them is hereby, authorized and required to locate, construct, maintain, and operate a double-track railroad, commencing at a point on the railroad of said Philadelphia, Baltimore and Washington Railroad Company at or near the crossing of Second street southwest, at the elevation of said railroad provided for in the said Act of Congress relating to the Baltimore and Potomac Railroad Company approved February twelfth, nineteen hundred and one; thence curving toward the north, crossing over Virginia

Vol. 31, p. 775.

Location of tracks.

Vol. 31, p. 767.

avenue with a clearance of fifteen feet above the present curb thereof, crossing over First street southwest and Delaware avenue southwest, at a point about forty feet north of the north house line of E street, with a clearance of not less than sixteen feet; thence curving to the northward, crossing over Canal street and South Capitol street with a clearance of not less than fourteen feet above the curbs thereof; thence passing under the intersection of D street with New Jersey avenue, C street southeast, and B street southeast at the intersection with First street; thence continuing under the west side of First street to near E street northeast; thence curving to the eastward, crossing under the proposed circle at Massachusetts avenue to a connection with the tracks in the proposed terminal station to be built on the north side of Massachusetts avenue hereinafter provided for; thence running from the said north line of Massachusetts avenue on the terminal station structure hereinafter mentioned northeastwardly to Delaware avenue; thence still on said terminal structure, and on the easternmost part of the viaduct, hereinafter mentioned, to be located in Delaware avenue; to the north side of M street northeast; thence northwardly still on Delaware avenue, crossing Florida avenue overhead, by means of a girder bridge, or by masonry arches, to the north side of said avenue; thence by a line, still northwardly, curving to the east, and crossing under New York avenue, by the most practicable route, in a general northeasterly direction, to a point on the north line of Montana avenue, as projected, and shown on plan filed as required by this Act, from which terminal point the Philadelphia, Baltimore and Washington Railroad Company, its successors and assigns, shall be, and is hereby, authorized to locate, construct, maintain and operate a line of railroad, of two or more tracks, by the most practicable route, to a point of connection with its present railroad near Magruder Station in the State of Maryland, and to acquire, from time to time, such lands between Montana and Florida avenues, and east of the present Metropolitan Branch of the Baltimore and Ohio Railroad, as it may need for sidings, switches, yard tracks, with suitable structures and appliances, and other proper corporate purposes in connection therewith, and to use the

Magruder station. Connection.

same accordingly, subject to the approval of the Commissioners of the District of Columbia; and a right of way one hundred feet in width for said line of railroad as it shall be located through and upon lands belonging to the Reform School of the District of Columbia is hereby granted to and vested in said Philadelphia, Baltimore and Washington Railroad Company, its successors and assigns, on such terms as the Attorney-General shall prescribe: PROVIDED, HOWEVER, That the portion of said line of railroad lying south of Florida avenue within the limits of the city of Washington shall be used for passenger trains only, except in cases of temporary emergency, and then for a period not exceeding twenty-four hours, unless with the consent of the Commissioners of the District of Columbia.

Proviso. Restrictions.

JOINT CONSTRUCTION.

Joint construction.

Division of cost.

It is the intention of this Act that the portion of the line of railroad above authorized lying between the north line of Massachusetts avenue and the north line of Florida avenue, if constructed by said Philadelphia, Baltimore and Washington Railroad Company, shall be constructed jointly with the said terminal company, and with the viaduct and elevated terminal carrying the same above or over the streets and avenues of the city, be continuous with the elevated terminal and viaduct of said terminal company; and in that case the cost of said joint works shall be borne by said railroad company and said terminal company in such proportions as they may agree on, or, in case of a disagreement, as may be determined by the Supreme Court of the District of Columbia in such manner as that court shall prescribe. If, however, the Philadelphia, Baltimore and Washington Railroad Company shall deem it expedient or advisable, and shall so elect, that the whole or any portion of the railroad hereby authorized south of the point hereinbefore designated, on the north line of Montana avenue, should be constructed and owned by said terminal company, then and thereupon the said Philadelphia, Baltimore and Washington Railroad Company shall acquire, by purchase, from the said Baltimore and Ohio Railroad Company one-half of the whole then issued capital stock of the termi-

Construction by terminal company alone.

nal company, and be entitled to subscribe for and acquire equally with said Baltimore and Ohio Railroad Company all thereafter issued stock of said terminal company; and, upon such election, said terminal company shall have as full power and authority to locate, construct, maintain, and operate said line of railroads as it is possessed of with reference to the other works, specified in this Act, to be constructed by it, or which it is authorized to construct under the said Act relating to the Baltimore and Ohio Railroad Company, approved February twelfth, nineteen hundred and one.

Vol. 31, p. 775.

UNION STATION.

Main passenger station, etc.

Sec. 2. That the main passenger station and terminals for the accommodation of the passenger traffic of both the Baltimore and Ohio Railroad Company and the Philadelphia, Baltimore and Washington Railroad Company as may be moved over the railroads of either of said two companies, as provided in section eleven, shall be constructed by said terminal company within the area described as follows, namely: Beginning on the north side of Massachusetts avenue at a distance of three hundred feet northwest from the west side of Delaware avenue measured at right angles thereto; thence by a line parallel with Delaware avenue and three hundred feet therefrom northeastwardly to a point in the south line of I street northeast; thence by a straight line northeastwardly to a point in the interesction of the west line of Delaware avenue with the south line of L street northeast; thence eastwardly, along the south line of L street northeast, to a point in the intersection with the west line of Second street northeast; thence south, along the west line of Second street northeast, to a point about eighty feet north of the north line of H street northeast; thence by a line parallel with and distant three hundred feet measured at right angles thereto eastwardly from the east line of Delaware avenue, southwestwardly to a point in the north line of Massachusetts avenue; thence by the said north line of Massachusetts avenue to the point of beginning.

Post, p. 918.

Location.

Cost and character of station.

The terminal station contemplated by this Act shall cost not less than four million dollars and shall be monumental

in character, and the plans thereof shall be subject to the approval of the Commissioners of the District of Columbia.

Acquiring lands.

And for the purposes of said passenger station and terminal said terminal company is fully authorized and empowered to acquire, take, and use all the lands and property lying within said area, or so much thereof as it may deem necessary: PROVIDED, That on the westerly side of said railway station sufficient land for a street not less than forty feet in width shall be dedicated to the District of Columbia by the said railroad companies and said terminal company.

Proviso. Dedication of land for street.

VIADUCT.

Viaduct. Location.

Sec. 3. That the viaduct leading northwardly from the passenger station and terminal between the south side of L street and the north side of M street may ocupy so much of the bed of Delaware avenue as lies west of a line drawn parellel with the east building line of said avenue and forty feet westwardly therefrom: PROVIDED, HOWEVER, that said terminal station and viaduct shall be so constructed as to permit H, K, L, and M streets, and Florida avenue to be passed and continued under the same through openings or spaces of sufficient clearance to permit the use of said streets and avenues in the form and manner and of the dimensions shown and indicated on the plan and profiles agreed upon between the Baltimore and Ohio Railroad Company, the terminal company, and the Philadelphia, Baltimore and Washington Railroad Company and the Commissioners of the District of Columbia, and filed in the office of the Engineer Commissioner; and the said terminal company shall also grade and pave the said passageways at the time of their construction to the satisfaction of the Commisioners of the District of Columbia, but thereafter the maintenance of the pavements and roadways shall be provided for as in the case of other public highways in the District of Columbia.

Proviso. Passage for streets.

Grading and paving.

Said viaduct shall be of sufficient width to carry, in addition to the tracks authorized by said Act relating to the Baltimore and Ohio Railroad Company, approved February twelfth, nineteen hundred and one, such tracks as may be required to accommodate the traffic of the said Phila-

Width of viaduct. Vol. 31, p. 774.

delphia, Baltimore and Washington Railroad Company, and one or more freight tracks for the Baltimore and Ohio Railroad Company, to be located on the west side thereof.

YARDS AND SWITCHES FOR TERMINAL CO.

Yards, switches, etc.

Said terminal company is also expressly authorized and empowered, subject to the approval of the Commissioners of the District of Columbia, to acquire and become possessed of such lands in the District of Columbia, outside the city limits, as may be from time to time needed for the purpose, and thereon to construct, maintain, own, and operate yard tracks, switches, roundhouses, shops and other structures to adequately accommodate the handling, shifting, housing, storing, cleaning, and repairing of the locomotives and cars of such companies as shall be entitled to use the said passenger station and terminal; and also to establish, maintain, and operate the necessary tracks connecting the same with the tracks on Delaware avenue: PROVIDED, That said roundhouses and shops shall be located as designated on plans to be approved by the Commissioners of the District of Columbia, and filed in the office of the Engineer Commissioner.

Proviso. Location of roundhouses, etc.

BALTIMORE AND OHIO FREIGHT TRAFFIC.

Additional freight facilities for Baltimore and Ohio Railroad.

Sec. 4. That in order to provide terminal facilities for the freight traffic of the Baltimore and Ohio Railroad Company in lieu of those which said company is now authorized to have within the area to be ocupied by the passenger station and terminal, described in the Act relating to it, approved February twelfth, nineteen hundred and one, the said Baltimore and Ohio Railroad Company be, and it is hereby, authorized and empowered (in addition to the power and authority conferred upon it by the provisions of said Act relating to it, approved February twelfth, nineteen hundred and one) to locate, construct, maintain, and operate tracks, switches, sheds, warehouses, other structures, and facilities necessary or proper for a freight-delivery yard and terminal in Eckington, in, over and upon the bed of Quincy street and Third street between New York avenue and R street, and in and upon the property bounded by New York avenue, Florida avenue, Eckington place, and R street, outside the limits of the city of Washington; and

Vol. 31, p. 774.

In Eckington.

In city limits.

also within the city of Washington in, over, and upon the bed of Second street between M and N streets and in and upon squares seven hundred and eleven, seven hundred and twelve, and seven hundred and thirteen; and also to extend its tracks and switches north of V street on the east side of the main tracks of its Metropolitan Branch Railroad to Rhode Island avenue extended; and said company is hereby authorized to acquire, by purchase or condemnation, as provided in this Act, the lands and property necessary for the additional freight facilities above mentioned.

STREETS TO BE VACATED.

Streets to be vacated.
Vol. 31, p. 775.

Sec. 5. That to accomplish the purposes of this Act the following named streets, in addition to the streets vacated, abandoned, and closed by the provisions of said Act relating to the Baltimore and Ohio Railroad Company, approved February twelfth, nineteen hundred and one, are hereby vacated, abandoned, and closed, to-wit: In Eckington, T

In Eckington.

street shall be closed between the west line of Seventh street and the right of way of the Metropolitan Branch of the Baltimore and Ohio Railroad Company; Thomas street from the west line of Seventh street westward; Seaton street from Sixth street to Seventh street; S street from Sixth street to the Brentwood road; Brentwood road from the west side of Seventh street to the south side of S street; Third street from the south side of R sreet to Florida avenue; Quincy street shall be closed and abandoned: PROVIDED, That no streets or avenues shall be closed or abandoned under the provisions of this Act or of the Acts relating to the Baltimore and Ohio Railroad Company and the Baltimore and Potomac Railroad Company, approved February twelfth, nineteen hundred and one, until all of the property abutting on the streets or avenues, or portions thereof, provided to be closed in said Acts, shall have been acquired by said railroad company or companies or the terminal company referred to herein, either by condemnation or purchase, as hereinafter provided. No streets or avenues, except Ninth, Twlfth, and Fifteenth streets and New York avenue, shall be opened across the railroads constructed under authority of this Act between Florida and Montana avenues; and said Ninth, Twelfth, and Fifteenth

Provisos.
Restrictions.

Streets to be elevated.

streets, when and as opened, shall be carried above the railroads by suitable viaduct bridges, the cost whereof, with their approaches within the limits of the right of way, shall be paid by the terminal company, but shall be maintained as in the case of other public highways in the District of Columbia: PROVIDED, That the Baltimore and Ohio Railroad Company shall make adequate and suitable provision for carrying T street over the railroad right of way to the west line of Seventh street east in a manner satisfactory to the Commissioners. And the terminal company shall construct the necessary tunnels or viaducts to permit New York avenue to be carried with its full width between parking lines over their rights of way as herein authorized; and shall fill said avenue to a like width to the grade approved for said avenue for the purposes of this Act across said right of way and westward to Florida avenue, and shall support the sides of said avenue with embankments or retaining walls wherever it abutts upon property belonging to said railroad, and nothing contained in the provisions heretofore made for the vacating of Third street and Brentwood road across said avenue shall operate to close said avenue in any way as a public thoroughfare at its full established width: AND PROVIDED FURTHER, That the Baltimore and Ohio Railroad Company shall dedicate to the District of Columbia the necessary land to widen Eckington place on its east side to its full width in accordance with the recorded plans for street extensions, and the Philadelphia, Baltimore and Washington Railroad Company shall dedicate to the District of Columbia the necessary land to form a western exit from Ivy street to Canal street as shown on the plan filed by said company as required by this Act. Also, in the city of Washington the following named streets are hereby vacated, abandoned, and closed, to-wit: Ivy street between South Capitol street and a point two hundred and twenty feet east thereof; Second street northeast, between N street and Delaware avenue, and, between the north side of M street and the south side of L street, so much of the bed of Delaware avenue as lies west of a line drawn parallel with the east building line of said avenue and forty feet westerly therefrom; also all parts of streets included within the area of the terminal herein

T street.

New York avenue.

Widening Eckington Place.

Streets to be vacated in city.

described, except H and K strets, it being the intention of this Act that all streets, avenues, ways and alleys within the area to be occupied and used for said terminal and terminal tracks shall be completely vacated, abandoned, and closed, and the use thereof and of any public reservation or street spaces of the United States within said area be granted to the company constructing such terminals for the purposes of the same, except that H and K streets shall be carried under said terminal tracks substantially in accordance with the plans agreed upon between the Baltimore and Ohio Railroad Company, the terminal company, and the Philadelphia, Baltimore and Washington Railroad Company, and the Commissioners of the District of Columbia, and filed in the office of the Engineer Commissioner.

Massachusetts avenue plaza.

MASSACHUSETTS AVENUE PLAZA.

Acquisition of land authorized.

The Commissioners of the District of Columbia, are hereby authorized and directed to cause all streets, avenues, ways and alleys to be closed as provided in this Act, and in accordance with the intent thereof; and also to lay out a circle or plaza at the intersection of Massachusetts avenue and Delaware to lay out and open streets leading to such circle, and to change the lines of certain other adjacent streets and of Ivy street, as shown on a plan filed in the office of the said Commissioners, and also to make such changes in the lines and grades of any existing street, avenue or way and in the recorded plans of street extensions as may be reasonably required, deemed necessary, or advisable in the construction of the works hereby authorized. And authority is hereby given said Commissioners to acquire by purchase, or to condemn in accordance with existing law, the land necessary to carry out the proceedings authorized by this Act, and to reconstruct, grade, and pave, by lay labor or otherwise, the streets, avenues and ways changed in line or grade or newly created hereunder.

Sale, etc., of abandoned land.

And authority is hereby given the District Commissioners to sell or equitably exchange any portion of existing public space abandoned by reason of the adjustment of streets as an approach to the plaza or circle at Massachusetts avenue:

PROVIDED, That the provisions of section three of the Act of February twelfth, nineteen hundred and one, in relation to new terminals for the Baltimore and Ohio Railroad Company which vacate, abandon, and close D and E streets between First street and North Capitol street and Delaware avenue between C street and the south line of Massachusetts avenue, be, and the same are hereby, repealed, and said streets are restored to the same status and ownership in all respects as they were prior to the passage of said Act.

Proviso.
Streets reopened.
Vol. 31, p. 775, amended.

DAMAGES.

All damages to adjacent property owners resulting from, incidental to, or connected with changes in the grades of the streets or alleys authorized by this Act shall be borne, paid for, and defrayed, by the District of Columbia, and shall be recoverable by action of law against the said District on the part of the owners of the property so damaged. Fifty per centum of the amounts so recovered shall be refunded to the said District by the United States: PROVIDED, That in determing the damages as herein provided the jury shall take into consideration any benefits that may have accrued by reason of the elimination of grade crossings or of the location of said station in proximity to the property alleged to have been damaged.

Payment of damages by the District.

United States to refund one-half.
Proviso.
Benefits.

TAXATION.

Sec. 6. That the property owned or occupied by the terminal company, or by the Philadelphia, Baltimore and Washington Railroad Company, or by the Baltimore and Ohio Railroad Company under authority of this Act, or otherwise, together with the improvements that may be put thereon, shall be subject to taxation in the District of Columbia in the same manner and to the same extent as other property in the District, and all tracks and sidings shall be taxed as real estate: PROVIDED, That no assessment, valuation, or tax shall be made, laid or levied on the stations, terminals, and lines of railroad located, constructed, or maintained, under the authority of this Act in excess of that which would or could be lawfully made,

Basis of taxation.

Condemnation proceedings. Vol. 31, pp. 767, 774.

Sec. 9. That in the execution of the powers conferred by this Act, or by either of said before-mentioned Acts, approved February twelfth, nineteen hundred and one, by the terminal company, the Philadelphia, Baltimore and Washington Railroad Company, or the Baltimore and Ohio Railroad Company, each of said companies may acquire, by purchase or condemnation, the lands and property necessary for all and every the purpose contemplated by each of said last-mentioned Acts and this Act respectively; and such condemnation shall be effected in the manner and by the methods and processes provided by sections six hundred and forty-eight to six hundred and sixty-three, both inclusive, of the Revised Statutes relating to the District of Columbia, which said sections, despite any repeal thereof, are hereby continued in full force and effect, and, for the purposes contemplated by this section, are hereby specially enacted, with like effect as if the same were incorporated herein at length: PROVIDED, That in every case wherein an assessment of damages or an award shall have been returned by the appraisers the company, upon paying into court the amount so assessed or awarded, may enter upon and take possession of the land and property covered thereby, irrespective of whether exceptions to said assessment or award shall be filed or not, and the subsequent proceeding shall not interfere with or affect such possession, but shall only affect the amount of compensation to be paid: AND PROVIDED FURTHER, That any property owner whose land is included within such location shall have the right, within two years, to begin proceedings to compel the appropriation of said land by said company and the payment of damages in the same manner as if the proceedings had been instituted by the company under the provisions of this Act.

R. S. D. C. secs. 648-663, pp. 78, 79.

Proviso. Possession.

Proceedings to compel appropriation of lands.

Additional works.

The said terminal company, in respect of the additional works hereby authorized to be undertaken by it, shall be vested with and may execise all the powers, authorities, rights, and privileges, granted by the provisions of sections six hundred and eighteen to six hundred and seventy-six, both inclusive, of the Revised Statutes relating to the District of Columbia, to the same extent as if said provisions were fully set forth and enacted herein, and shall also be vested with and enjoy all the powers, authorities, rights, and franchises conferred or granted by said Act relating to the Baltimore and Ohio Railroad Company approved February twelfth, nineteen hundred and one, except the power to sell all its railroad and works and property to the Baltimore and Ohio Railroad Company, as provided in said last-named Act: PROVIDED, HOWEVER, That the Philadelphia, Baltimore and Washington Railroad Company shall have the right to acquire, own, and hold one-half of the capital stock of said terminal company, whether now or hereafter issued, and said Baltimore and Ohio Railroad Company shall make necessary transfers thereof accordingly.

R. S. D. C. secs. 618-676, pp. 74-81.

Vol. 31, p. 774.

Exception.

Proviso. Capital stock.

POWER TO CONTRACT.

Traffics contracts.

The Baltimore and Ohio Railroad Company, the Philadelphia, Baltimore and Washington Railroad Company, and the said terminal company shall have power to contract each with the other, or with both the others, or with any other railroad company or companies whose passenger traffic may be moved over the railroads of either of said two railroad companies as provided in section eleven, in regard to the construction, maintenance, use, or operation of any line or lines of railroad, terminals, terminal tracks, stations, or other work or properties, held, owned, or possessed by any of said companies within the District of Columbia, or authorized so to be, or for the lease of the same upon such terms as may be agreed upon between the parties to any such contract. Said terminal company shall also have the right and power, exercisable at any time, to sell and convey, either to the Baltimore and Ohio Railroad Company or to the Philadelphia, Baltimore and Washington Railroad Company, so much of the line of railroad constructed by the

Post, p. 915.

Sell by terminal company.

said terminal company under the authority of this Act, north of the north line of Florida avenue, as may be set apart for the exclusive use of the traffic of either of said railroad companies by their mutual consent.

MAGRUDER STATION LINE.

Magruder station line.

Sec. 10. That in the location, construction, and maintenance of the connecting line of railroad which the Philadelphia, Baltimore and Washington Railroad Company is by this Act authorized and empowered to locate, construct, maintain, and operate, from the point hereinbefore mentioned on the north line of Montana avenue to a point of connection with its railroad near Magruder Station, in the State of Maryland, said Philadelphia, Baltimore and Washington Railroad Company shall have, be possessed of, and exercise the powers and processes of condemnation as prescribed by section nine of this Act, and also all authorities, rights, powers, privileges, and franchises conferred upon or vested in the Baltimore and Ohio Railroad Company by the twelfth section of said Act relating to it, approved February twelfth, nineteen hundred and one, in respect to the line of railroad therein authorized, and shall be subject to the same limitations and restrictions as in said twelfth section set forth.

Location, etc., of tracks.

Ante, p. 916.

Vol. 31, p. 780.

INTERSECTING HIGHWAYS.

Intersecting highways.

Any and all streets or highways within the District of Columbia now or hereafter planned or projected to cross any line of steam railroad in the District of Columbia, which may be hereafter opened to public use, shall be located, constructed, and maintained either beneath such railroad by a suitable subway, or above the same by a suitable viaduct bridge at such altitude as will not interfere with the free and safe operation thereof. The cost and expense of opening said streets or highways within the limits of such railroad company's right of way, including the cost of constructing the portion of any viaduct bridge, within said limits, shall be borne and paid half by such railroad company, its successors and assigns, and half by the District of Columbia and the United States, but after construction

Subways, etc.

Cost of opening streets, etc.

Maintenance.

the cost of maintenance shall be wholly borne and paid as in the case of other public highways in the District of Columbia; and the portions of such streets now or hereafter planned or projected as above which lie within a right of way belonging to such railroad company shall be dedicated by such company as a public thoroughfare when the portions of such street adjoining such right of way have been similarly dedicated or otherwise acquired.

Use by other roads.

Sec. 11. That any railroad company now or hereafter lawfully existing and authorized to extend a line of railroad into the District of Columbia, or having secured the right to operate over the lines of any other then existing railroad, to a point of connection with the tracks of said terminal company, shall have the right to the joint use of said station and terminals upon the payment of a reasonable compensation for the use of the same; and if the parties be unable to agree upon such terms, then the same shall be prescribed by the Supreme Court of the District of Columbia, upon petition of either party in interest, under such rules of procedure as the said court shall prescribe.

Compensation.

Substation at Long Bridge.

Sec. 12. That the Philadelphia, Baltimore and Washington Railroad Company shall establish and maintain a substation with suitable accommodation for passenger travel at a convenient location north of the Long Bridge and at a point to be approved by the Commissioners of the District of Columbia.

AMENDMENT AND REPEAL.

Amendment.

Sec. 13. That Congress reserves the right to alter, amend or repeal this Act.

Approved, February 28, 1903.

ILLINOIS TRANSFER RAILROAD COMPANY.

Articles of Incorporation

Illinois Transfer Railroad Company,

The undersigned, J. M. Hamill, James Hanna, Michael Harrold, E. P. Bryan, and J. W. Taylor, for the purpose of organizing a railroad corporation under and pursuant to an act of the general assembly of the state of Illinois, approved

and in force March 1, 1872, entitled "An act to provide for the incorporation of associations that may be organized for the purpose of constructing railways, maintaining and operating the same; for prescribing and defining the duties and limiting the powers of such corporations when so organized, and authorizing the same and all railroad companies of this state to own and hold the stock and securities of railroad companies of other states owning connecting lines," and amendments thereto, and for the purpose of constructing and operating a railroad in said state, do hereby make, agree to, and adopt the following articles of incorporation, to-wit:

I. The name of such proposed corporation shall be Illinois Transfer Railroad Company.

II. The places from and to which it is intended to construct the proposed railway are from a point on the Mississippi river in the county of Madison, opposite town or village of Venice in said county of Madison; thence through the counties of Madison and St. Clair, to a point on said Mississippi river in said county of St. Clair south of Missouri avenue in the city of East St. Louis in said county of St. Clair.

III. The place at which shall be established and maintained the principal business office of such proposed corporation is the city of East St. Louis, county of St. Clair, state of Illinois.

IV. Such corporation shall continue a body for a period of fifty (50) years from the date of the filing and recording of these articles of incorporation in the office of the secretary of state of the state of Illinois.

V. The amount of the capital stock of such corporation shall be $500,000.

VI. The names and places of residence of the persons forming such corporation are as follows, to-wit: J. M. Hamill, Belleville, Illinois; James Hanna, Alton, Illinois; Michael Harrold, East St. Louis, Illinois; E. P. Bryan, St. Louis, Missouri and J. W. Taylor, St. Louis Missouri.

VII. The names of the members of the first board of directors are as follows: J. M. Hamill, James Hanna, Michael Harrold, E. P. Bryan and J. W. Taylor; the officers and persons in whom the government of the corporation and the management of its affairs shall be vested are the first board of directors as just stated.

VIII. The number of shares shall be five thousand (5000) and the amount of each share shall be one hundred dollars ($100).

In witness whereof, we have hereunto severally subscribed our names this twenty-sixth day of October, 1899.

J. M. Hamill,
Jas. Hanna,
Michael Harrold,
E. P. Bryan,
J. W. Taylor.

Acknowledged before N. D. Huer, notary public, St. Louis, Missouri, October 25, 1899.

Filed in the office of the secretary of state of Illinois, October 27, 1899.

St. Louis Belt and Terminal Railway Company.

Articles of Association.

St. Louis Belt and Terminal Railway Company.

Know all men by these presents, that the undersigned do hereby associate themselves together by these articles of association for the purpose of constructing, maintaining and operating a standard gauge railroad for public use in the conveyance of persons and property, under the laws of the state of Missouri, and more particularly under the provisions of article II, chapter 12, of the revised statutes of Missouri, 1899, and acts amendatory thereof.

I. The name of this company shall be the St. Louis Belt and Terminal Railway Company.

II. It shall continue as a body corporate for the period of one hundred (100) years.

III. Said company is organized for the purpose of constructing, maintaining and operating a standard guage railroad for public use in the conveyance of persons and property under the laws of the state of Missouri, with single or double track, from a point on or near the west bank of the Mississippi river in Carondelet township, in St. Louis county, Missouri, and running thence to a point on the right of way of the St. Louis and San Francisco Railroad Company at or near the intersection with the line dividing the city of St. Louis from the county of St. Louis, and thence to a point in Central township, in said county, west to Clayton court house, thence to a point at or near the west bank of the Mississippi river between the Chain of Rocks in said county and Eads bridge in the city of St. Louis, and also to construct, maintain and operate single or double track spurs, switches, side tracks, branch lines and connections from points on its aforesaid main line to points within the city of St. Louis and in the aforesaid county of St. Louis and to stations, warehouses, yards, depots and manufacturing establishments in said city or county, and to make connections with other railroads now or hereafter constructed in said city and county for the purpose of providing complete and convenient terminal railway facilities, connections and accommodations in said city and county for all railroads now entering, or which may hereafter be constructed in said city or county, and all individuals and corporations doing business with said railroads.

IV. The railroad to be constructed, maintained and operated by this company is to be twenty-one (21) miles in length.

V. It is intended to construct said railroad in the city of St. Louis and county of St. Louis as aforesaid.

VI. The capital stock of the company is three million dollars ($3,000,000.00), divided into thirty thousand (30,000) shares of the par value of one hundred dollars ($100) per share. Of said capital stock, stock to the amount of eight hundred thousand dollars ($800,000.00), being eight

thousand (8,000) shares of the par value of one hundred dollars ($100) per share, is preferred stock, and the remainder of said stock, being stock to the amount of two million two hundred thousand dollars ($2,200,000.00), or twenty-two thousand (22,000) shares of the par value of one hundred dollars ($100) each, is common stock. The holders of preferred stock shall be entitled to receive dividends thereon, if and when declared, up to, but not exceeding, four per cent in any year, before any dividends in that year shall be set apart or paid on the common stock, but such preferred dividends shall not be cumulative; and such dividends on the preferred stock may be paid annually, semi-annually or quarterly, as the board of directors shall in its discretion determine; after the payment of such dividends on the preferred stock, the holders of the common stock shall be entitled to receive all the net proceeds that may then be distributed as dividends, if and when declared.

The holders of said preferred stock shall not be entitled to vote at any meeting of the shareholders of the company for any purpose, held within thirty years from the date of its incorporation, and said preferred stock, or any part thereof, may at the option of the company, exercised by and through its board of directors, at any time, or from time to time, be called in and cancelled by the payment to the holders of the same the par value thereof. Upon the board of directors exercising said option, they shall be caused to be published in some newspaper of general circulation in the city of St. Louis, a notice to the holders of said preferred stock, designating the number of the certificates thereof, and the number of shares thereof to be called in, cancelled and paid as aforesaid, and after the publication of said notice no further dividends shall be paid upon the certificates of said preferred stock called in for cancellation as aforesaid.

VII. The business of this corporation shall be managed by a board of directors composed of nine persons, and the following are the names and places of residence of those agreed upon to manage the affairs of the company for the first year, and until others are chosen in their places, namely: Charles G. Warner, St. Louis, Missouri; Russel Harding, St. Louis, Missouri; Edwin G. Merriam, St. Louis, Mis-

souri: Benjamin L. Winchell, St. Louis, Missouri; Benjamin F. Yoakum, St. Louis, Missouri; Luman F. Parker, St. Louis, Missouri; William K. Kavanaugh, St. Louis, Missouri; James Y. Lockwood, St. Louis, Missouri; John F. Lee, St. Louis, Missouri.

VIII. In testimony whereof, each subscriber to these articles of association hereby subscribes hereto his name, place of residence and number of shares of stock he agrees to take in said company as follows:

Name	Place of Residence	Shares	Amount
C. G. Warner,	St. Louis, Missouri.....	50	$5,000
Russell Harding,	St. Louis, Missouri.....	10	1,000
Edwin G. Merriam,	St. Louis, Missouri.....	10	1,000
B. F. Yoakum,	St. Louis, Misouri.....	50	5,000
B. L. Winchell,	St. Louis, Missouri.....	10	1,000
L. F. Parker,	St. Louis, Missouri.....	10	1,000
W. K. Kavanaugh,	St. Louis, Missouri.....	50	5,000
Jas. Y. Lockwood,	St. Louis, Missouri.....	10	1,000
John F. Lee,	St. Louis, Missouri.....	10	1,000

State of Missouri, City of St. Louis, ss.

On this 11th day of March, A. D. 1902, before me came Charles G. Warner, Benjamin F. Yoakum and John F. Lee, all to me personally known, and who being by me first duly sworn, on their respective oaths state that the foregoing and annexed articles of association contain the true and original list of subscribers to the capital stock of the St. Louis Belt and Terminal Railway Company; that they are directors in said company named in said articles of asociation; that at least one thousand doliars of stock for every mile of said railway proposed to be constructed is subscribed thereto, and five per cent paid thereon, in good faith, and in cash, to the directors named in said articles of association; and that it is intended in good faith to construct, maintain and operate the standard gauge railroad mentioned in said articles of association.

B. F. Yoakum,
C. G. Warner,
John F. Lee.

Subscribed and sworn to before me this 11th day of March, A. D. 1902. My commission as notary expires September 27, 1904.

(Seal) Ernest M. Kenna,
Notary Public, City of St. Louis, Missouri.

Filed and copy issued March 14, 1902.

Sam B. Cook,
Secretary of State.

TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS.

Formed by consolidation of Union Railway and Transit Company of St. Louis and Terminal Railroad of St. Louis. Length of track, including Union Depot Company. Main track, 1.03; second track, 1.03; side track, 52.50; total, 54.56 miles.

On October 1, 1889, an agreement was entered into between Jay Gould (then in control of the Union Railway and Transit Companies of St. Louis and Illinois, the Terminal Railroads of St. Louis and East St. Louis, and the Union Depot Company), the Missouri Pacific and Wabash Railroad Companies (who were lessees of the St. Louis Bridge and the Tunnel Railroad of St. Louis); the St. Louis, Iron Mountain and Southern; Cleveland, Cincinnati, Chicago and St. Louis; Ohio and Mississippi; Louisville and Nashville Railroad Company, which provided for the organization of a corporation called the Terminal Railroad Association of St. Louis, to operate the terminals at St. Louis and East St. Louis, whose capital stock should be jointly and equally owned by the six railroad companies last mentioned, and whose tracks and facilities should be perpetually used by them, the rate of toll or charges for such use to be sufficient to pay expenses of operation and maintenance, interest on the bonds of the new company, and on the bonds and stocks of the St. Louis Bridge Company and the Tunnel Railroad of St. Louis. The St. Louis, Vandalia and Terre Haute Railroad Company, now the Vandalia Railroad Company, was named in the body of the agreement, and one-seventh of the capital stock was reserved for delivery to it, but it did not subscribe to the

agreement at that time, nor become a party to it until February 13, 1902, when one-seventh of the original stock was delivered to it.

Each of the proprietary companies limited its liability for any deficit in the revenues to pay fixed charges to its pro rata share of $1,000,000, which liability was afterward extended, through the guaranty agreement of December 16, 1902, as will be seen below.

The agreement explicitly sets forth that the rental due to the Bridge and Tunnel Companies (being interest on $5,000,000 bonds and dividends on the first and second preferred stock of the Bridge Company, and on the capital stock of the Tunnel Company) has precedence over all other fixed charges except the $7,000,000 first mortgage bonds of the Terminal Association.

Provision was made in this agreement for the future admission of other railroad companies upon similar terms.

In accordance with the agreement, the Union Railway and Transit Company of St. Louis and the Terminal Railroad of St. Louis consolidated under the name of the Terminal Railroad Association of St. Louis, to which were transferred the entire capital stocks of the Union Railway and Transit Company (of Illinois) Terminal Railroad of East St. Louis, and the Union Depot Company of St. Louis, and all the property of the latter company was conveyed by deed of October 3, 1889. The lease of the St. Louis Bridge and the Tunnel Railroad of St. Louis was assigned to the new Company by the Missouri Pacific and Wabash Railroad Companies on October 3, 1889. The consideration for these capital stocks, leaseholds and property was $5,000,000 of the first mortgage bonds of the Terminal Railroad Association.

The articles of consolidation of the Terminal Railroad Association of St. Louis were dated July 26, 1889, and were filed in the office of the secretary of state of Missouri, July 30, 1889; the first election for directors was held July 30, 1889, and the organization was perfected the same day.

The St. Louis, Vandalia and Terre Haute Railroad Company, which, on January 1, 1905, became merged into the Vandalia Railroad Company, was admitted to member-

› in the association by agreement of February 13, 1902, Pittsburgh, Cincinnati, Chicago and St. Louis Rail- / Company, and the Terre Haute and Indianapolis Rail- d Company joining in the agreement as guarantors, their gations being apportioned between by agreement of .rch 10, 1902.

The St. Louis and San Francisco Railroad Company was mitted to membership by agreement of June 9, 1902.

The Chicago, Rock Island and Pacific Railway Company, nd the St. Louis, Kansas City and Colorado Railroad Company, as part of the system of that company; the Southern Railway Company; Illinois Central Railroad Company; Missouri, Kansas and Texas Railway Company; Chicago and Alton Railway Company, and the Chicago, Burlington and Quincy Railway Company were admitted by agreements of December 16, 1902, under the following circumstances:

The Chicago, Rock Island and Pacific Railway Company, in order to provide itself and other companies with terminal facilities at St. Louis and East St. Louis, had acquired almost a majority of the capital stock of the Wiggins Ferry Company; and the proprietary companies, on behalf of the Terminal Association, which was itself without means to make the purchase, had also acquired nearly a controlling interest. In order to settle a controversy over the control of the Wiggins Ferry Company, threatening to result in prolonged litigation, the Chicago, Rock Island and Pacific Railway Company and the five other railroad companies were admitted to membership in the Terminal Association by the agreements of December 16, 1902, above mentioned, which agreements were accompanied by certain other agreements of the same date, known as the Preliminary, Admission, Second Admission, Assurance, Guaranty, Ferry Stock and Trust agreements, and briefly explained as follows:

Preliminary agreement, between the then nine proprietary companies, the Pennsylvania Company, and the Chicago, Rock Island and Pacific Railway Company, granting the latter company the use of certain terminal facilities, and also providing for the admission of the Illinois Central, Chicago, Burlington and Quincy, Chicago and Alton, and Southern Railway Companies to membership in the asso-

ciation. The Pennsylvania Company was a party to this agreement because of its stock ownership in the St. Louis, Vandalia and Terre Haute Railroad Company, now the Vandalia Railroad Company.

Assurance agreement, between the Chicago, Rock Island and Pacific Railway Company and the Terminal Railroad Association, whereby the latter agreed to perform the obligations of the proprietary companies under the Preliminary agreement, and also that the rights granted the Chicago, Rock Island and Pacific Railway Company under that agreement were not modified by the Admission agreement.

Admission agreement, between the Terminal Railroad Association of St. Louis and the Chicago, Rock Island and Pacific Railway Company, and the St. Louis, Kansas City and Colorado Railroad Company, admitting those two companies to membership in the Terminal Association.

Second Admission agreement, between the Terminal Railroad Association and the Southern Railway Company; Illinois Central Railroad Company; Missouri, Kansas and Texas Railway Company; Chicago and Alton Railway Company, and the Chicago, Burlington and Quincy Railway Company, admitting those companies to membership. The Chicago and Alton Railroad Company and the Chicago, Burlington and Quincy Railroad Company joined in this agreement as guarantors of the two last named companies respectively.

Guaranty agreement, between the fourteen proprietary companies, the guarantors of three of them, the Terminal Railroad Association, and the trustees of its general mortgage. By this agreement the payment of the interest on the general mortgage bonds of the Terminal Association was specifically guaranteed by the proprietary companies, it being further provided that the charges for the use of the facilities of the Terminal Association should be sufficient to pay the cost of maintenance and operation, fixed charges, etc., and that each of the proprietary companies should make good its proportion of any deficit in the revenues to meet those charges. Under the agreement of October 1, 1889, under which they became members, their liability had been limited to their proportionate share of a deficit amounting to not more than $1,000,000.

Ferry Stock agreement, between thirteen of the proprietary companies (the St. Louis, Vandalia and Terre Haute Railroad Company not joining) the Pennsylvania Company (taking the place of the St. Louis, Vandalia and Terre Haute Railroad Company) and the Terminal Railroad Association, providing for the reimbursement of those companies for amounts invested by them in the purchase of the capital stock of the Wiggins Ferry Company, and for the assignment of that stock to the trustees of the general mortgage of the Terminal Railroad Association, the title to the stock to vest in the proprietary companies subject to the mortgage.

Trust agreement, between thirteen of the proprietary companies, the Pennsylvania Company (taking the place of the St. Louis, Vandalia and Terre Haute Railroad Company) and the trustees of the general mortgage of the Terminal Railroad Association, assigning to the latter the capital stock of the Wiggins Ferry Company as additional security for the payment of the general mortgage bonds of the Terminal Association, the stock to be held in trust for the proprietary companies, subject to the mortgage.

In addition to the agreements of December 16, 1902, as above described, an agreement called the "Supplemental Agreement," dated January 16, 1903, which was supplemental to the agreement of October 1, 1889, under which the association was formed, provided among other things that in case any member defaulted in the performance of its obligations under the agreement of October 1, 1889, the Supplemental agreement or Guaranty agreement, the stock of such member should be surrendered to the association and distributed pro rata among the remaining members.

As already explained the Terminal Railroad Association acquired on October 1, 1889, the capital stocks of the Union Railway and Transit Company (of Illinois) Terminal Railroad of East St. Louis, and Union Depot Company of St. Louis.

In 1893 the association obtained a controlling interest in the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, and also acquired all of the cap-

ital stock and bonds of the St. Louis Terminal Railway Company.

The capital stock of the Granite City and Madison Belt Line Railroad Company was purchased June 18, 1900, and the capital stock of the St. Louis Belt and Terminal Railway Company was purchased October 1, 1902, by the Terminal Association.

Control of the Wiggins Ferry Company was obtained in December, 1902, as explained above.

In February, 1903, the Terminal Association purchased the entire capital stock of the Interstate Car Transfer Company.

It also an February 16, 1903, purchased the entire capital stock of the East St. Louis and Carondelet Railway in accordance with an agreement with the Pennsylvania Company dated February 13, 1902.

The East St. Louis Belt Railroad Company, Illinois Transfer Railroad Company, and Terminal Realty Company were organized in the interest of the Terminal Association.

Ordinances of the city of St. Louis, approved March 31, 1890, July 30, 1892, and April 7, 1897, granted the company the right to lay tracks on certain streets, and ordinance of February 25, 1891, authorized the construction of a new depot and tracks.

Capital Stock.

The capital stock authorized in the articles of consolidation was $7,000,000, in shares of $100 each. A certificate was filed in the office of the secretary of state of Missouri April 17, 1893, of an authorized increase to $12,000,000, and another certificate was filed December 10, 1902, of an authorized increase to $50,000,000. There was $2,882,000 stock issued, of which each of the fourteen proprietary companies owns $205,800, and $800 is held by the president, chairman of the board, and inspectors of elections, to enable them to qualify as such officers.

This stock is inalienable and not transferable, and must be returned to and become the property of the Terminal Association, whenever the proprietary company holding it ceases to be a member of the association.

MORTGAGES AND BONDS.

First mortgage, dated October 1, 1889, to the Central Trust Company of New York, trustee, securing $7,000,000 bonds of $1000 each, dated October 1, 1889, payable October 1, 1939, bearing 4½ per cent interest, all of which were issued and are now outstanding. This mortgage covers the property of the Terminal Railroad Association proper, all the property formerly of the Union Depot Company of St. Louis, the leasehold of the St. Louis Bridge and Tunnel Railroad of St. Louis, and the entire capital stock of the Union Railway and Transit Company (of Illinois) and of the Terminal Railroad of East St. Louis. By the guaranty agreement of December 16, 1902, and the Supplemental agreement of January 16, 1903, above mentioned, the proprietary companies agree to make good any deficit in the revenues to pay fixed charges to the extent of one-fourteenth each.

Second mortgage, dated August 1, 1893, to the Central Trust Company of New York, trustee, securing $5,000,000 bonds of $1000 each, dated August 1, 1893, payable August 1, 1943, bearing 5½ per cent interest, all of which were issued. They were all exchanged for first consolidated mortgage bonds, dated November 10, 1894, and the mortgage was cancelled of record.

First consolidated mortgage, dated November 10, 1894, to the Central Trust Company of New York, trustee, securing $12,000,000 bonds of $1000 each, dated November 10, 1894, payable August 1, 1944, bearing 5 per cent interest, of which $5,000,000 were issued and are now outstanding. Of these $3,500,000 took the place of a like amount of second mortgage bonds, which had been issued but never actually disposed of. This mortgage covers the property of the Terminal Railroad Association of St. Louis proper, and that formerly owned by the Union Depot Company of St. Louis, the leaseholds of the St. Louis Bridge, and the Tunnel Railroad of St. Louis; and the capital stock of the Union Railway and Transit Company (of Illinois) and of the Terminal Railroad of East St. Louis, subject to the prior pledge of these stocks under the first mortgage; also 17,800 shares of the capital stock of the St. Louis Mer-

chants Bridge Terminal Railway Company, the capital stock of the East St. Louis Belt Railroad Company, and the stock and bonds of the St. Louis Terminal Railway Company. The bonds were issued for the purposes of retiring the first and second mortgage bonds, acquiring a majority of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, and the stock and bonds of the St. Louis Terminal Railway Company, constructing the East St. Louis Belt Railroad, completing the Union Depot, and making other additions and improvements to the property of the company.

General mortgage, dated December 16, 1902, to the Central Trust Company of New York and William Taussig, trustee, securing $50,000,000 bonds of $1000 each, dated January 1, 1903, payable January 1, 1953, bearing 4 per cent interest of which $18,000,000 have been issued. Of the $32,000,000 unissued bonds, $17,500,000 are reserved for the retirement of $12,000,000 bonds of the Terminal Railroad Association, $3,500,000 bonds of the St. Louis Merchants Bridge Terminal Railway Company, $2,000,000 bonds of the St. Louis Merchants Bridge Company, and $14,500,000 are reserved for betterments and improvements and the acquisition of additional property.

A sinking fund provides for the redemption of $100,000 bonds in each year, beginning July 1, 1906, by lot at 110, or by purchase at a less price. The entire issue may be redeemed at the option of the company on January 1, 1910, or on any interest day thereafter, at a premium of 10 per cent and accrued interest.

This mortgage covers the property of the Terminal Association proper, and that formerly of the Union Depot Company of St. Louis; the leaseholds of the St. Louis Bridge and the Tunnel Railroad of St. Louis; the capital stocks of the Union Railway and Transit Company (of Illinois) and the Terminal Railroad of East St. Louis, subject to their prior pledge under the first and first consolidated mortgages; 17,800 shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company; the capital stock of the East St. Louis Belt Railroad Company; and the stock and bonds of the St. Louis Terminal Railway Company, subject to their prior pledge under the

first consolidated mortgage. It also covers the capital stock of the East St. Louis and Carondelet Railway, Illinois Transfer Railroad Company, Granite City and Madison Belt Line Railroad Company, St. Louis Belt and Terminal Railway Company, Interstate Car Transfer Company, and Terminal Realty Company.

In accordance with the Ferry Stock and the Trust agreements of December 16, 1902, above mentioned, the capital stock of the Wiggins Ferry Company is also pledged as additional security for the payment of these bonds.

By the Guarantee agreement of the same date the proprietary companies specifically guarantee the payment of the interest and sinking fund of these bonds.

In addition to the bonds secured by the above mortgages the Terminal Railroad Association guarantees the payment of the interest on the $2,000,000 bonds of the St. Louis Merchants Bridge Company, in accordance with an agreement of August 17, 1893, with the Madison, Illinois and St. Louis Railway Company; and also guarantees the payment of the principal and interest of $3,500,000 bonds of the St. Louis Merchants Bridge Terminal Railway Company, in accordance with an agreement of August 17, 1893, for the use of that company's property. It also guarantees under its lease of the St. Louis Bridge and the Tunnel Railroad the payment of the principal and interest of the $5,000,000 bonds of the Bridge Company, as well as dividends on its first and second preferred stock and on the stock of the Tunnel Railroad of St. Louis.

Union Railway and Transit Company of St. Louis.

Consolidated into the Terminal Association of St. Louis, July 30, 1889. The exact length of track constructed by this company cannot now be ascertained.

The Union Railway and Transit Company of St. Louis was organized in the interest of the Illinois and St. Louis Bridge Company. for the purpose of providing that company with freight terminal facilities in St. Louis.

This company filed articles of association in the office of the secretary of state of Missouri April 13, 1874, for the purpose of constructing a railroad from the western end of the tunnel, at or near Poplar street, St. Louis, to such

point west thereof as might be necessary to provide necessary ground for switches, etc., and also to run trains through the tunnel and over the Illinois bridge; thus forming a connection between the tunnel and bridge and the railroads constructed or to be constructed approaching the mouth of the tunnel on the west side of the Mississippi river, the length of the railroad not to exceed twenty-five miles.

The first election for directors was held April 13, 1874, and the organization perfected the same day.

An ordinance of the city of St. Louis, approved September 21, 1874, granted the company the right to construct its tracks from the Tunnel Railroad, at a point between Poplar and Spruce streets, across Ninth street into block 427, across Tenth street into block 434, across Eleventh street into block 437, and across Poplar street between Tenth and Eleventh, and Eleventh and Twelfth streets, the tracks to be located between the north line of Poplar street and a point 200 feet north thereof.

An ordinance, approved February 7, 1876, authorized the Union Depot Company and the Union Railway and Transit Company of St. Louis, or either of them, to extend their tracks from the east side of Tayon avenue to the western city limits, and to cross all intervening streets and alleys between Tayon and Prospect streets on a line parallel with the St. Louis, Kansas City and Northern Railway (now Wabash Railroad); and also to cross Randolph and Poplar streets and the alleys between Spruce and Randolph and Adolph and Mercer streets. This ordinance also authorized the Union Railway and Transit Company to lay tracks across Poplar and Spruce streets, adjoining the tracks of the Union Depot Company between Sixteenth street and Tayon avenue, or to use the tracks of the Union Depot Company across Poplar street.

Ordinances of March 17, 1880, and August 12, 1882, authorized the extension of tracks across the streets and alleys bounded by the east line of Ulrici street, the south line of Clark avenue, the east line of Tayon avenue, and the tracks of the Union Railway and Transit Company.

An ordinance, approved August 1, 1887, (amended July 30, 1892) granted right of way from Twenty-first street westwardly to a connection with the Wabash Western

Railway; thence over the Wabash Western tracks to their point of crossing the Olive road, thence to a connection with the Wabash Western Railway beyond Florissant avenue. It also authorized connection of the tracks in city blocks 457, 458 and 459 with those in city blocks 1671, 1672 and 1673, and over and across intervening streets and alleys.

An ordinance, approved July 26, 1888, authorized the construction of a side track on South avenue between Twenty-first and Twenty-second streets.

An ordinance, approved July 30, 1892, authorized the Terminal Railroad Association to construct tracks through blocks 2237, 2238, 2239, 2240 and 2550 and the streets dividing those blocks, and across Cardinal avenue, south of Adams street.

The road was open for operation July 4, 1874. The exact length of the line constructed by this company cannot now be ascertained.

Under date of January 1, 1879, the company leased its entire property and tracks to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, which lease was assigned by them July 1, 1881, to the Missouri Pacific Railway Company and the Wabash, St. Louis and Pacific Railway Company. The Union Railway and Transit Company of St. Louis was consolidated with the Terminal Railroad of St. Louis July 30, 1889, under the name of the Terminal Railroad Association of St. Louis, and this lease was cancelled in accordance with agreement of October 1, 1889, providing for the reorganization of the terminals at St. Louis.

Capital Stock.

The capital stock authorized in the articles of association was $250,000 in shares of $100 each. On December 17, 1874, the stockholders authorized its increase to $750,000 and on January 16, 1877, to $900,000.

There was $846,400 issued, which was exchanged for an equal amount of the capital stock of the Terminal Railroad Association of St. Louis, in accordance with the articles of consolidation forming that company.

Mortgages and Bonds.

The company created no mortgage debt.

Terminal Railroad of St. Louis.

Consolidated into the Terminal Railroad Association of St. Louis July 30, 1889. The exact length of track constructed by this company cannot now be ascertained.

The Terminal Railroad of St. Louis filed articles of association in the office of the secretary of state of Missouri February 25, 1880, for the purpose of constructing a railroad connecting with the tracks of the Union Railway and Transit Company of St. Louis, the Tunnel Railroad, and the Union Depot and the various railroads in St. Louis, and with factories and other establishments, and to provide ample and convenient terminal facilities for those railroads and establishments. The length of the road was not to exceed ten miles.

The first election for directors was held March 31, 1880, and the organization perfected the same day.

The company constructed a system of tracks, which it opened for operation in 1881. Their exact length cannot now be ascertained.

On March 3, 1880, the company leased its entire property to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, which lease was on July 1, 1881, assigned to the Missouri Pacific Railway Company and the Wabash, St. Louis and Pacific Railway Company.

The Company was consolidated with the Union Railway and Transit Company of St. Louis July 30, 1889, under the name of the Terminal Railroad Association of St. Louis, and this lease was cancelled in accordance with an agreement of October 1, 1889, providing for the reorganization of the terminals at St. Louis.

Capital Stock.

The capital stock authorized in the articles of association was $250,000 in shares of $100 each.

On August 11, 1882, a certificate was filed in the office of the secretary of state of Missouri of its authorized increase to $500,000, and another certificate was filed March

7, 1885, of its authorized increase to $700,000. There was $594,800 issued, which was exchanged for stock of the Terminal Railroad Association of St. Louis share for share, in accordance with the articles of consolidation forming that company.

Mortgages and Bonds.

The company created no mortgage debt.

Union Depot Company of St. Louis.

The St. Louis Union Passenger Station furnishes passenger facilities to all of the railroads entering St. Louis. The mileage of this company is included in that of the Terminal Railroad Association.

The Union Depot Company was organized under the act of the Missouri Legislature, approved March 18, 1871, authorizing the formation of Union Depot Companies, etc. Articles of Association were filed in the office of the clerk of the circuit court of St. Louis county, Missouri, May 9, 1874, who issued his certificate of incorporation the same date. A certificate of incorporation was also issued by the secretary of state of Missouri May 12, 1874.

Prior to the incorporation of the company, an agreement had been entered into between the Atlantic and Pacific Railroad Company (St. L. & S. F.), Terre Haute and Indianapolis Railroad Company; Indianapolis and St. Louis Railroad Compony (C. C. C. & St. L.); St. Louis and Southwestern Railway Company (L. & N.); Ohio and Mississippi Railroad Company (B. & O. S. W.); and Samuel Gaty, W. H. Clement, J. H. Britton, William Taussig, and their associates, providing for the incorporation of the Union Depot Company, and for the use of its depot, etc., by the railroad companies at an annual rental amounting to 10 per cent upon its total cost.

This agreement was supplemented by an agreement, made in 1874, between the above-named companies and the Union Depot Company of St. Louis, providing fully for the construction, use and control of the depot, and giving the companies the option of purchasing it within fifteen years.

An ordinance of the city of St. Louis, approved July 10, 1874, granted the Union Depot Company the right to con-

struct a depot and tracks in and under all the streets and alleys within the following limits: Commencing at the southeast corner of Eleventh and Poplar streets; thence running westwardly along the southern line of Poplar street to the west line of Sixteenth street; thence northwardly along the west line of Sixteenth street to Clark avenue; thence westwardly along the south line of Clark avenue to Tayon avenue; thence southwardly along the east line of Tayon avenue to the north line of lands of the Pacific Railroad Company (Missouri Pacific Railway); thence eastwardly along the north line of the Pacific Railroad lands to the east line of Eleventh street; thence northwardly along the east line of Eleventh street to the place of beginning.

Ordinances, approved December 26, 1874, February 11, 1875, and March 26, 1884, provided for the construction of bridges over the tracks of the Union Depot Company.

An ordinance approved February 7, 1876, authorized the Union Depot Company and the Union Railway and Transit Company, or either of them, to extend their tracks from the east side of Tayon avenue to the western city limits, and to cross all intervening streets and alleys between Tayon and Prospects streets on a line parallel with the St. Louis, Kansas City and Northern Railway (now Wabash Railway); also to cross Randolph and Poplar streets, and the alleys between Spruce and Randolph, and Adolph and Mercer streets.

The depot was opened for operation in 1876.

In accordance with agreement of October 1, 1889, between Jay Gould (then in control of most of the terminal facilities in St. Louis and East St. Louis) and the several railroad companies whose lines terminated there, the Terminal Railroad Association of St. Louis was formed for the purpose of placing all of the terminals under the control of one company. The Union Depot Company conveyed all of its property to the Terminal Railroad Association of St. Louis by deed dated October 3, 1889, and also all of its capital stock was transferred to that company. The corporate existence of the Union Depot Company is, however, still maintained, as of possible future value.

An ordinance, approved February 25, 1891, authorized the extension of tracks from the south line of Randolph

street to the south line of Clark avenue, between the east line of Eighteenth and the east line of Twenty-first street, and from the south line of Clark avenue to the south line of Market street, between the west line of Eighteenth and the east line of Twentieth street; to cross Randolph, Poplar, Spruce, Clark, Walnut and Eugenie streets and intermediate streets and alleys; and to construct a new passenger station, tracks, etc. The ordinance also provided for the vacation of the streets and alleys within the abovementioned limits.

A new station was built by the Terminal Association and opened for operation September 1, 1894, on which date an agreement was made with the various railroad companies using the station for its continued use for a period of ten years from September 1, 1894, at an aggregate rental of $325,000 (5 per cent on $6,500,000) and all expenses of maintenance and operation, the rental, etc., to be apportioned among the several lines according to the business done by each. The station is still operated on the basis of this agreement.

Capital Stock.

The capital stock authorized in the articles of association was $1,000,000 in shares of $100 each, all of which was issued, and is owned by the Terminal Railroad Association of St. Louis.

Mortgages and Bonds.

The company created no mortgage securing the issue of any series of bonds. All of the property formerly of the company, but which it conveyed to the Terminal Railroad Association of St. Louis by deed of October 3, 1889, is covered by the various mortgages of the association.

Union Railway and Transit Company

(Of Illinois.)

The tracks of the Union Railway and Transit Company form a part of the railway yards in East St. Louis. Main track, 0.24; side, 0.13; total, 0.37.

The Union Railway and Transit Company (of Illinois) was organized in the interest of the Illinois and St. Louis

Bridge Company, and filed articles of incorporation in the office of the secretary of state of Illinois April 14, 1874, to construct a railroad to connect railroads terminating at or near East St. Louis with the Illinois and St. Louis Bridge "and to operate the said railroad and the railroads crossing said bridge and passing through the tunnel at the western end of said bridge at St. Louis; and it is intended to construct the proposed railway from the points or places to which said Illinois and St. Louis Bridge Company may carry its approaches at the east end thereof, and to such points or places on the lines of the several railroads terminating or hereafter to terminate at East St. Louis, as the company shall find most convenient for the purpose of transporting persons and property from said railroads, to and from said approaches, and over said bridge."

The first election for directors was held April 14, 1874, and the organization perfected the same day.

On January 1, 1879, the company leased its property to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, which lease was assigned to the Missouri Pacific and Wabash, St. Louis and Pacific Railway Companies July 1, 1881. This lease was cancelled in pursuance of agreement of October 1, 1889, for the organization of the Terminal Railroad Association of St. Louis, under which the Terminal Association also became the owner of the entire capital stock of the company.

Capital Stock.

The capital stock authorized in the articles of association was $250,000 in shares of $100 each, of which $99,000 has been issued. This stock is all owned by the Terminal Railroad Association, and is specifically pledged as collateral security under the first, first consolidated and general mortgages of that company.

Mortgages and Bonds.

The company created no mortgage debt.

Terminal Railway of East St. Louis.

The tracks of the Terminal Railroad of East St. Louis constitute part of the railway yards of the Terminal Asso-

ciation in East St. Louis. Main track, 0.70; second, 0.46; side, 30.62; total, 31.78 miles.

The Terminal Railroad of East St. Louis was organized in the interest of the St. Louis Bridge Company, and filed articles of incorporation in the office of the secretary of state of Illinois February 23, 1880, to construct a railroad and terminal facilities and tracks in East St. Louis connecting with the tracks of the Union Railway and Transit Company, the St. Louis Bridge Company and with the various railroads entering East St. Louis.

The first election for directors was held March 2, 1880, and the organization perfected the same day.

On March 3, 1880, the company leased its road to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, which lease was assigned to the Wabash, St. Louis and Pacific Railway Company and the Missouri Pacific Railway Company July 1, 1891. When the Terminal Railroad Association of St. Louis was organized, in accordance with agreement of October 1, 1889, it became the owner of all of the capital stock of the Terminal Railroad of East St. Louis, and this lease was cancelled.

An ordinance of the city of East St. Louis, approved May 24, 1893, granted to the company the right to lay tracks across St. Clair avenue west of Cahokia creek.

Capital Stock.

The capital stock authorized in the articles of association was $100,000 in shares of $100 each. On July 12, 1882, the stockholders authorized its increase to $300,000 and on March 3, 1885, to $400,000. There has been $316,000 issued, all of which is owned by the Terminal Railroad Association of St. Louis, and is specifically pledged as collateral security under the first, first consolidated and general mortgages of that company.

Mortgages and Bonds.

The company has created no mortgage debt.

St. Louis Terminal Railway Company.

Commonly called "Inner Belt." Extends from a connection with St. Louis Merchants Bridge Terminal Rail-

way in the northern part of the city of St. Louis to a contion with the Wabash Railroad. Main track, 7.26 miles; second, 3.01; side, 6.73; total, 19.00 miles.

The St. Louis Terminal Railway Company was organized in the interest of the St. Louis Merchants Bridge Terminal Railway Company, and filed articles of association in the office of the secretary of state of Missouri November 9, 1892, to construct a railroad beginning at or near the intersection of McKissock and Grand avenues, St. Louis; thence in a westerly and northwesterly direction into the county of St. Louis; thence southwardly and southwestwardly to a point near Ivory Station on the St. Louis, Iron Mountain and Southern Railway. Also beginning at the intersection of Grand and McKissock avenues; thence in a northeasterly direction to a point on the northern boundary line of the city near the Chain of Rocks; thence through the county of St. Louis to a point on the north bank of the Missouri river in St. Charles county, between the city of St. Charles and the mouth of the Missouri river, passing through St. Louis county, through the city of St. Louis and into the county of St. Charles, a total distance of about thirty-five miles.

The first election for directors was held November 11, 1892, and the organization was perfected the same day.

An ordinance passed April 1, 1893, amended April 10, 1895, and April 3, 1899, granted right of way from a connection with the St. Louis Merchants Bridge Terminal Railway near Bulwer and Carrie avenues northwardly to the city limits; also from a point in city block 4228 in a northern and eastern direction to some point on the Mississippi river south of the Chain of Rocks; and also from a point near the intersection of Bulwer and Bircher avenues westwardly to the western city limits.

While the road was being constructed, the Terminal Railroad Association in 1893 purchased the entire capital stock and bonds of the company and completed the road and opened it for operation May 1, 1904. As constructed it extends from the intersection of Carrie and McKissock avenues westwardly to the Wabash Railroad (5.01 miles) and from the intersection of the same streets northwardly to the St. Louis Car Company's tracks (2.25 miles).

Capital Stock.

The capital stock authorized in the articles of association is $1,500,000, in shares of $100 each, of which $34,900 has been issued. It is all owned by the Terminal Railroad Association of St. Louis, and is pledged as collateral security under the first consolidated and the general mortgages of that company.

Mortgages and Bonds.

First mortgage, dated January 2, 1893, to the St. Louis Trust Company, trustee, securing $1,500,000 bonds of $1000 each, dated January 2, 1893, payable January 2, 1943, bearing 6 per cent interest, subject to redemption January 1, 1923. All of these bonds were issued, and they are owned by the Terminal Railroad Association of St. Louis. They are pledged as collateral security under the first consolidated and general mortgages of that company.

Granite City and Madison Belt Line Railroad Company.

Line partially encircles Granite City, Illinois, connecting industries there with the Madison, Illinois and St. Louis Railway. Main track, 0.70 miles; sidings, 2.00 miles; total tracks, 2.70 miles.

The Granite City and Madison Belt Line Railroad Company filed articles of association in the office of the secretary of state of Illinois December 27, 1892, to construct a railroad in Madison county, Illinois, from the Chicago, Peoria and St. Louis Railroad and the Toledo, St. Louis and Kansas City Railroad, in or near the northeast quarter of section 30, in township 3 north, range 9 west, of the third principal meridian, to a point in or near the southwest quarter of section 18, in township 3 north, range 9, at or near the Wabash, the Indianapolis and St. Louis, and the Chicago and Alton Railroads, and from the last-named point to a point at or near the northeast half of section 24, in township 3 north, range 10, and from that point to a point at or near the point of first beginning.

The first election for directors was held November 15, 1893, and the organization perfected the same day.

On June 18, 1900, the Terminal Railroad Association of St. Louis acquired the entire capital stock of the company.

Capital Stock.

The capital stock authorized in the articles of incorporation is $100,000, in shares of $100 each, all of which has been issued. It is all owned by the Terminal Railroad Association of St. Louis and is pledged as collateral security under its general mortgage.

Mortgages and Bonds.

The company has created no mortgage debt.

East St. Louis Belt Railroad Company.

The East St. Louis Belt Railroad forms a connection between the Terminal Railroad of East St. Louis and the Madison, Illinois and St. Louis Railway. Main track, 3.51 miles; side tracks, 1.65 miles; total tracks, 5.16 miles.

The East St. Louis Belt Railroad Company was organized in the interest of the Terminal Railroad Association of St. Louis, and filed articles of incorporation in the office of the secretary of state of Illinois June 15, 1898, to construct a railroad from a point in Madison county on the Mississippi river, to a point on the Mississippi river in St. Clair county opposite the city of St. Louis.

The first election for directors was held July 7, 1898, and the organization perfected the same day.

Capital Stock.

The capital stock authorized in the articles of incorporation was $500,000, in shares of $100 each, all of which was issued. It is all owned by the Terminal Railroad Association of St. Louis, and is pledged as collateral security under its first consolidated and general mortgages.

Mortgages and Bonds.

The company has created no mortgage debts.

St. Louis Belt and Terminal Railway Company.

Commonly called "Outer Belt." Extends from a connection with C., B. & Q. Ry. on the north to a connection with St. L. & S. F. R. R. on the south.

Length of line when completed 16.4 miles. Main track now built 9.00 miles.

The St. Louis Belt and Terminal Railway Company was organized in the interest of the Interstate Car Transfer Company, Missouri Pacific Railway Company and St. Louis and San Francisco Railroad Company, and filed articles of association in the office of the secretary of state of Missouri March 14, 1902, to construct a railroad twenty-one miles in length from a point at or near the west bank of the Mississippi river in Carondelet township, St. Louis county, and running thence to a point on the right of way of the St. Louis and San Francisco Railroad Company, at or near the line dividing the city of St. Louis from the county of St. Louis, and thence to a point in Central township, west to Clayton Court House, thence to a point at or near the west bank of the Mississippi river between the Chain of Rocks and the Eads bridge in the city of St. Louis; also to construct sidings, etc., to manufacturing establishments, and make connections with railroads, for the purpose of providing complete and convenient terminal facilities for railroads entering the city and county of St. Louis.

The first election for directors was held March 18, 1902, and the organization perfected the same day.

The road, extending from the Chain of Rocks to a connection with the St. Louis Terminal Railway Company near Page avenue in St. Louis county (16.4 miles), is now under construction, except about eight miles, which is in operation.

The Terminal Railroad Association of St. Louis purchased the entire capital stock of this company October 1, 1902.

Capital Stock.

The capital stock authorized in the articles of association is $3,000,000, in shares of $100 each, of which $800,000 is preferred and $2,200,000 common stock. There has been $21,000 issued, all of which is owned by the Terminal Railroad Asociation of St. Louis, and is pledged as collateral security under its general mortgage.

Mortgages and Bonds.

The company has created no mortgage debt.

Illinois Transfer Railroad Company.

Belt line connecting the East St. Louis Belt Railroad with the Illinois Central Railroad. Also connects with railroads entering East St. Louis from the east. Main track 5.96 miles. Second 5.96. Side 1.54. Total tracks 13.46 miles.

The Illinois Transfer Railroad Company was organized in the interest of the Terminal Railroad Association of St. Louis, and filed articles of association in the office of the secretary of state of Illinois October 27, 1899, to construct a railroad from a point on the Mississippi river, in Madison county opposite the town of Venice, thence through Madison and St. Clair counties, to a point on the Mississippi river in St. Clair county, south of Missouri avenue in the city of East St. Louis.

The first election for directors was held October 31, 1899, and the organization perfected the same day.

Ordinances of the city of East St. Louis passed April 9, 1900, May 12, 1902, and September 8, 1902, granted right of way over certain streets.

The road was opened for operation in 1904. As constructed it extends from the East St. Louis Belt Railroad, north of the stockyards, to a connection with the Illinois Central Railroad, 5.96 miles.

Capital Stock.

The capital stock authorized in the articles of association was $500,000, in shares of $100 each, all of which has been issued. It is all owned by the Terminal Railroad Association of St. Louis, and is pledged as collateral security under its general mortgage.

Mortgages and Bonds.

The company has created no mortgage debt.

East St. Louis and Carondelet Railway.

Belt line extending from the stockyards in East St. Louis to a ferry transfer on the Mississippi river opposite Carondelet (South St. Louis). Main track 9.12. Side 8.75. Total track 17.87 miles.

The East St. Louis and Carondelet Railway was the successor by change of name of the American Bottom Line, Marble and Coal Company, April 19, 1873.

AMERICAN BOTTOM LINE, MARBLE AND COAL COMPANY.

The American Bottom Line, Marble and Coal Company was incorporated by special act of the Illinois legislature, approved February 18, 1857, with authority to purchase lands in St. Clair county for the purpose of making lime and bricks, quarrying marble, mining coal, iron and other minerals, and of manufacturing every material permitted by the laws of the state.

It was also authorized to construct a railroad over any part of its land on the bluffs at or near Falling Spring, and up and down the foot of the bluffs two miles each way, and to the Mississippi river opposite St. Louis.

An act reviving this charter was approved March 18, 1867.

The first election for directors was held July 20, 1867, and the organization was perfected the same date. The by-laws of the company adopted at this meeting stated that the object of the company, until otherwise determined by a vote of the stockholders, was to prosecute its business as a railroad corporation, and not to engage in mining, quarying, etc.

Construction work was delayed pending the determination of the validity of a subscription to the capital stock by the city of East St. Louis, which was finaly decided to be invalid by the Supreme Court of the state of Illinois June 24, 1872.

A contract was entered into June 13, 1872, with J. W. Conologue for the construction of the road from East St. Louis southwardly to and through the village of Cahokia, with branches from Cahokia to Falling Spring and to a point opposite Carondelet, for which he was to receive $150,000 in bonds of the company and $250,000 in cash or stock at the option of the company. Upon completion of the road, however, he was allowed $200,000 bonds and $300,000 stock.

By this agreement Conologue transfered to the American Bottom Line, Marble and Coal Company, a contract which

he had made December 30, 1871, with the American Bottom Board of Improvement to construct on right-of-way furnished by them an embankment along the Mississippi river from East St. Louis to Cahokia, on which he was to build a railroad.

The road was opened for operation from East St. Louis to Falling Spring September 26, 1872, and to East Carondelet July 1, 1873. A part of the track was laid on right-of-way leased from the St. Louis, Alton and Terre Haute Railroad Company October 9, 1872, which lease was modified November 15, 1887.

Capital Stock.

The capital stock authorized by the act of February 18, 1857, was $100,000, with authority to increase it to $300,000. On May 16, 1870, the stockholders authorized its increase to $300,000, all of which was afterwards issued to J. W. Conologue for building the road. The Pennsylvania Company, through advances made towards constructing the road, acquired the majority of this capital stock.

Mortgages and Bonds.

Mortgage, dated June 15, 1872, to William R. McKeen and William H. Maurice, trustees, securing $200,000 bonds of $1,000 each, dated June 15, 1872, payable October 1, 1897, bearing 7 per cent interest, all of which were issued. These bonds were all paid and cancelled and the mortgage cancelled of record.

East St. Louis and Carondelet Railway.

The East St. Louis and Carondelet Railway is the successor by change of name of the American Bottom Line, Marble and Coal Company, by resolution of its stockholders of April 19, 1873, a copy of which was recorded in St. Clair county, Illinois, April 21, 1873, and filed in the office of the secretary of state April 23, 1873.

The company completed a branch from East St. Louis to the St. Louis national stock yards April 3, 1875.

An arrangement went into effect March 1, 1894, under which the Terre Haute and Indianapolis Railroad Company were to operate the road at cost, paying the net earnings

to the East St. Louis and Carondelet Railway and make good any deficit.

An agreement was made February 13, 1902, between the Pennsylvania Company and the Terminal Railroad Association of St. Louis whereby the latter on March 1, 1902, commenced to operate the East St. Louis and Carondelet Railway and on February 15, 1903, purchased its entire capital stock.

Capital Stock.

The capital stock authorized by the American Bottom Line, Marble and Coal Company was $300,000.

Under the general laws of the state the stockholders on May 25, 1880, authorized the increase to $500,000, and a certificate of this increase was filed in the recorder's office of St. Clair county and in the office of the secretary of state of Illinois May 29, 1880.

There has been issued to January 1, 1905, $420,000, which is all owned by the Terminal Railroad Association and is pledged as collateral security under its general mortgage.

Mortgages and Bonds.

The company has created no mortgage debt.

American Bottom Board of Improvement.

The American Botom Board of Improvement above refered to was organized for the purpose of embanking the Mississippi river and draining the lands contiguous thereto in the American Bottom, a tract extending from Alton to Kaskaskia, Illinois, ninety miles long and about five miles wide, with the object of reclaiming them for farming and other purposes.

Its capital stock was purchased by the East St. Louis and Carondelet Railway in 1870.

The company, among other obligations, amounting to about $25,000, executed a bond, May 1, 1875, for $4,602, payable May 1, 1877, to J. W. Conologue, to pay for the right-of-way on which to construct the levee from East St. Louis to Cahokia in which the East St. Louis and

Carondelet Railway was built. This bond is held by the East St. Louis and Carondelet Railway.

The American Bottom Board of Improvement suspended operations, owing to a decision by the Supreme Court of Illinois by which they were denied the right to levy assessments against owners of property benefited by their works, that being the only means by which they defrayed their expenses.

Subsequently the work contemplated by the American Bottom Board of Improvement and like corporations was under the laws of the state turned over to county drainage boards, these public authorities being authorized to acquire the works of the old private boards by payments of their debts.

Terminal Realty Company.

The Terminal Realty Company filed articles of association in the office of the secretary of state of Missouri November 13, 1902.

The purpose of organization, as stated therein, was the "buying, selling, owning, holding, leasing, renting and improving real estate in the city of St. Louis, Missouri, and elsewhere."

The organization of the company was perfected December 12, 1902.

This company was organized in the interest of the Terminal Railroad Association of St. Louis, for the purpose of acquiring rights-of-way for the association. The property of this company consists of land acquired for the purpose of constructing an elevated line connecting the Eads bridge with the elevated structure of the St. Louis Merchants Bridge Terminal Railway.

Capital Stock.

The capital stock authorized in the articles of association is $100,000, in shares of $100 each. It is all owned by the Terminal Railroad Association of St. Louis, and is pledged as collateral security under the general mortgage of that company.

Mortgages and Bonds.

The company has executed no mortgage securing an issue of bonds.

East St. Louis Electric Street Railway Company.

The Terminal Railroad Association purchased the capital stock of the East St. Louis Electric Street Railway Company and commenced to operate it March 1, 1897, but disposed of its interest in that company on April 30, 1902, and did not operate it thereafter.

St. Louis Bridge Company.

The St. Louis Bridge, commonly known as the "Eads" bridge, spans the Mississippi river between St. Louis, Missouri, and East St. Louis, Illinois. Main track 1.22. Second 1.22. Side 0.18. Total tracks 2.62 miles.

The St. Louis Bridge Company was formed December 18, 1878, by the reorganization of the Illinois and St. Louis Bridge Company (No. 2), which was formed by the consolidation July 9, 1868, of the Illinois and St. Louis Bridge Company (No. 1), chartered February 21, 1867, and the St. Louis and Illinois Bridge Company, chartered February 5, 1864.

St. Louis and Illinois Bridge Company.

The St. Louis and Illinois Bridge Company was incorporated by special act of the Missouri legislature, approved February 5, 1864 (amended February 20, 1865), to construct a bridge over the Mississippi river at St. Louis.

By special act of the Illinois legislature, approved February 16, 1865, authority was granted for the construction of the bridge over the portion of the river in Illinois, provided it should be located not more than one hundred feet from what is known as Dyke avenue, East St. Louis.

The act of congress of July 25, 1866, also authorized the construction of the bridge, provided for its length, height of spans, etc., and made it a post road.

The first election for directors was held in St. Louis May 1, 1867, and the organization perfected the same date. A similar organization was also perfected in East St. Louis February 22, 1869.

An ordinance of the city of St. Louis, passed March 14,

1868, authorized the construction of the bridge over streets and alleys.

Only a small amount of construction work was done by this company.

Although the Illinois legislature had by the act of February 16, 1865, authorized the construction of the bridge in Illinois, yet it nevertheless on February 21, 1867, incorporated the Illinois and St. Louis Bridge Company, with the right to construct a bridge over the Mississippi river at any point opposite the city of St.Louis. The reason assigned for the granting of this new charter was that a general impression prevailed that the promoters of the two enterprises were substantially the same, which, however, was not the fact. In order to avoid impending litigation as to the rights of the companies under the two charters, and the consequent delay in building the bridge, the St. Louis and Illinois Bridge Company and the Illinois and St. Louis Bridge Company (No. 1) were consolidated July 9, 1868 under the name of the Illinois and St. Louis Bridge Company.

Capital Stock.

The capital stock authorized in the act of incorporation was $4,000,000, in shares of $100 each, none of which was issued.

Mortgages and Bonds.

The company created no mortgage debt.

Illinois and St. Louis Bridge Company (No. 1).

The Illinois and St. Louis Bridge Company (No. 1) was incorporated by special act of the Illinois legislature February 21, 1867, to construct a bridge over the Mississippi river at any point opposite the city of St. Louis.

The first election for directors was held March 1, 1867, and the organization perfected the same date.

Only a small amount of construction work was done by this company.

The company was consolidated with the St. Louis and Illinois Bridge Company July 9, 1868, under the name of the Illinois and St. Louis Bridge Company.

A similar company had been organized under the laws of Missouri February 19, 1867, but on account of this consolidation its charter was not used.

Capital Stock.

The capital stock authorized by the act of February 21, 1867, was $1,000,000, in shares of $100 each. The exact amount issued cannot now be ascertained, but it is believed to have been small.

Mortgages and Bonds.

The company created no mortgage debt.

Illinois and St. Louis Bridge Company (No. 2).

The Illinois and St. Louis Bridge Company (No. 2) was formed by consolidation of the Illinois and St. Louis Bridge Company (No. 1) and the St. Louis and Illinois Bridge Company July 9, 1868, under authority of the act of the Illinois legislature of February 21, 1867, and of the Missouri legislature of March 19, 1868, and act of congress of July 20, 1868.

Articles of consolidation were entered into April 4, 1868, and a certificate of consolidation was filed in the office of the recorder of St. Louis county, Missouri, March 11, 1869.

The first election for directors was held July 9, 1868, and the organization of the company perfected the same date.

By act of congress, approved July 20, 1868, the company was recognized and declared to be a corporation, with full power to construct a bridge across the Mississippi river at St. Louis.

An ordinance of the city of St. Louis, approved July 15, 1874, granted the company the right to construct a track at the west end of the bridge, and ordinances of the city of St. Louis, approved February 26, 1873, and July 30, 1874, gave the company certain rights in that city.

The bridge (generally known as the Eads bridge) was opened for operation July 4, 1874.

The company having defaulted in the payment of the interest on its bonds, J. Pierpont Morgan and Solon Hum-

phreys were appointed receivers May 31, 1875, by the United States Circuit Court for the Eastern District of Missouri.

An agreement for the reorganization of the company was entered into August 28, 1878, by the first, second and third mortgage bondholders, providing for the sale of the bridge and the organization of a new company called the St. Louis Bridge Company.

A decree of sale was entered in the United States Circuit Court for the Eastern District of Missouri October 17, 1878, under which all the property of the bridge company was sold December 20, 1878, to Anthony J. Thomas, representing the bondholders, for $2,000,000, and the sale was confirmed February 17, 1879.

A decree was entered March 29, 1879, ordering a conveyance to be made to the purchaser, which was acordingly done by deed dated December 20, 1878 (executed on March 29, 1879), of E. W. Woodward, comissioner, and the Illinois and St. Louis Bridge Company, the company being required to join in its execution by order of the Circuit Court of the United States for the Southern District of Illinois.

By deed of March 29, 1879, supplemented by deed of October 14, 1879, the property was conveyed to the St. Louis Bridge Company.

Capital Stock.

The capital stock authorized in the articles of consolidation was $4,000,000, in shares of $100 each, of which $3,774,345 was issued. The capital stock was extinguished by foreclosure proceedings.

Mortgages and Bonds.

First mortgage, dated March 15, 1870, to J. A. Stewart, Solon Humphreys, and W. M. McPherson, trustees, supplemented by mortgage of February 2, 1874, securing $4,000,000 bonds of $1,000 each, dated March 15, 1870, payable April 1, 1900, bearing 7 per cent interest, of which $3,935,000 were issued. This mortgage was foreclosed, and in accordance with the agreement of reorganization entered into by the bondholders August 28, 1878, holders

were entitled to receive for each of their bonds and coupons a first mortgage bond of the St. Louis Bridge Company. The decree of March 29, 1879, provided that the holders of the $124,000 bonds who had not at that time subscribed to the agreement, and should not do so within three months of the date of the decree, should be entitled to a payment of $494.91 on each bond out of the proceeds of sale. There is now only one of these bonds outstanding.

Second mortgage, dated May 15, 1871, to Solon Humphreys and J. A. Stewart, trustees, securing $2,000,000 bonds of $1,000 each, dated May 15, 1871, payable July 1, 1901, bearing 7 per cent interest, all of which were issued. This mortgage was foreclosed by decree of October 17, 1878. Holders of the bonds, who became parties to the reorganization agreement of August 28, 1878, within the proper time, were entitled to receive for each bond and its coupons $1,245 first preferred capital stock of the St. Louis Bridge Company. There are $24,000 of these bonds still outstanding, and the Terminal Association pays annual dividends on 24 shares of first preferred stock of the St. Louis Bridge Company held in trust by the Mercantile Trust Company of New York for their exchange.

Third mortgage, dated March 2, 1874, to Solon Humphreys, William Taussig and H. F. Vail, trustees, securing $3,000,000 bonds of $1,000 each, dated March 2, 1874, payable March 1, 1886, bearing 7 per cent interest. Holders of these bonds, who became parties to the plan of reorganization of August 28, 1878, within the time limited, were entitled to receive for each bond and its coupons $1,000 second preferred stock of the St. Louis Bridge Company.

Fourth mortgage, dated January 1, 1875, to Solon Humphreys and J. P. Morgan, trustees, securing the payment of one bond of $2,000,000, dated January 1, 1875, delivered to J. S. Morgan and Company as security for the payment of moneys advanced by them, and also securing the payment of $1,000,000 income bonds to be substituted for the one bond of $2,000,000. These income bonds were never issued.

St. Louis Bridge Company.

The St. Louis Bridge Company was formed by the re-

organization of the Illinois and St. Louis Bridge Company (No. 2), and filed articles of association in the office of the secretary of state of Missouri December 18, 1878.

The first election for directors was held December 20, 1878, and the organization perfected the same day.

The Illinois and St. Louis Bridge was conveyed to the St. Louis Bridge Company by deed and agreement between Anthony B. Thomas and wife, St. Louis Bridge Company and J. S. Morgan et al., dated March 29, 1879, supplemented by deed and agreement between the same parties dated October 14, 1879.

Under date of January 1, 1879, the St. Louis Bridge Company and the Tunnel Railroad of St. Louis jointly leased the properties of the Union Railway and Transit Company of St. Louis and the Union Railway and Transit Company (of Illinois), and on March 3, 1880, (supplemented June 29, 1882, and March 4, 1885), they jointly leased the properties of the Terminal Railroad of St. Louis and the Terminal Railroad of East St. Louis.

On July 1, 1881, the St.Louis Bridge Company and the Tunnel Railroad of St. Louis leased their properties to the Missouri Pacific Railway Company and the Wabash, St. Louis and Pacific Railway Company, and assigned to them the leases of the Union Railway and Transit Companies of St. Louis and Illinois, and the Terminal Railroads of St. Louis and East St. Louis above mentioned. The lease was for the term of the existence of the lessor companies. The lessees were to pay the principal and interest when due of the $5,000,000 bonds of the St. Louis Bridge Company, a dividend of 6 per cent on $2,490,000 first preferred, and 3 per cent on $3,000,000 second preferred capital stock of the St. Louis Bridge Company, and a dividend of 6 per cent on $1,250,000 capital stock of the Tunnel Railroad of St. Louis, as rental for the use of the properties. The St. Louis Bridge Company agreed to transfer all its $2,500,000 common stock to the Mercantile Trust Company of New York in trust, to be voted at the direction of the lessors at any meeting of the stockholders.

By an agreement of March 1, 1882, between the lessor company, each acquired the right to succeed to the interest of the one making default in its obligations under the

lease. Under this agreement the Missouri Pacific Railway Company became practically the sole lessee.

The lease of the St. Louis Bridge Company and the Tunnel Railroad of St. Louis was assigned to the Terminal Railroad Association of St. Louis October 3, 1889, and the leases of the Union Railway and Transit Companies of St. Louis and Illinois and of the Terminal Railroads of St. Louis and East St. Louis were canceled in accordance with agreement of October 1, 1889, for the re-organization of the St. Louis terminals.

Capital Stock.

The capital ctock authorized in the articles of assocition was $7,990,000, in shares of $100 each, of which, in accordance with the agreement of re-organization of August 28, 1878, above mentioned, $2,490,000 was preferred stock, $3,000,000 second preferred and $2,500,000 common stock all of which was issued. As above indicated, the Terminal Railroad Association under the lease guarantees the payment of a dividend of 6 per cent on the first preferred and 3 per cent on the second preferred stock. The $2,500,000 common stock is held in trust for the Terminal Railroad Association by the Mercantile Trust Company of New York, for the purpose of voting it at any meeting of the stockholders.

Mortgages and Bonds.

Mortgage, dated April 1, 1879, to J. C. Rogers and C. E. Tracy, trustees, securing $5,000,000 bonds of $1,000 each, dated April 1, 1879, payable April 1, 1929, bearing 3½ per cent interest until April 1, 1881, and 7 per cent thereafter, all of which were issued and are now outstanding except one bond. The payment of the principal and interest of these bonds is guaranteed by the Terminal Railroad Association of St. Louis, in accordance with the lease above referred to .

Tunnel Railroad of St. Louis.

Connects the union depot tracks with the St. Louis bridge tracks. Main track 0.93. Second 0.93 Total track 1.86.

The Tunnel Railroad of St. Louis was formed December 18, 1878, by the reorganization of the St. Louis Tunnel Railroad Company, which was incorporated November 8, 1872.

St. Louis Tunnel Railroad Company.

The St. Louis Tunnel Railroad Company was organized in the interest of the Illinois and St. Louis Bridge Company. The act of the Illinois legislature of February 16, 1865, requiring the St. Louis and Illinois bridge to be built within 100 feet of Dyke avenue in East St. Louis, made it expedient to construct a tunnel in order to reach terminal facilities in St. Louis.

The St. Louis Tunnel Railroad Company filed articles of association in the office of the secretary of state of Missouri November 8, 1872, to construct a railroad about two miles in length in St. Louis, from the terminus of the bridge of the Illinois and St. Louis Bridge Company at or near Third street, to a place between Poplar and Cerre streets, and between Eighth street and Tayon avenue, so as to make suitable connection with the Missouri Pacific Railroad and any other railroad.

By ordinance of the city of St. Louis, approved March 14, 1868, and July 11, 1872, the Illinois and St. Louis Bridge Company had been granted the right to construct a tunnel under the streets and alleys, from a point between Second and Third streets to any point south of Clark avenue between the east line of Eighth and the west line of Twelfth streets. By ordinance, approved November 29, 1872, these rights were transferred to the St. Louis Tunnel Railroad Company, and the further right was granted it to construct an open cut from the mouth of the tunnel at Clark avenue to the middle of block 424.

An ordinance, approved June 23, 1874, authorized the paving of Third street.

The tunnel, about 4,800 feet in length, was opened for operation July 4, 1874.

The company having defaulted in the payment of interest on its bonds, J. Pierpont Morgan and Solon Humphreys were appointed receivers by the United States Circuit Court for the Eastern District of Missouri, May 31, 1875.

A decree of sale was entered by that court April 24, 1878, under which the entire property of the company was sold July 1, 1878, to Charles E. Tracy, trustee, for $450,000, and conveyed to him by deed of Ezekiel W. Woodward, commissioner, dated July 1, 1878.

The sale was confirmed December 7, 1878. In accordance with a decree of December 19, 1878, Charles E. Tracy, trustee, by deed of December 19, 1878, conveyed the property to the Tunnel Railroad of St. Louis, which had been organized by the bondholders, in consideration of $62,500 cash and $1,250,000 capital stock of that company.

Capital Stock.

The capital stock authorized in the articles of association was $100,000, in shares of $100 each, all of which was issued.

This stock appears to have been extinguished by foreclosure proceedings.

Mortgages and Bonds.

Mortgage, dated January 1, 1873 (supplemented August 1, 1873) to Barton Bates and Charles Edward Tracy, trustees, securing $250,000 bonds of $200 each, dated January 1, 1873, payable January 1, 1888, bearing 9 per cent interest, all of which were issued.

This mortgage was foreclosed and the road sold July 1, 1878. The decree of court of December 19, 1878, ordering conveyance, and the deed of conveyance, dated December 19, 1878, to the Tunnel Railroad of St. Louis provided that bondholders might, at any time within sixty days of the date of the deed, exchange their bonds for an equal amount of the capital stock of the Tunnel Railroad of St. Louis, and those not making the exchange within that time would be entitled to their pro rata of the proceeds of sale.

Tunnel Railroad of St. Louis.

The Tunnel Railroad of St. Louis was formed by the reorganization of the St. Louis Tunnel Railroad Company. Articles of association were filed in the office of the secretary of state of Missouri December 18, 1878. In these

articles, the line of the company's railroad was stated to be "from a place on the eastern boundary line of the state of Missouri opposite to the city of East St. Louis, where the present bridge over the Mississippi river, called the Illinois and St. Louis bridge, crosses said line, thence to a place near Poplar street in said city, and to the western limit of said city, so as to make suitable connection with the tracks of the Union Depot Company of St. Louis, the Missouri Pacific, the St. Louis, Iron Mountain and Southern and other railroads having termini in the said city, together with the necessary side-tracks in the said city. The length of said road as near as may be is six miles."

The first election for directors was held December 19, 1878, and the organization was perfected the same day.

As above stated, the property of the St. Louis Tunnel Railroad Company was conveyed to the company by deed of Charles E. Tracy, trustee, dated December 19, 1878.

Under date of January 1, 1879, the Tunnel Railroad of St. Louis and the St. Louis Bridge Company jointly leased the properties of the Union Railway and Transit Company of St. Louis, and the Union Railway and Transit Company (of Illinois), and on March 3, 1880, they leased the properties of the Terminal Railroad of St. Louis, and the Terminal Railroad of East St. Louis. On July 1, 1881, they assigned these leases, and also leased their own properties for the term of their corporate existence, to the Missouri Pacific Railway Company and the Wabash, St. Louis and Pacific Railway Company, the lessees agreeing to pay as rental a dividend of 6 per cent upon the $1,250,000 capital stock of the Tunnnel Railroad of St. Louis, and interest and dividends on the bonds and stocks of the St. Louis Bridge Company.

The lease was assigned to the Terminal Railroad Association of St. Louis October 3, 1889, in accordance with an agreement of October 1, 1889, for the formation of the association. The leases of the Union Railway and Transit Companies of St. Louis and Illinois, and of the Terminal Railroads of St. Louis and East St. Louis were cancelled.

Capital Stock.

The capital stock authorized in the articles of association

is $1,250,000, in shares of $100 each, all of which was issued.

The Terminal Railroad Association of St. Louis, as lessee, guarantees the payment of an annual dividend of 6 per cent upon this stock, in accordance with the lease above mentioned.

Mortgages and Bonds.

The company has created no mortgage debt.

St. Louis Merchants Bridge Terminal Railway Company.

Line extending from a point near Seventh and Gratiot streets, southeast of the union station, to the approach of the Merchants bridge at Ferry street, and northwardly from that point to a connection with the St. Louis Terminal Railway. Main track 3.94. Second 3.94. Sidings 17.80. Total track 25.68 miles.

The St. Louis Merchants Bridge Terminal Railway Company was organized in the interest of the Merchants Exchange of St. Louis, for the purpose of providing terminal facilities in St. Louis in connection with the St. Louis Merchants Bridge Company.

Articles of association were filed in the office of the secretary of state of Missouri August 18, 1887, to construct a railroad fourteen miles in length in the city of St. Louis. A certificate was filed September 29, 1887, of an increase in the number of directors from seven to eleven.

The first election for directors was held August 27, 1887, and the organization perfected the same day.

Ordinances of the city of St. Louis, approved July 9, 1887, and December 24, 1889, granted the company the right-of-way over the following generally described route: Beginning near Twelfth street in city block 439; thence across city blocks 432, 429, 422, 419, 148, 161, 160, 77, 52 and 41, and across intervening streets and alleys to the levee; thence along the levee to near the foot of Wash street; thence through city blocks and across intervening alleys and Carr street to Main (First) street; along Main and across Exchange square to Hall street; along Hall street to Ferry street, opposite the location of the St. Louis Mer-

chants bridge; thence north through the grounds of the St. Louis water works; thence through city blocks and across intervening streets to McKissock avenue; thence along McKissock avenue to Adelaide avenue; thence through city block to Bulwer avenue; along Bulwer avenue to Bircher street; thence in a northerly and easterly direction to any point on the Mississippi river south of the Chain of Rocks. Also a branch line beginning at or near the intersection of Pope and Bulwer streets; thence across city blocks and intervening streets to Bircher street; thence along Bircher street, through city blocks and across intervening streets to the intersection of the Natural Bridge with the old city limits.

An ordinance, approved February 14, 1889, granted right-of-way from the intersection of Hall and Bremen avenues, and from the intersection of McKissock and Bryan avenues, to a connection with the St. Louis Merchants bridge.

An ordinance, approved July 14, 1890 (No. 15,695), granted right-of-way for a line along Second and Collins streets, and across intervening streets and through certain city blocks, between North Market and Biddle streets, to enable the company to reach the wholesale business center of the city.

An ordinance, approved April 6, 1891 (No. 16,135), authorized the use of certain streets for the purpose of constructing a passenger station between Carr, Collins, Broadway and Biddle streets.

The road as described in these ordinances was constructed by the company and opened for operation April 10, 1890, except the branches to the point south of the Chain of Rocks, and to the western city limits, which were afterwards built by the St. Louis Terminal Railway Company, under its own ordinances.

Sixteen other ordinances, passed in 1890, and fourteen passed since that time, granted authority to construct sidings and conferred other minor rights.

On February 1, 1889, the company leased the St. Louis Merchants Bridge for a period of forty years, agreeing to pay as rental the interest on the $2,000,000 of 6 per cent bonds of that company and three-fourths of the net income, but this lease was cancelled August 1, 1893, when a new

lease was made by the bridge company to the Madison, Illinois, and St. Louis Railway Company.

On September 1, 1890, for the purpose of making connection with the St. Louis bridge, the company leased the Venice and Carondelet Belt Railroad for a period of five years, at a rental of $800 per month.

An agreement was made March 26, 1891, with the St. Louis, Vandalia and Terre Haute Railroad Company, for the use by that company of the facilities of the company.

An agreement was made December 26, 1894, with the Missouri, Kansas and Texas Railway Company for the use by it of the elevated portion of the line between Wright street and the union station. This portion of the road is still used by the Missouri, Kansas and Texas Railway Company and also by the Chicago, Burlington and Quincy Railway Company, on the basis of this agreement.

On August 17, 1893, an agreement was made by the company granting the pereptual use of its railroad, and assigning $438,400 of its capital stock to the Terminal Railroad Association of St. Louis, in consideration of that company paying all the liabilities and guaranteeing by endorsement the principal and interest of the $3,500,000 bonds of the St. Louis Merchants Bridge Terminal Railway Company. The Terminal Railroad Association, through this agreement and the stock which it already owned, became the holder of a majority of the capital stock of the company.

The St. Louis Merchants Bridge Terminal Railway Company owns all of the capital stock of the St. Louis Merchants Bridge Company and the Madison, Illinois, and St. Louis Railway Company.

Capital Stock.

The capital stock authorized in the articles of association was $1,000,000, in shares of $100 each. A certificate was filed in the office of the secretary of state of Missouri November 28, 1889, of its authorized increase to $2,000,000, and another certificate was filed November 17, 1890, of its increase to $3,500,000. There was $2,939,500 issued, of which $1,810,300 is owned by the Terminal Railroad Association of St. Louis, $1,780,000 of which is pledged as

collateral security under its first consolidated and general mortgages.

MORTGAGES AND BONDS.

Mortgage, dated October 1, 1890, to the St. Louis Trust Company, trustee, securing $3,000,000 bonds of $1,000 each, and $500,000 bonds of $500 each, dated October 1, 1890, payable October 1, 1930, bearing 5 per cent interest, all of which were issued. In accordance with the agreement of August 17, 1893, above mentioned, the Terminal Railroad Association of St. Louis guarantees the payment of the principal and interest by endorsement on each bond.

ST. LOUIS MERCHANTS BRIDGE COMPANY.

The St. Louis Merchants Bridge spans the Mississippi river at a point about 3 miles north of the Eads Bridge. Main track, 2.37 miles; second track, 2.36; side track, 0.45; total, 5.18 miles.

The St. Louis Merchants Bridge Company was organized in the interest of the Merchants Exchange of St. Louis for the purpose of constructing a bridge over the Mississippi river to the city of St. Louis from some suitable point between the north line of St. Clair county, Illinois, and the mouth of the Missouri river. A certificate of incorporation was issued by the secretary of state of Missouri May 11, 1886.

The act of Congress, approved February 3, 1887, amended by act approved September 10, 1888, authorized the construction of the bridge, and on November 15, 1888, the secretary of war approved of the plans of the bridge.

The first election for directors was held May 10, 1886, and the organization perfected the same day.

The bridge was completed March 18, 1890, and opened for operation in May, 1890.

On February 1, 1889, the company leased its property to the St. Louis Merchants Bridge Terminal Railway Company for forty years, the lessee agreeing to pay as rental the interest on the $2,000,000 of 6 per cent bonds of the company, and three-fourths of the net income. This lease was cancelled, and a new lease for the same term and at the same rental was made to the Madison, Illinois and St. Louis Railway Company August 1, 1893.

An agreement was made by that company August 17, 1893, with the Terminal Railroad Association of St. Louis for the use by the latter company of the Madison, Illinois and St. Louis Railway and the St. Louis Merchants Bridge, in consideration of the Terminal Association guaranteeing by endorsement the payment of the interest on the $2,000,000 bonds of the bridge company.

Capital Stock.

The capital stock authorized in the articles of incorporation was $500,000, in shares of $100 each. On January 21, 1889, the stockholders authorized its increase to $2,000,000, a certificate of which increase was filed in the office of the secretary of state of Missouri February 23, 1889. There was $1,500,000 issued, all of which is owned by the St. Louis Merchants Bridge Terminal Railway Company.

Mortgages and Bonds.

Mortgage, dated February 1, 1889, to the Farmers Loan and Trust Company of New York, trustee, securing $2,000,000 bonds of $1000 each, dated February 1, 1889, payable February 1, 1929, bearing 6 per cent interest, all of which were issued. The payment of the interest is guaranteed by the Terminal Railroad Association of St. Louis by endorsement on each bond, in accordance with the agreement of August 17, 1893, above mentioned.

Madison, Illinois and St. Louis Railway Company.

Connects the east approach of the Merchants Bridge with the East St. Louis Belt Railroad, and roads entering East St. Louis from the north. Main track. 1,88; second, 1.87; side, 14.75; total tracks, 18.50 miles.

The Madison, Illinois and St. Louis Railway Company was the successor by change of name September 29, 1891, of the Electric City and Illinois Railway Company, which was incorporated March 4, 1889.

Electric City and Illinois Railway Company.

The Electric City and Illinois Railway Company was organized in the interest of the St. Louis Merchants Bridge Terminal Railway Company, and filed articles of associa-

tion in the office of the secretary of state of Illinois March 4, 1889, to construct a railroad from the eastern approach of the St. Louis Merchants Bridge through Madison county to the city of East St. Louis.

The first election for directors was held March 25, 1889, and the organization perfected the same day.

The capital stock was fixed at $50,000, in shares of $100 each, and the company created no mortgage debt.

On September 29, 1891, the name of the company was changed to the Madison, Illinois and St. Louis Railway Company.

MADISON, ILLINOIS AND ST. LOUIS RAILWAY COMPANY.

The Madison, Illinois and St. Louis Railway Company was the successor by change of name of the Electric City and Illinois Railway Company. A certificate of change of name was filed in the office of the secretary of state of Illinois September 29, 1891. In this certificate the powers of the company were enlarged so as to give it authority to construct, maintain and operate a railway over and across the St. Louis Merchants Bridge and also three lines extending from the eastern approach of the bridge to the towns of Alton and Edwardsville, and to a point opposite the southern portion of the city of St. Louis, with a branch from the last-mentioned line to the city of East St. Louis.

The company constructed a line from the Merchants Bridge to Granite City, Illinois, which it opened for operation July 1, 1890.

On August 1, 1893, the company leased the St. Louis Merchants Bridge for a period of forty years, agreeing to pay as rental the interest on the $2,000,000 bonds of the bridge company, and three-fourths of the net income.

In 1893 the Terminal Railroad Association of St. Louis having acquired control of the company through its ownership of the majority of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, entered into an agreement August 17, 1893, with the Madison, Illinois and St. Louis Railway Company for the perpetual use of its line and the Merchants Bridge, in consideration of the Terminal Association guaranteeing the payment of the interest on the $2,000,000 bonds of the bridge company.

Capital Stock.

The $50,000 capital stock originally authorized was increased in the certificate of change of name to $500,000 in shares of $100 each. There was $2500 issued, all of which is owned by the St. Louis Merchants Bridge Terminal Railway Company.

Mortgages and Bonds.

Mortgage dated October 1, 1891, to the St. Louis Trust Company, trustee, securing $500,000 bonds of $1000 each, dated October 1, 1891, payable October 1, 1911 bearing 6 per cent interest all of which were issued. These bonds are all pledged as collateral security on notes of the St. Louis Merchants Bridge Terminal Railway Company, owned and held by the Terminal Railroad Association of St. Louis.

Wiggins Ferry Company.

The Wiggins Ferry Company operates a ferry across the Mississippi river at St. Louis for passengers, vehicles and cars. It owns 7 steamers, 2 tugs, 1 car transfer barge, 4 wharf boats, 5 small floats, and 1 floating pile driver. It also owns 13 miles of yard and side tracks in St. Louis, 711 acres of land in St. Clair and Madison counties, Illinois, and 70 acres in St. Louis.

The Wiggins Ferry Company was incorporated by special act of the Illinois legislature of February 11, 1853, for the purpose of acquiring the franchise to operate a ferry over the Mississippi river, which had originally been granted to Samuel Wiggins by special acts of March 2, 1819, February 6, 1821, and January 19, 1833, and also to construct a levee, wharves, boats, warehouses etc. This act was amended by acts of February 17 1857, and June 12, 1867, but the latter act was never accepted and is accordingly considered by the company to be void.

The first election for directors was held and the organization perfected May 12, 1853.

The company operates a line of ferry boats across the river and car transfers, the latter being operated since 1870, and thirteen miles of yard track in St. Louis.

Ordinances of the city of St. Louis, approved April 16,

1898, and November 11, 1898, authorized the construction of side tracks. An ordinance of East St. Louis, approved March 12, 1902, vacated a street and alley, and another ordinance relating to the company's property was approved March 25th, 1902.

The company owns the entire capital stock of the St. Louis Transfer Railway Company and the East St. Louis Connecting Railway Company. In 1890 it purchased the railroad and franchises of the Fourth street and Arsenal Railway Company.

It also owns the capital stocks of the Unity Realty Company and the Lorenzo Realty Company.

In 1902 the Terminal Railroad Association of St. Louis, or rather its fourteen proprietary companies, acquired the capital stock of the Wiggins Ferry Company, as is more fully explained in the history of the Terminal Railroad Association.

Capital Stock.

The capital stock authorized by the act of February 11, 1853, was $100,000, in shares of $100 each, which might be increased to $1,000,000. There has been $1,000,000 issued all of which is outstanding. Of this stock $950,000 is technically owned by the fourteen proprietary companies of the Terminal Railroad Association, but practically by the Association, and is pledged as collateral security for the payment of the general mortgage bonds of that company, as provided in the Ferry Stock and Trust agreements of December 16, 1902.

Mortgages and Bonds.

The company has created no mortgage debt.

East St. Louis Connecting Railway Company.

Railway extends from Trendley avenue to Winters avenue, East St. Louis (1.15 miles) with 1.15 miles second track and 35.34 miles side track; total trackage, 37.64 miles.

The East St. Louis Connecting Railway Company was organized in the interest of the Wiggins Ferry Company, and filed articles of association in the office of the secretary of state of Illinois, January 4, 1878, to construct a railroad

from Venice, Illinois, to the Illinois and St. Louis Railroad (now the Southern Railway).

The first election for directors was held January 10, 1878, and the organization perfected the same day.

Ordinances of the city of East St. Louis, passed August 5, 1878, October 8, 1878, June 30, 1885, August 20, 1897, April 29, 1899, April 9, 1900, January 11, 1901, and August 18, 1902, granted to the company rights of way over certain streets etc.

The road was opened for operation in 1887.

Under date of July 1, 1885, the company leased the Venice and Carondelet Railway and certain tracks of the Illinois and St. Louis Railroad Company at East St. Louis, for a period of ten years at an annual rental of $18,000.

Capital Stock.

The capital stock authorized in the articles of association is $20,000 in shares of $100 each, all of which was issued and is owned by the Wiggins Ferry Company.

Mortgages and Bonds.

The company has created no mortgage debt.

St. Louis Transfer Railway Company.

The St. Louis Transfer Railway Company was organized in the interest of the Wiggins Ferry Company, and filed articles of association in the office of the secretary of state of Missouri June 25, 1884, to construct a railroad about six miles in length and 100 feet in width through the city of St. Louis, beginning at Arsenal street at the crossing of the St. Louis, Iron Mountain and Southern Railway, thence running north parallel with the Mississippi river to Calvary avenue east of Hall street, with a branch from a point on Chambers street to a point on Bellefontaine road near Bircher avenue.

An ordinance of the city of St. Louis, approved June 11, 1884, amended by ordinances of December 15, 1885, February, 1886, and April 5, 1889, granted the company right of way beginning at the intersection of the St. Louis, Iron Mountain and Southern Railway with the south line of Arsenal street; thence through block 2013 to Commercial

street; thence north on Commercial street across block 774, to the wharf; thence along the wharf to Almond street; thence over St. Louis, Iron Mountain and Southern tracks to the north line of Morgan street; thence northwestwardly across the wharf or through block 19, across Biddle street to Lewis street; thence along Lewis street to a point on the Wharf east of the Wabash, St. Louis and Pacific Railway; thence along the wharf to and across Clinton street; thence northwesterly across Exchange square and Monroe, North Market and Benton streets to Hall street; thence along Hall street to Bremen avenue; thence across blocks 1222 and 1223 to McKissock street and along same to Ferry street; thence to intersection of switches of the St. Louis Water Works.

An ordinance, approved August 10, 1885, authorized the extension of the road from a point south of Chambers street along the wharf to the property of the company in city block 292. An ordinance, approved February 18, 1886, limited the time for completing the road.

Ten other ordinances relating chiefly to the construction of sidings and the leasing of portions of the wharf were passed between 1886 and 1895.

The first election for directors was held July 1, 1884, and the organization perfected the same day.

The road was opened for operation July 1, 1890.

Under ordinance of June 11, 1884, the company used the St. Louis, Iron Mountain and Southern Railway from Almond (Valentine) street to the north line of Carr street. As satisfactory arrangements could not be made with that company for further use of its line, an ordinance, approved March 20, 1891, granted the company the right of way along the wharf between those points.

Capital Stock.

The capital stock authorized in the articles of association was $20,000, in shares of $100 each, all of which was issued. This stock is all owned by the Wiggins Ferry Company.

Mortgages and Bonds.

The company created no mortgage debt.

Unity Realty Company.

The Unity Realty Company was organized in the interest of the Wiggins Ferry Company and filed articles of association in the office of the secretary of state of Missouri January 20, 1899.

The purpose of organizing was the buying, selling, etc., of real estate in the state of Missouri or elsewhere.

The first Board of Directors, which was named in the articles of association, completed the organization of the company on January 20, 1899.

The property of this company consists of real estate and improvements thereon located in St. Louis, Missouri, having an area of 23.95 miles, being bounded on the north by Bremen avenue and fronting east on the Mississippi River.

The tracks of the Wiggins Ferry Company and of the St. Louis Transfer Railway Company are laid on a part of this property, the remainder being used for stock yards and an abattoir for the manufacturing of ice and for cold-storage purposes.

The stock yards and abattoir property is leased to and operated by the Independent Stock Yards Company.

Capital Stock.

The capital stock authorized in the articles of association was $3,000, in shares of $100 each. On April 18, 1900, the stockholders authorized its increase to $260,000, a certificate of which increase was filed in the office of the Secretary of State of Missouri, April 19, 1900.

The entire $260,000 stock has been issued and is held in trust by a trustee for the Wiggins Ferry Company.

Mortgages and Bonds.

Mortgage, dated May 1, 1900, to the Mercantile Trust Company of Missouri, trustee, securing $260,000 bonds, payable at various intervals between May 1, 1900, and May 1, 1910, with the option of paying them on any interest day in multiples of $10,000, bearing 4 per cent interest, payable on May 1, and November 1 of each year.

This mortgage covers all of the property owned by the Unity Realty Company.

There are $220,000 of these bonds outstanding.

Lorenzo Realty Company.

The Lorenzo Realty Company was the successor by change of name April 23, 1901, of the Oliver Realty Company, which was incorporated April 18, 1901.

The Oliver Realty Company was organized in the interest of the Wiggins Ferry Company, and on April 18, 1901, filed articles of association in the office of the Secretary of State of Missouri for the purpose of dealing in real estate in the State of Missouri or elsewhere, and on the same date the Secretary of State issued his certificate of incorporation.

The first Board of Directors named in the articles of incorporation perfected the organization of the company on April 18, 1901.

On April 18, 1901, by a vote of the stockholders the name of the company was changed to the Lorenzo Realty Company, a certificate of which change was filed in the office of the Secretary of State of Missouri, April 23, 1901.

The property of the Lorenzo Realty Company consists of a large tract of unimproved land located in St. Louis, Missouri, situated between Angelica street and Bremen avenue, east of Hall street, fronting east on the Mississippi River, containing 32.77 acres and an improved parcel of land located on Broadway and Branch streets, the latter piece of property being leased to the St. Louis Union Packing Company.

Capital Stock.

The capital stock authorized in the articles of association was $50,000 in shares of $100 each, all of which has been issued. It is all held in trust by a trustee for the Wiggins Ferry Company.

Mortgages and Bonds.

The company has created no mortgage securing the issue of any series of bonds.

Interstate Car Transfer Company.

The Interstate Car Transfer Company is the successor by change of name of the Interstate Sand and Car Transfer Company June 27, 1898.

The Interstate Sand and Car Transfer Company filed

articles of association in the office of the secretary of state of Missouri, July 20, 1896. The purpose of organization, as therein set forth, was the trading in sand and the use of boats in such business, and the transfer of cars and freight in car load lots upon its boats.

A certificate of incorporation was issued by the secretary of state of Missouri, July 20, 1896.

The first board of directors named in the articles of association perfected the organization of the company on July 27, 1896.

On May 5, 1898, by a vote of the stockholders, the name of the company was changed to the Interstate Car Transfer Company, a certificate of such change being filed in the office of the secretary of state of Missouri, June 27, 1898.

The Interstate Car Transfer Company is the owner of one tug, one steamer, two barges and two small floats, by means of which it transfers cars across the Mississippi river for the various railroads terminating there.

The Terminal Association purchased the entire capital stock of the Interstate Car Transfer Company, in February, 1903, and on October 1, 1902, it purchased the entire capital stock of the St. Louis Belt and Terminal Railway Company which was organized in the interest of the Interstate Car Transfer Company, Missouri Pacific Railway Company and St. Louis and San Francisco Railroad Company.

Capital Stock.

The capital stock authorized in the articles of association was $90,000, in shares of $100 each.

On June 27, 1898, a certificate was filed in the office of the secretary of state of Missouri of its increase to $300,000, and on May 9, 1902, another certificate was filed of its increase to $500,000.

The entire $500,000 stock has been issued. It is all owned by the Terminal Railroad Association of St. Louis, and is pledged as collateral security under the general mortgage of that company.

Mortgages and Bonds.

The company has executed no mortgage securing an issue of bonds.

March 15, 1906.

Investment Bonds.

Terminal Railroad Association of St. Louis,

General Mortgage Refunding 4% Sinking Fund. Gold Bonds.

214 North Fourth Street. St. Louis.

$250,000.00
(Or Any Part)

Terminal Railroad Association of St. Louis, General Mortgage Refunding 4% sinking Fund Gold Bonds.

Dated January 1, 1903. Due January 1, 1953.

Optional at 110 and accrued interest on January 1, 1910, or any interest day thereafter. Interest payable January 1st and July 1st, in New York.

Coupon Bonds: Denomination, $1,000 each, with privilege of registration of principal or in full registered bonds of any multiple of $1,000. Registered Bonds may be converted into Coupon Bonds at the option of the owner.

Authorized issue, $50,000,000. Outstanding, $18,000,000; reserved to retire underlying liens, $17,500,000; balance, $14,500,000, are reserved for issue after January 1st, 1906, at not to exceed $1,000,000 in any one year for betterments and improvements and the acquisition of additional properties. The above issue is secured by a general mortgage on the entire property of the Terminal Railroad Association of St. Louis, subject only to $17,500,000 prior liens.

The Terminal Association owns and controls the entire Terminal facilities in the City of St. Louis, as well as valuable Terminal facilities in East St. Louis, in addition to owning the Union Station in St. Louis; owning also 100

miles of main, side, yard, and storage tracks; a number of freight stations and ware-houses, machine shops, round-houses, etc.; two Belt Railway lines encircling the City of St. Louis, and three Belt Railway lines in the City of East St. Louis and vicinity. In the heart of the business districts of St. Louis and East St. Louis it owns more than 200 acres of land. It owns 9,500 shares of a total issue of 10,000 shares of the capital stock of the Wiggins Ferry Co., whose property is unencumbered, and which owns 794 acres of land in the City of East St. Louis, and practically the entire Mississippi river front on the Illinois side, opposite the City of St. Louis, for a distance of three miles. Also Belt Railway lines in St. Louis and East St. Louis and 70 acres of land in St. Louis. In addition to the above properties, the Terminal Association controls in perpetuity by lease, the Eads Bridge and the St. Louis Tunnel. The interest and sinking fund payments on the above issue are guaranteed proportionately by the following fourteen proprietary companies:

St. Louis, Vandalia & Terre Haute R. R. Co. (Pennsylvania System.)
Clev., Cin., Chic. & St. Louis Ry Co. (New York Central System.)
Missouri Pacific Ry. Co.
St. Louis, Iron Mountain & Southern Ry. Co.
Wabash R. R. Co.
Baltimore & Ohio Southwestern R. R. Co.
Louisville & Nashville R. R. Co.
St. Louis & San Francisco R. R. Co.
Chic., Rock Island & Pacific Ry. Co.
Southern Ry. Co.
Illinois Central R. R. Co.
Chicago & Alton Ry. Co.
Chic., Burlington & Quincy Ry. Co.
Mo., Kans. & Texas Ry. Co.

These Companies have entered into an agreement binding themselves forever to make use of the properties of the Terminal Association for all passenger and freight traffic.

For full details concerning the issue, would refer you to

the following letter of Julius S. Walsh, Pres., under date of February 10, 1903.

We recommend the above bonds for investment. Price, par and interest, yielding 4%.

Francis, Bro. & Co.

Terminal Railroad Association of St. Louis.

St. Louis, Mo., February 10, 1903.

Messrs. J. P. Morgan & Company,

New York City.

Dear Sirs:—The General Mortgage Refunding Four Per Cent, Sinking Fund Gold Bonds of the Terminal Railroad Association of St. Louis sold to you are part of an issue limited to $50,000,000 and secured by mortgage and deed of trust to Central Trust Company of New York and William Taussig, Trustees, covering the entire property of the Terminal Association now owned or hereafter acquired.

The bonds are dated January 1, 1903, and mature January 1, 1953; interest payable January 1 and July 1 in New York. The General Mortgage provides a sinking fund for the redemption of $100,000 of bonds each year, beginning on July 1, 1906, by lot at 110, or by purchase in the market at a less price. The entire issue is subject to call at 110 and interest on January 1, 1910, or any interest day thereafter.

Of this issue of bonds $17,500,000 are reserved to retire or take up an equal amount of prior lien bonds, $14,500,000 are reserved for issue after January 1, 1906, at not to exceed $1,000,000 in any one year, for betterments and improvements and the acquisition of additional properties. The proceeds of the remaining $18,000,000 which are under contract with your goodselves are to be used for extensive additions and improvements to be made immediately to accommodate rapidly increasing demands for additional terminals at St. Louis and East St. Louis, and for the acquisition of additional properties, including the entire capital stocks of the following named companies, the properties of which are unencumbered and on the stocks of which the General Mortgage will constitute a first lien:

East St. Louis and Carondelet Railway;
Illinois Transfer Railway Company;

Granite City and Madison Belt Railroad Company;
St. Louis Belt and Terminal Railroad Company; and
Terminal Realty Company.

The mortgage prohibits the placing of any lien on the existing properties of these companies which would underlie the general mortgage bonds.

The issued capital stock of the Terminal Association is owned in equal shares by:

Missouri Pacific Railway Company;
St. Louis, Iron Mountain and Southern Railway Company;
Wabash Railroad Company;
St. Louis, Vandalia and Terre Haute Railroad Company (Pennsylvania System);
Baltimore and Ohio Southwestern Railroad Company;
Cleveland, Cincinnati, Chicago and St. Louis Railway Company (N. Y. Central System);
Louisville and Nashville Railroad Company;
St. Louis and San Francisco Railroad Company;
Chicago, Rock Island and Pacific Railway Company;
Southern Railway Company;
Illinois Central Railroad Company;
Chicago and Alton Railway Company;
Chicago, Burlington and Quincy Railway Company; and
Missouri, Kansas and Texas Railway Company.

These companies control over 50,000 miles of railway, or more than 25 per cent of the total mileage in the United States.

Under a Guarantee Agreement between the proprietary companies, the Terminal Association and the Trustees of the General Mortgage, and lodged with the Trustees, each of these companies binds itself forever to make use of the properties of the Terminal Association for all passenger and freight traffic within its control through, to and from St. Louis and destined to cross the Mississippi River at St. Louis; and further agrees that the tariff rates of the Terminal Association shall be so fixed by it as to insure the production at all times of sufficient revenue to enable it punctually to meet and discharge the interest on all its bonded debt, rentals, including the tunnel and the bridge

across the Mississippi, also sinking fund installments, taxes and all expenses of every nature incurred in the maintenance, operation and renewal of its system and properties and every part thereof. Under this Agreement each of the proprietary companies also, to the extent of its proportionate interest, one-fourteenth, in the Terminal Association, guarantees the payment of all interest on the General Mortgage Bonds and the payment of the installments of the sinking fund.

As further security for this issue of bonds there have been deposited with the Trustees 9,500 shares of a total issue of 10,000 shares of the capital stock of the Wiggins Ferry Company, which owns 794 acres of land in the City of East St. Louis, and practically the entire Mississippi River front on the Illinois side, opposite the City of St. Louis, for a distance of three miles; also Belt Railway lines in St. Louis and East St. Louis, and 70 acres of land in St. Louis. The property of the Wiggins Ferry Company is unencumbered.

The Terminal Association owns the most extensive and complete system of railway terminals in this country, the result of a growth of more than twenty-five years, and its value to-day is largely in excess of the mortgage debt. It owns the Union Station, the largest and most complete passenger station in the world, which contains thirty-two parallel tracks under roof, and is the passenger station in St. Louis of the various railway lines entering that city—some twenty-two in number; 100 miles of main, side, yard, and storage tracks, a number of freight stations and warehouses, machine shops, roundhouses, etc.; two Belt Railway lines encircling the City of St. Louis, and three Belt Railway lines in the City of East St. Louis and vicinity. In the heart of the business district of St. Louis and East St. Louis it owns more than 200 acres of land.

In addition to the above properties, the Terminal Association controls in perpetuity by lease the Eads Bridge and the St. Louis tunnel.

The entire surplus earnings of the Terminal Association since its organization, aggregating in round figures $2,500,000, have been invested in betterments and the acquisition of new properties, but in order properly to extend its facilities and meet the constantly growing demand upon it, the Terminal Association makes this bond issue, the proceeds of

which will be devoted to the acquisition of additional facilities; among these may be mentioned, in addition to the various properties above referred to, the building of an elevated structure connecting the Eads Bridge with the Merchants' Terminal Railway, thus doubling the capacity of the bridge and enabling the Terminal Association to move passenger trains into the Union Station without passing through the tunnel.

The Terminal System is open to the use of all Railway Lines without discrimination, and affords a convenient method for rapid interchange of traffic between all Railway Lines, and for this purpose occupies the only available lands in St. Louis and East St. Louis. Upon the completion of the improvements now contemplated, and to the construction of which the proceeds of this bond issue will be applied, the Terminal Association will be able to handle rapidly and economically all traffic of every character crossing the Mississippi River at St. Louis, and the recent admission into the Terminal Association of the Southern Railway Company, Illinois Central, Chicago and Alton, Chicago, Burlington and Quincy, and Missouri, Kansas and Texas, insures the use of the system of the Terminal Association by every railroad of importance entering St. Louis or East St. Louis.

A contract with the owners of the entire system of East St. Louis Street Railways secures to the Terminal Association for the upper roadway of the Eads Bridge all trans-river street railway traffic at St. Louis for a term ending in 1952.

The following figures will give some idea of the extent of the business handled, and railway terminals owned by the various companies, the properties or stocks of which come under the General Mortgage:

Mileage including main and side tracks.....	240
Lands owned and available for industrial plants	1,500 acres
Trans-river freight, passenger, express, mail and baggage cars handled in 1902.....	1,089,431 cars

The additions now being made insure an increasing income and more economic operation.

Very truly yours,

Julius S. Walsh, President.

X7

In the Supreme Court of the United States.

OCTOBER TERM, 1910.

THE UNITED STATES, APPELLANT,
v.
THE TERMINAL RAILROAD ASSOCIATION of St. Louis et al. } No. 686.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF MISSOURI.

MOTION TO ADVANCE.

Comes the Attorney General on behalf of the United States and moves the court to advance the above-entitled cause, and respectfully suggests that the same be set for hearing on a day convenient to the court during the October term, 1911.

This was a petition in equity filed by the United States on November 5, 1905, in the Circuit Court of the United States at St. Louis against the Terminal Railroad Association of St. Louis and fourteen railroads. The petition charged the defendants with violating the Sherman Antitrust Act of July 2, 1890 (26 Stat., 209), by combining for the purpose of controlling and restraining interstate commerce between the States of Missouri and Illinois and other States and foreign countries. A special examiner was appointed, by whom much testimony was taken during a period of several years. The case came on for final hearing on April 1, 1909, before the four circuit judges of the

Eighth Circuit, pursuant to the provisions of the expediting act of February 11, 1903 (32 Stat., 823), which provides that on the filing of a certificate by the Attorney General, an equity case instituted under the Sherman Antitrust Act, in which the United States is a party, shall be assigned for hearing before not less than three of the circuit judges of the circuit in which the suit is prosecuted, if there be three or more; otherwise before two such judges and a district judge selected by them.

On May 21, 1909, the four judges handed down an order stating that they found themselves equally divided in opinion, two being in favor of granting some relief to the complainant and two being in favor of dismissing the bill; and, therefore, in accordance with the construction placed by them upon the terms of the expediting act, they certified the case to this court for review. At the October term, 1909, after the decision of this court was handed down in the cases of *B. & O. R. R. Co.* v. *Interstate Commerce Commission* and *Southern Pacific Co.* v. *Interstate Commerce Commission*, a motion to dismiss this action was made by the United States because no final judgment had been pronounced by the court below. This motion was sustained and the cause was remanded accordingly (215 U. S., 595).

On June 7, 1910, a final order was entered by the judges of the Eighth Circuit dismissing the case, and from this order an appeal was taken to this court.

It is the contention of the United States that the defendants in said cause were and are engaged in carrying out a combination and conspiracy in restraint of trade and commerce among the several States, as described in the original bill, contrary to and in violation of the Sherman Act; that the several defendants, except the St. Louis Merchants Bridge Terminal Railway Co., Wiggins Ferry Co., and the St. Louis Bridge Co., own and control the entire capital stock of the Terminal Railroad Association of St. Louis, and that such ownership and control constitute a combination in restraint of trade and commerce among the several States and between said States and foreign countries, contrary to said act; that the agreements whereby the defendant Terminal Railroad Association of St. Louis acquired the ownership and control of the St. Louis Bridge, designated in the complaint as the "Eads Bridge," and the railroad tracks crossing the same and terminals connecting therewith, and also the St. Louis Merchants Bridge, designated as the "Merchants Bridge," and the railroad tracks crossing the same and terminals connecting therewith, are void because unlawful under the terms of said act; that the agreements described in the bill of complaint relating to the operation of said bridges and railroad tracks crossing the same and terminals connecting therewith, in a common or noncompetitive interest, are likewise void because in contravention of the said act; that the several railroad companies mentioned in the complaint, who claim to own stock in said Terminal Railroad Association of St. Louis, the

Wiggins Ferry Co., and the St. Louis Merchants Bridge Terminal Railway Co., can not lawfully hold the same because the contracts of ownership are in violation of said act; and that the Terminal Railroad Association of St. Louis can not lawfully hold shares of capital stock of the various companies and corporations mentioned in the original bill, the stock of which it claims to hold, because such alleged ownership is in violation of the provisions of said act; and that therefore the several corporations, their officers and agents, who are claiming to hold stock in the other corporations mentioned, should be enjoined from voting, controlling, and acting as owner or owners of such shares.

This case is one of vast importance to the people of the city of St. Louis, and to the mercantile interests of that entire section of the country, and, as heretofore shown, its final determination has been greatly delayed because of the necessity that it be remanded when previously in this court; and, furthermore, as stated, it is entitled to a speedy hearing under the expediting act of February 11, 1903.

It is therefore urged that the case be advanced and assigned for hearing as above suggested.

Notice of this motion has been served on opposing counsel.

GEO. W. WICKERSHAM,
Attorney General.

MAY, 1911.

○

IN THE

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1911.

No. 386.

THE UNITED STATES OF AMERICA, APPELLANT,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET AL.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF MISSOURI.

STATEMENT.

This is a proceeding begun November 5th, 1905, by Petition, under the Act of Congress, commonly known as the "Sherman Anti-Trust Act" of July 2nd, 1890, against the defendant railroad Companies and certain officers and directors thereof, named in the Petition, charging them with violating said Act by combining and unreasonably restraining interstate commerce between the States of Missouri and Illinois and other states of the Republic and foreign countries.

The Petition avers the facts in detail upon which the complainant relies, and charges a conspiracy in restraint of interstate and foreign trade, and a combina-

tion in restraint of such trade in violation of the First Section of the Anti-Trust Act.

The Bill also charges an attempt to monopolize, and a monopolization of interstate and foreign trade in violation of the Second Section of the Sherman Act.

~~The Government moved to remand because no final judgment had been entered in the lower court.~~

Answers were filed by the various companies, admitting a great many of the facts as to corporate organization and consolidation of interests, and stock ownership and transfer of property, and leases thereof, but denying that the properties as combined and operated restrained commerce, and denying any intent to restrain the movement of interstate commerce. And averring specifically that the properties so combined and operated (in the manner substantially as alleged in the petition) was an aid to commerce and not a restraint, and alleging said properties were so combined and operated for the purpose of facilitating the transportation of persons and property by the fourteen railroads, co-defendants of The Terminal Railroad Association, and all other railroads engaged in interstate commerce between Missouri and Illinois at St. Louis, Missouri.

Issues of fact being made by the Pleadings, a Commissioner was appointed to take the testimony and report the same to the Court without any findings, either as to the law or the facts.

The testimony was taken and filed by the Commissioner in the United States Circuit Court at St. Louis, Mo., and the case was argued at St. Louis, before the four Circuit Judges of the United States Circuit Court of Appeals.

The Judges were equally divided in opinion as to

whether or not the Government was entitled to any relief, and they accordingly certified the case to this Court, where, upon motion made by the Government, it was on the 31st day of January, 1910, remanded because no final judgment had been entered below, to be dealt with according to law.

On June 6th, 1910, the United States District Attorney for the Eastern District of Missouri filed a motion in behalf of complainant, asking for a re-argument of said cause.

Afterwards the four Circuit Judges made an order reciting that the complainant could not prevail because only two of the Judges were of the opinion that it is entitled to relief, while two were of the opinion it is entitled to no relief, and the Court ordered:

"That the motion for a re-argument of this case be, and the same is hereby, denied, and that the Bill of the complainant be, and it is hereby, dismissed."

And afterwards, on August 1st, 1910, a Petition for Appeal, accompanied by the following Assignment of Errors, was filed by the complainant:

I.

"The complainant assigns as error the action of the Circuit Court in making and entering in this cause its order of June 4th, A. D., 1910, and adjudging and decreeing the dismissal out of Court of complainant's bill of complaint herein.

II.

The complainant assigns as error the failure and refusal of the Circuit Court by its decree herein to adjudge and decree the complainant the relief prayed for in its bill of complaint.

III.

The complainant assigns as error the failure and refusal of the Circuit Court under the evidence in this cause to adjudge and decree that the defendants had entered into, prior to the institution of this cause, and at the time of the institution thereof were engaged in carrying out a combination and conspiracy in restraint of trade and commerce among the several states as described in the complaint herein, contrary to and in violation of the act of Congress of July 2nd, 1890, entitled "An Act to protect trade and commerce against unlawful restraints and monopoly."

IV.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and decree that the several defendants (other than the Terminal Railroad Association of St. Louis, St. Louis Merchants Bridge Terminal Railway Company, Wiggins Ferry Company, and the St. Louis Bridge Company) owned and controlled the entire capital stock of the defendant Terminal Railroad Association of St. Louis, and that such ownership and control constitute a combination in restraint of trade and commerce among the several states and between said states and foreign countries contrary to the act of July 2nd, 1890, entitled "An Act to protect trade and commerce against unlawful restraints and monopoly."

V.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and decree null

and void the several agreements between the defendants herein, described in complainant's bill of complaint, whereby the defendant, The Terminal Railroad Association of St. Louis, acquired the ownership and control of the St. Louis Bridge (designated in the complaint as the "Eads Bridge"), and the railroad tracks crossing the same, and terminals connecting therewith; and also the St. Louis Merchants Bridge (designated in the complaint as the "Merchants Bridge"), and the railroad tracks crossing the same, and terminals connecting therewith. And also the failure and refusal of the Circuit Court to enjoin the further carrying out of such agreements and the operation of such bridges, railroad tracks, and terminals upon a noncompetitive basis with each other.

VI.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and declare null and void the several agreements between the defendants herein described in the complainant's bill of complaint looking to the operation of the St. Louis Bridge, known as the Eads Bridge, and railroad tracks crossing the same and terminals connecting therewith, in a common or noncompeting interest with the St. Louis Merchants Bridge, known herein as the Merchants Bridge, and railroad tracks crossing the same and terminals connecting therewith, and to enjoin and forbid the defendants, parties to such agreements, from the further carrying out of such agreements or the operation of such bridges, railroad tracks, and terminals in such common or noncompetitive interest, and to enjoin and forbid the defendants and each of them, their agents, servants and employes, from operat-

ing, controlling, and maintaining the properties hereinbefore described as a common instrument or agency of interstate commerce under the common control of the fourteen railroad companies owning the capital stock of the Terminal Railroad Association.

VII.

The complainant assigns as error the failure and refusal of the Circuit Court to enjoin the defendants, the Missouri, Kansas & Texas Railroad Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railroad Company, the Illinois Central Railroad Company, the St. Louis, Iron Mountain & Southern Railway Company, the Chicago, Burlington & Quincy Railway Company, the St. Louis, Vandalia & Terre Haute Railroad Company, the Wabash Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railroad Company, the Louisville & Nashville Railroad Company, the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, their stockholders, officers, directors, executive committees, agents, and servants, from voting or in any way acting as the owner of any of the shares of the capital stock of the Terminal Railroad Association of St. Louis, of the Wiggins Ferry Company, and of the St. Louis Merchants Bridge Terminal Railway Company; and to enjoin the Terminal Railroad Association of St. Louis, its stockholders, officers, agents and servants, from in any manner recognizing or accepting the defendants hereinbefore in this assignment specified, as the owners or holders of any share or shares of its capital stock, and from allowing such specified de-

fendants to vote such stock, and from paying any dividends upon such stock to said defendants.

VIII.

The complainant assigns as error the failure and refusal of the Circuit Court to enjoin the defendant, the Terminal Railroad Association of St. Louis, and the said named railroad companies who own its capital stock as set out in the bill of complaint, their stockholders, officers, directors, agents and servants, from voting, controlling, or acting as the owner or owners of any of the shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, the shares of the capital stock of the St. Louis Merchants Bridge Company, the shares of the capital stock of the Wiggins Ferry Company, the shares of capital stock of the Madison, Illinois & St. Louis Railway Company, the shares of capital stock of the St. Louis Transfer Railway Company, the shares of capital stock of the Wiggins Car Transfer Company, the shares of capital stock of the St. Louis Terminal Railway Company, the shares of capital stock of the Granite City & Madison Belt Railway Company, and the shares of capital stock of the East St. Louis Connecting Railway Company, and to enjoin said last named companies from recognizing or accepting the said Terminal Rail road Association of St. Louis, and the fourteen defendant railroad companies described in the bill of complaint as the owners of the capital stock of the Terminal Railroad Association of St. Louis, as the owners or holders of any of the shares of their respective capital stocks.

In order that the foregoing assignments of error

may be and appear of record, the complainant presents the same to the Court and respectfully prays that such disposition be made thereof as is in accordance with law and the statutes of the United States in such case made and provided.

CHARLES A. HOUTS,

United States Attorney for the Eastern District of Missouri.

Solicitors for Complainant, the United States of America.

(Endorsed): Filed Aug. 1, 1910, James R. Gray, clerk.

An appeal in proper time and manner was allowed to this Court.

The testimony disclosed that, of the railroads named in the petition, The Chicago & Alton, Baltimore & Ohio, Illinois Central, Cleveland, Cincinnati, Chicago & St. Louis, Louisville & Nashville, Chicago, Rock Island & Pacific, had and have their termini at points in Illinois east of the eastern shore of the Mississippi River.

The tracks and rails of the above mentioned eight railroads do not now and never have touched the east bank of the Mississippi River.

Between the termini of the said roads and the east bank of the Mississippi River lies the property which formerly belonged to the Wiggins Ferry Company, and which is covered by tracks **connecting with all of the Eastern Railroads.**

The Missouri, Kansas & Texas, and the Missouri Pacific, and the Wabash, and the Iron Mountain, and Southern, the Chicago, Burlington & Quincy, and St. Louis & San Francisco Railroads have their termini in Missouri.

It is proven that the railroad companies named and their subsidiary corporations comprise all but two of the main lines of railroads handling interstate commerce moving to or from St. Louis, Mo.; and that said railroad companies own and control on either side of the Mississippi River thousands of miles of railway, extending from the Atlantic Coast and the Great Lakes and Canada to St. Louis, Mo., and from St. Louis, Mo., to the Gulf on the south, and to the Pacific Ocean and the Rio Grande River on the west and southwest.

In the language of the President of one of the defendant companies, Julius S. Walsh, found in Vol. 9, p. 3346. "These companies [referring to the defendant railroad companies] control **over 50,000 miles of railroad,** or more than 25 per cent of the total mileage of the United States."

The haul of freight and passengers from the termini in Illinois of the Eastern roads into the City of St. Louis, Missouri, and to a connection with the rails of the roads from the west having their termini in St. Louis, Missouri, was **a carriage of interstate commerce performed by a separate carrier, for which a separate charge was and is made.**

No freight from the east or foreign countries

could be shipped and **billed to St. Louis, Missouri,** but it was all shipped and **billed to East St. Louis,** Granite City or Madison, Illinois. No freight could be billed **from St. Louis, Missouri, to pass over roads leading east to the Atlantic Coast, north to the Great Lakes or south to the Gulf. No St. Louis bill of lading was issued on this eastern business. St. Louis was not on the railroad map.** All freight rates were made to East St. Louis, Illinois.

The eight Eastern defendant railroads having their termini in Illinois and the six defendant railroads having their termini in Missouri have combined under one control and monopolized all the agencies and instruments used to move interstate commerce from all States of the Republic and foreign countries which is required to be moved between the termini of the roads in Missouri and Illinois, and which is required to be moved across the Mississippi River at St. Louis, Missouri.

This instrument of interstate commerce so used by the defendants to restrain, control and monopolize the movement of interstate commerce is known as "The Terminal Railroad Association of St. Louis," and is named as one of the defendants in this action.

The Terminal Railroad Association performs this independent interstate movement of commerce with its own engines, cars and employes.

The Terminal Railroad Association publishes and files with the Interstate Commerce Commission a regular classified Freight and Railroad Tariff, and collects the rates therein stated, for a haul between the termini of the Eastern roads in Illinois and the Western roads in Missouri. It also operated on its own account, over the bridges and ferries across the Mississippi River, freight and passenger trains.

As will be seen on page 1724 Vol. 4 of the Record, The Terminal Railroad Association maintained a **separate** and independent switching charge schedule, which was entirely **separated from the charge for the haul between the cities located in Missouri and Illinois.**

The **entire capital stock** of the Terminal Railroad Association is owned in equal parts by the fourteen railroads who are co-defendants with it herein. Each of the fourteen railroad companies, co-defendants of the Terminal Railroad Association, own and hold 2056 of the 28,820 issued shares of the authorized capital stock of $50,000,000 of the Terminal Railroad Association of St. Louis. The 36 remaining outstanding shares are held by officers and agents of the co-defendants herein of the Terminal Railroad Association, for the purpose of qualifying said officers and agents to act as Directors of said company, and Inspectors of Election.

The Terminal Railroad Association is controlled entirely by its co-defendants. The officers and agents of the fourteen railroad companies, co-defendants with the Terminal Railroad Association herein, are the officers and officials **actually and actively in charge of and operating the Terminal Railroad Association.**

The co-defendants of the Terminal Railroad Association each name one of their officials to act as a Director of the Terminal Railroad Association. Each railroad names a Director in accordance with the contract of Oct. 1st, 1889, which provided for and caused the organization of Dft. Terminal Railroad Association. This contract provided how the Directors should be named. The fourteen railroads name all the Directors and Officers, and operate under their joint control the properties of the Terminal Railroad Association.

The Terminal Railroad Association is a "dummy corporation."

THE DEFENDANTS AND THEIR PREDECESSORS, IN ACCORDANCE WITH A WRITTEN CONTRACT, ORGANIZED THE DEFENDANT TERMINAL RAILROAD ASSOCIATION FOR THE PURPOSE OF UNREASONABLY RESTRAINING INTERSTATE COMMERCE AND CREATING A MONOPOLY THEREOF AT ST. LOUIS, MO.

The Terminal Railroad Association of St. Louis was organized for the purpose of and has been used to unreasonably restrain and monopolize commerce.

This is clearly shown by the contract between Jay Gould, of New York City, and six of the defendant railroads, in which Gould agreed to organize the Terminal Railroad Association of St. Louis by consolidating corporations he controlled operating railroads in Missouri and Illinois, and controlling the Eads Bridge over the Mississippi River at St. Louis and the tunnel used in connection with it, to move interstate commerce at St. Louis, and in which said contract Gould agreed to convey to each of the seven roads one-seventh of the seven millions of dollars of stock of the Terminal Railroad Association of St. Louis when organized, **whenever** each of said companies should sign **a written agreement with** the Terminal Association containing the following clause, binding them **to forever use for interstate commerce** the properties Gould should convey to the Terminal Association of St. Louis, to-wit:

"Each of the proprietary companies hereby covenant and agree that it will forever make use of **the bridge and terminal properties of the first party, as above described** [referring to the Terminal Railroad Association] **for all freight and passenger traffic within its control, through, to and from St. Louis and destined to cross the Mississippi River at St. Louis, and pay therefor as herein provided.**" Vol. 8 of Exhibits, p. 1861.

See agreement of organization of Terminal Railroad Association of St. Louis, Vol. 8, pages 1849 to 1853.

This clause restrained commerce handled by the seven railroads **for all time to the particular instruments** used for the movement of interstate traffic at St. Louis by the Terminal Railroad Association.

The same clause practically was written into the Guaranty Agreement of 1902, when the Wiggins Ferry Company was bought and the eight additional lines became the property of the Terminal Railroad. See Ehibits, Vol. 8, page 1868.

These two contracts each prohibited the admission of new members except **by unanimous consent.**

These contracts show clearly **the intent and purpose** in creating the Terminal Railroad Association to be to control and **restrain and monopolize interstate commerce** at St. Louis, Mo. These contracts were **not in aid of, but in restraint of, interstate commerce.**

The movements of those in control of the various agencies of interstate commerce at St. Louis, and the gradual process by which, slowly but surely, all were consolidated, is clearly shown in the following history as shown by the testimony of these common carriers, and justifies the statement made above, that the Ter-

minal Railroad Association of St. Louis was **organized to restrain interstate commerce.**

WIGGINS FERRY COMPANY.

From the time anterior to the erection of the bridges across the Mississippi River, a company then and now known as the Wiggins Ferry Company owned the land on the river front on the Illinois shore for a distance of about three miles opposite the center of the business district of St. Louis, Missouri. This land, several hundred acres in extent, lies between the termini in Illinois of the eight Eastern railroads above mentioned and the Mississippi River and extends to the river front, and on said land the Wiggins Ferry Company built and operated a railroad called the East St. Louis Connecting Railway with 25 or 30 miles of track and directly touching with its rails the termini of all the Eastern roads.

The Wiggins Ferry Company was a common carrier engaged in interstate commerce business and operating car transfer ferries across the Mississippi River and railroad lines in both Illinois and Missouri. The Wiggins company connected with all the railroads in Missouri and Illinois and moved interstate traffic between the termini of roads in Illinois and Missouri.

EADS BRIDGE.

A bridge known as the "Eads Bridge" was built at St. Louis by the Illinois and St. Louis Bridge Company and was opened for operation July 4th, 1874 (Exhibits, Vol. V, p. 3332) and was built as an independent instrument of interstate commerce.

The bridge has its western approach at the foot of Washington avenue in St. Louis, Missouri, and its eastern terminus in East St. Louis, Illinois. It is a double deck bridge and has a double track standard gauge railroad on its lower or first part, and immediately over the said railroad tracks is a wagonway, sidewalk for pedestrians and a double track electric street railway line. The wagonway, pedestrian walk and street railway at the western approach are reached by the street surface of Washington avenue. The railroad tracks are reached from the west by a tunnel (built and owned by an independent company known as the St. Louis Tunnel Railroad Company) extending under the surface of Washington avenue and leading to the southwest under the business district of the city for a distance of almost a mile and emerging into the Mill Creek Valley at Clark avenue near Twelfth street, Exhibits, Vol. V, p. 3327.

The "Eads Bridge" owned no railroad connecting with the lines of road terminating either in Missouri or Illinois, but was built and operated as an independent instrument of interstate commerce. Prior to the erection of the Eads Bridge, the "Wiggins Ferry" owned and operated car transfer boats across the river and railroad tracks on both sides of the river. The roads terminating in Illinois and Missouri having no proprietary or other interest in the "Eads Bridge," and having direct rail connection in Illinois and Missouri with the tracks of the Wiggins Ferry Company, used the Wggins car transfer boats to conduct the interstate commerce passing through the St. Louis gateway.

The "Eads Bridge" Company defaulted in payment of the interest on its bonds, and in 1879 passed under

foreclosure proceedings to the St. Louis Bridge Company, which now owns it. The St. Louis Tunnel Railroad Company, defaulting in the payment of interest on its bonds, also passed under foreclosure proceedings in 1878 to the Tunnel Railroad Company of St. Louis, which company now owns the tunnel property. Exhibits, Vol. 19 p. 3328.

TUNNEL RAILROAD.

The St. Louis Tunnel Railroad Company was organized in 1872 to construct a railroad through the tunnel from the western terminus of the "Eads Bridge" to a connection with the Missouri Pacific, or any other railroad. Exhibits, Vol. 19 p. 3327.

UNION RAILWAY AND TRANSIT CO.

In April, 1874, two independent railroad companies were organized in Missouri and Illinois and designated respectively the "Union Railway and Transit Company of St. Louis," and the "Union Railway and Transit Company of Illinois," and these companies proceeded to build railroads in Missouri and Illinois with the object of making connection, by rail, by means of the Eads Bridge, between the eastern railroads terminating in Illinois and the western roads terminating in Missouri, but these two corporations were not owned by, but were independent of, the railroads terminating in either State and were also independent of the Eads Bridge.

POOLING AGREEMENT BETWEEN TERMINAL RAILROAD ASSOCIATION AND THE WIGGINS FERRY COMPANY.

The Terminal Railroad Association and the Wiggins Ferry Company being engaged in the same business in the same territory formed a combination and agreed on certain fixed rates to be charged for the interstate haul between the eastern roads in Illinois and roads in St. Louis, Missouri. Record, Vol. 2, pp. 84-85.

Regular statements of the joint earnings were kept by the carriers of the pool. Record, Vol. 2 pp. 103-117.

MERCHANTS BRIDGE.

This state of affairs existed at the time when we find that ex-Governor David R. Francis headed a movement of the merchants of St. Louis and demanded that relief be given from the situation; this will be seen in the testimony of Governor Francis, Vol. 2 of the Record, pages 34 to 69. Governor Francis, the Merchants Exchange and the business men generally of the City of St. Louis banded together and appealed to Congress for a franchise to erect a bridge over the Mississippi River, which was granted, **and it was erected as a competing instrument of interstate commerce.** Governor Francis says on page 35 of Vol. 2, of the Record, that one of the reasons why this relief was sought was because the people of St. Louis objected to the expense of the haul from St. Louis to the termini at East St. Louis, thinking it too great and feeling that it should be reduced. There was inserted in the Charter of this

Merchants Bridge by Congress of the United States at the request of the merchants of the City of St. Louis the provision that no person who was a **stockholder,** director or manager in any other bridge over the Mississippi River should be a stockholder, director or manager of the Merchants Bridge. The specific clause was as follows, and will be found in

Vol. 19 of Exhibits, page 3170:

> "Section 11. That whereas, a principal reason for giving authority to build a bridge herein contemplated is to secure reasonable rates and tolls for corporations and individuals, for passing over the same, the St. Louis Merchants Bridge Company, or its successors or assigns, shall not agree or consent to the consolidation of this bridge with any other bridge across the Mississippi River, or to the pooling of the earnings of this bridge company with the earnings of any other bridge company on said river. Nor shall any person who is or may be **a stockholder or director or manager** of any other bridge over said river be a stockholder or director or manager of the bridge herein provided for; **provided,** that if this provision of this act shall at any time be violated in any of these particulars, such violation shall, without legal proceedings, at once forfeit the privilege hereby granted, and such bridge shall become the property of the United States, and the Secretary of War shall take possession of the same in the name and for the use of the United States."

On pages 39 and 40 of Vol. 2 of the Record, Governor Francis testified that the reason for having this clause inserted **was to prevent the bridge from being**

purchased by the same people who owned the Eads Bridge, and that the object of the Merchants Bridge was to maintain it as an independent structure across **the river, to operate independent transportation facilities at St. Louis, and that competition was what the St. Louis merchants desired and they wanted the haul made from the termini of the road from East St. Louis to St. Louis without extra cost.**

This Act of Congress was amended September 1st, 1888, before the bridge was completed, by striking out certain words, so that the amended section permitted an acquisition of the ownership of the Merchants Bridge by persons interested in other bridges across the Mississippi River.

This was done to permit the sale of the bridge stock and thus transfer the control of it to some other Bridge Company or its stockholders, to acquire control of the Merchants Bridge.

Governor Francis, in Vol. 2 pages 40, 41 and 43 of the Record, testifies that it was **not until 1893 that** he discovered that this amendment had been made to the charter of the Merchants Bridge, although the Governor was Chairman of the Finance Committee of this corporation. This admission of Governor Francis, which is undisputed, shows **that the fact of the amendment was not known generally to the people of St. Louis.** The Merchants Bridge was completed and opened in 1890 and operated between St. Louis, Missouri, and Venice, Illinois. The Merchants Bridge owned a franchise to operate a railway between Venice, Illinois, and the Union Depot in St. Louis. Vol. 2 of Record, p. 36.

Wiggins Company, Terminal Company and Merchants Terminal Company Pool.

After the Merchants Bridge and Terminal Railway was completed, rates for the interstate haul between the termini in Illinois of the Eastern roads and St. Louis, Missouri, were **cut b ythe Merchants Company.** See Record, Vol. 2 page 86.

This rate cutting was followed by **an agreement** between the three companies, the Merchants Company, the Wiggins Company and the Terminal Company, for **a divison of the earnings** of the three roads **on a tonnage** basis, for the traffic carried between **the termini of the Eastern railroads in Illinois and St. Louis, Mo.** This will be shown by the testimony of the President of the Wiggins Company in Record, Vol. 2 page 86; also by the testimony of the man who had charge of the records of the pool. Record, Vol. 2 pages 112 to 122, and 86, 180, 181, 183.

On pages 3103 and 3104, Vol. 9 of the ~~Record~~ Exhibits will be found exhibits showing the statement of joint earnings, as kept by the Commissioner of the Pool.

These pooling agreements are offered in evidence and referred to for the purpose of showing the object and intent of the persons and corporations in forming and operating the Terminal Railroad Association.

These pooling agreements are an aid in discovering the intent and purpose in combining under one control all of the instruments of interstate commerce used in moving freight and passengers between the termini of the eastern railroads in Illinois and St. Louis, Mo.

St. Louis Merchants Bridge Terminal Railway Company.

Before the Merchants Bridge had been opened, on August 28th, 1887, the St. Louis Merchants Bridge Terminal Railway Company had been organized to operate a railroad over and from the Merchants Bridge to a connection with railroads in Missouri and Illinois. This company finally built the present elevated railroad structure along the river front in St. Louis, Missouri.

LEASE OF MERCHANTS BRIDGE.

On February 1st, 1889, the Merchants Bridge Company leased the bridge to the Merchants Bridge Terminal Railway Company, the lessee agreeing to pay as rental the interest on $2,000,000 of six per cent bonds of the Bridge Company. This lease was canceled August 1st, 1893, and a new lease exactly similar was made to the Madison, Illinois and St. Louis Railway, which corporation was organized to and did construct a railroad from the east end of the Merchants Bridge in Illinois to Granite City, Illinois. Exhibits, Vol. X9 pp. 3333-3334-3335.

An agreement was made whereby the Missouri, Kansas & Texas, and the Chicago, Burlington & Quincy railroads used the elevated structure before referred to, in order to get into the Union Station.

TERMINAL COMPANY ACQUIRES CONTROL OF MERCHANTS COMPANY.

On August 17th, 1893, an agreement was made between the Terminal Railroad Association and the Mer-

chants Bridge Terminal Railway Company whereby the Terminal Association acquired $438,400 of the capital stock of the Merchants Company, giving it with what it already owned a majority of the capital stock of the Merchants Bridge Terminal Railway Company. As the Merchants Terminal Railway Company controlled the stock of the Merchants Bridge, so this gave the Terminal Railroad Association the control of both the "Eads" and the "Merchants" Bridges. Exhibits, Vol. 8, page 3332.

The Merchants' Bridge Terminal Railway Company owned all the stock of the Merchants Bridge Company and of the railroad reaching the east end of the Merchants Bridge, namely, the Madison, Illinois and St. Louis Railway Company.

The Madison, Illinois and St. Louis Railway connected the east approach of the Merchants Bridge with the East St. Louis Belt Railroad and roads entering East St. Louis from the north.

On September 1st, 1890, for the purpose of making connection with the Eads Bridge in Illinois, the Merchants Bridge Terminal Railway leased in Illinois the Venice and Carondelet Belt Railroad.

These connections in Illinois gave the Merchants Bridge access to all the eastern roads.

GUARANTY CONTRACT OF 1902, IN DIRECT RESTRAINT OF INTERSTATE COMMERCE.

In the process of combining under the control of the Terminal Railroad Association the various interstate agencies of commerce that had been independent, contracts were made from time to time intended to aid in eliminating competition. One of these contracts, known

as the "Guaranty Contract," found at p. 1868, Vol. 8 of the Exhibits, prohibits **the admission of new companies except by unanimous consent** of all the proprietary roads.

ROCK ISLAND'S FIGHT TO GET INTO ST. LOUIS AND SALE OF WIGGINS FERRY COMPANY.

In 1902 the Rock Island road wanted to enter St. Louis from the east. To do so it tried to buy the Wiggins property. The Wiggins Company then owned three miles of the river front in Illinois opposite St. Louis, Missouri, and which land lay between the termini of the eastern roads and the river.

When the Terminal Railroad Association found the Rock Island was trying to buy the stock of the Wiggins Ferry Company, the Terminal Association sent its banker and brokers to get control at any price of the majority of the Wiggins Ferry Company stock. The result was, Wiggins shares, worth really about $300.00 each, were sold for as high as fifteen hundred dollars per share.

The purchase was made to prevent a **so valuable property from falling into the hands of a competitor.** The usual result followed., i. e., the Rock Island and the Terminal Association got together and arranged for the Rock Island to be admitted to the Terminal Association, and the Wiggins property was transferred to the Terminal Company and an additional issue of Terminal Association bonds was put forth and sold, and the Rock Island and the Terminal Company were repaid with the proceeds of said sale the seven millions of dollars that had jointly been expended by the two companies while the Terminal was trying to keep the

Rock Island out of St. Louis and the Rock Island was trying to get into St. Louis.

Bonds of the Terminal Association to the extent of fifty millions of dollars have been authorized, and twenty-eight millions of dollars have been issued. This twenty-eight million has paid for all the property of the company and made all the improvements thereon.

Another clause of the same contract made in 1889 (and agreed to by the Rock Island in the contract of December, 1902), admitting said last named road to the Terminal Railroad Association, bound all the roads **to forever** make use of the Terminal Railroad Association properties for all passenger and freight traffic within their control on their fifty thousand miles of road, destined **through, to and from St. Louis,** Missouri, and destined to cross the Mississippi River at St. Louis, and pay therefor as therein provided. Exhibits, Vol. 8, p. 1861.

RESULT OF COMPLETE MONOPOLY BY FOURTEEN RAILROADS OF INSTRUMENTS OF INTERSTATE COMMERCE AT ST. LOUIS.

The result of this combination of the instruments of interstate commerce under the control of the Terminal Railroad Association was that the fourteen proprietary lines acting jointly through their dummy company, the Terminal Railroad Association, fixed the freight rates to East St. Louis, Granite City and Madison, Illinois, and the City of St. Louis, Missouri, and collected through the Terminal Railroad Association a specific rate and charge for the interstate traffic between points last above named and the City of S. Louis, Missouri, and compelled the people and the business interests of

St. Louis, Missouri, to pay the original cost of and the operating expenses of the Terminal Railroad Association in addition to the usual and ordinary freight charges.

The practical result of this has been to drive manufacturers away from St. Louis and many have dismantled their plants in St. Louis and moved into Illinois and cities in that state have had their growth stimulated at the expense of St. Louis. Granite City, Madison and East St. Louis, Illinois, owe practically all their population and business and, in fact, existence, to the combination and monopoly of the agencies of interstate commerce controlled by the fourteen roads with its resulting discrimination against St. Louis, Missouri. Fourth Municipal Bridge and Terminal Report, pages 4, 5 and 8.

To make the burden more onerous to St. Louis people and shippers, a charge for the haul between the termini of the eastern roads in Illinois and the City of St. Louis, Missouri, or the termini of the western roads in St. Louis, Missouri, was not imposed directly upon any shipper or receiver of freight passing through St. Louis either way and destined to points one hundred miles beyond St. Louis. But freight originating in St. Louis and destined to points east of St. Louis had to be shipped over the Terminal Association's property or hauled to East St. Louis, Granite City or Madison, Illinois, and then reshipped to the point of destination.

All railroad rates from the Atlantic seacoast were based upon Chicago, and a rate was never made to St. Louis, Missouri, but to East St. Louis, Illinois. This was the end of the haul of the eastern roads. The East St. Louis, Illinois, rate was made by taking the

rate from New York to Chicago as a basis and then it was figured that sixteen per cent of the amount charged for the haul from Chicago to New York should be added to the rate from New York to Chicago, and this would be **the New York to East St. Louis rate.** The Terminal Association then charged its published rate, according to its classified freight traffic for the haul from East St. Louis, Granite City or Madison, Illinois, to St. Louis, Missouri.

On all **through business coming from the east** the railroads extending west from St. Louis, Missouri, absorbed the charge for the haul from Illinois to the termini of the western roads in Missouri.

The result of this practice has been to create in Illinois a difference in freight rates greatly in favor of the towns on that side of the river as compared with any suburban or similarly situated towns near any other city in the country, a difference amounting on general merchandise to four cents per hundred weight (that being the cost of crossing the river both ways), and this advantage being over the City of St. Louis. The practical result of this policy has been to stimulate the growth of East St. Louis and other Illinois cities at the expense of St. Louis, Missouri, to such an extent that it has greatly crippled the development of St. Louis, especially along manufacturing lines. The fact is, that the cities in the State of Illinois have all of the transportation facilities that the City of St. Louis has, and many advantages that the latter does not have. (Fourth Municipal Bridge and Terminal Report, pp. 4, 5 and 8.)

After this action was instituted a commission was appointed by the City Government of St. Louis, Missouri, called the "Municipal Bridge and Terminal Com-

mission," with the avowed object of securing some relief for St. Louis from the railroads. This Commission appointed Mr. Perkins as a Railroad Traffic Expert to advise it. The defense put him on the stand as their witness and his testimony will be found bound separately in Volume 4 of the Record. This expert railroad traffic witness for the defense admitted on pages 2794-95, Volume 4 of the Record, **that the monopoly of the Terminal Railroad Association of interstate business restrained the interstate traffic and injured** the business interests of St. Louis, Missouri, and gave cities in Illinois an advantage over St. Louis, Missouri, in the manufacturing business.

The record teems with demonstrations of still further injurious and direct influences of the combination upon interstate commerce.

Thus upon Coal Traffic. The largest deposits of soft coal in the Mississippi Valley are in Illinois within a short distance of St. Louis, Missouri. The largest item of freight from the East coming into St. Louis, Missouri, is soft coal, amounting in 1907 to eight millions of tons. All of the eastern roads are coal carrying roads. For many years the rate on soft coal from the mines within a distance of from 25 to 40 miles was 25 cents per ton to East St. Louis, Illinois; then the coal was delivered to the Terminal Railroad Association and it charged for a haul across the river 30 cents per ton, the two rates making 55 cents per ton freight rate to St. Louis for soft coal, as against 25-cent rate for the same article to East St. Louis, Granite City and Madison, Illinois. This drove manufacturers into Illinois. Later the Wabash road forced a reduction of the haul across the river to 20 cents per ton. Record, Vol. 4, page 2471.

But to make up for this reduced charge of 10 cents per ton across the river, the proprietary lines in the Terminal Association increased the rate from the coal mines to East St. Louis, Illinois, from 25 cents to 40 cents per ton. Record, page 2929. And later 2 cents per ton more, page 2930, was added, making instead of a reduction on coal from the Illinois mines to St. Louis, an increase of 17 cents per ton.

"COAL POOL."

Many years ago the St. Louis Coal Pool was formed by the railroads. After the decision in the Joint Traffic Assocation case the name was changed to the St. Louis Coal Traffic Bureau, as it is now called. Its sole object was to suspend competition between the railroads in coal rates from the Illinois coal fields, most of which are in a very short distance from St. Louis, Missouri, to the St. Louis market. The association had a secretary, whose name is R. M. Frazer. It held its meetings in St. Louis, Missouri. This association was composed of representatives of each of the coal carrying roads and the Tunnel Association. All of the proprietary lines in the Terminal Association were members of the Coal Traffic Bureau. When a rate had been agreed on a circular called "An Information Circular" would be issued and sent to all the railroads. This circular contained the rates to be charged from all the Illinois coal mines to East St. Louis, Illinois. If a road cut the rate, a meeting was called and usually the roads were powerful enough to force a return to the agreed rate. The average coal car will now carry about forty tons. Twenty cents per ton freight over the river makes $8.00 per car for the transfer charge. This Coal

Traffic Bureau kept an accurate account of all shipments of coal by each road, and issued to its members statements of the same, and in general kept a supervision over the coal traffic into St. Louis from the Illinois coal fields.

Delays. The evidence shows that goods from Chicago, Illinois, would be delivered to towns in Illinois only 50 to 75 miles from St. Louis, Missouri, 24 to 48 hours sooner than goods of the same character ordered at the same time from St. Louis, Missouri. Record, Vol. 2, p. 295. These delays caused the St. Louis merchants and manufacturers to haul their goods by wagon to the State of Illinois, and deliver them to the Eastern roads. Record, Vol. 2, pp. 224-225.

The lack of facilities of the monopoly caused delays.

Dividends and Interest Paid by the Terminal Railroad Association. The testimony shows that the fourteen proprietary companies are using the Terminal Railroad Association as a dummy company, through which to operate an instrument and agency of interstate commerce. They have not invested a dollar in the Terminal Railroad Association, either in the States of Illinois or Missouri, and do not pay any of the expense of maintaining the agencies of interstate commerce in the two States; but by reason of the control of the stock of the Terminal Railroad Association, and the fixing of freight rates for interstate commerce between Illinois and Missouri, at St. Louis, Missouri, and East St. Louis, Illinois, have caused the public to pay all of the expense of maintaining and operating these properties. In addition thereto, dividends on stock and interest on bonds, amounting to $1,100,000 in the primary consolidated corporation, and also interest on

twenty-eight millions of bonds issued by the Terminal Association have been paid, and are now being paid, and improvements in the property are also made with the earnings of the property controlled by the fourteen companies through the agency of the Terminal Railroad Association.

THE ARBITRARY.

The charges made by The Terminal Railroad Association for hauling freight in general from St. Louis, Missouri, to the termini of the Eastern roads in Illinois and from the termini of the Eastern roads in Illinois to St. Louis, was about two cents per hundred pounds each way. The haul was simply across the river. The charge fixed was an **arbitrary** one, varied on different classes of freight. This charge is what is known as "The Arbitrary."

No freight from the east or foreign countries could be shipped **and billed to St. Louis, Missouri**, but it was all shipped **and billed to East St. Louis, Granite City or Madison, Ill.**

No freight could be billed **from St. Louis** to pass over roads **leading east to the Atlantic coast, north to the lakes or south to the Gulf. No St. Louis Bill of Lading was issued on this eastern business.**

If goods were shipped from **East St. Louis, Ill., or points East of Mississippi River to points west of St. Louis, no charge for the haul from East St. Louis, or points East of the Mississippi River, was made; but if goods were shipped to the same points from St. Louis westward, the same rate had to be paid as though it had been shipped from East St. Louis**—in other words, no charge for the use of the properties of the Terminal Railroad Association crossing the river and mak-

ing the haul from the termini of the **eastern** roads in Illinois to **the termini** of the western roads in **Missouri** was made for shipments originating in East St. Louis and points beyond East St. Louis, and destined to **points west of St. Louis.** But if shipments originated in St. Louis, Missouri, bound eastward, or originated on the Atlantic seacoast or in Europe or the Great Lakes, and were destined to St. Louis, Missouri, **they could only be billed to East St. Louis, Granite City or Madison, Ill.**

No Bill of Lading could be issued to St. Louis, Mo. When the goods got to East St. Louis, Granite City or Madison, Illinois, **they were re-billed to St. Louis and an independent charge was made for the interstate haul between East St. Louis, Granite City or Madison, Ill., and St. Louis, Mo.**

The result of this **has been to drive factories** from **St. Louis to East St. Louis to such an extent** as to injure the growth of St. Louis, Mo., along the manufacturing lines.

The situation as set forth in the preliminary report of the Bridge & Terminals Commission (copies of which are filed as part of the record in this case) at pages 4 and 5 is as follows:

"The City of St. Louis has for many years been struggling to free itself from what is known as the bridge arbitrary * * * the transportation companies have fixed a rate from East St. Louis and compel the business interests of this city **to pay the costs and operating expenses of the Terminal Railroad Association by means of this bridge arbitrary** * * * to make the burden more onerous for St. Louis shippers, the bridge charge is **not imposed directly** on the receiver of freight **outside of the City of St. Louis**, in the

State of Missouri, when such merchandise passes over the Terminal * * * the result of this practice has been to give shippers on **the east side of the river a difference very greatly in their favor,** as compared with that of any St. Louis shipper, the difference amounting on general merchandise to 4c per 100 lbs., that being the cost of crossing the river both ways, **the disadvantage being all to the City of St. Louis.** At the same time the City of East St. Louis is given all facilities without any bridge expense whatever, the west side roads assuming the cost of transfer in car-loads (and less than car-loads over the St. Louis Transfer Co.) from East St. Louis to points **west** of St. Louis, and whichever direction the freight may go from St. Louis, **either east or west,** East St. Louis is **given the advantage of the bridge charges.** The result of this policy has been to stimulate manufacturing in East St. Louis at the expense of this city to such an extent as to greatly hinder the growth of this city along manufacturing lines."

EFFECT OF COMPETITION ON CHARGES OF RAILROADS.

There was one exception, however, to this matter, so far as freight rates are concerned, and that is what is known as **the Green Line teritory,** being that territory lying **south of the Ohio River, east of the Carolinas and Georgia and extending south to the Gulf.** At Memphis, Tennessee, a railroad bridge was built and freight was allowed to pass over it without any extra charge, the bridge being used as part of the main line of the road, as it should be. Railroads running from St. Louis, Mo., down to a point where a

connection could be made with the tracks crossing the bridge at Memphis on the west bank of the Mississippi River caused Eastern lines extending Southeastwardly **from East St. Louis, Illinois, to ship from St. Louis, Mo., to that Green Line territory free of extra charges for haul from St. Louis, Mo., to East St. Louis, Ill., owing to this competition of the Memphis bridge.** In other words, if a shipment made from St. Louis, Missouri, going forty miles from St. Louis, in Illinois, the arbitrary charge of two cents per hundred pounds for haul from St. Louis, Mo., to the termini of the Southeastern roads would be made. But if the shipment was made from St. Louis, Mo., over the **same** line to a point near Memphis, Tenn., or to Memphis, or beyond Memphis, **no charge would be made for the haul from St. Louis, Mo., to the termini of the Eastern or Southeastern road that carried the shipment.**

WHY THE TERMINAL RAILROAD ABSORBED ITS COMPETITOR.

Fight of Rock Island Railroad to secure entrance into St. Louis and for Control of Wiggins Co.

In 1902 the Rock Island road attempted to buy control of the Wiggins Company. The Wiggins Company then owned tracks in Illinois reaching **every eastern** railroad and connecting with the ferries of the Wiggins Company. It also had a track on the levee in St. Louis, Mo., for almost the entire distance of the city front on the river.

The Wiggins Company had connection with **every railroad in Missouri and Illinois carrying St. Louis traffic. It had better facilities for handling business in**

Missouri and Illinois than the Terminal Railroad Association possessed.

This was shown by the testimony of a traffic expert placed on the stand by **the defendants.**

This witness testified the Wiggins had more **complete** connection with the individual roads than the Terminal Association had. That the connection of the Wiggins in both states was more **direct and complete** than the connection of the Terminal Association. See Record, pages 2746 and 2747.

Mr. Ramsey, President of the Wabash road, (one of the owners of the Terminal Association) testified when he learned the Rock Island wanted to enter St. Louis and was buying Wiggins stock that he told Mr. Gould, President of Missouri Pacific and Iron Mountain Railroads, (both part owners of the Terminal Association) that the Gould lines could well afford to purchase the Wiggins to **prevent such a valuable property from passing into the control of a competitor.** Record, page 249.

Mr. Gould then sent a telegram to Mr. Walsh, at St. Louis, Mo., Chairman of the Board of Directors of the Terminal Railroad Association, directing him to buy the control of the Wiggins Company; and a fight for control opened, and the stock, which had never sold for more than $300 per share, sold as high as $1500 per share.

The result was a drawn battle, control of the stock being claimed by both the Rock Island and Terminal Company, and was finally settled by an agreement by which the Rock Island road became a member of the Terminal Association, and the stock bought by the Rock Island and the Terminal was all divided up equally between the Rock Island and the other thir-

teen roads owning the Terminal Association; and then the usual railroad financial operation was performed, and the bond indebtedness of the Terminal Association was increased and seven millions of dollars of bonds sold, and the seven millions of dollars was paid to the Rock Island and the other roads to reimburse them for money expended for stock in the contest for control of the Wiggins property.

The new mortgage of December, 1902, of the Terminal, covered the Wiggins Ferry property as well as the Terminal property. The fourteen railroads now owned the stock of the Wiggins Company and had been reimbursed from the sale of bonds for the outlay of money for the Wiggins stock, and the only competitor of the Terminal Association passed into its control, and is operated, and has been since 1902, as a part of the Terminal Association by the fourteen railroads.

These facts appear from the testimony of Mr. Walsh, Chairman of the Board of Directors of the Terminal Association, and Mr. Vinnedge, its Auditor. Record, Vol. 4 pages 2282, 2283 and 2273, and Vol. 2 480, 481 and Vol. 4 2421 to 2445.

But before the Rock Island was admitted to membership, and after fight for control of Wiggins Company, the Southern, the Illinois Central, Burlington and M. K. & T. also agreed to join the Terminal Association, and all the roads signed what is known as "The Guaranty Agreement of 1902."

Control of Conlogue Road Secured by Terminal Railroad Association.

Prior to 1902, the Pennsylvania Company had built a road known as the "Conlogue" road, extending

southward from a connection with the railroads in Illinois to a point on the Illinois side of the Mississippi River, where connection was made with a car transfer ferry in South St. Louis operated by the Missouri Pacific Railway Company. Over this line several hundred freight cars were sent daily by ferry by the Pennsylvania Railroad across the Mississippi River. This haul was made at the rate of $2.00 per car. This was about one-third of what the Terminal charged for the same haul.

Mr. Walsh testified the Terminal bought the "Conlogue" road, six miles in length, and paid $1,250,000 cash for it from the proceeds of the sale of bonds authorized and issued after the Wiggins Company passed into the hands of the Terminal Company. Record, pages 500, 501 and 2282.

The record shows the "Conlogue" quit delivering cars to the ferry in South St. Louis, and the ferry ceased to operate in 1902 or 1903. Record, page 2323.

GUARANTY AGREEMENT.

The Guaranty Agreement of 1902 in express words **restrained forever the movement of all commerce crossing the Mississippi at St. Louis and handled by the fourteen railroads, to the use of the properties of the Terminal Railroad Association.**

This agreement will be found in Record, pages 1930, 1939.

On Record, page 1936 will be found the specific provision referred to. It is as follows:

"(a) The proprietary Companies **will forever make use of the properties of the Terminal Association** granted under said agreement of October 1, 1889, for

all passenger and freight traffic **within their control through, to and from St. Louis and destined to cross the Mississippi River at St. Louis.''**

This agreement undertakes **to perpetuate** for all time by express contract the arbitrary charge for the interstate haul between the termini of the Eastern roads in Illinois and St. Louis, Mo.

In express terms, it is a contract **restraining forever the movement of all traffic through, to and from St. Louis, Mo., over the fifty thousand miles of railroad of the fourteen companies to the use of a particular and specified instrument of interstate commerce,** i. e. **the properties of the Terminal Association.** It **excludes** the use of all other instruments of interstate commerce **forever.** It is **a complete monopoly.**

The old pool agreement was followed by the purchase of stock of competitors, and now the competitors and the owners of the fourteen railroads contract that, not only the business to or from St. Louis, Mo., but **all business originating anywhere on** their lines and **passing** through St. Louis shall **forever use** the **properties** of the Terminal Association.

There are 40 million of people tributary in a traffic sense to their railroads and all their present and future interstate commerce is restrained by this agreement.

TRAFFIC ASSOCIATION.

The railroads have, for the purpose of traffic, divided the Republic into different territories, and each is under the jurisdiction of a Traffic Association.

Each Association has a Chairman and Secretary, and maintains an office, and the railroads pay the expenses.

The object and purpose of these Associations is to fix and maintain freight and passenger rates.

The "Central Traffic Association," with offices in Chicago, has charge of territory extending from the Ohio River on the South, to the Great Lakes on the North, thence to a point westward in the State of Iowa, and around the lakes eastward to Pittsburg, and southward to the Ohio River.

Under the direction of the "Central Traffic Association" the railroads, including those owning the Terminal Association and the Terminal Railroad, came together at St. Louis and formed the Eastbound Freight Committee, for the purpose of maintaining freight rates fixed by the Central Traffic Association.

The East-Bound Freight Committee deal with interstate feright rates.

All these Traffic Associations are clearly in violation of the Sherman Antitrust Act under the decision in the Trans-Missouri case and the Joint Traffic Association case.

But the membership of the fourteen railroads and of the Terminal Association itself in these traffic organizations to fix interstate rates is referred to for the purpose of showing that the Terminal Railroad Association is used as an instrument of interstate commerce by its owners, and is looked on by them as a carrier of interstate traffic, and not merely as an aid to interstate commerce. In these Traffic Asosciations it agrees to, and does, maintain certain fixed interstate rates for freight. This shows the intent and the purpose, and the use to which this combination of railroads known as the Terminal Association of St. Louis, puts the property of said Association, and it proves conclu-

sively that the combination is used **to maintain** a monopoly **of interstate commerce** at St. Louis, Mo.

The character of these Traffic Associations and their control is shown completely by the Coal Traffic Asosciation. Record, pages 702, 751.

And of the Louisville-Cincinnati Traffic Association in Record, pages 815, 882.

BRIEF.

UPON THE UNDISPUTED EVIDENCE—THE ESTABLISHED FACTS,—THE COMPLAINANT SHOULD HAVE A DECREE.

The record shows a plain violation by the defendants of the **Act of July 2nd, 1890—"An Act to protect trade and commerce against unlawful restraints and monopolies."**

Familiar as the Judges are with the provisions of the statute, the counsel for complainant, at the outset, apologize for intruding upon the Judges suggestions and propositions which may justly be considered by the Judges as wanting in novelty as are household words.

Counsel however submit:

1. Every contract, combination in the form of trust or otherwise, or conspiracy, in undue restraint of trade or commerce among the several States or foreign nations, is illegal.

Act July 2nd, 1890, Section 1.

2. Monopolizing, or attempting, combining or conspiring to monopolize interstate or foreign trade or commerce is illegal.

Act July 2nd, 1890, Section 2.

CERTAIN FUNDAMENTAL CONSIDERATIONS CONTROL.

1. The statute is aimed at restrictions upon

interstate commerce. Given a reasonable construction as it must receive, its purpose is to permit commerce between the States and with foreign nations to flow in their natural channels "unrestricted by any combinations, contracts, conspiracies, or monopolies whatsoever."

Hopkins v. United States, 171 U. S. 586;
Loewe v. Lawlor, 208 U. S. 274.

2. Combinations between competing railroads engaged in interstate commerce to unduly restrain commerce and combinations between **media** or instruments of interstate commerce fall within the prohibition of the Act.

United States v. Trans-Missouri Freight Association, 166 U. S. 319;
United States v. Joint Traffic Association, 171 U. S. 505;
Addyston Pipe, Etc. Co. v. United States, 175 U. S. 244;
Northern Securities v. United States, 193 U. S. 197;
Anderson v. United States, 171 U. S. 604;

Standard Oil v. United States Advance Sheets; opinions of United States Supreme Court, p. 516, No. 12, date June 15th, 1911.

4. To monopolize interstate commerce or the media, or instruments of interstate commerce is to secure, or adopt measures which may bring about an exclusive **control** of such commerce or of such instruments of commerce so as **to prevent others**

from engaging therein, or using such instruments of commerce.

In re **Green**, 52 Fed. 115;

Northern Securities Co. v. United States, 193 U. S. 197, 402;

United States v. American Tobacco Co., 164 Fed. 700.

United States v. Knight, 156 U. S. R., p. 1.

5. It is not necessary to bring a combination within the Act, that the result of its operation shall be complete restraint or monopoly, or that it shall have resulted in actual injury to the public. It is sufficient if it really tends to that end and to deprive the public of the advantages which flow from free competition.

United States v. Chesapeake, Etc., Fuel Co., 115 Fed. 610;

United States v. E. C. Knight Co., 156 U. S. 16;

Northern Securities Co. v. United States, 193 U. S. 197;

Chattanooga, Etc. Works v. Atlanta, supra.

6. **The Terminal Association** is necessarily engaged in interstate commerce.

United States v. Union Stock Yards, 161 Fed. 919;

United States v. Colorado, Etc. R. R., 157 Fed. 321;

United States v. R. P. T. Co., 144 Fed. 861.

THE CASE AT HAND AND IN CHRONOLOGICAL SEQUENCE.

1. **The Wiggins Ferry Company**, chartered by the State of Illinois. Before the day of railroads operating a steam ferry between "Bloody Island", Illinois, and the City of St. Louis, Missouri. After the advent of railroads, in time, transferring cars, carrying freight and passengers from the eastern termini of railroads to St. Louis or to railroads operating westward, or north or south from St. Louis, these railroads, however, never reaching the eastern bank of the river with tracks of their own.

At no time, either at the beginning or at the end of its connection with interstate commerce as an independent medium, was it a part of a terminal system for railroads, but on the contrary at all times it was an independent, and as time went on, a competing medium or instrument of interstate commerce. When bought by the defendants, it had upon both sides of the river a complete system of its own, which was not terminal in any sense, but which was an adequate, competitive and substantial instrumentality of interstate commerce.

2. The **St. Louis bridge—known as the "Eads Bridge."**

Originally the creation of both Illinois and Missouri in the year 1874, and employed independently for **purposes of interstate commerce,** competing with the **Wiggins Ferry Company** and in no sense a part of a system of terminals. It did not connect with the rails of any railroad.

In 1878, then being operated by the **Union Rail-**

way and Transit Company and the Terminal Railroad of St. Louis under a lease, it was acquired by the **St. Louis Bridge Company**, a Missouri corporation, and continued to be operated as theretofore under the lease until 1880 when the **Union Railway and Transit Company and the Terminal Railroad Company** were consolidated under the name of the present defendant "**The Terminal Railroad Association of St. Louis**," which secured a new lease of the bridge properties, under which it proceeded to operate them, and under which it now operates them.

The **Union Railway and Transit Company and the Terminal Railroad** owned and operated railroads so connected as to form a continuous line over the "Eads Bridge" and they were being operated as an instrument of interstate commerce in competition with the **Wiggins Ferry Company**, when the consolidated defendant was created. Consolidated defendant composed of two railroad corporations and necessarily itself a railroad corporation, consolidated into "**one railroad company.**"

At the creation of the consolidated company its capital stock was $7,000,000 owned by **seven** of the "**proprietary companies**" defendants herein. Subsequently this capital was increased to $50,000,000, divided into 50,000 shares of the par value of one hundred dollars each, and by contracts made after August 17th, 1893, **28,820** shares were bought by **fourteen "proprietary companies"** now defendants herein.

The Guaranty Agreement.

December 16th, 1902, the fourteen "proprietary"

defendants made with each other and the **Terminal Railroad Association** an agreement entitled "**Guarantee Agreement**" wherein it was recited that at the instance of the "**proprietary companies**" (so designated), the **Terminal Association** was about to issue bonds limited in extent of issue to $50,000,000 and to secure such bonds by a mortgage upon **all** of its properties. It was **agreed** that the rates of toll for the use of properties of the **Terminal Association** should be fixed from time to time by the Association so as to pay certain designated charges.

The "proprietary companies" agreed to **forever** use the properties of the Terminal Association for "**all passenger and freight traffic within their control through, to and from St. Louis and destined to cross the Mississippi River at St. Louis.** The tariff rates were agreed to be so fixed as to **insure** the production of **sufficient revenue at all times** to enable the Terminal Association to punctually meet and discharge the **fixed charges specified in the guaranty agreement.**

Reference being had to an earlier agreement—October 1st, 1889—with **five** of the "proprietary companies" whereby they agreed with "each other and with such other companies as might be admitted as proprietary lines" to the joint use of the properties of the Association, the agreement recited the admission of the remaining "proprietary companies" and thus evidenced a complete and exclusive control by the "proprietary companies" now parties defendant.

GUARANTY AGREEMENT MADE IN 1902 BY FOURTEEN DEFENDANT RAILROADS, RESTRAINING INTERSTATE COMMERCE FOREVER TO PROPERTIES OF TERMINAL RAILROAD ASSOCIATION.

This Guaranty Agreement provided (Exhibits, Vol. 8, p. 1936) "The proprietary companies will forever make use of the properties of the Terminal Association granted under said agreement of October 1st, 1889, for all passenger and freight traffic within their control, through, to and from St. Louis and destined to cross the Mississippi River at St. Louis."

The 1902 agreement expressly refers to and recognizes the agreement of October 1st, 1889. Exhibits, Vol. 8, pp. 1931 and 1932.

Directors and officers of Terminal Association were named and determined in advance by the agreement of October 1st, 1889, and the Exhibit "A" attached said agreement.

Exhibits, Vol. 8, p. 1850, 7th clause, Agreement and Exhibit, Vol. 8, p. 1861, 3rd clause "A", and first paragraph of clause 4 of Exhibit "A" attached as part of the Agreement of October 1st, 1889. In the Guaranty Agreement of 1902, railroads were compelled to insert clause restraining commerce to Terminal properties because the agreement of October 1st, 1889, made the right to the possession and control of the stock of the Terminal Association dependent upon the defendant railroad companies signing the agreement **to forever use** the Terminal properties for interstate commerce.

Exhibits, Vol. 8, sixth clause of agreement of 1889; Exhibits, Vol. 8, pp. 1849 and 1850.

Fourteenth clause of Exhibit "A" attached to said agreement of October 1st, 1889, Exhibits, Vol. 8, p. 1867.

The Agreement of October 1st, 1889, prohibited the transfer of stock of the Terminal Railroad Association to anyone except railroad companies signing the agreement **to forever** use the Terminal properties for interstate commerce.

Sixth clause of Agreement of 1889, Exhibits, Vol. 8, pp. 1849 and 1850.

The railroads were prohibited by the agreement of October 1st, 1889, from assigning any right acquired under the said contract.

First paragraph of Exhibit "A", Exhibits, Vol. 8, p. 1860.

The Guaranty Agreement of 1902 recognized and continued the obligation of the Agreement of October 1st, 1889, prohibiting transfer of any right acquired under the last named contract.

Exhibts, Vol. 8, p. 1932.

By the consolidation which created the defendant, "**The Terminal Railroad Association,**" the St. Louis Bridge, The Terminal Railroad, The Union Railway and Transit Company, The Terminal Railroad of St. Louis, The Terminal Railroad of East St. Louis were brought under one control, together with all of their railroad tracks, branches and switches—so the defendant thus acquired a complete instrument and medium of interstate commerce, which it proceeded to operate and was operating (under its ownership by the "proprietary companies"), when its subsequent acquisition of

all competing instrumentalities took place. The railroads—"proprietary companies"—controlled over 50,000 miles of track and twenty-five per cent of the mileage of the country.

This medium of interstate commerce was so operated in competition with the Wiggins Ferry Company, likewise a medium of interstate commerce.

3. **The St. Louis Merchants Bridge Company, known as the "Merchants Bridge."**

Organized May 11th, 1886, under laws of Illinois. Authorized by Act of Congress to construct railway bridge across Mississippi between Illinois and Missouri. Act prohibited any **person who was a stockholder in any other bridge corporation from becoming a stockholder therein.**

Built bridge—opened 1890.

St. Louis Merchants Bridge Terminal Company, organized August 18th, 1887, under laws of Missouri. Constructed railroad over "Merchants Bridge" from Illinois shore to Union Station, St. Louis. Prior to August 17th, 1893, had secured control of **Madison, Illinois & St. Louis Terminal Railway, East St. Louis Terminal Railway, Illinois Transfer Railway Company, Granite City and Madison Belt Railway Company, St. Louis Belt and Terminal Railway Company and St. Louis Merchants Bridge,** going concerns and constituting a competitive system of interstate commerce operating continuous lines of railroad tracks, over the "Merchants Bridge," from St. Louis to points in Illinois with eastern connections, branches, switches, freight stations and depots, so as to enable it to

conduct interstate and international commerce across the Mississippi between Illinois and Missouri.

RESUME OF CONDITIONS, THUS EXISTING, AS OF AUGUST 17, 1893.

1. TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS operating railroad for interstate commerce over **St. Louis Bridge.**

2. MERCHANTS BRIDGE TERMINAL RAILWAY operating railroad for interstate commerce over **Merchants Bridge.**

3. **These railroads parallel and competitive.**

4. WIGGINS FERRY COMPANY competitively operating ferry and transfer boats for interstate commerce through connecting terminal railroad, and switches which were its own property.

UNLAWFUL COMBINATION EFFECTED.

AUGUST 17TH, 1893, Missouri Pacific, L. & N., C. C. C. & St. L., O. & M., Wabash, St. Louis Bridge Terminal R. R., Terminal R. R. St. Louis Union Railway & Tr., Terminal R. R., East St. Louis, Merchants Bridge Terminal, Merchants Bridge, E. St. L. & C. R. R., Illinois Transfer, G. C & M. Belt R. R., St. L. B. & T. R. R. and St. Louis Terminal Railway combined with defendant "Terminal Association" to put properties of the **Eads Bridge,** the **Merchants Bridge** and the **Wiggins Ferry,** under control of the **Terminal Railroad As-**

sociation of St. Louis, defendant herein as aforesaid.

1. **Merchants Bridge Terminal Railway** granted to **Terminal Railroad Association** perpetual use of tracks, switches and terminal facilities of **Merchants Bridge**. Terminal Association guaranteed $3,500,000 bonds and bought 4,384 shares stock of Merchants Bridge—the Act of Congress prohibiting such purchase, in some mysterious manner, having been **amended** in this respect.

2. **Terminal Association** acquired control of **St. Louis Terminal Railway.**

3. Pooling arrangement which had existed between **Wiggins Ferry Company, St. Louis Terminal Railroad Association** and **Merchants Bridge** was continued in force between **Terminal Association** and **Wiggins Ferry Company**.

4. Terminal Association acquired 13,416 additional shares in **Merchants Bridge Terminal,** thus acquiring control and thereafter controlling and operating said **Merchants Bridge Terminal.**

5. M. K. & T., C. & A., St. L. & Fr., B. & O. S. W., I. C., Southern, C. B. & Q., St. L. V. & T. H., C. R. I. & P. became stockholders of Terminal Association, thus constituting an ownership by the fourteen "proprietary companies." **Guarantee agreement theretofore executed created complete monopoly of use of Association's properties.**

6. **Terminal Association** obtained control of Wiggins Ferry Company because of Rock Island roads endeavor to obtain independent entry into St. Louis

across the Mississippi; 9,500 shares of total of 10,000 deposited with **Central Trust Company** to be voted for the **fourteen roads** owning stock of Terminal Association. This stock acquired as hereafter shown, **at utterly** extravagant prices in reality to defeat an effort by the "Rock Island" to secure an independent entry into St. Louis.

RESUME AND CONSEQUENCE.

By virtue combination **August 17, 1893, Terminal Association** owned by **fourteen defendant railroads,** owns, operates and controls, arbitrarily fixes rates and stifles competition in interstate commerce over:

1. **St. Louis Bridge,** tracks and terminals.
2. **Merchants Bridge,** tracks and terminals.
3. **Wiggins Ferry Co.,** tracks and terminals.

ALL PARALLEL AND THERETOFORE COMPETITIVE VEHICLES OF INTERSTATE COMMERCE. **By their acquisition and exclusive control, not only was an opportunity to monopolize afforded, but a monoply was actually created.**

DETRIMENTAL CONSEQUENCES RESULTING FROM MONOPOLY.

1. **Delays in transit and delivery were and are caused by the combination.**

Complainant affords voluminous evidence showing necessity for use of their own teams by merchants and manufacturers of St. Louis, in transfering their goods across the river at St. Louis. This

because of delays caused by the Terminal Association. Use of teams necessitated in order to compete with jobbers of other cities.

Contrast clearly shown between time of deliveries from St. Louis to points near at hand and deliveries from Chicago to same points.

Overwhelming mass of testimony showing constant delays in movement of goods across the river, of from one day to ten days, caused by the operations of the Terminal Association.

Abundant evidence adduced to show excessive freight charges made possible by combination.

2. **Favoritism shown to St. Louis Transfer Company** by "proprietary companies."

Complainant adduces abundant evidence of discrimination in favor of **St. Louis Transfer Company**, a corporation engaged in hauling goods across the river to and from railroads terminating on "Bloody Island". It hauls some 400,000 pounds of freight per annum. **The railroads "proprietary" defendants allow the St. Louis Transfer Company a "differential" of two cents per one hundred pounds over any other transfer company hauling goods to East St. Louis. The Wiggins Ferry Company, since 1881 has allowed the Transfer Company a rate 17% lower than to ordinary teams.** Wiggins Ferry owned by combination as heretofore demonstrated.

3. **Advantages to be afforded by independent freight stations in St. Louis for Eastern railroads.**

Complainant adduces evidence showing that effect of consolidating media of transit across the river is to impede delivery of freight.

4. **One consequence of consolidation—deprivation of St. Louis of adequate freight facilities for its commerce across the Mississippi River.**

Upon this point evidence clear and conclusive. The total track room of the Terminal Association in St. Louis is practically the same as it was ten years before this suit was brought. The combination could have acquired abundant facilities had it been disposed to expend the necessary amount of money therefor. Shown to have had over $28,000,000, it devoted nothing to improving its facilities for hauling freight in St. Louis. It paid over $725.00 per share for **Wiggins Ferry** stock to stifle a competing concern. It bought the **Conlogue** road, which was six miles long but owned neither locomotive nor flat cars, but which was a competing concern. It paid $620,274.25 for the **Interstate Car Transfer Company,** another competing concern, worth $225,000.

As soon as the Terminal Association had bought up all of its competitors it raised its rates of transfer from 100 to 375% regardless of the effect upon St. Louis consumers and even forcing manufacturers to leave the city. It paid $21,250,000 for the **"Conlogue"** road and abandoned it rather than permit competition over the **Carondelet Ferry,** which had been receiving **62½ cents** per car for transferring as against **eight dollars** per car over the St. Louis Bridge.

5. **The effect of the consolidation upon freight rates, bridge and ferry charges and the business interests of St. Louis.**

A Filing of tariffs and establishment of transfer rates.

The **Merchants Terminal Railway Company**, The **Terminal Railroad Association** and the **Wiggin's Ferry Company** filed tariffs of freight charges with the Interstate Commerce Commission.

The Interstate Car and Transfer Company—owned by the defendant, Terminal Association—also filed tariffs.

The **Terminal Association** also joined the **St. Louis Association** of General Passenger and Ticket Agents.

Upon the completion of the **Merchants Bridge** and its operation there was a sharp competition for business and rates of transfer across the "**Eads Bridge**", the "**Wiggins Ferry**" and the "**Merchants Bridge**", were **reduced.** This was followed by an agreement between the three concerns and rates were **restored.** A pooling agreement was made between the three companies. Upon the consolidation, this matter of transfer rates became fixed at an onerous figure and came to be known as the **Bridge Arbitrary.**

The "**proprietary companies**" fixed a freight rate to East St. Louis and compelled St. Louis shippers and receivers of freight crossing the river to pay the cost and expenses of the Terminal Association—thus known as the "**Bridge Arbitrary**".

The bridge charge did not fall directly upon any shipper or receiver of freight outside of the limits of St. Louis, where the freight passed over

the consolidated bridges and ferries. The railroads on the west side of the river, **on all business passing through St. Louis,** absorbed this bridge arbitrary and it was not paid by the consignees.

The result of the system thus brought about by the consolidation of bridges and ferries doing interstate commerce, into one medium under a single ownership (that of the "proprietary companies") was to create for the East side a very great difference in its favor over St. Louis. IN WHATEVER DIRECTION FREIGHT MIGHT GO FROM ST. LOUIS, EITHER EAST OR WEST, EAST ST. LOUIS WAS GIVEN THE ADVANTAGE OF THE CONSOLIDATED CHARGES—THE "BRIDGE ARBITRARY".

The City of East St. Louis enjoyed all transportation advantages without expense to that city, but altogether to the disadvantage of St. Louis. To the extent of the arbitrary differentials in rates caused by the system the merchants doing business in St. Louis was handicapped, as compared with the East St. Louis merchant, or a merchant at other large distributing centers where rates were based on East St. Louis. **The established fact, upon the record is, that the condition was repellant to new-comers AND BECAME NOTORIOUS THROUGHOUT THE UNITED STATES AS A CONDITION ADVERSE TO THE PROSPERITY OF ST. LOUIS.**

B. Coal Traffic.

More than sixty per cent of the seven million tons of coal, which came to St. Louis during the year 1907, came from a territory which lay within a radius of twenty miles eastward from East St. Louis. Within a radius of ten miles farther eastward, ten per cent more came. All of the railroads terminating in East St. Louis are coal-hauling roads. The percentages indicated had obtained for a long period prior to the year named.

All of the railroads, defendants herein, together with a few roads which are not defendants, and which brought coal only to East St. Louis, created a "**Coal Traffic Bureau**" composed of representatives of the various members. This bureau became operative about 1885, and its control over rates on coal became peculiarly effective after the consolidation. The bureau fixed the rate on coal to East St. Louis, fixed the rate on coal shipped to points in Missouri other than St. Louis, required of its members maintenance of rates as fixed by the bureau, vigorously held members to such rates, and in every way strove to preserve the monopoly.

The record shows the maintenance of a through rate to St. Louis from Illinois coal fields of from forty to sixty cents per ton. Of this a "bridge arbitrary" of 20 cents per ton was charged by the defendant Terminal Association. This was fixed and unvarying, no matter how the rate of the coal bureau may have changed from time to time.

This burden upon the commerce of St. Louis in a branch of the most formidable importance, led to the removal from St. Louis of many manufacturing establishments and their location in the neighborhood of East St. Louis; to the creation and location of many new concerns in the same locality, which would otherwise have been located in St. Louis.

All railroads, defendant herein, all known as "trunk lines" and have organized **"Freight Committees"** of which the "trunk lines" are members.

C. Freight Rates.

1. **"Central Traffic Territory."**

Beginning at the western limit of what is known as "The Trunk Line Territory," which is an imaginary line between Buffalo and Pittsburg, a territory extends westward to a line running up the Mississippi and Illinois rivers from St. Louis to Chicago, which is known as the **"Central Traffic Territory."** In this territory exists the **"St. Louis East Bound Freight Committee,"** composed of the following roads: B. & O., C. & A., C. P. & St. L., C. C. C. & St. L., I. C., H. & St. L., C. & E., Vandalia, Wabash, Southern and The Terminal Railroad Association.

2. **The Southern Freight Association.**

The territory of this Association lies from St. Louis South of the Ohio River to Paducah and then follows the Southern line of Kentucky and

Virginia to the Atlantic ocean. The Association is composed of I. & M., M. & O., I. C., L. & N. Southern and St. Louis Transfer Co.

3. **Belleville and St. Louis Traffic Bureau.**

Covering freight between St. Louis, Missouri, and Belleville, Illinois, is the "**Belleville and St. Louis Traffic Bureau,**" composed of the I. C. R. R., L. E. & St. L., I. C., and L. & N. R. R.

4. **The St. Louis, Cincinnati and Louisville Freight Committee.**

The committee has "jurisdiction" over all traffic handled between Cincinnati and Cincinnati points, Louisville and Louisville points, and East St. Louis and East St. Louis points. proper; Pacific Coast traffic handled through East St. Louis; traffic between Cincinnati and Louisville and Arkansas, Texas, certain territories and the Republic of Mexico; all traffic between Cincinnati and Louisville or their "points," and East St. Louis where the roads get their full published individual rates.

The railroads composing this committee are B. & O. S. W., C. C. C. & St. L., P. C. C. & St. L., L. H. & St. L., Southern, Vandalia.

The "**proprietary companies**" having agreed to route their freight over the "Terminal Association" properties **forever,** the record teems with instances of the injurious features of the monopoly created by the bridge and ferry consolidation.

Rates are fixed by the Committee for interstate traffic and adherence to them rigidly insisted upon.

Members obligate themselves to not issue individual tariffs and agree that no tariff shall be promulgated except by the Committee or bureau.

Vigilant supervision is exercised to prevent departure from promulgated rates.

Anything like a benefit to shippers by reason of a member not having adhered to the fixed rate is strenuously opposed.

Applications for reduced rates proceeding from shippers are bluntly rejected.

A permanent Committee is appointed to consider "**all questions of violations of tariff rates**".

Rates are readily increased—rarely lowered.

East-bound freight committee members each agree to "absolutely maintain all authorized published tariff rates on freight originating at East St. Louis or St. Louis and all business delivered to them by connecting lines at St. Louis or East St. Louis, originating beyond.

Careful scrutiny of members' business shows failure to maintain rates on the part of some, which is deprecated by the Committee. Reports as to "views on the situation" which show some **irregularities** but generally **improved** conditions received with marked favor.

"**Impressions**" seem to prevail among members that there can be no good reason why the "**authorized**" rate on cotton both domestic and export should not be maintained. The "Clover Leaf" was, however, shown to be unsound on

rates on packing house products and provisions from Missouri River.

As illustrating the **animus** of the situation created by the monopoly, at noon, Oct. 1, 1901. **"as to traffic to the western termini"**)trunk lines) **"and points east thereof"**, each road agreed that it would **absolutely** maintain the agreed rates and thirty minutes thereafter, **"as to Central Freight Association traffic"** each road agreed that it would just as **absolutely** so maintain the tariff of the last named association.

By **authorized tariffs** are meant tariffs created and imposed by the freight bureaus or committees. It is tariffs of this description which the members pledge themselves to maintain. It is such tariffs which the bureaus or committees from time to time refuse to change, although shippers apply for the change on the ground that the tariff as imposed is injurious to such shippers.

Tariffs of freight carriage having thus been arbitrarily fixed and inflexibly maintained, the **necessity** of having the Terminal Assoication a member of the freight bureaus at once becomes obvious. If any feature were needed to prove the nefarious character of the combination which unlawfully merged all of the competing carriers and media of interstate commerce at St. Louis into one concern, this feature of traffic bureaus and their tariffs would suffice for the demonstration.

DEFENDANTS, BY CONTRACT IN 1889, AGREED TO AND DID ORGANIZE DEFENDANT TERMINAL RAIROAD ASSOCIATION TO RESTRAIN COMMERCE.

The complainant charges that the defendant railroad companies, by contract and combination, have unduly restrained commerce between Missouri and Illinois and the other states of the republic and foreign countries; that the defendants, by combination and contract and conspiracy, have created a monopoly and prevented competition in the movement of interstate commerce between Missouri and Illinois and all other states and foreign countries by combining under one control all the instruments used to carry on said commerce at St. Louis; that the defendant railroad companies organized the deefndant The Terminal Railroad Association of St. Louis with the intent and for the purpose of unduly and unreasonably forever restraining and monopolizing the movement of interstate commerce between the termini of the eight Eeastern Railroads in Illinois and the six Western railways in Missouri.

The complainant charges that the contract between Jay Gould and six of defendant companies, of October 1st, 1889, and which contract is still in force between defendant railroads, which **provided for and caused the organization** of the defendant, The Terminal Railroad Association of St. Louis, contained a **clause that then was and now is in direct and undue restraint of interstate commerce. The clause referred to is as follows:**

"In consideration of the foregoing each of the proprietary companies, for itself only and not for others,

accepts the right of joint use hereinbefore granted by the first party (The Terminal Railroad Association of St. Louis was the first party), and hereby covenants and agrees **that it will forever make use of the bridge and terminal properties of the first party as above described, for all passenger and freight traffic within its control, through, to and from St. Louis and destined to cross the Mississippi River at St. Louis, and pay therefor as herein provided.**"

This contract with this clause was made between The Terminal Railroad Association and six of the railroad companies now defendants herein, in pursuance of a contract of even date therewith, made between Jay Gould, of New York City, as one party, and the six defendants hereinabove mentioned; and in which said contract between Gould and the said railroads it was provided that Gould should organize by consolidation of corporations he owned, the defendant The Terminal Railroad Association of St. Louis, and that the other six defendant companies should then execute an agreement with the Terminal Association mentioned in the Gould contract as Exhibit "A", which said contract of said six defendant railroads should bind **them to forever use for the movement of interstate commerce the instruments thereof, at St. Louis, which Gould should consolidate and place in the control of the Terminal Railroad Association.** This agreement between Gould and the six railroad companies will be found in Vol. 8, of Exhibits, pp. 1846 to 1853. The reference to the agreement which was to be and was made between the six railroad companies and the Terminal Railroad Association will be found in Paragraph Six of the contract between Gould and the roads, in Vol. 8 of the Exhibits, and on p. 1850.

The agreement between the six defendant roads and the Terminal Railroad Association referred to in the above mentioned Gould contract as Exhibit "A" will be found in Exhibit, Vol. 8, pp. 1859 to 1869.

The particular clause above set out, binding the six roads to the use of the Terminal properties forever, will be found in paragraph 3 of the contract between the Terminal Railroad Association and the six roads, in Vol. 8 of Exhibits, p. 1861.

When your Honors examine first, the consolidation agreement of 1889, and the later agreement of 1902, which reaffirmed that of 1889 (these agreements will be found at pp. 1840 and 1930, Vol. 8 of Exhibits), you will find that each and every one of these proprietary lines, with their more than 50,000 miles of rails, running from the lakes on the north to the gulf on the south, and to either coast on the east and west, bound themselves **forevermore that whatever freight passes through the St. Louis gateway, no matter where it originates on their line shall pass over these instruments of interstate commerce in controversy here now.**

Not only that, but they bound themselves by that agreement forevermore **to pay charges sufficient** to meet all of the bonded indebtedness, and to pay the dividends on the **preferred stock that these primary companies had out, keep up the operating expenses and produce a fund sufficient to meet any annual loss from time to time as the years went on, and provide funds for all needed improvements and sinking fund to pay the principal when it is due.**

Now this contract of 1902, is a contract, an agreement, that is clearly in restraint of commerce.

If there were a dozen independent agencies aside from these controlled by the Terminal Railway Asso-

ciation, carrying on commerec between the termini of the roads in Missouri and the roads in Illinois, if a shipment of goods originates in Texas or on the Pacific Coast, on one of the lines of one of these railway companies, and it was routed through the City of St. Louis, when it got to the City of St. Louis it would have to pass over one of these mediums of commerce controlled by this Terminal Association, and pay the charges agreed upon in this contract. **Competition is eliminated.** Restraint of commerce is established and freedom of commerce is destroyed by this contract of 1902. Otherwise that contract would be violated.

Can it be said that that is not in violation of the anti-trust act which says that this commerce should be allowed to **flow free and unrestrained?** It certainly is; there is no way to evade that proposition—no way to get around it. **It is a direct restraint.** It shuts off for evermore rfom all the millions of people that now, or that may hereafter be on either side of the Mississippi River that are using or will have to use the railroads of the defendant companies in all the years to come, from any relief from the situation, because that contract is one in perpetuity, and it shuts them off from competition in this carriage between Missouri and Illinois, at this great gateway.

Now, I ask is that freedom of commerce? Is that in consonance with the spirit of the Federal Anti-trust Law that this Republic has passed?

It certainly is not. And yet the gentleman says that this Terminal Association is one of the things which will hel pto build up the City of St. Louis.

And the argument is made that the Government has nothing to do with the internal economy that relates to the operation of these railroads; that if thehy can save

money, they can do as they please with reference to the instruments that they use. The logic of this argument is that if the consolidation is **economical** to its owners, the law is not violated even **if competition is eliminated.**

Now I do not so understand the law. They say that it does not concern the shipper. I ask your Honors to test the soundness of this proposition. Who pays the money that keeps up these railroads? Who pays the money that goes to buy coal and pay wages of employes and keep up repairs? Who maintains these bridges and these ferries? It is the traveling public, isn't it? Why, certainly. Then, are they not interested in the proposition of whether or not there is any reasonable competition in these instruments of commerce? **The public interest is affected the moment competition is eliminated and prevented.**

The clause of the agreement of October 1st, 1889, above set out, shows clearly that it was intended that all the comerce passing **through St. Louis, Mo., should be moved by one particular instrument of commerce,** to-wit: The Terminal Railroad Association.

This made the contract clearly one in undue restraint of commerce and, being yet operative, it violates the Sherman Act.

> Addystone Pipe and Steel Co. vs. United States, 175 M. S. R., p. 2111.
> Northern Securities Co. vs. United States, Loc. Cit., pp. 389-390.

This contract was between the railroads—strangers to each other's business; * * * in some instances competitors and in some instances not competitors;

and it was also made for benefit of the persons who took the bonds, J. P. Morgan and others.

This was **a true contract in restraint of trade** and commerce.

This clause, for the perpetual use of the properties of the Terminal Railroad Association by the fourteen co-defendant railroads herein, in the movement of interstate commrc, was placed in the Guaranty Agreement of the railroad companies, made in 1902, and will be found in Vol. 8 of the Ezhibits, p. 1936.

This contract of October 1st, 1889, was recognized and continued in force by the Guaranty Agreement of December, 1902.

Both the contracts of October 1st, 1889, and of December, 1902, were contracts made by the respective common carriers with strangers to their business, and being with a stranger to the business of the contracting parties, and controlling the movement of all interstate commerce handled by the defendant railroads at St. Louis, it created a monopoly in traffic and affected public interest, and violated the Anti-Trust Law.

United States vs. Joint Traffic Association, 171 M. S. R., p. 505.
Northern Securities Co. vs. United States, 193 M. S. R. Loc Cit., p. 405.

Every movement of all the officials of the defendant roads throughout the years that have intervened point conclusively to one intent and purpose, and that was and is to compel all interstate movement of commerce at St. Louis to pass over the property of the Terminal Railroad Association, in pursuance of the directions contained in, and the agreements made in, the contract of October 1st, 1889.

The iron hand of restraint on commerce, laid with full force on traffic by that agreement of 1889, has been and yet is reaching out and forcing the movement of commerce over the rails Gould dictated it should move upon.

The combination effected put all the agencies capable of being used to move passengers and freight between the termini of the Eastern roads in Illinois and St. Louis, Mo., in control of The Terminal Railroad Association, and **excluded all competition.**

The plain purpose of the contract of 1889 and 1902 was to control unreasonably commerce; and the presumption of an intent to monopolize and restrain trade arising from the increase of the stock of the Terminal Railroad Association from Five to Fifty Millions of Dollars, and vesting in said Terminal Association such complete control of all the agencies of interstate commerce at St. Louis, Mo., is rendering conclusive by considering—

First:—The conduct of the persons or corporations who were instrumental in increasing the power and control over commerce of the Terminal Railroad Association before the completion of that result, i. e., prior to the combination by the fourteen railroads of the control of the agencies of interstate commerce, and prior to the formation of the Pools and the creation of the Trust Agreements.

We find the citizens built a bridge and opened it for the use of the railways in 1874. That the Eastern railroads terminating in Illinois refused to build tracks and connect with the bridge approach, but continued to use the Wiggins Ferry tracks and car ferry transfer across the river.

The persons who built the bridge (mainly St. Louis citizens) then built railroads in Illinois and in Mis-

souri, connecting the approach so that the connections could be made by the carriers by rail in both states.

These companies were known as the "Union Railway & Transit Company of St. L ouis" and the "Union Railway & Transit Company of Illinois."

There was also a tunnel built by The Tunnel Railroad Co., extending westward under St. Louis, Mo., from the "Eads" Bridge.

The Eastern railroads with their termini in Illinois refused to use the "Eads" Bridge and its connections.

The Bridge Company and the Tunnel Company defaulted in payment of interest and principal on bonded indebtedness, and passed by foreclosure proceedings to two new corporations known as The Tunnel Railroad of St. Louis and the St. Louis Bridge Co.

These companies leased the bridge and tunnel to the Wabash and Missouri Pacific Railway Companies.

These companies, in 1889, after the organization of the Terminal Railroad Association, transferred the control of the stock of the Bridge and Tunnel Companies to the Terminal Railroad Association, in pursuance of the contract of 1889.

After the bridge and tunnel had passed into the control of the corporation, Gould organized, in accordance with his contract with the six defendant railroads companies herein, we find The Terminal Railroad Association and the Wiggins Ferry Company, a competitor of the Terminal Railroad Association, forming a pool on the interstate business between Missouri and Illinois.

The unification of power and control begun by the contract of Gould, of Oct. 1st, 1889, over the instruments used to transport persons and property between the termini of the Eastern Railroads in Illinois and St. Louis, Mo., and the transfer of The Terminal Rail-

road Association of St. Louis and to the fourteen railroads of the stock of all the competing interstate carriers, aggregating so vast a capital and such complete ownership and control of all the agencies by which interstate commerce was carried on, in the absence of testimony to the contrary, gives rise to the presumption of intent and purpose to maintain a dominioncy over the interstate commerce in question by means of a combination of control and operation of said instruments of commerce, not as a result of ordinary transportation development, but by means of a combination of said instruments so that greater power would be added than would otherwise have arisen, and with the purpose **of excluding others from this commerce, and thus fixing in the combination a perpetual control of the said business.**

Standard Oil Co. v. United States Advance Sheets, Vol. 12, date June 15th, 1911, opinions United States Supreme Court, p. 520.

This presumption of intent to restrain and monopolize commerce is [redacted] further strengthened by considering the conduct of Gould and the six railroad companies defendants herein, in making the agreement of Octobr 1st, 1889, forever restraining all movement of interstate business at St. Louis to one particular instrument of commerce, to-wit: The properties of The Terminal Railroad Association; and what has been done by the defendant railroads in excluding here and there and everywhere all competition, until at last the defendants control all the agencies that are used as common carriers to move interstate traffic between Missouri and Illinois.

By examining the Pooling Agreements and Tonnage Pools made by the Terminal Railroad Association, first,

with its only competitor, the Wiggins Company, and, second, with its second competitor, the Merchants Company, and by examining the record showing the acquisition, first, of the Merchants Terminal Company, then the Wigfgins and "Conlogue" Companies, and finally the Interstate Car Company, which, together comprised every efficient means by which competition could have been arrested,—all these facts prove clearly **intent** to **control,** not to **aid commerce.**

Not Necessary to Make Pooling Agreements or Prevent Competition, nor buy all Agencies that Might Compete, in Order to Facilitate Interstate Commerce.

If it be claimed that the defendant companies were merely seeking to aid commerce, **and not control it,** then why was it necessary to enter into the Pooling Agreements with the Wiggins and Merchants before their purchase by the fourteen defendant railroads?

What was a Pool formed for?

Was it to facilitate commerce?

Certainly not. It was made to protect and maintain rates, and is now prohibited by the Interstate Commerce Law.

The Pooling Agreements to Which the Defendants Were Parties, Show Intent to Restrain Commerce.

These Pooling Agreements made prior to the adoption of the Sherman Law are competent to aid in discovering the intent and purpose with which the combination of all these instruments of interstate commerce were brought about.

Standard Oil Co. v. United States, Advance Sheets of Opinion, Supreme Court, No. 12, date June 15th, 1911, l. c., p. 521.

The payment of fifteen hundred dollars per share for Wiggins Ferry Company stock in 1902, worth actually only three hundred, inorder to keep an independent road, the Rock Island, from obtaining an entrance to St. Louis, was frankly not put by Mr. Ramsey, then an officer and director of The Terminal Railroad Association, upon the ground that the acquisition of the Wiggins Company **was to facilitate commerce.**

Mr. Ramsey testified:

"We discussed the matter and I told Mr. Gould that the Missouri Pacific, the Iron Mountain and the Wabash Railroads could well afford to purchase the Wiggins Ferry Company in order to prevent such a valuable property from passing into the control of a competitor of those railways."

Ramsey's testimony, Vol. 2, Terminal case, p. 249.
.Ramsey's testimony, Vol. 2, Terminal case, p. 249.

TheMembership of all the Defendants in "Traffic Association" Shows an Intent to Control Interstate Comerce.

The defendant, The Terminal Railroad Association, and all the other defendant railroads were members of the Traffic Association.

The defendant Terminal Railroad Association and the eight Eastern railroads with their termini in Illinois belonged to the Central Freight Association. **This organization fixed freight rates on interstate commerce.**

The record clearly shows that these Traffic organizations were created for the purpose of and did eliminate competition in rates between the railroads on interstate traffic, and did maintain these rates.

The defendant, The Terminal Railroad Association, belonged to the Traffic Association and kept up the rates fixed by said Traffic Association on interstate commerce.

This is competent to show the **intent** with which the Terminal Railroad was operated. It shows the intent was to maintain rates and control and monopolize all interstate commerce moving over the properties of The Terminal Railroad Association. It shows also that the fourteen railroads owning the Terminal Railroad Association regarded it as an interstate carrier of commerce, **and not simply as a terminal company.**

If The Terminal Railroad Association was merely a terminal facility used to aid commerce in terminal connections, why was it necessary for it to join a traffic association whose only object and work was to maintain interstate rates and prevent competition in interstate commerce?

Defendants All Were Members of Coal Traffic Association to Maintain Interstate Freight Rates.

The eight Eastern defendant railroads all ran through the coal fields in Illinois and were heavy carriers of the product.

The soft coal is the largest single item coming to St. Louis, Mo., from the east.

Most of coal coming into St. Louis, Mo., has been hauled a distance of 20 to 40 miles only—more than

70% of it comes from within a radius of 40 miles of St. Louis. Now, for years and years, the average charge for hauling coal, not to St. Louis, but, to East St. Louis, Ills., has been from 35 to 45c per ton. In later years it dropped down to 25c. Then, after it got to East St. Louis, Ills., these interstate carriers, the Wiggins Ferry Co., the Eads and the Merchants Bridge, charge 30c a ton for bringing it across the river. That, added to the other charges, of course, made it a pretty expensive freight item; but it had to be paid, and the citizens of St. Louis have been paying it.

Many years ago the coal-carrying roads now comprising the proprietary lines of the Terminal Railroad Association and the Terminal Association formed what is known as a Coal Traffic Bureau, the object of which was the fixing and maintaining of a common rate from the same coal mining territory to East St. Louis, Illinois, **and the elimination of competiton in freight rates in hauling** the millions of tons of coal from the near-by Illinois coal mines to the St. Louis markets. This Association had a President and Secretary and kept written and printed records of its transactions. The organization was composed of a freight traffic representative from each of the coal-carrying roads. This rate was the same on all the roads, as all coal-carrying roads extending eastward or northeastward or southeastward reached coal mines in about the same distance from East St. Louis and this made a common competitive territory and hence **competition was eliminated by an agreement as to the rates to be charged.**

After the coal reached East St. Louis, Illinois, it was turned over to the Terminal Association for the haul to St. Louis, Missouri, and for this haul a charge of 30 cents per to nwas made. It is apparent at once that if

a manufacturing company uses one hundred thousand tons of coal per annum, that if it moved from St. Louis, Missouri, to East St. Louis, Madison or Granite City, Illinois, it would save immediately ten thousand dollars per annum on coal alone. This one discrimination against St. Louis manufacturers and in favor of Illinois manufacturers located in East St. Louis, Madison or Granite City, Illinois, together with the further fact that a factory located in either East St. Louis, Granite City or Madison, Illinois, could ship its products to Kansas City or any point west **at the same rate it could have done** if it was located **in St. Louis, Missouri,** and had no additional charges to pay for the haul of its products from its factory in East St. Louis to St. Louis, Missouri, has driven many **of the largest factories from St. Louis, Missouri, and caused many new ones to locate in East St. Louis, Granite City or Madison, Illinois, instead of in St. Louis, Missouri.**

The different coal-carrying roads reported to the Coal Traffic Association the coal tonnage of its road each day and a record of this was kept and printed and sent to each of the roads. After the rates had been agreed upon and fixed for hauling coal to East St. Louis, Granite City and Madison, Illinois, a regular coal tariff was issued by the Coal Traffic Bureau and sent to all of the roads and it was the rate they were expected to and did charge. It was a complete combination to stifle and did completely stifle competition.

A regular coal tariff of the St. Louis Coal Traffic Association will be found printed in full on pp. 2034-2041, Vol. 8, of the Exhibits. Another will be found on pp. 2041-2049 of Vol. 8 of Exhibits.

The Terminal Railroad Association belonged to the Coal Traffic Association.

This testimony concerning the Coal Traffic Association and the membership of the defendants therein is offered to show the purposes and uses to which the defendants put the properties of the Terminal Association, and to show the **intent of the defendants in operating the Terminal Railroad Association.**

The Terminal Railroad Association as Controlled and Operated by the Defendants was a Hindrance and Not an Aid to Commerce.

This is clearly shown by the testimony of the thirty-six witnesses placed on the stand by the Government, who were all shippers and who testified that traffic could be handled more rapidly by team, by hauling to and from St. Louis, Mo., to the termini of the Eastern roads in Illinois because of the delay of the defendants in getting the freight over the properties of the Terminal Railroad Association between Missouri and Illinois. Witnesses from cities and towns within seventy-five and one hundred miles of St. Louis, Mo., testified that shipments of goods from Chicago, two hundred miles farther away than St. Louis, would be received from one to three days sooner than shipments from St. Louis. The testimony showed the delay was caused by the defendant not moving the freight over the tracks from Missouri to Illinois as rapidly as should be done. The witnesses all claim the delay was in the handling of the shipments by the Terminal Railroad Association.

Consolidation of all Agencies of Interstate Commerce did not Improve Connections or Increase Facilities For Handling Commerce.

If it be claimed that the combination increased the

facilities for the interchange of commerce the answer in the record shows the connections were no better between the roads after, than before the combination was formed.

On pp. 2746-7, Vol. 15 of the Record, the traffic expert of the defendants, Mr. Perkins, says that the Wiggins Company had more complete connection with the individual roads than the Terminal Association had. That the connection of the Wiggins Company with the roads in both States was more direct and complete than the connection of the Terminal Association. **The Terminal, the Merchants and the Wiggins all owned locomotives, passenger and freight cars, and all operated trains.** The Terminal Association operated passenger trains out of Union Station to the State of Illinois over both the Merchants and the Eads Bridge, as shown by the testimony of Mr. Sarber, pp. 445-6 of Vol. 2 of the Record.

The argument was made by counsel for the defense that the consolidation of these companies, the Wiggins, the Merchants and the Terminal Association had benefited the City of St. Louis, Mo., by opening up more industries to the rails of the different roads. On pp. 2729-30 of Vol. 15 of the Record, the traffic expert of the defendant, Mr. Perkins, says the consolidation of these companies opened so many track-located industries because the Terminal Company owned so many terminal tracks and property, and thereby brought so many track-located industries on the line of the consolidated companies, and then on pp. 2730-31 of Vol. 15 of the Record, Perkins is forced to admit that of the 700 track-located industries in the City of St. Louis, Mo., more than 500 are on the Rock Island, Frisco,

Iron Mountain and Missouri Pacific and less than 200 of them are on the St. Louis Transfer Railway, Wiggins Ferry, Merchants Bridge Terminal and Terminal Railroad Association of St. Louis, **and that it is the individual and independent terminals of the individual and independent roads and not the Terminal Railroad Association which really furnish the connections and transportation facilities to the track-located industries in the City of St. Louis.**

In Vol. 1 of Exhibits, pp. 2507 to 2526, is found a complete list of track-located industries, giving the location of each. But the tariff schedules for freight rates of the Terminal and the Wiggins and the Merchants before referred to and the testimony before mentioned show that from 1893 on the three roads by their connection with the railroads in Missouri and Illinois all had access to all the roads in both States. But the agreement of consolidation between the Merchants and the Terminal Association of August 17th, 1893, recites that the two railroads, the Merchants and the Terminal Association, are connected with each other (Exhibits, Vol. 1, pp. 1551-1552) and therefore the consolidation did not, as counsel argue, produce a connection or coupling up of the Merchants and the Terminal Association tracks.

On page 2312, Vol. 3 of the Record, a witness testified the Conlogue was **a competitor of** the Terminal Railroad Association for transferring cars across the river and was accessible to all roads alike.

When you inspect this record you will find that the facts heretofore detailed are established and clearly prove that the Merchants Bridge Termianl Railway Company and the Wiggins Ferry Company had access before 1893, when the Terminal

Association absorbed the Merchants, directly and indirectly to every railroad entering the City of St. Louis and the City of East St. Louis, Illinois; that before the consolidation of Wiggins with the Terminal Association each had access to all roads. The highest proof of this is found in these switching tariffs and freight tariffs which are in this record here, where the connections are given, in 1898 and then in 1905; the combination was effected in 1902.

This tariff the Merchants Railroad Company issued in 1891 before the consolidation and shows that the Merchants Bridge Terminal had connection **with all the roads in both Missouri and Illinois, and connected in Illinois with the tracks of the Wiggins Ferry Company and with those of the Terminal Railroad Association.**

On pages 1658-59 and 62 will be found another freight tariff of the Merchants Bridge Terminal Railway, date April 1st, 1892, and on R. page 1662 under Rule No. 3 the following will be found:

3. No loaded car will be received by this company unless accompanied **by regular waybill** showing final **destination and consignee.** If for St. Louis delivery, the freight yard or switch at which delivery it is to be made must be designated **on waybill.**

These tariffs show that the Merchants Bridge Terminal Railroad Company in 1891 prior to the consolidation was carrying on interstate commerce and making a specific charge for the haul to the termini of the Western roads in St. Louis and to the City of St. Louis. It also shows that the Merchants Terminal Railway Company required goods to be billed to St. Louis, Mo., after reaching East St. Louis, Granite City and Madi-

son, Illinois, or if from St. Louis they had to be billed to Madison, Granite City or East St. Louis, Illinois.

These tariffs show the Merchants Terminal Co., prior to the consolidation in 1893, had freight yards in both States and also depots; that one of the depots of the Merchant's Co. was located **in Mill Creek Valley** within a short distance of the Terminal Association tracks therein; that the Wiggins Co. railroad tracks also reached the lower end of Mill Creek Valley and within a short distance of the Terminal Association tracks; **that all three companies reached common competitive territory in the center of St. Louis, Mo., and like common competitive territory in the State of Illinois and all three reached practically the same railroads in the two States.**

These facts hereinbefore stated show conclusively, first, that these corporations were independent competing instruments of interstate commerce; second, that they had been combined by pooling arrangement; third, that they were making a specific charge for the interstate haul.

[redacted]: That the Exhibits, Vol. 8, p. 1663, show on February 13, 1893, the Merchants Terminal had direct connection by its own rails with the Missouri Pacific Railroad in the Mill Creek Valley in St. Louis, Mo., only a few feet distant from the rails of the Terminal Railroad Association, and in the heart of the manufacturing and business district of St. Louis, Mo., and by its own rails with the St. Louis Transfer Railway of the Wiggins Co., which extended almost the entire length of the City of St. Louis up and down the west bank of the Mississippi River that the Merchants Company had connection directly with the Iron Mountain,

Frisco and Wabash west. This Exhibit shows the Merchants Terminal had in February, 1893, prior to the consolidation agreement of August 17, 1893, connection direct **by its own rails with every road in St. Louis** but the Terminal Railroad Association and the Merchants could reach the Terminal Association Mill Creek Valley by either the rails of the Missouri Pacific, the Wabash or the Iron Mountain, which constituted the three westside members of the six proprietary lines then owning the Terminal Association. **These facts show cars could be and were sent over the Merchants tracks to all roads in St. Louis from Illinois and the termini of the Eastern lines in said State.**

At this time in February, 1893, prior to the consolidation, the Merchants Terminal Railway Company had leased from what is now the Southern Railway, and was operating the Venice and Carondelet Railway Company. This road was a belt road and still is so used. It ran from a connection with the eastern approach of the Merchants Bridge Company in Venice, Illinois, southeast to and through East St. Louis, Illinois, to a connection with the Mobile & Ohio Railroad and connected and intersected with its own rails **every railroad in East St. Louis, Illinois.** This gave the Merchants Company, prior to agreement with Terminal Association of 17th of August, 1893, **direct access over rails of its own to every railroad in East St. Louis, Illinois, and it reached every road in Illinois that the Terminal Railroad Association reached.**

Primarily, before the Merchants Bridge was built, but after the Eads Bridge was built, when the Eads Bridge and the Wiggins Ferry Compan ywere comformed their pools and agreements as to rates—when

peting interstate carriers, when they from time to time their freight agents met, as the record in this case shows, their General Freight Agents did—when they met and agreed upon tariffs that they were to promulgate, and when they did promulgate them in accordance with those agreements—these classified freight tariffs, covering every article of merchandise, the same as every other railroad in the country did—during that period of years the Pennsylvania Railroad—what is known as the Pennsylvania Railroad Company—had its termini in East St. Louis, Missouri, that Railroad Company made various efforts to obtain relief from Bridge and the Wiggins Ferry Company were comits termini in East St. Louis, Missouri; that Railroad what we term in this case the combination and control of commerce across the river by the proprietary railroad companies. For many years the Pennsylvania Company was not a proprietary company. It became a proprietary company of The Terminal Association in 1903. The proprietary companies were only 6 in number up to 1903, and then 8 more (The Pennsylvania being one of them) were admitted, and these admissions came after the fight for the control of the Wiggins between the Terminal Company and the Rock Island had occurred. The Pennsylvania was up to that time an outside company, and not one of the proprietary railroads.

In one of the efforts of the Pennsylvania road to reach St. Louis, it acquired and afterwards extended to the Eastern bank of the Mississippi River a belt line of railroad that connected with the Pennsylvania's own rails and intersected every other railroad in the city of East St. Louis, Illinois, reaching the termini of every

Eastern railroad that came in there. This was known as the Conlogue road.

It ran down the Eastern bank of the Mississippi River, six or seven miles to East Carondelet to a point where there was a ferry boat owned by the Missouri Pacific operated from the foot of Robert avenue in St. Louis, Missouri, to East Carondelet and cars were transferred from the rails of the Conlogue road to the ferry and by the ferry brought to Missouri and placed directly on the Missouri Pacific rails and carried up the Mill Creek Valley and did not pass over the Terminal Association tracks to get into or through the City of St. Louis, Mo.

That was in 1879—about that time; long prior to the agreement of 1893. The Conlogue track or a portion of it had been there for many years; it was owned by a corporation, and it was acquired by the Pennsylvania Company, and extended so as to facilitate their getting their commerce across the river by means of the Missouri Pacific car transfer ferry at East Carondelet.

Now, the object of the Pennsylvania in going to East Carondelet with the Conlogue road was to meet a car ferry, and that car ferry was owned and operated by the Missouri Pacific Railway.

The Missouri Pacific Railway, as I said, had a track coming down Poplar street, to the western bank of the Mississippi River, and it operated cradles on either side of the river, approaches to this ferry boat, and it operated its ferry and transferred its own freight cars. Now, the Pennsylvania Railroad, and several other railroads made an agreement or an arrangement with the Missouri Pacific by which they used the car ferry,

and thus freight cars were sent right across the ferry and up the Mill Creek Valley—not on the rails of the Terminal Railway Company, but on the independent rails of the Missouri Pacific Railroad Company, which were then laid there and are there today. The Missouri Pacific Railway Company connected directly on the Levee with the rails of the Iron Mountain, which latter road the Missouri Pacific owned, and the Iron Mountain tracks ran south from Poplar street along the river to and beyond the southern limits of St. Louis, Mo. On the Levee, near Poplar street, the Wiggins, Iron Mountain and Missouri Pacific tracks also had direct connection.

Now, the Missouri Pacific Road, as you can see, was receiving the traffic of these Eastern lines reaching its car ferry and it was, of course, an important competitor for this interstate commerce which was being carried on by the Wiggins Ferry Co. and by the Eads Bridge.

On pages 2317, 2322 Vol. 4 the Court will find the testimony of a witness having charge at the time of the Conlogue Road for the Pennsylvania Company who stated 200 to 300 cars of freight per day coming from both Missouri and Illinois and from all the Eastern roads, and Western roads were handled over the ferry of the Missouri Pacific and by the Conlogue Railroad. That after the purchase of the Conlogue by the Terminal Company, the Conlogue ceased to be operated in connection with the Carondelet, Missouri Pacific Ferry.

This witness testified that the Conlogue Road and the Carondelet Ferry was an open competitor with the Terminal Company, operating two car ferry boats, and hauled from East St. Louis, Illinois, to Missouri most of the iron and steel coming from Pittsburg, Pennsyl-

vania, and other Eastern points over the Pennsylvania Road and destined to St. Louis, Missouri, and points beyond in the West and Southwest.

The assistant auditor of the Missouri Pacific Railroad testified at p. 2323 of Vol. 4 of the Record, that about 1902, the Missouri Pacific ceased to operate the Carondelet Ferry as a car transfer ferry in connection with the Conlogue Road in Illinois. From that date on, the Conlogue Road did not and does not now operate and haul loaded freight cars to the Carondelet Ferry, and cars of freight from 1902 were no longer transferred by the Carondelet Ferry from the Conlogue rails over the river to Missouri and on to the Missouri Pacific rails. The reason was that in 1902 the Pennsylvania, with seven other roads joined The Terminal Railroad Association and the vast interstate business of 200 to 300 cars of freight per day was sent over the Eads and Merchants or the Wiggins rails and no longer over the Conlogue Road. The competition of the Conlogue and the Missouri Pacific car transfer ferry boats with the Terminal Railroad Association in the interstate commerce ceased and the two car transfer ferry boats of the Missouri Pacific were moved a few miles further down the river where they are now operated to transfer to Missouri line of Mo. Pac. cars of freight from a point called Bixby Junction on rails of a road incorporated in Illinois as "The Valley" line and extending down the east bank of the Mississippi River, and which road is controlled by the Missouri Pacific Railway Company, p. 2282, Vol. 3 of the Record.

The Court will find from the testimony of the President of the Terminal Railroad Association that the purchase price of one million and two hundred thou-

sand dollars was paid for the Conlogue road to the Pennsylvania by the Terminal Association from funds arising from the sale of the fifty millions of dollars of bonds authorized by the Terminal Association after the Pennsylvania and the other seven roads joined the Terminal Association, when the fight between the Terminal and the Rock Island roads for the control of the Wiggins Ferry had been settled in 1902, and the Wiggins Ferry Company, with its five car transfer boats operated at different points on the river in connection with its splendid system of railroads in Missouri and Illinois having direct connection by its own rails with every road in both States, and been absorbed by the Terminal Railroad Association. The Pennsylvania, the Burlington and other roads had stood out for years and used the Merchants Terminal and the Conlogue Road and the Carondelet Car Transfer Ferry and the Wiggins tracks and its five car transfer boats, but when the Wiggins Company, with all of its direct connection by its own rails with all the roads in both Missouri and Illinois passed into the control of the Terminal Railroad Association, the Pennsylvania and the Burlington and the other six roads were compelled in 1902 to join the Terminal Railroad Association and accept the terms of the Terminal Railroad Association, and one of the terms was that the eight new roads joining the Terminal Association should forever use the properties and the tracks of the Terminal Company for the interstate commerce of said roads between Missouri and Illinois, at St. Louis, Missouri.

This witness Walsh also at pp. 2282-2283 of Vol. 34 of the Record testified that out of the proceeds of the sale of the increased issue of bonds following the con-

solidation of the Eads, Wiggins and Merchants and Interstate and Cologue Companies in 1902, the proprietary companies were all repaid the amount they had expended, the Rock Island on the one hand and the six roads comprising the Terminal on the other, in the struggle to get control of the Wiggins property, and also that expensive machine shops were built out of the money from the sale of these bonds aforesaid.

The fabulous price of fifteen hundred dollars per share paid for Wiggins Ferry Company stock, worth not over Three Hundred Dollars per share, was all put as a burden upon the people of St. Louis to be paid as freight charges for the haul between East St. Louis, Illinois, and St. Louis, Missouri, to enable the Terminal Railroad Association to pay the interest on the increased issue of bonds and provide a sinking fund to retire them at maturity; and yet counsel for the defendants say no profit was made from the operation of the Terminal Railroad Association. Charges admittedly were collected sufficient to pay interest on increased bonds of the Terminal Association in amount sufficient to pay the purchase price of seven and one half millions of dollars for the Wiggins property, and the property was transferred to the proprietary lines and they own it today, and according to Walsh, the President of the Terminal Railroad Company, the proprietary lines have not a dollar of their own money in the Wiggins property. Did the proprietary lines not make seven and one-half millions of dollars in this transaction I have detailed? The proprietary companies own the stock of the Wiggins and mortgaged it and got money to repay the purchase price paid by them for the Wiggins property.

Julius S. Walsh testified at page 481: Vol. 2 The 13 proprietary lines and the Pennsylvania own every share of Wiggins Ferry stock (10,000) shares in 14 equal parts each.

Page 500: Vol. 2 Each of the 14 roads took the 1-14 of the Wiggins Ferry stock and deposited it with the Central Trust Company. It does **not** go to the Terminal Railway on the expiration of the mortgage.

Page 2274: Vol. 4 Control of Wiggins Ferry was owned by the 14 proprietary lines, **not** the Terminal Railroad.

Page 2277: Vol. 4 The 7 old and 7 new companies finally paid their proportionate part of whatever was finally paid for the entire issue of Wiggins stock.

Page 2282: Vol. 4 The 14 railroads were reimbursed for the expenditure that had been made for the Wiggins Ferry Company from the sale of the bonds (page 2283, Vol. 4) that the roads have practically no money invested in the Wiggins Ferry stock as a primary proposition themselves.

By examination of the testimony heretofore referred to, we find that the Eads Bridge with its subsidiary companies (and designated as the Terminal Association), at the time the Merchants Bridge was opened, had not nearly so extensive terminal facilities in Missouri in the way of making connections with other roads and industries as did the Wiggins Ferry Company—the Wiggins Company had a track running down the levee from the northern part of the City, extending well towards the south, and all the railroads in St. Louis reached these tracks of the Wiggins Company. This track on the levee of the Wiggins Company was known as the St. Louis Transfer Company. The Terminal Railroad with its facilities did not before the

consolidation, reach all of the railroads, but practically all; connections could be made by using the Wiggins track on the levee and by use of private switching tracks of independent lines, such as the Wabash and the Missouri Pacific, and a car could be readily and practically sent to any other railroad over the tracks of the Terminal Association; using the same Wiggin-Ferry tracks, the same thing is true of the Merchants Bridge Terminal Company, prior to the consolidation in 1893, and a car could readily and practically be sent to any other railroad over the tracks of the Merchants Bridge Terminal Railway. This same condition prevailed in the State of Illinois with reference to both the Merchants Terminal and the Terminal Railroad Association. In the State of Illinois the Wiggins Ferry Company, however, reached every railroad that came into East St. Louis. The Merchants Bridge Terminal Railway through the Venice & Carondelet Belt also reached every Railroad company in East St. Louis. This Venice & Carondelet Belt ran from the east end of the Merchants Bridge to a point south of East St. Louis, where it touched the tracks of the Mobile & Ohio, crossing and intersecting directly the rails of all eastern roads coming into East St. Louis. This condition giving access to the eastern roads, by the Merchants Company, existed long prior to the consolidation in 1893. The Wiggins Company also had a line of road on the east side, as is shown by reference to the testimony heretofore quoted which reached every railroad in East St. Louis, Madison and Granite City, and which was known as the East St. Louis Connecting Railway.

So Your Honors see that before this consolidation took place in 1893, the record shows that these three

separate, independent agencies of interstate commerce were here in the States of Missouri and Illinois, competing for the haul between the termini of the roads in Illinois and the termini of the roads in Missouri, that is, the carriage between connecting roads in Missouri and Illinois, and between the City of St. Louis and the termini of the eastern roads in Illinois.

Then the thing happened that has been happening in America for many years, as this record shows, *i. e.*, the Wiggins, Merchants and Terminal Companies got together through their officers, and they established a schedule of classified freight tariffs to be charged for the haul from East St. Louis, Illinois, to St. Louis, Missouri, and from St. Louis, Missouri, to East St. Louis, Madison and Granite City, Illinois. There rates were all agreed upon and published, and filed with the Interstate Commerce Commission, the roads arranging to divide their earnings on the basis of a tonnage pool, which was carried out for many years.

Now, I ask if these were not competing instruments of interstate commerce, why should they get together and make an arrangement or agreement to fix and maintain the same rate of freight for the same class of property? Why should they arrange to divide their earnings upon a tonnage basis if not competing in common territory for similar classes of business? Is there any reason for companies used merely for terminal facilities to do that? Certainly not.

The facts proven by reference to the Record heretofore quoted, show conclusively that the Merchants Terminal, the Wiggins Ferry and the Terminal Railroad Association, prior to 1893, reached a common territory and were practically as well connected as they are to-

day, so far as the actual carrying on of the interstate business between the States of Illinois and Missouri, and St. Louis, Missouri, and East St. Louis, Illinois, are concerned; but whether that proposition be true or not, the principle still remains, that it would not cut any figure whether coupling up of these railroads acted beneficially to the operation of the railroads or not, if the operation of these agencies of interstate commerce unreasonably restrained, or tended to restrain, or monopolize, commerce, it violates the provisions of the Federal statute which says that commerce shall flow freely between the States. If it violates the provisions of the Sherman Anti-Trust Law, it does not matter whether it is a **terminal company** or **two** or **three terminal companies,** or **whether it is a line of railroad with a thousand miles** of track extending from the sea to the Mississippi River; if in its operation or in its contracts made with roads who operate thereon, the carrying on of commerce between the States through this instrument or instruments of interstate commerce, the provisions of the Sherman Anti-Trust Law are violated by restraining or monopolizing the business between the different States, then the road or roads must respond for the violation thereof, and the fact that it or they might be a terminal company, should have no bearing in that regard, if in truth and in fact the operations and conduct of the instrument of interstate commerce comes within the principle prohibited by the Act of Congress. The record here shows clearly that five independent carriers of interstate commerce, *i. e.*, the Merchants, Eads, Conlogue, Wiggins and Interstate Commerce, have been unlawfully consolidated; and that these five agencies consolidated under the control of one company, the stock of

which is owned by the fourteen proprietary lines having an absolute monopoly of the movement of all commerce between the States of Missouri and Illinois at St. Louis, Missouri, and East St. Louis, Granite City and Madison, Illinois, and of a like monopoly on all that great commerce that comes from the producing regions in and around St. Louis, in Missouri and in the Mississippi Valley, and which is routed through the St. Louis gateway, as said commerce passes either to or from one coast to the other, or foreign countries.

The Claim That the Defendants Make no Profit From The Terminal Railroad Association Does Not Exempt it From the Provisions of the Anti-Trust Act.

The contention may be made by counsel on the other side, that this consolidation was not made for profit, and consequently there could be no violation of the Sherman Anti-trust Law. I do not understand that there is any such exception in the Sherman law—I do not understand that a profit must be realized in order that the Sherman Anti-trust Law may be violated. I do not understand that the Sherman Law reads all combinations **for profit** and none other in restraint of commerce are illegal. It may be that a combination has been made very injurious to commerce, and yet there may be no greater charge to the public than there was before the combination was organized, but the operation of the combination may be cheaper for those in control of it, and yet the control and combination may exclude **competition.** If it were a test as to whether or not profit were realized, and if it were to be held that because it could pay the asso-

ciation no additional profit, a combination such as this is legal, what would hinder the combination of competing lines from East St. Louis to the Atlantic sea coast, provided they charged the same rate as was charged theretofore, and made no additional profit? It was contended below and may be here that the Court must carve out of this Anti-trust Law first, an exception in favor of the Terminal Railroad Association, because it is claimed to be only a Terminal Railroad, and second, in favor of a combination which it is alleged is a benefit to commerce and in aid of commerce, although **it controls commerce**. If an exception be carved out of this statute by judicial interpretation, the question naturally presents itself, where are you going to stop? If a combination of competing instrumentalities of interstate commerce controlling, restraining and monopolizing trade can be legal, which will reach from the western limits of St. Louis, Mo., 12 or 15 miles to the furthermost limits of East St. Louis, Madison and Granite City, Illinois, and if that combination controls commerce, both local and through, over these instruments of trade, and if such combination is legal because of the presence of these cities in the two states, I ask how far along the lines of those rails of those roads in either direction can that combination be extended? Can it be extended westward to Kansas City and eastward to Indianapolis, or northeast to Chicago, or must it stop at some point short of the Great Lakes or the Atlantic sea coast or the foothills of the Rocky Mountains on the west? Perhaps the answer of the gentlemen is that so long as those properties are operated as terminal facilities alone, that that fixes the limit. But the Sherman Law contains no exception exempting from its provisions ter-

minal railroads operated to aid terminal facilities. **If an instrument of service does an interstate business and is combined with a competing instrument of interstate commerce, competition between the two is necessarily eliminated.**

I take it that if the statute contained exceptions, it would be proper to discuss the question of whether or not the existing instruments of interstate commerce here under consideration came within the terms of the exception; but there is no exception; the Federal statute is plain and clear, and as suggested before, I understand the rule of interpretation in this Court to be where a statute is plain and clear and unequivocal, this Court holds that no exception was intended.

If these five agencies were separate and independent corporations, and pooled their earnings as they once did there could be no doubt **but what they would be violating the law.**

St. Louis is a great center of commerce; a great highway; a gateway through which flows commerce North and South, East and West, across this continent.

Does not that appeal all the morestrongly as a reason why we should clearly and definitely apply the rule of the Federal statute?

That rule says that this commerce **shall flow not unduly unrestrained and competitive.**

It seems to me that this statute is made to act on great gateways of commerce as well as at places where commerce is light, and does apply equally in both places; but there certainly is more reason for the Federal rule where the commerce is greater—and why? Because the injury flowing from the combination is so much greater.

It is just such gateways as this, and such contracts and the forming of such combinations as we have here that should come under the rule. St. Louis is in the geographical and productive and industrial center of the Republic and each passing year will make it more and more a center; commerce radiates from this city in all directions to the uttermost confines of the Republic and to foreign lands and can be influenced more readily **by its control here as to rates than almost anywhere else.**

The Defendant Companies Have Made and Now Make a Profit From the Operation of The Terminal Railroad Association.

The contention will no doubt be made that the consolidation is not operated for profit. Did anyone ever hear of a railroad pool or combine not being operated for profit?

I say that the record in this case shows that the Terminal Railroad Association was operated for profit, and that it was a profitable enterprise. The Record discloses that the Terminal Association controlled by fourteen proprietary railroads, did just what every railroad in this country has been at least wanting to do for years—that is, mortgaging its property for a sufficient amount to reimburse the investors and owners for all moneys invested, and then retaining the control of the stock and operating the property and declaring dividends on the stock, in addition to the payment of interest on the bonds for which the property had been pledged.

An inspection of this Record and a reference to the organization of the primary companies, will disclose that each of these primary companies had stocks and

bonds outstanding and that as the consolidation occurred from time to time, beginning with 1881, there was always an agreement on the part of the Terminal Association that the bonds outstanding and the stock outstanding in the constituent and consolidated companies, should have the interest and dividends thereon paid, and a guarantee was made by the Terminal Association to this effect.

When your Honors will inspect the Record, you will find in Vol. 8 of Exhibits in the form of written agreements, at pages 1823 to 1880, and from 1930 to 1939, whereby the Terminal Association actually **guaranteed payment of interest on bonds and dividends** on issued stock to the extent of something like $28,000,000, with the right to issue some $22,000,000 additional, and under the clause of the agreement hereinbefore referred to, the companies agree to charge sufficient freight rates for the haul over the properties of the consolidated companies to meet any amounts that might be needed for future improvements, agreeing that the whole $22,000,000 could be used and the roads bound themselves to charge rates sufficient to pay interest on the additional $22,000,000 that might be so used.

The Record shows that the present owners of the Terminal Association, **the owners of this consolidated property, have never put one dollar into these properties that they have not received back.** In other words, the proceeds of a bonded indebtedness of $28,000,000 against the Terminal has repaid the proprietary railroad companies every cent they have invested, and these proprietary companies still own the stock of the Terminal Railroad Association and control and operate the property.

Several of the primary companies whose charters are still in force and whose bonds and stocks are out

with a guarantee for the payment of the interest and dividends thereon by the Terminal Railroad Association, are paying at the rate of 6% and 7% on many hundred thousand dollars of stocks and bonds. There is a stock and bonded indebtedness guaranteed by the Terminal Railroad Association and proprietary lines against the Eads Bridge to the extent of $11,000,000, and that was onyl one of these combined instruemnts of interstate commerce, and yet we hear that this is a beneficent organization for the public benefit and not for the profit of its owners.

It seems to me to make a community like the City of St. Louis pay for this vast property, and for maintaining and keeping it up, **free of cost of purchase and of maintenance to the railroads and owners**, is an extremely profitable investment to the defendant interstate carriers of commerce. The defendants have a monopoly of all the interstate commerce at the St. Louis gateway without investing a dollar. This burden and tax is imposed upon each resident who lives within the confines of St. Louis, and nowhere else. To illustrate, if a shipment of freight originated in East St. Louis and was destined for Leavenworth, Kansas, Utah or Colorado, the freight charge is the same as though the shipment originated from St. Louis, Mo. If the shipment originates in a foreign country, or at the Atlantic sea coast and passes over the rails of the roads east coming west, or is destined for the Pacific coast, passing through St. Louis, the consignee pays no additional charge for the haul between the termini of the eastern roads in Illinois and the termini of the western roads at St. Louis. This commerce goes through free and unobstructed. The bridges and feries are treated as a part of the main line of road in cases of

through shipments to points west of St. Louis, Missouri; but if a citizen of St. Louis, Missouri, wishes to make a shipment anywhere east of the City of St. Louis, except to what is called the Green Line territory, a charge of 2c per 100 lbs. was made. on an average, for the haul from St. Louis, Mo., to the termini of the eastern roads in East St. Louis. **No St. Louis bill of lading was issued prior to the time this suit was brought.** When a merchant used one of these instruments of interstate commerce, the Eads, Wiggins, Merchants, Conlogue or Interstate, the shipment was never received by the eastern railroad company until it arrived in East St. Louis, Madison or Granite City.

The President of the Terminal Railroad Association, Mr. Walsh, in a letter to Mr. Morgan giving the facts about the value of the property of the Terminal Railroad Association to enable Mr. Morgan to accurately represent the facts to his clients who might wish to purchase Terminal bonds, stated, that the Terminal Railroad Association controlled all the facilities for interstate commerce at St. Louis, Missouri, and had made a profit of ($2,500,000) Two Million and Five Hundred Thousand Dollars.

The Right to Use the Defendants' Properties Known as The Terminal Railroad Association Could Only be Acquired by a Road Outside The Terminal Railroad Association by Signing the Contract to Forever use the Properties of the Defendants for Movement of Interstate Commerce at St. Louis.

A reference to the agreement of October 1st, 1889, between Gould and six of the defendant roads herein

and the contract known as the Guaranty Agreement of 1902, shows that no railroad could become a member of the Terminal Railroad Association and participate in the use of the properties of said last named company without first signing an agreement to forever send all its interstate commerce originating anywhere and passing through St. Louis, or to or from St. Louis, over the properties of the defendant, the Terminal Railroad Association.

Again, if a railroad was willing to sign the agreement, it even then could not become a member under the terms of the two contracts, if any one railroad that was a member objected. In other words, unanimous consent of all of the defendants allowing an applicant to join must first be obtained.

This power enabled the defendant companies to shut out all competitors from the use of the agencies for moving interstate commerce between Illinois and Missouri at St. Louis.

The Charge for the Haul Between the Termini of the Eastern Roads in Illinois Defendants Herein and St. Louis Was Not a Switching Charge.

It will be seen by reference to R. Vol. 4 p. 1724, the Terminal Railroad Association maintained a separate and independent switching charge schedule which was entirely separate from the charge for the haul between the termini of the defendant roads in Illinois and St. Louis.

The Terminal Railroad Association issued a regular classified schedule of freight rates for the haul between the termini of the Eastern roads in Illinois and St. Louis.

See R., Vol. 3 pp. 1651-1654, and 1658-1659 and Vol. 4 2246 and 2233.

The Pool between Terminal Railroad Association and Merchants Co. and Wiggins Co., admitted to exist by Mr. Scullin on R., Vol. 3 pp. 87-88, shows a regular classified schedule of freights was used by all three companies last above named. This was the pool Scullin said was formed when they stopped cutting rates and "agreed to sin no more."

It Was Not Necessary to Combine Under One Control all the Instruments Used to Move Interstate Commerce to Facilitate the Interchange of Business Between the Defendant Railroads.

The Wiggins Company had for a long time prior to the building of any bridge across the river at St. Louis been a carrier of interstate commerce between the termini of the Eastern roads in Illinois and St. Louis. For many years after the building of the bridges and after the organization of the Terminal Railroad Association, the Wiggins Company continued to operate its locomotives and cars in Missouri and Illinois and its car transfer ferries across the Mississippi River, moving interstate commerce. The Record shows as hereinbefore stated that the Wiggins Company connected with every railroad in Missouri and Illinois doing business at St. Louis. It connected with the Terminal Association in Missouri and Illinois. It had more and better facilities for handling interstate commerce than the Terminal Association had. The combining of the two companies did not and could not add anything to the facility with which traffic could be interchanged between the Wiggins and other carriers, nor between

the Wiggins and the Terminal Railroad Association. The Record shows the Wiggins Company had more track-located industries than the Terminal; that most of the track-located industries were on the tracks belonging to individual roads and not belonging to either the Wiggins or the Terminal Companies.

The payment of five times the value of the Wiggins properties by the defendants in 1902 to get control of it did not add additional facilities for the interchange of traffic moving between Missouri and Illinois or elsewhere at or through or to St. Louis.

The excessive price war paid only to exclude competition. The Record shows the Merchants Terminal Company had connection with all the railroads before it was combined with the Terminal Railroad Association. Therefore no additional facilities were afforded for interchange of traffic by that combination.

RESUME AND CONSEQUENCE OF FOREGOING.

1. **August 17, 1893.**

St. Louis Bridge, with tracks and terminals, **Wiggins Ferry,** with tracks and terminals, **Merchants Bridge** with tracks and terminals, all independent, competing and distinct media of interstate commerce—each being operated on its own account and for its own purposes.

2. **August 17, 1893.**

Foregoing three separate media combined under one control and thenceforward so operated.

3. **August 17, 1893.**

"The Terminal Railroad Association of St. Louis" —owned by fourteen **"proprietary"** railroad companies, also defendants herein.

4. **Purpose to monopolize by foregoing combination farther shown** by:

1. Purchase of Merchants Company.
2. Purchase of Wiggins Company.
3. Purchase of Conlogue railroad.
4. Purchase of Interstate Car and Transfer Company.
5. Purchase and control of Alton bridge.

Every semblance of competition thus effectually removed.

5. **Detrimental consequence of combination and monopoly shown** by:

1. Guaranty agreement.
2. Delays in transit and delivery.

3. Favoritism to St. Louis Transfer Company.

4. Indeepndent freight stations rendered impossible.

5. City of St. Louis deprived of adequate freight facilities.

6. "Bridge Arbitrary" established hostile to business interests of St. Louis shippers and manufacturers.

7. Coal traffic handled to St. Louis' detriment.

8. Feright rates arbitrarily fixed and maintained to St. Louis' detriment.

Every fact thus demonstrates a clear and deliberate violation of the statute.

Unreasonable Restraint of Interstate Commerce and a Monopoly Thereof is Shown by the Record.

The **intent to create** a restraint upon interstate commerce from the time of the creation of the Terminal Railroad Association is shown by the agreement binding all the railroads, stockholders of the Terminal Association to **forever use** the properties of said corporation for all interstate commerce.

This contract fixes the intent the organizers of the Terminal Association had when they caused said company to be formed.

Purpose to creat a monopoly shown by the acts of those controlling the Terminal Company in causing it to buy the Wiggins Ferry Company at three times its value to exclude the Rock Island as a competitor.

The intent to creat a monopoly is shown by the acquisition, by Terminal, of every agency and instrument that could possibly be used as a competitor, to-wit:

1. Purchase of Merchants Bridge and Terminal Railway Company.
2. Purchase of Wiggins Ferry Company.
3. Purchase of Conlogue road.
4. Purchase of Interstate Car and Transfer Company.
5. Defendants purchase and control of the Alton Bridge.

Monopoly is Complete.

The record shows the control of all the instruments used to move interstate commerce between the termini of the Eastern railroads in Illinois and St. Louis is absolute. none are left to compete.

No road can acquire the right to use the facilities of the defendants in Missouri and Illinois without unanimous consent of all defendants, and then only by signing an agreement to forever use the properties of the defendants for the movement of interstate traffic destined to or from St. Louis This binds forever all interstate traffic at St. Louis and puts it in the hands of the defendants.

If it is legal and not a violation of the law and policy of the Republic for one city, and the million of people commercially and industrially tributary to it, to have all of its traffic placed in the hands of fourteen railroads why is it not legal for the different railroads at all of the cities to control in this manner the traffic at all centers? The control thus extended would practically forever exclude perpetually all competition in railroad transportation and place it in the hands of the existing lines and their successors.

It is Legally no Justification for This Complete Monopoly to Say it is a Terminal Facility and the Combination is Made Only to Facilitate Interchange of Traffic.

The physical interchange of traffic has not been facilitated because there has been no change in the physical condition or arrangement of the properties since the combination.

No additional facilities have been added.

Again the interstate commerce act provides all interstate commerce carriers must interchange traffic at points of connection. Thel aw of Missouri requires the same thing of connecting carriers.

The record shows competition was eliminated as to rates between, first, the Terminal Company and the Wiggins Company by pooling agreements. This was followed by pooling agreements between the then competing carriers, The Merchants, the Wiggins and the Terminal Companies. Now the old form of eliminating competition by pooling agreements has been displaced by combining the control in one consolidated corporation by transfer of stock.

The result is the same—elimination of competition and undue restraint of trade. If brought about now by an old fashioned pooling contract it would at once be declared illegal. Is it legalized because now the undue restraint of commerce and the monopoly thereof appears clothed in the corporate form of a "dummy" corporation, having as an excuse for its existence economy of operation and facility of interchange of traffic?

The Trust's excuse for its undue restraint of trade is always "economy of operation."

The Defendant, Terminal Railway Association, is an Illegal Combination in Restraint of Commerce. It is a Monopoly.

This defendant, The Terminal Railroad Association, was the illegal product of an unlawful contract made in 1889, between six of the defendants herein and Jay Gould, and it was brought into existence to be used only to unreasonably restrain interstate commerce and create a monopoly thereof. And this corporate entity the spawn of an illegal contract in which the public policy of this Republic was spurned has in its every act of its corporate life been true to the object for which it was created and it has never failed to use its power to restrain commerce and create monopoly as its creators, the defendants, intended it should do. The defendants hail this Terminal Association as a public benefactor while the shipping world looks on it as a burden on commerce.

The Conlogue road reached every road in East St. Louis, and it carried over its rails to a connection with the East Carondelet Ferry of the Missouri Pacific freight cars from all the Eastern roads destined to St. Louis, Missouri, and to points beyond.

The Interstate Car-Transfer Company operated two car-transfer boats passing from a point south of the Eads Bridge to a point north of it and between the Eads and the Merchants Bridge. The Interstate Car-Transfer Company operated in connection with the railroads in Missouri and Illinois and thereby had access to the central business and manufacturing sections of St. Louis, Missouri, and East St. Louis, Madison and Granite City, Illinois.

The Conlogue and the Interstate Companies were clearly competitors with each other and with the Mer-

chants and Wiggins and the St. Louis Terminal Association. All five were **competitive instruments of interstate commerce and carried on interstate commerce, and the combination of them restrained interstate commerce by eliminating all competition.**

The combination of the five instruments of interstate commerce violated the Sherman Law by creating a monopoly of the interstate commerce between the States of Missouri and Illinois at St. Louis, Missouri, and Granite City, Madison and East St. Louis, Illinois.

The consolidation of the five instruments of interstate commerce, the Wiggins, the Eads, the Merchants, the Conlogue and the Interstate Car Transfer Company into a single instrument of interstate commerce **unduly restrained** competition and this consolidation therefore was an unlawful restraint of interstate commerce.

The interstate commerce theretofore controlled by the five companies, was thenceforward controlled by one single corporation, and the commerce between the States of Missouri and Illinois, at St. Louis, Missouri, and East St. Louis, Madison and Granite City, Illinois, was placed under the command and mastery of a single corporation, i. e., the Terminal Railroad Association. The great commerce passing over the 50,000 miles of rails of the fourteen proprietary companies and through the St. Louis gateway was absolutely **controlled and restrained and its movement and the cost thereof, absolutely directed** wholly by the single corporation known as the Terminal Railroad Association.

Competition was eliminated. The control, restraint and mastery of interstate commerce was complete. The fourteen roads and the Terminal Association acted as one road. The fourteen roads acted through the

Traffic Association as a single corporate entity. The combination eliminated all competition in rates and service. **It was a complete monopoly.**

The acts of the defendants clearly violate the Sherman Law and the prayer of the Government should be granted.

RELIEF SPECIFICALLY ASKED BY PETITION.

1. That all acts done or to be done in carrying out the combination are in derogation of the common rights of the people of the United States, and in violation of the Act of Congress of July 2, 1890, entitled "An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopoly", and that the defendants and each of them and every one of them, and their officers, directors, stockholders, agents and servants, and each of them be perpetually enjoined from doing any act in pursuance of or for the purpose of carrying out the same in the future; that all agreements made between the defendants looking to the operation of the St. Louis Bridge, known herein as the Eads Bridge, and railroad tracks crossing the same and terminals connecting therewith, in a common or non-competing interest with the St. Louis Merchants Bridge, known herein as the Merchants Bridge, and railroad tracks crossing the same and terminals connecting therewith be declared void, and the defendants, parties to such agreements, be enjoined and forbidden from the further carrying out of such agreements or the operation of such bridges, railroad tracks and terminals in such common or non-competitive interest; that the said defendants and each of them, their agents, servants and representatives, be enjoined and forbid-

den from operating, controlling and maintaining the properties hereinbefore described as a common instruments or agency of interstate commerce, under the common control of the fourteen railroad companies, owning the capital stock of the Terminal Railroad Association.

This finds it authority in **Northern Securities v. United States**, 193 U. S. 197.

2. That the fourteen "proprietary companies" be enjoined from voting or in any manner acting as owner of shares of the capital stock of the Terminal Railroad Association, the Wiggins Ferry Company or the Merchants Bridge Terminal Railway Company.

This consequence follows from the unlawful character of the combination complained of in the petition.

Northern Securities Cases—*supra.*

3. That the Terminal Railroad Association be enjoined from recognizing or accepting the "proprietary companies" as owners of its stock, or permitting them to vote the same or paying them dividends thereon, or recognizing as valid any transfer, mortgage, pledge or assignment of the same.

This is the necessary accompaniment of the next preceding prayer and is based upon the same authority.

4. That Eads Bridge, Merchants Bridge and Wiggins Ferry and their associated subsidiary companies be enjoined from recognizing or accepting the Terminal Association and its fourteen co-defendants as the owners of the stock of the said Bridges, Ferry and Subsidiary Companies, and from voting same, or paying any

dividends thereon and from recognizing as valid any mortgage, piedge, assignment or transfer of the stock of said bridges, ferry, or subsidary corporations.

5. That the individuals above named and each of them, and each and every person combining or conspiring with them as hereinbefore charged, and their trustees, agents and assigns, present or future, and each and every one of them, be perpetually enjoined from doing any and every act or thing hereinbefore complained of, or in furtherance of the combination or conspiracy described herein, or intended or tending to place the capital stock of the Terminal Railroad Association of St. Louis, in any of the corporations controlled by it, or the St. Louis Merchants Bridge Terminal Railway Company, or any of the corporations controlled by it, or the stock of either the Merchants or the Eads Bridge, or the said two bridges or the competing railway systems operated by the St. Louis Merchants Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, or the competitive interstate or foreign trade or commerce carried on by them under the control legally or practically of the defendant, the Terminal Railroad Association of St. Louis, or either or all of the said fourteen railroad companies above named, who now own the capital stock of the Terminal Railroad Association, or of any person or persons, association or associations, corporation or corporations acting for or in lieu of said Terminal Railroad Association of St. Louis, or the said fourteen railroads companies above named, owning and controlling the stock thereof, in carrying out the unlawful combination or conspiracy hereinbefore complained of in this petition.

6. The relief sought in general is necessarily aimed at restoring conditions existing when the monopoly was effected—that of restoring to their position as media of interstate commerce the three competitive instruments—the "Eads Bridge", the "Merchants Bridge" and the "Wiggins Ferry", under whatever form each was being operated.

No. 386.

THE UNITED STATES OF AMERICA, APPELLANT,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET AL.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF MISSOURI.

Abstract of the Pleadings and Evidence.

THE PLEADINGS.

The plaintiff proceeds by petition filed November 25, 1905, under the Act of Congress of July 2, 1890, 26 Statutes at Large 209 (commonly known as the Sherman Law).

> Sec. 1. Every contract combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal.
>
> Sec. 2. Every person who shall monopolize or attempt to monopolize, or combine, or conspire

with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be guilty of a misdemeanor.

Defendants.

The Terminal Railroad Association of St. Louis; The St. Louis Merchants' Bridge Terminal Railway Company; the Wiggins Ferry Company; the St. Louis Bridge Company; the St. Louis Merchants' Bridge Company; the Missouri, Kansas & Texas Railway Company; the St. Louis & San Francisco Railway Company; the Chicago & Alton Railway Company; the Baltimore & Ohio Southwestern Railroad Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; these fourteen railroads being known herein as the "proprietary companies"; The Central Trust Company of New York; A. A. Allen; S. M. Felton; A. J. Davidson; W. M. Green; J. T. Harahan; C. S. Clarke; H. Miller; Benjamin McKean; Joseph Ramsey; Geo. E. Evans; C. E. Schaff; T. C. Powell; J. F. Stevens; A. G. Cochran; W. S. McChesney; Julius Walsh; V. W. Fisher and S. D. Webster.

1. Averments of Petition and Answer—Admissions —Denials.

The defendants and each of them (with the exception of the defendant, the Central Trust Company of New York and the several individuals above named), at the times hereinafter mentioned, were and now are common carriers employed in the transportation of freight and passengers among the several States of the United States, and between such States and foreign nations, and as such carriers so employed were and are engaged in trade and commerce among the several States and with foreign nations.

Denied as to Terminal Association, both Bridge corporations, the Wiggins Ferry Company and Merchants Bridge Terminal. Admitted as to others.

2. St. Louis Merchants Bridge and St. Louis Bridge.

That the St. Louis Merchants Bridge and the St. Louis Bridge (owned by the respective companies above named) are now and have been since 1889, the only two bridges across the Mississippi River between the States of Illinois and Missouri, at St. Louis; that one of said bridges was erected by the Illinois and St. Louis Bridge Company, and is now owned by the St. Louis Bridge Company, and was opened for business in the year 1874, and that this bridge is known as, and hereafter will be designated herein as the "Eads Bridge"; that it has its western approach at the foot of Washington avenue, in the City of St. Louis, Missouri, its eastern terminus in East St. Louis, Illinois; that

it has a double track, standard gauge railroad on its lower or first part, and immediately over the said railroad tracks is a wagon way, sidewalk for pedestrians and a double track electric street railway line. The wagon way, pedestrian walks and street railway at said western approach are reached by the street surface of Washington avenue; the railroad tracks on the bridge are reached from the west by a tunnel, extending under the surface of Washington avenue, and the business district of the City of St. Louis, Missouri.

That the St. Louis Merchants Bridge, hereinafter designated as the "Merchants Bridge," has its western approach at the foot of Hall street, in the City of St. Louis, Missouri, and has its eastern terminus in the Village of Venice, in the State of Illinois; that said bridge was erected and opened for business on the first day of June, 1890.

Admitted.

3. Terminal Railroad Association and Merchants Bridge Terminal Railway Co. operating independent lines.

The defendants, the Terminal Railroad Association of St. Louis, and the Merchants Bridge Terminal Railway Company, on and prior to August 17, 1893, owned and controlled and operated two separate, parallel, independent and competing lines of railroad (hereinafter more particularly described) running east and west in the States of Missouri and Illinois, and across the Mississippi River, by means of two bridges, the Eads Bridge and the Merchants Bridge, theretofore constructed

over said river (opposite the City of St. Louis, Missouri) and into the States of Missouri and Illinois.

Denied.

4. Terminal Railroad Association, Merchants' Bridge Terminal and Wiggins Ferry in control of interstate commerce at St. Louis.

The defendants, the Terminal Railroad Association of St. Louis, the Merchants Bridge Terminal Railway Company and the Wiggins Ferry Company, at all of the times hereinafter stated, and at the present time, control and operate all of the lines of railway, and particularly control all of the lines of railway and means of transportation for passengers and freight among the several States of the United States and foreign nations, at St. Louis, Missouri, East St. Louis, East Carondelet, Madison and Granite City, Illinois.

Denied.

5. Organization of Terminal Railroad Association.

That on July 3, 1889, the Terminal Railroad Association of St. Louis was organized under the laws of the State of Missouri, with a capital stock of seven millions of dollars, which was owned by the following named railroad companies, to-wit:

The Wabash Railroad Company; the Missouri Pacific Railway Company; the Cleveland, Cincinnati, Chicago and St. Louis Railway Company; the Louisville and Nashville Railway Company; the Ohio and Mississippi Railroad Company; and

the St. Louis, Iron Mountain and Southern Railway Company.

Admitted as to incorporation. Denied as to ownership of stock.

6. Increase of Capital Stock.

That subsequently the capital stock of said Terminal Railroad Association was increased to fifty millions of dollars, and that 28,820 shares of said stock, at one hundred dollars par value each, have been issued and are now outstanding.

Admitted.

7. Ownership of Stock.

That by the terms, arrangements and contracts made subsequent to the 17th day of August, 1893, other railroad companies purchased shares of stock in the Terminal Railroad Association of St. Louis, and at this time the capital stock of the said Terminal Railroad Association is owned and held by the following named corporations and persons, to-wit:

Missouri, Kansas & Texas Railway Company	2056
Chicago & Alton Railway Company	2056
St. Louis & San Francisco Railway Company	2056
Baltimore & Ohio Southwestern Railway Company	2056
Illinois Central Railway Company	2056
St. Louis, Iron Mountain & Southern Railway Company	2056

Chicago, Burlington & Quincy Railway Company	2056
St. Louis, Vandalia & Terre Haute Railroad Company	2056
Wabash Railroad Company	2056
Cleveland, Cincinnati, Chicago & St. Louis Railway Company	2056
Louisville & Nashville Railroad Company	2056
Southern Railway Company	2056
Chicago, Rock Island & Pacific Railway Company	2056
Missouri Pacific Railway Company	2056
Mr. A. A. Allen for M., K. & T. Ry. Co	2
Mr. S. M. Felton for C. & A. Ry. Co	2
Mr. A. J. Davidson for St. L. & S. F. Ry. Co.	2
Mr. W. M. Green for B. & O. S. W. R. R. Co.	2
Mr. J. T. Harahan for Ill. Cent. Ry. Co	2
Mr. C. S. Clarke for St. L., I. M. & S. Ry. Co.	2
Mr. H. Miller for C., B. & Q. Ry. Co	2
Mr. Benjamin McKean, for St. L., V. & T. H. R. R. Co	2
Mr. Joseph Ramsey for Wabash R. R. Co	2
Mr. Geo. E. Evans for L. & N. R. R. Co	2
Mr. C. E. Schaff for C., C., C. & St. L. Ry. Co.	2
Mr. T. C. Powell for Southern Ry. Co	2
Mr. J. F. Stevens for C., R. I. & P. Ry. Co	2
Mr. A. G. Cochran for Missouri Pacific Ry. Co.	2
Mr. W. S. McChesney for T. R. R. Assn. of St. L.	2
Mr. Julius S. Walsh for T. R. R. Assn of St. L.	2
Mr. V. W. Fisher, Inspector of Election	2
Mr. S. D. Webster, " "	2
	28820

Admitted except that Nutt holds in lieu of Miller, Miller in lieu of Ramsey and Moore in lieu of Stevens.

8. Control by Proprietary Roads.

That the persons above named as holding two shares of stock each, hold the same as representatives of the respective railroads of which they are officers, agents and representatives, and that each of the said fourteen railroad companies owning the capital stock of the Terminal Railroad Association is represented by a director in the board of directors of the Terminal Railroad Association.

That W. S. McChesney, Julius S. Walsh, V. W. Fisher and S. D. Webster each hold two shares of stock in trust for the Terminal Railroad Association of St. Louis; and that the said McChesney and Walsh are officials of the Terminal Railroad Association and said Fisher and Webster inspectors of election.

That the said fourteen lines of railroad above named constitute the principal trunk lines of railroad entering the City of St. Louis, Missouri, and the City of East St. Louis, Illinois, from either side of the Mississippi River, and from all portions of the continent, and control and conduct the interstate commerce of the States of the United States which centers upon and is required to be conducted across the said river at the City of St. Louis.

That the Terminal Railroad Association was created by the consolidation of and succeeded to the rights, privileges, franchises and property of

the Union Railroad & Transit Company, and the Terminal Railroad of St. Louis; that there was issued to the shareholders of the Union Railway & Transit Company and the Terminal Railroad of St. Louis, for each share that they owned in the primary companies, one share of the capital stock of the Terminal Railroad Association of St. Louis, Missouri.

Admitted.

9. Union Railway & Transit Company and Terminal Railroad Association.

That at the time the said consolidation occurred, each of the said primary companies, to-wit: The Union Railway & Transit Company and the Terminal Railroad Company of St. Louis, each owned a complete railroad with equipments thereto and that said roads were so constructed as to form one continuous line of railroad, running in the same general direction, through and into the States of Missouri and Illinois and across the Mississippi River on the Eads Bridge.

Denied.

10. Control by Terminal Railroad Association.

That by this consolidation aforesaid, there was brought under the control of the Terminal Railroad Association of St. Louis the properties of the St. Louis Bridge Company (Eads Bridge), The Tunnel Railroad Company of St. Louis, the Union Railway & Transit Company, the Terminal Railroad of St. Louis, Missouri, and the Terminal Rail-

road of East St. Louis, Illinois, all of which were engaged in trade or commerce among the several States and between said States and foreign countries, and of all of which said properties belonging to the said last above named railroad and bridge companies, the said Terminal Railroad Association took possession and which it began to operate and still continues to operate, and still continues to operate in the carrying on of interstate trade and commerce.

Denied. Averred that by the consolidation the Terminal Association became the owner of the properties the constituent companies, the Union Railway and Transit Company of St. Louis and the Terminal Railroad of St. Louis, but of no other property.

11. Companies under name Terminal Railroad Association.

That the said railroad companies last enumerated were so consolidated under the name of the Terminal Railroad Association of St. Louis, that their lines of railroad so consolidated were owned and operated in the States of Illinois and Missouri, and were connected with all the main lines of railway entering the Cities of St. Louis, Missouri, East St. Louis, Madison, Granite City, and East Carondelet, Illinois.

Denied, except as to consolidation of the Terminal R. R. Association of St. Louis and the Union Railway and Transit Company.

12. Tracks of Terminal Railroad Association.

That on the 3rd day of July, 1889, and prior thereto, and at all times thereafter and now, the Terminal Railroad Association of St. Louis, Missouri, had tracks and lines of railroad and operated the same as follows: Beginning at the west end of the Eads Bridge, in St. Louis, Missouri, thence running southwesterly with a double track, standard gauge railroad, through the tunnel controlled by said corporation, to Spruce street and Eighth street, thence westwardly to the Union Station, at Eighteenth and Twenty-first, Clark avenue and Market street, in said city, to a point where connections were then and are now made with the tracks, lines and termini of the lines of railroad entering St. Louis, Missouri, from the north, from the south, from the west and from the southwest; also from the place of beginning at the west end of the Eads Bridge, thence eastwardly and across the Mississippi River, over and upon said bridge with a double track standard gauge railroad into the City of East St. Louis and into East Carondelet and into the State of Illinois, where the tracks of said Terminal Railroad Association then and theretofore and now connect with the tracks of the lines of railway and termini of the main lines of railways, extending from East St. Louis, Illinois, northwardly to the Great Lakes, and eastwardly to the towns, cities and ports situated on the Atlantic sea coast; that in addition to the main lines of track of said Terminal Railroad Association on said date, theretofore and now, said Terminal Railroad Association operated, and operates, and controlled and controls, switches,

tracks, spurs and branches, cross-overs and depots, running to and from various public and private warehouses, depots, storage houses, factories and business establishments in the cities of St. Louis, Missouri, East St. Louis, East Carondelet, Madison and Granite City, Illinois, and which said side tracks, spurs and switches were then and theretofore had been and now are so connected with the lines of track of the said Terminal Railroad Association as to enable said Association as a common carrier of interstate trade and commerce for hire, to haul, carry, transfer and switch the products so manufactured and stored, or shipped or to be shipped into and from said warehouses, factories and business establishments, depots or other places, to and upon the tracks and lines of road and termini of the various railroads entering the cities of St. Louis, Missouri, East St. Louis, Madison, East Carondelet, Granite City, Illinois; and so as to enable said Terminal Railroad Association as a common carrier employed in interstate trade and commerce to haul, switch and convey to and from the factories, warehouses, depots and other places in said cities, all freight and articles of trade and commerce coming into or going out of said cities, upon all of the tracks and lines of road and termini of the various railroads entering St. Louis, Missouri, East St. Louis, Madison, Granite City and East Carondelet, Illinois.

Denied: Averred that the Terminal Association of St. Louis was created by consolidation of Union Railway and Transit Company with Terminal Railroad of St. Louis, July 26, 1889. Avers that Union Station was not erected until 1894. Avers that

Terminal Association is limited to East St. Louis and St. Louis. Admits that it has facilities to reach other points.

13. St. Louis Merchants Bridge Terminal and Madison, Illinois, and St. Louis R. R.

That the St. Louis Merchants Bridge Terminal Railway Company was organized in August, 1887, under the laws of the State of Missouri, and its charter amended in 1893, and that it was created for the purpose of and did build and construct a standard gauge railroad from the Illinois shore over the Merchants Bridge to the Union Station in St. Louis, Missouri, and owned and operated said road on the 17th day of August, 1893.

That the Madison, Illinois, and St. Louis Railroad Company was organized under the laws of the State of Illinois, for the purpose of building and operating and did build and operate a railroad from the east end of the Merchants Bridge to Granite City, Illinois, a distance of four and one-half miles, and that said road was organized for the purpose of being operated and controlled by the St. Louis Merchants Bridge Terminal Railroad Company, and that on the 17th day of August, 1893, said Madison, Illinois, and St. Louis Railway was controlled and operated by the St. Louis Merchants Bridge Terminal Railway Company.

Admitted, except as to purposes of creation of Merchants Bridge Terminal Railway and that it was or is operated.

14. St. Louis Terminal Railway Company.

That the St. Louis Terminal Railway Company was organized under the laws of the State of Missouri, to construct and operate a railroad from a point upon the line of the St. Louis Merchants Bridge Terminal Railway Company, near the western approach of said Merchants' Bridge, in the State of Missouri, north and westerly through the City and County of St. Louis, Missouri; that said St. Louis Terminal Railway Company built about twenty miles of road in the City and County of St. Louis, leased the same to the said St. Louis Merchants Bridge Terminal Company, which said latter corporation controlled and operated the said St. Louis Terminal Railroad Company, on the 17th day of August, 1893, and prior thereto.

Admitted except as to lease.

15. East St. Louis Terminal Railway Company.

That the East St. Louis Terminal Railway Company was organized under the laws of the State of Illinois in 1887, to build and did build and operate a railroad from the eastern end of the Merchants Bridge for connection with other lines of railroad in the State of Illinois, and said East St. Louis Terminal Railway Company on the 17th day of August, 1893, was and had been theretofore controlled and operated by the St. Louis Merchants Bridge Terminal Railway Company.

Denied.

16. St. Louis Transfer Railway.

That the St. Louis Transfer Railway Company was a corporation organized under the laws of the State of Missouri, and built and operated a railway from Grand avenue to Arsenal street in the City of St. Louis, Missouri, having a main and side tracks of about 40 miles; that said corporation was, on the 17th day of August, 1893, and prior thereto, had been controlled and operated by the Wiggins Ferry Company.

Admitted except as to length of road.

17. Illinois Transfer Railway.

That the Illinois Transfer Railway Company was and is a corporation organized under the laws of the State of Illinois, for the purpose of making connection with the Merchants Bridge and the tracks of the Merchants Bridge Terminal Railway Company in the State of Illinois.

That the Granite City and Madison Belt Railway Company was and is likewise a railway corporation organized under the laws of the State of Illinois, for the purpose of making connection with the Merchants Bridge and the various lines of railway entering into Granite City, Madison, and East St. Louis, Illinois, and that both of said railways were on the 17th day of August, 1893, and prior thereto, had been controlled and operated by the St. Louis Merchants Bridge Terminal Railway Company.

Admitted except as to purposes of incorporation and by what operated.

18. St. Louis Belt and Terminal Railway.

That the St. Louis Belt and Terminal Railway Company was a railroad corporation, organized to build a railroad in the State of Missouri, and that it did build and construct lines of railway in the City and County of St. Louis, Missouri; that said lines of railway, on the 17th day of August, 1893, and prior thereto had been and were controlled and operated by the St. Louis Merchants Bridge Terminal Railway Company.

Denied.

19. Stock of Merchants Bridge.

That the stock of the Merchants Bridge had been from a time previous to the building of said bridge, and was on the 17th day of August, 1893, owned by the St. Louis Merchants Terminal Railway Company.

That in 1889, the St. Louis Merchants Bridge Company made a lease of its bridge for forty years to the St. Louis Merchants Bridge Terminal Railway Company; but afterwards, this lease was cancelled and a similar lease for forty years made to the Madison, Illinois and St. Louis Railroad Company, which corporation is controlled by the St. Louis Merchants Bridge Terminal Railway Company.

Admitted.

20. St. Louis Merchants Bridge Terminal.

That on the 17th day of August, 1893, and prior thereto, and at the time of the commission of the

acts hereinafter complained of, the St. Louis Merchants Bridge Terminal Railway Company was the owner of and operated a standard gauge railroad, located in part as follows:

Beginning at the Union Station in the City of St. Louis, Missouri, thence running easterly with a double track standard gauge railroad across and over Eighth, Seventh and Sixth streets and Broadway through and across Plum and Poplar streets, and thence by an elevated road and track to the wharf, on the west bank of the Mississippi River, and thence on said elevated railway and track northeasterly along said wharf, through and across First street, and thence in a northerly and easterly direction to Hall street, and thence easterly across the Mississippi River, over and upon the Merchants Bridge into the State of Illinois, to the village of Venice and to the City of East St. Louis, Madison and Granite City in the State of Illinois, at which points in Illinois its line of road then connected, and now connects with the Illinois Transfer Railroad Company, East St. Louis Connecting Railway Company, East St. Louis Belt Railway Company, East St. Louis and Carondelet Railway Company, and all the main lines of railway leading from East St. Louis, Illinois, Granite City, Illinois, and Madison, Illinois, and other points in said State, opposite St. Louis, Missouri, to towns and cities and ports on the Great Lakes and the Atlantic Coast; also beginning at the west end of the Merchants Bridge in St. Louis, Missouri, thence westerly and southerly, the tracks of the said St. Louis Merchants Bridge Terminal Railway Company extend with a standard gauge road, through the City of St.

Louis, Missouri, for a distance of 25 miles, intersecting and connecting with the tracks and termini of all the lines of railroad extending from St. Louis, Missouri, westward, northwestward and southwestward to the Pacific Coast and the Rio Grande River, and the Republic of Mexico on the south; that in addition to the above named railroad properties the said Merchants Bridge Terminal Railroad Company on the 17th day of August, 1893, and prior thereto owned and controlled and operated the side tracks, branches and spurs extending to freight depots, private and public warehouses, manufacturing establishments and other places, where articles of trade and commerce were stored, or to be stored and manufactured, and which said branches and side tracks, switches and spurs were all properly connected with the main lines of road and tracks of the said company, so as to enable it as a common carrier of interstate trade (among the several States and foreign countries) for hire, to carry and haul, transfer and convey, all goods and articles of trade and commerce of all kinds to and from said freight depots and warehouses, factories, storehouses and other places upon its own tracks and termini in Missouri and Illinois, and to places on the tracks and termini of all roads entering the Cities of St. Louis, Missouri, and East St. Louis, Venice, Madison and Granite City, Illinois.

Denied. Averment made that line of Merchants Terminal was from 8th and Gratiot east to levee and thence north to Merchants Bridge.

21. Wiggins Ferry Company.

That the Wiggins Ferry Company is an Illinois corporation, organized by special act of the General Assembly of the State of Illinois, in 1853; that it had constructed, and on the 17th day of August, 1893, and prior thereto, and at the time of the commission of the acts hereinafter complained of, owned and operated steam ferry boats and transfer boats on and across the Mississippi River between the City of St. Louis, Missouri, and the City of East St. Louis, Illinois; that these transfer and ferry boats were so constructed as to transfer trains of cars across the Mississippi River between the cities of Illinois and Missouri, aforesaid; that said boats were used for said purpose; that said Wiggins Ferry Company did on the 17th day of August, 1893, and theretofore operate and has since said time, operated the East St. Louis Connecting Railroad in Illinois, which connected with the various railroad lines entering East St. Louis, Illinois, East Carondelet, Madison and Venice, Illinois, with its ferry privileges, and it also operates and controls a railroad in St. Louis, Missouri, and by means of the two railroads and its ferry boats, cars to the number of 1200 daily are now and have been transferred and were on the 17th day of August, 1893, transferred from the railroads entering East St. Louis, Illinois, and other points in Illinois, from the east to railroads entering St. Louis from the west and to the Union Station and **vice versa.**

That the lines of railroad auxiliary to the Wiggins Ferry Company and controlled by it, are as follows, to-wit: The East St. Louis Connecting

Railway, a corporation organized under the laws of the State of Illinois, and operating a line of railroad in East St. Louis, connecting with the ferry and transfer boats of said Wiggins Ferry Company; the St. Louis Transfer Railway Company, a corporation organized under the laws of the State of Missouri, and operating under the control of the Wiggins Ferry Company, 12.83 miles of main track, and about 30 miles of side track in the City of St. Louis, Missouri.

That in so operating said railroads and steam ferry and transfer boats, the said Wiggins Ferry Company was on the 17th day of August, 1893, and had been prior thereto, and has been at all of the times since, a common carrier engaged in interstate commerce among the several States of the United States and with foreign countries.

Admitted as to incorporation: Denies other averments. Avers separate operation of railways named—that Wiggins Ferry owns their stock—East St. Louis, Carondelet, connecting with lines entering East St. Louis, and St. Louis Transfer connecting with inclines of Wiggins in St. Louis and E. St. L. & C. R. R. with those in East St. Louis.

22. Scheme of Monopoly.

That in 1881, the defendant, the Missouri Pacific Railway Company, and the Wabash, St. Louis & Pacafic Railway Company (now the Wabash Railroad), and other corporations and persons whose names are unknown to the complainant entered into a combination to consolidate, under the

control of the Missouri Pacific and the Wabash, St. Louis & Pacific Railway Company, the properties of the St. Louis Bridge Company, the Union Railway & Transit Company, the Tunnel Railroad Company of St. Louis, the Terminal Railroad of East St. Louis, comprising and including the Eads Bridge and all of the railroads used in connection therewith, with the intention thereby to place restraint upon all competitive interstate or foreign trade or commerce, carried on by said above named railroad corporations, and all other railroad corporations, at St. Louis, Missouri, and East St. Louis, Illinois, opposite the City of St. Louis, Missouri, and intending by said combination to monopolize the interstate commerce and trade, and to suppress competition therein between the railway systems; and to that end the Missouri Pacific Railway Company and the Wabash, St. Louis and Pacific Railway Company entered into an agreement with the St. Louis Bridge Company and the Tunnel Railroad Company by which there was leased all of the property of the bridge and tunnel companies, including that held under the lease or contract to the said Wabash, St. Louis & Pacific Railway Company, and the Missouri Pacific Railway Company.

That in pursuance of the said lease the said Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company took possession of all of the property of the St. Louis Bridge Company and Tunnel Railroad Company, and began and continued to operate said Eads Bridge, Tunnel Railroad Company and Terminal Railroad Company of East St. Louis and the Union Railway & Transit Company.

Admitted.

That by means of the control of said property last above mentioned by said lessees, the said Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company, were enabled to arbitrarily fix and maintain whatsoever price they wished for transportation of passengers and freight between the States of Illinois and Missouri, and over the Eads Bridge, and between said States and several states of the United States and foreign countries; that by reason of said control of the aforesaid instrumentalities of interstate commerce by said two railroad corporations, there were exacted and charged unreasonable and extortionate bridge tolls and charges for transporting passengers and freight among the several States and from foreign countries, and the public was subjected to ruinous and unecessary delays in carrying on said interstate trade and commerce.

Denied.

That in order to secure competition and obtain relief from the existing conditions and to enable the trade and commerce in passengers and freight between Missouri and Illinois, and between said States and other States and foreign countries to be carried on at reasonable rates, and without unnecessary delay, and to rid themselves of the pernicious effects of monopoly, certain citizens of the City of St. Louis, Missouri, applied to Congress for authority to erect a competing railway bridge across the Mississippi River at St. Louis, Missouri; that on February 23, 1887, the Congress of the United States granted a charter for that purpose and in order to maintain and keep said bridge

an independent and competitive instrument of interstate commerce, the citizens of St. Louis, Missouri, asked Congress to insert in the said charter of the Merchants Bridge the following section, which was so inserted, to-wit:

"Section 11. That whereas, a principal reason for giving authority to build a bridge herein contemplated is to secure reasonable rates and tolls for corporations and individuals for passing over the same, the St. Louis Merchants Bridge Company, or its successors or assigns, shall not agree or consent to the consolidation of this bridge with any other bridge across the Mississippi River, or to the pooling of the earnings of this bridge company with the earnings of any other bridge company on said river. Nor shall any person who is or may be a stockholder or director or manager of any other bridge over said river be a stockholder, or director, or manager of the bridge herein provided for, provided, that if this povision of this act shall at any time be violated in any of these particulars, such violation shall without legal proceedings at once forfeit the privilege hereby granted, and such bridge shall become the property of the United States, and the Secretary of War shall take possession of the same in the name and for the use of the United States."

That by the terms of said Section 11, no person who was a stockholder, director or manager in any other bridge over the Mississippi river, could be a stockholder, or manager or director of said Merchants Bridge; that afterwards, to-wit: On September 1, 1888, some person, or persons, corporation or corporations, whose names are unknown to

the complainant, intending and contriving to defeat the object for which said bridge was built, and intending and designing to remove the legal obstacles to the consolidation of said Merchants Bridge with the Eads Bridge, and with the design of depriving the citizens of Missouri and Illinois, and the several other States of the United States of the benefits of competition in interstate trade or commerce, and with the purpose of placing the control of the Merchants Bridge, and the railroads in Illinois and Missouri, used in connection therewith, under the control of the same persons and corporations as the Eads Bridge and the railroad corporations used in connection therewith, so as to maintain a monopoly and destroy competition in the business of transporting passengers and freight between the States of Missouri and Illinois, and the several other States and foreign countries, did procure the said Act of February 3, 1887, to be amended by striking out the word "stockholder" in said Section 11, wherever the same occurred therein; and that said amendment was so procured for the purpose of and with the design of having the said owners of the Eads Bridge, and the railroads used in connection therewith, purchase and acquire control of the Merchants Bridge and the railroads used in connection therewith.

Admitted except as to the purpose of the amendment.

In pursuance of the combination, so formed as aforesaid, to control and restrain interstate trade and commerce in the States of Missouri and Illinois, and said other States and foreign countries, on October 3, 1889, an agreement was entered into be-

tween the Terminal Railroad Association, the St. Louis Bridge Company, the Tunnel Railroad Company, the Missouri Pacific Railway Company, the Wabash Railroad Company, in which the lease of July 1, 1881, above mentioned, was cancelled and a new agreement entered into by which the Terminal Railroad Association succeeded as lessee to the entire property of the Eads Bridge and Tunnel Railroad, cars, engines, stations, etc., owned and controlled by the corporation hereinbefore named as parties to the agreement of July 1, 1881.

Agreement admitted, purpose denied.

That afterwards, to-wit: On the 17th day of August, 1893, the defendants, the Missouri Pacific Railway Company, the Louisville and Nashville Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Ohio & Mississippi Railway Company; the Wabash Railroad Company; the St. Louis Bridge Company; the Tunnel Railroad Company of St. Louis; the Terminal Railroad Company of St. Louis; the Union Railway & Transit Company; the Terminal Railroad Company of East St. Louis; the St. Louis Merchants Bridge Terminal Railway Company; the St. Louis Merchants Bridge Company; the East St. Louis & Carondelet Railway Company; the Illinois Transfer Company; the Granite City and Madison Belt Railroad Company; the St. Louis Belt and Terminal Railroad Company; the St. Louis Terminal Railway Company, and the officers and directors of each, contriving and intending unlawfully and unreasonably to restrain the trade and commerce among the several States, and between

said States and foreign countries, as carried on by the above named corporations, and contriving and intending unlawfully to monopolize said trade or commerce, and contriving and intending unlawfully and unreasonably to restrain and prevent competition among said railroads and bridges and contriving and intending to prevent and unreasonably restrain competition and interstate commerce at St. Louis, Missouri, and at East St. Louis, Illinois, between all railway systems and all bridges and ferries entering East St. Louis, Granite City, Madison and East Carondelet, Illinois, and the City of St. Louis, Missouri, from all directions, and contriving and intending unlawfully to deprive the public of the facilities and advantages produced by free and open competition between railroad systems, bridges, ferry and ferry transfer companies and other instruments of interstate commerce, did then and there enter into an unlawful combination and conspiracy to effect a consolidation and control of the properties of the St. Louis Bridge Company; the Tunnel Railroad Company of St. Louis; the Union Railway & Transit Company; the Terminal Railroad of St. Louis; the St. Louis Merchants Bridge Terminal Railway Company; the St. Louis Merchants Bridge; the East St. Louis & Carondelet Railway Company; the Illinois Transfer Railway Company; the Granite City and Madison Belt Railroad Company; the St. Louis Belt & Terminal Railroad Company; the Missouri Pacific Railway Company; the Louisville & Nashville Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company;

Ohio & Mississippi River Railway Company, and the Wabash Railroad Company, under the control of the Terminal Railroad Association of St. Louis, Missouri, and solely as an instrumentality to effect the purpose to unlawfully and unreasonably restrain the interstate trade and commerce, as aforesaid, did proceed to consolidate the last above named competing railroads and bridges in the following manner, to-wit:

"That on the 17th day of August, 1893, the St. Louis Merchants Bridge Terminal Railway Company, hereinafter referred to as the Merchants Company, and the Terminal Railroad Association of St. Louis, hereinafter referred to as the Terminal Association, made and entered into an agreement wherein it was recited that the Merchants Company owned and operated a railroad in the City of St. Louis, Missouri; that said Terminal Association owned and operated a railroad in St. Louis connected with the railroad of said Merchants Company, and that as said Terminal Association desired to aid said Merchants Company in the completion and construction of its railroad, and the payment of its liabilities incurred in said construction, it was therefore agreed between said two corporations:

"That said Merchants Company agreed to grant to said Terminal Association, the right to the perpetual use of all tracks, side tracks, switches, turncuts and turntables, yards, depots and all other terminal facilities then owned or that might thereafter be owned, possessed, controlled, or acquired by said Merchants Company in the City of St.

Louis, Missouri; that said Terminal Association accepted the said grant of right of perpetual use of said terminal facilities, and in payment and compensation therefor guaranteed the payment of all liabilities of said Merchants Company, and further agreed to endorse on or before September 1, 1893, its guarantee of payment of $3,500,000 of 5 per cent first mortgage bonds of said Merchants Company, and in consideration of the agreements hereinbefore set out, said Terminal Association subscribed for 4384 shares of the capital stock of said Merchants Company and the said Merchants Company sold and transferred to said Terminal Association said number of shares of its capital stock, full paid and non-assessable; that said contract above set out was duly executed by the officers of the respective railroad companies, authorized to act in their behalf, and properly acknowledged.

"That on said date there was also an agreement executed between said Terminal Association and the Merchants Bridge Company and the St. Louis Terminal Railway Company, by which the Terminal Association became the assignee of a contract theretofore made between said St. Louis Terminal Railway Company and the Merchants Company, and by means whereof said Terminal Association came into control of the said St. Louis Terminal Railway Company and its property, and has continued to control and does now control and operate the same."

Admitted. Terminal Association in control of St. Louis Transfer Railway.

"That in the year 1893, there was in force and effect an agreement and pooling arrangement between the Wiggins Ferry Company and the St. Louis Terminal Railroad Association and the St. Louis Merchants Bridge Terminal Railway Company, establishing rates for passengers and freight carried by them between the States of Illinois and Missouri, and between said States and other States and foreign countries; that this agreement or a similar one was in effect in the years 1894 and 1895, 1896 and 1897, and thereafter continued in force between the Terminal Association and the Wiggins Ferry Company."

Denied.

"That afterwards, in pursuance of the unlawful combination and conspiracy aforesaid, to control and unlawfully restrain the interstate commerce between the States of Missouri and Illinois, and between said several States and foreign countries, and solely as an instrumentality to effect the purpose thereof, the Missouri Pacific Railway Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Ohio & Mississippi River Railway Company and the St. Louis, Iron Mountain & Southern Railway Company, through their control of the Terminal Association, proceeded to unlawfully and illegally acquire the absolute ownership and control of the St. Louis Merchants Bridge Terminal Railway Company and the bridge and railway corporations controlled by the St. Louis Merchants Bridge Terminal Railway Company, in the following manner, to-wit:

29

"That on or about the first day of May, 1897, the St. Louis Merchants Bridge Terminal Railway Company, sold to said Terminal Association 13,416 additional shares of stock of the St. Louis Merchants Bridge Terminal Railway Company, and that this gave said company the control of the majority of the said St. Louis Merchants Bridge Terminal Railway Company stock, and that from said date said Terminal Association owned and now owns and controls and operates the St. Louis Merchants Bridge Terminal Railway Company and fixes rates to be charged for the transportation of passengers and freight over the lines of said St. Louis Merchants Bridge Terminal Railway Company, and all lines and instruments of interstate commerce, so as aforesaid, controlled by said St. Louis Merchants Bridge Terminal Railway Company, and that said Terminal Association in purchasing a majority of the shares of the stock of the St. Louis Merchants Bridge Terminal Railway Company acquired the ownership and control of the St. Louis Merchants Bridge, and that said Terminal Association now owns and controls and operates the St. Louis Merchants Bridge Company and the Eads Bridge, and without competition, fixes unreasonable rates and tolls to be charged upon both of said bridges alike, thereby operating the same as a single instrument of interstate commerce, and therein enjoying and maintaining a monopoly, thereby depriving the people of the benefit of competition between instruments of such commerce."

Denied as to combination, as to sale of stock by Merchants Bridge Terminal to Terminal Associa-

tion, other than under agreement of August 17, 1893.

Denied as to Terminal Association operating Merchants Bridge Terminal; denied as to rate fixing, and monopoly. Avers competition.

"That after the 17th day of August, 1893, the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railway Company; the Southern Railway Company; the Chicago, Burlington & Quincy Railroad Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Chicago, Rock Island and Pacific Railway Company, became stockholders in the Terminal Association, and each is now the owner of the several amounts of the capital stock of said Terminal Association, as hereinbefore set forth."

Admitted.

"That said fourteen railroad companies above named, as the owners of the capital stock of the Terminal Association, were on the 15th day of July, 1902, operating under one control and management, the St. Louis Terminal Railroad Association, and the lines of railway it controls, and the Eads Bridge and Merchants Bridge, and that said fourteen railroads fixed the charges and tolls to be paid by the public upon said railroads and bridges, and that a common, uniform and unreasonable price was charged as toll for transferring

passengers and freight upon each of said bridges, and that a common, uniform and unreasonable price for the same service was charged for transporting passengers and freight over the respective lines of railway of the St. Louis Merchants Bridge Terminal Railway Company, and the Terminal Railroad Association of St. Louis; and that there was no competition whatever between said railroads or said bridges, or the companies operating the same, and that the same condition exists now and the said Terminal Association and St. Louis Merchants Bridge Terminal Railway Company and the Eads and Merchants Bridges are controlled and unreasonable charges fixed as aforesaid, through the means and instrumentality of the said St. Louis Terminal Railroad Association, and which said last named corporation is in truth and in fact but a holding company for said fourteen railroad companies.

"That by reason of the control of said instruments of interstate commerce, as aforesaid, all competition in the transportation of freight and passengers between the States of Illinois and Missouri, and the several States of the United States, and foreign countries, has become and now is stifled and destroyed and that unreasonable charges are established and fixed and collected by the said Terminal Railroad Association of St. Louis, for the transportation of passengers and freight between said States of Illinois and Missouri, and the several States of the United States, and foreign countries, and that the profit and benefit thereof inures to the said fourteen railroad companies owning the capital stock of said Terminal Association."

Denied. Avers competition. Avers that the Terminal Association is limited to terminal operations.

"That in the year 1902, an arrangement, agreement or contract, the exact terms of which are unknown to the complainant, was entered into between the Terminal Association and the Wiggins Ferry Company, whereby the former company obtained control of the latter company, together with all of its property, consisting of boats, cars and railroad tracks in the States of Missouri and Illinois, and that by reason of said arrangement, contract or agreement, 9,500 shares of the total issue of 10,000 shares of the capital stock of the Wiggins Ferry Company have been deposited with the Mercantile Trust Company of New York City, as trustee, to be held and voted by it for the fourteen railroad companies owning the capital stock of the Terminal Association; that the Terminal Association has pledged as security for an issue of fifty million dollars of bonds, made by said association, said 9,500 shares of the capital stock of the Wiggins Ferry Company.

"That from the year 1902, and at this time, said Terminal Association controls the Wiggins Ferry Company, and all of its railroads and boats, and fixes the rate and toll to be charged for passengers and freight upon the railroads and boats of the said Wiggins Ferry Company.

"That by reason of the control of the Wiggins Ferry Company, by the Terminal Railroad Asso-

ciation of St. Louis, all competition between said companies, in interstate business of transporting passengers and freight, between the States of Illinois and Missouri, and the several other States of the United States and foreign countries, has become and is now stifled and destroyed."

Denied.

23. Consequence and Conclusion.

"Wherefore, complainant says by reason of the foregoing facts the fourteen above named railroad companies which own and control the capital stock of the Terminal Association, acting through said Terminal Association, control and own and operate the Eads and Merchants Bridges, crossing the Mississippi River at St. Louis, Missouri, the Wiggins Ferry Company, with its ferry boats and railroad tracks on either side of the Mississippi River, the Terminal Railway Company of St. Louis, the Terminal Railroad Association of St. Louis, the St. Louis Merchants Bridge Terminal Railway Company, as well as all of the issued and outstanding stock of the Terminal Railroad Company of East St. Louis, Illinois, and all of the issued and outstanding capital stock of the Union Railway & Transit Company of Illinois, and all of the authorized and issued stock of the East St. Louis Belt Railway Company, and also owns and operates and controls the East St. Louis & Carondelet Railroad Company, the Granite City and Madison Belt Railroad Company, the Tunnel Railroad Company of St. Louis, the Madison, Illinois, and St. Louis Railway, the St. Louis Transfer Railway

Company, the Wiggins Car Transfer Company, the East St. Louis Terminal Railroad Company, the East St. Louis Connecting Railway Company, the Illinois Transfer Railway Company, and the St. Louis Belt & Terminal Railway Company, comprising in all about one hundred and fifty miles of railroad.

"That by reason of the facts hereinbefore set out, said fourteen railroad companies above named, through their agent and representative (the Terminal Railroad Company of St. Louis), all use the property of said Terminal Railroad Association for interstate business between Illinois and Missouri, and compel all other railroad companies which are not owners of stock in said Terminal Association to use the said property of the Terminal Association to interstate commerce business between Illinois and Missouri and between said two States and the other States of the United States and foreign countries, and that said fourteen railroads acting through the Terminal Association, as aforesaid, jointly and arbitrarily fix unreasonable charges and tolls to be paid, for freight and passengers to be hauled and transferred in the interstate business between Illinois and Missouri, and between said States and the several States of the United States and foreign countries, and by means of said joint control by the said fourteen railroad companies all competition is stifled and destroyed.

"That, unless complainant prevents the continued existence and carrying out of the combination and conspiracy to unreasonably and unlawfully restrain commerce among the several States and

foreign countries, as aforesaid, the monopoly of the interstate and foreign commerce as carried on as aforesaid by said defendants between said States of Missouri and Illinois, and said several States of the United States, and of foreign countries, will be perpetuated, and the public greatly injured and damaged and the Act of Congress of July 2, 1890, to protect trade and commerce will be circumvented and set at naught and the public be left at the mercy of a monopoly thus created through the combination of the fourteen railroad corporations jointly owning and operating the Terminal Railroad Association of St. Louis.

"That the properties hereinbefore enumerated as instruments of interstate commerce are so operated by the said Terminal Railroad Association of St. Louis (owned and controlled as aforesaid by the said fourteen railroad companies, owning and controlling the stock of said Terminal Association) as to constitute a monopoly in their employment and conduct as aforesaid of all interstate commerce between the States of Illinois and Missouri, and the various States of the United States and foreign countries, and so as to exclude from participation therein in all interstate commerce on the part of carriers of freight and passengers, all others than those named herein as parties to the unlawful combination and conspiracy hereinbefore set forth.

Prayer.

"In Consideration Whereof, and inasmuch as adequate relief in the premises can only be obtained in this Court, the United States of America prays your Honors to order, adjudge and decree that the combination and conspiracy hereinbefore described is unlawful, and that all acts done or to be done in carrying it out, are in derogation of the common rights of the people of the United States, and in violation of the Act of Congress of July 2, 1890, entitled 'An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopoly', and that the defendants and each of them and every one of them, and their officers, directors, stockholders, agents and servants, and each of them be perpetually enjoined from doing any act in pursuance of or for the purpose of carrying out the same in the future; that all agreements made between the defendants looking to the operation of the St. Louis Bridge, known herein as the Eads Bridge, and railroad tracks crossing the same and terminals connecting therewith, in a common or non-competing interest with the St. Louis Merchants Bridge, known herein as the Merchants Bridge, and railroad tracks crossing the same and terminals connecting therewith be declared void, and the defendants, parties to such agreements, be enjoined and forbidden from the further carrying out of such agreements or the operation of such bridges, railroad tracks and terminals in such common or noncompetitive interest; that the said defendants and each of them, their agents, servants and representatives, be enjoined and forbidden

from operating, controlling and maintaining the properties hereinbefore described as a common instrument or agency of interstate commerce, under the common control of the fourteen railroad companies, owning the capital stock of the Terminal Railroad Association; and in addition that the several defendants be respectively enjoined as follows:

"1st. That the said fourteen railroad companies, the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, their stockholders, officers, directors, executive committees, agents and servants, each and every one of them be perpetually enjoined from voting, or in any manner acting as owner of any of the shares of the capital stock of the Terminal Railroad Association of St. Louis, or of the Wiggins Ferry Company, or of the Merchants Bridge Terminal Railway Company.

"2nd. That the defendant, the Terminal Railroad Association of St. Louis, its stockholders, directors, officers, agents and servants and each and

every one of them, be perpetually enjoined from in any manner recognizing or accepting the said fourteen railroad companies, to-wit: The Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railway Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Houte Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, as the owners or holders of any share or shares of its capital stock, and from permitting said companies to vote such stock, whether by proxy or otherwise, and from paying any dividends upon such stock to said companies or their assigns (except as ordered by this Court), and from recognizing as valid any transfer or mortgage, pledge or assignment by such company of such stock unless authorized by this Court.

3rd. That the defendant, the Terminal Railroad Association of St. Louis, and the owners of its capital stock, to-wit: The Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railway Company; the St. Louis, Iron Mountain & Southern

Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company and the Missouri Pacific Railway Company, their stockholders, officers, directors, agents or servants, and each and every one of them, be perpetually enjoined from in any manner voting, controlling or acting as the owner of any of the shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, or the shares of the capital stock of the St. Louis Merchants Bridge, or the Wiggins Ferry Company, or the Madison, Illinois & St. Louis Railway Company, or the St. Louis Transfer Railway Company, or the Wiggins Car Transfer Company, or the St. Louis Terminal Railway Company, or the Granite City & Madison Belt Railway Company, or the East St. Louis Connecting Railway Company.

"4th. That the St. Louis Merchants Bridge Terminal Railway Company, and the St. Louis Merchants Bridge, the Wiggins Ferry Company; the Madison, Illinois and St. Louis Railway Company; the Wiggins Car Transfer Company; the St. Louis Transfer Railway Company; the St. Louis Terminal Railway Company; the Granite City & Madison Belt Railway Company; the East St. Louis Belt & Terminal Railway Company; the East St. Louis & Carondelet Railway Company; the Terminal Railroad Company of St. Louis; the East St. Louis Terminal Railroad Company; the East

St. Louis Connecting Railroad Company and the Illinois Transfer Railway Company, their stockholders, officers, directors, agents and servants, and each and every one of them, be perpetually enjoined from in any manner recognizing or accepting the Terminal Railroad Association of St. Louis, or the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company as the owners or holders of any of the shares of their respective capital stock and from permitting said Terminal Railroad Association of St. Louis, or any of said railroad companies, to-wit: The Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railway Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St.

Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; the Missouri Pacific Railway Company, their directors, stockholders, officers, agents or servants, from voting such stock, in either of said companies, whether by proxy or otherwise, and from paying any dividends upon the stock of the St. Louis Merchants Bridge Terminal Railway Company; St. Louis Merchants Bridge; Wiggins Ferry Company; Madison, Illinois & St. Louis Railway Company; St. Louis Transfer Railway Company; Wiggins Car Transfer Company; St. Louis Terminal Railway Company; Granite City & Madison Belt Railway Company, or the East St. Louis Belt Railway Company, to said Terminal Railroad Association, or to its assigns, or to either one of said fourteen railroad companies, to-wit: The Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company and the Missouri Pacific Railway Company, unless authorized by this Court, and from recognizing as valid any transfer, mortgage, pledge or assignment

by said Terminal Railroad Association of St. Louis, or the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company and the Missouri Pacific Railway Company, or the stock of said St. Louis Merchants Bridge Terminal Railway Company; the St. Louis Merchants Bridge; the Wiggins Ferry Company; the Madison, Illinois & St. Louis Railway Company; St. Louis Transfer Railway Company; the Wiggins Car Transfer Company; the St. Louis Terminal Railway Company; the Granite City & Madison Belt Railway Company, or the East St. Louis Belt Railway Company, unless authorized by this Court.

"5th. That the individuals above named and each of them, and each and every person combining or conspiring with them as hereinbefore charged, and their trustees, agents and assigns, present or future, and each and every one of them, be perpetually enjoined from doing any and every act or thing hereinbefore complained of, or in furtherance of the combination or conspiracy described herein, or intended or tending to place the

capital stock of the Terminal Railroad Association of St. Louis, in any of the corporations controlled by it, or the St. Louis Merchants Bridge Terminal Railway Company, or any of the corporations controlled by it, or the stock of either the Merchants or the Eads Bridge, or the said two bridges or the competing railway systems operated by the St. Louis Merchants Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, or the competitive interstate or foreign trade or commerce carried on by them under the control legally or practically of the defendant, the Terminal Railroad Association of St. Louis, or either or all of the said fourteen railroad companies above named, who now own the capital stock of the Terminal Railroad Association, or of any person or persons, association or associations, corporation or corporations acting for or in lieu of said Terminal Railroad Association of St. Louis, or the said fourteen railroad companies above named, owning and controlling the stock thereof, in carrying out the unlawful combination or conspiracy hereinbefore complained of in this petition.

"The United States prays for such other and further relief as the nature of the case may require and the Court may deem proper in the premises, to the end therefore that the United States of America may obtain relief, to which it is justly entitled in the premises. May it please your Honors to grant to it writs of subpoena directed to the said defendants, the Terminal Railroad Association of St. Louis; the St. Louis Merchants Bridge Terminal Railway Company; the Wiggins Ferry Company;

the St. Louis Bridge Company; the St. Louis Merchants Bridge Company; the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company and the Missouri Pacific Railway Company, together with all the directors of the Terminal Railroad Association of St. Louis, to-wit: A. A. Allen, S. M. Felton, A. J. Davidson, W. M. Green, J. T. Harahan, C. S. Clarke, H. Miller, Benjamin McKean, Joseph Ramsey, Jr., C. E. Schaff, George E. Evans, T. C. Powell, J. F. Stevens, A. G. Cochran and W. S. McChesney and to each and every one of them, commanding them, and each of them to appear herein and answer (but not under oath) the allegations contained in the foregoing petition, and abide by and perform such order or decree as the Court may make in the premises, and that pending the final hearing of this case a temporary restraining order may issue, enjoining the defendants and their associates and each of them, and their stockholders, directors, officers, agents and servants, as hereinbefore prayed."

Affirmative Averments of Answer:

1874. Eads Bridge and terminals constructed. Circumstances leading to Bridge—Acts creating companies, etc. Creation of **U. R. & Tr. St. L.** and **U. R. & Tr. Ill.**—averment that neither operated as common carriers—merely hauled cars. Union Depot Company created 1874, Union Station, 12th & Poplar, 1875.

1875-1879. Union R. & Tr. St. L. hauled cars over St. Louis Bridge to Union Station. 1879, U. R. & Tr. St. L. and U. R. & Tr. Ill. leased to St. Louis Bridge and Tunnell R. R., St. Louis.

1880. Terminal R. R. St. Louis organized.

1880. Terminal R. R., E. St. Louis, organized. Leased properties to St. L. Bridge and Terminal R. R. St. L. Cars and trains by these over bridge to 1881.

1881. July lease to Wabash and M. P. Operation by these to 1889.

1889. At instance of C. C. C., St. L., Wabash, O. & M., St. L. I. M., L. & N., M. P., U. R. & Tr. and Term. R. R. consolidated and **Term. R. R. Ass'n** formed.

By this Term. Ass'n acquired property U. R. & Tr. Union Depot, Term. R. R., stock of U. R. & Tr. Ills. and Term. R. R. Ills. and lease Eads Bridge and Tunnel.

Averment that all these arrangements were to provide terminals for E. St. L. & St. L. to switch, etc., for all roads without profit to shareholders Terminal Association. Properties open to all lines not members on same terms as to members.

1889. Mortgage by Terminal Association to Central Trust.

1886. **Merchants Bridge.**

1887. Merchants Bridge Terminal R. R., 8th and Gratiot to west of Merchants.

1889. Merchants Company leased bridge.

1889. Mad. Ill. & St. L. R. R. owned by Merchants Co.

1893. Bridge, etc., passed into control Merchants Co.

Averment, that 1893 Merchants Co. insolvent.—Properties distinct from Terminal Association and at right angles therewith—no connection with Union Station.

Averment, that 1893 R. R. lines entering and about to enter St. Louis from north desirous to reach Union Station, same entering East St. Louis could more advantageously reach Union Station if continuous system was effected by connection between Terminal Association and Merchants Co. Such connection indispensable to all roads. **Agreement Aug. 13, 1893, by which Terminal Association secured control of Merchants Co. and operated its properties.** Agreement.

1902. **Wiggins Ferry** owned St. L. Transfer R. R. and E. St. L. Ry. and entire river front north of Eads Bridge.

Proprietary companies bought capital stock Wiggins. Terminal Association terminals passed to same companies.

1902. Mortgage by Terminal Association. $18,000,000 pledge Wiggins stock—main security agreement of proprietary companies to use in **perpetuity** terminal facilities of Terminal Association, $14,000,000 bonds provided: $1,000,000 per year from 1906—proprietary companies agreed to use

facilities in perpetuity and guarantee proportionate interests. Terminal Association to be operated at cost—in case deficiency each road to contribute in proportion.

Subdivisions 77-85 inclusive—acquisition on necessities and advantages to public arrangement. Averment that tolls and charges have been reduced 40 to 60 per cent.

Subdivision 86-100 inclusive — argument upon validity of scheme, disclaimer of unlawful purpose, claim of benefit to public, of necessity for consolidation, its economy, convenience, etc.—all without profit to operators, which own no cars and handle no freight on its own account. Tolls fixed only to cover fixed charges, etc., 87. Monopoly avoided rather than created—88.

General Replication.

The testimony was taken and reported to the Circuit Court and the four judges heard the arguments, and, being divided in opinion, the cause was certified to the Supreme Court, where upon application by the Government, on January 31st, 1910, the certificate was dismissed and it was ordered that the cause be remanded to the Circuit Court to proceed therein in conformity to law.

A motion requesting reargument was filed by the Government and overruled, and the Circuit Court dismissed the cause by the following order:

> "And whereas the complainant cannot prevail because only two of the judges are of the opinion that it is entitled to any relief, while two are of the opinion that it is entitled to no relief;

"It is hereby ordered that the motion for a re-argument of this case be, and the same is hereby, denied and that the bill of the complainant be, and it is hereby, dismissed."

Thereupon Assignment of Errors was filed by the Government and a Petition for Appeal, and on August 2d, 1910, an order allowing an appeal was signed by the Honorable Willis Van Devanter, at that time one of the Circuit Judges.

No. 5250.

Praecipe for transcript.

The clerk of said court, instead of preparing a full transcript of the record and proceedings for use in the United States Supreme Court in the above-entitled cause, as directed by the order entered therein granting an appeal, will please copy and certify the following only, to-wit:

1. Mandate of Supreme Court remanding cause.
2. Application for reargument.
3. Order denying reargument and dismissing bill.
4. Assignment of errors.
5. Petition for appeal.
6. Order allowing appeal.

CHAS. A. HOUTS,
United States Attorney.

The mandate, application for reargument, order denying reargument and dismissing bill, assignment of errors, petition for appeal, and order allowing appeal are respectively in words and figures as follows, to-wit:

(*Mandate of Supreme Court remanding cause.*)

183 UNITED STATES OF AMERICA, *ss:*

The President of the United States of America, to the honorable the judges of the Circuit Court of the United States for the Eastern District of Missouri, greeting:

(SEAL)

Whereas lately in the Circuit Court of the United States for the Eastern District of Missouri before you or some of you, in a cause between The United States of America, complainant, and Terminal Railroad Association of St. Louis et al., defendant, No. 5250, wherein the judges of the said Circuit Court were divided in opinion, as by the inspection of the transcript of the record of the said Circuit Court, which was brought into the Supreme Court of the United States agreeably to the act of Congress in such case made and provided, fully at large appears;

And whereas in the present term of October, in the year of our Lord one thousand nine hundred and nine, the said cause came on to be heard before the said Supreme Court, on the said transcript of record, and on a motion to dismiss which was submitted by counsel for the United States:

On consideration whereof, it is now here ordered, adjudged, and decreed by this court that said certificate be, and the same is hereby, dismissed.

And it is further ordered that this cause be, and the same is hereby, remanded to the said Circuit Court with directions to proceed therein in conformity with law.

JANUARY 31, 1910.

You, therefore, are hereby commanded that such further proceedings be had in said cause, in conformity with the decree of this court as according to right and justice, and the laws of the United States, ought to be had, the said certificate notwithstanding.

184 Witness the honorable Melville W. Fuller, Chief Justice of the United States, the 19th day of March, in the year of our Lord one thousand nine hundred and ten.

JAMES H. MCKENNEY,
Clerk of the Supreme Court of the United States.

(Endorsed:) Filed May 5, 1910. James R. Gray, clerk.

185 (*Application for reargument.*)

United States Circuit Court for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA

vs.

TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET AL.

No. 5250.

Now comes the United States of America by Charles A. Houts, United States attorney for the Eastern District of Missouri, and shows to the court that on the 31st day of January, 1910, the above entitled cause, being then pending in the Supreme Court of the United States upon a certificate from this court, that the judges of this court were divided in opinion, and a motion to dismiss said cause having been filed in the Supreme Court of the United States by the complain-

ant, United States of America, the Supreme Court by its order of record duly entered in said cause, did dismiss said certificate and remand said cause to this court, with directions to proceed therein in conformity with law; that said mandate of the Supreme Court was duly filed in said cause on the 5th day of May, 1910.

The complainant in said cause further shows that in the opinion of its counsel a reargument of said cause would promote and aid in the proper disposal thereof by this court, and to that end complainant asks that said cause be reset for reargument at such convenient time as the court may direct, and that notice of the time and place of such resetting and reargument be given by the clerk of this court to the parties to this cause.

CHARLES A. HOUTS,
United States Attorney for the Eastern District of Missouri, for Complainant.

(Endorsed:) Filed June 6, 1910. James R. Gray, clerk.

186 (*Order denying reargument and dismissing bill.*)

United States Circuit Court of the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET.

No. 5250.

Before Sanborn, Van Devanter, Hook, and Adams, circuit judges.

Whereas upon full argument and careful consideration of this case two of the judges of this court were of

the opinion that the complainant should prevail and two of the judges of this court were of the opinion that the defendants should prevail, and each of them is of the same opinion still, and the Supreme Court of the United States has dismissed the certificate of this division of opinion and has remanded this case to this court with direction to proceed in conformity with the laws of the United States;

Whereas honorable Charles A. Houts, United States attorney for the Eastern District of Missouri, has made a motion on behalf of the complainant that this court listen to a reargument of this case, and the judges are unanimously of the opinion that further argument thereof would be futile;

And whereas the complainant cannot prevail because only two of the judges are of the opinion that it is entitled to any relief, while two are of the opinion that it is entitled to no relief;

It is hereby ordered that the motion for a reargument of this case be, and the same is hereby, denied and that the bill of the complainant be, and it is hereby, dismissed.

WALTER H. SANBORN,
WILLIS VAN DEVANTER,
WILLIAM C. HOOK,
ELMER B. ADAMS,
Circuit Judges.

ST. PAUL, MINNESOTA, June 4, 1910.

(Endorsed:) Filed June 6, 1910. James R. Gray, clerk.

187 (*Assignment of errors.*)

UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri, ss:

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

UNITED STATES OF AMERICA, COMPLAINANT,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF

St. Louis; the St. Louis Merchants Bridge Terminal Railway Company; the Wiggins Ferry Company; the St. Louis Bridge Company; the St. Louis Merchants' Bridge Company; the Missouri, Kansas & Texas Railway Company; the St. Louis & San Francisco Railway Company; the Chicago & Alton Railway Company; the Baltimore & Ohio Southwestern Railroad Company; the Illinois Central Railroad Company, the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chica-

go, Rock Island & Pacific Railway Company; the Missouri Pacific Railway Company; the Central Trust Company of New York; A. A. Allen; S. M. Felton; A. J. Davidson; W. M. Green; J. T. Harahan; C. S. Clark; H. Miller; Benjamin McKean; Joseph Ramsey; George E. Evans; C. E. Schaff; T. C. Powell; J. F. Stevens; A. G. Cochran; W. S. McChesney; Julius Walsh; V. W. Fisher; and S. D. Webster, defendants.

Assignment of errors.

Complainant, United States of America, by Charles A. Houts, United States attorney for the Eastern District of Missouri, acting in pursuance of the express instructions of the Attorney General in that behalf given, files the following several assignments of error upon which it will rely upon its appeal from the final judgment and decision made herein by this honorable court on the 4th day of June, A. D. 1910, saying that in the record of proceedings herein and in said final judgment there is manifest error, and for error the
188 complainant assigns, on the appeal, the following:

I.

The complainant assigns as error the action of the Circuit Court in making and entering in this cause its order of June 4th, A. D. 1910, and adjudging and decreeing the dismissal out of court of complainant's bill of complaint herein.

II.

The complainant assigns as error the failure and refusal of the Circuit Court by its decree herein to adjudge and decree the complainant the relief prayed for in its bill of complaint.

III.

The complainant assigns as eror the failure and refusal of the Circuit Court under the evidence in this cause to adjudge and decree that the defendants had entered into, prior to the institution of this cause, and at the time of the institution thereof were engaged in carrying out a combination and conspiracy in restraint of trade and commerce among the several States as described in the complaint herein, contrary to and in violation of the act of Congress of July 2d, 1890, entitled, "An act to protect trade and commerce against unlawful restraints and monopoly."

IV.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and decree that the several defendants (other than the Terminal Railroad Association of St. Louis, St. Louis Merchants Bridge Terminal Railway Company, Wiggins Ferry Company, and the St. Louis Bridge Company) owned and controlled the entire capital stock of the defendant Terminal Railroad Association of St. Louis, and that such ownership and control constitute a combination in restraint of trade and commerce among the several States and between said States and foreign countries contrary to the act of July 2d, 1890, entitled, "An act

to protect trade and commerce against unlawful restraints and monopoly."

189 V.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and decree null and void the several agreements between the defendants herein, described in complainant's bill of complaint, whereby the defendant, the Terminal Railroad Association of St. Louis, acquired the ownership and control of the St. Louis Bridge (designated in the complaint as the "Eads Bridge"), and the railroad tracks crossing the same, and terminals connecting therewith; and also the St. Louis Merchants Bridge (designated in the complaint as the "Merchants Bridge"), and the railroad tracks crossing the same, and terminals connecting therewith. And also the failure and refusal of the Circuit Court to enjoin the further carrying out of such agreements and the operation of such bridges, railroad tracks, and terminals upon a noncompetitive basis with each other.

VI.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and declare null and void the several agreements between the defendants herein described in the complainant's bill of complaint looking to the operation of the St. Louis Bridge, known as the Eads Bridge, and railroad tracks crossing the same and terminals connecting therewith, in a common or noncompeting interest with the St. Louis Merchants Bridge, known herein as the Merchants Bridge, and railroad tracks crossing the same and ter-

minals connecting therewith, and to enjoin and forbid the defendants, parties to such agreements, from the further carrying out of such agreements or the operation of such bridges, railroad tracks, and terminals in such common or noncompetitive interest, and to enjoin and forbid the defendants and each of them, their agents, servants, and employes from operating, controlling, and maintaining the properties hereinbefore described as a common instrument or agency of interstate commerce under the common control of the fourteen railroad companies owning the capital stock of the Terminal Railroad Association.

VII.

The complainant assigns as error the failure and refusal of the Circuit Court to enjoin the defend-
190 ants, the Missouri, Kansas & Texas Railroad Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railroad Company, the Illinois Central Railroad Company, the St. Louis, Iron Mountain & Southern Railway Company, the Chicago, Burlington & Quincy Railway Company, the St. Louis, Vandalia & Terre Haute Railroad Company the Wabash Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railroad Company, the Louisville & Nashville Railroad Company, the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, their stockholders, officers, directors, executive committees, agents, and servants, from voting or in any way acting as the owner of any of the shares of the capital stock of the Terminal Railroad Association of St. Louis, of the Wiggins Ferry Com-

pany, and of the St. Louis Merchants' Bridge Terminal Railway Company; and to enjoin the Terminal Railroad Association of St. Louis its stockholders, officers, agents, and servants, from in any manner recognizing or accepting the defendants hereinbefore in this assignment specified, as the owners or holders of any share or shares of its capital stock, and from allowing such specified defendants to vote such stock, and from paying any dividends upon such stock to said defendants.

VIII.

The complainant assigns as error the failure and refusal of the Circuit Court to enjoin the defendant, the Terminal Railroad Association of St. Louis, and the said named railroad companies who own its capital stock as set out in the bill of complaint, their stockholders, officers, directors, agents, and servants, from voting, controlling, or acting as the owner or owners of any of the shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, the shares of the capital stock of the St. Louis Merchants Bridge Company, the shares of the capital stock of the
Wiggins Ferry Company, the shares of the capi-
191 tal stock of the Madison, Illinois & St. Louis Railway Company, the shares of capital stock of the St. Louis Transfer Railway Company, the shares of capital stock of the Wiggins Car Transfer Company, the shares of capital stock of the St. Louis Terminal Railway Company, the shares of capital stock of the Granite City & Madison Belt Railway Company, and the shares of capital stock of the East St. Louis Connecting Railway Company, and to enjoin said last named companies from recognizing or accepting the said Ter-

minal Railroad Association of St. Louis, and the fourteen defendant railroad companies described in the bill of complaint as the owners of the capital stock of the Terminal Railroad Association of St. Louis, as the owners or holders of any of the shares of their respective capital stocks.

In order that the foregoing assignments of error may be and appear of record, the complainant presents the same to the court and respectfully prays that such disposition be made thereof as is in accordance with law and the statutes of the United States in such case made and provided.

CHARLES A. HOUTS,
United States Attorney for the Eastern District of Missouri.

ESTABLISHED FACTS

SHOWING COMBINATION AND MONOPOLY

ESTABLISHED FACTS.

1. The Wiggins Ferry Company created February 11th, 1853. Record 15.

This company operated a ferry on the Mississippi River from East St. Louis, Illinois, to St. Louis, Missouri. This ferry was and is a carrier of freight and passengers and a medium of interstate commerce between the two cities. The company owned and operated properties, tracks and ferries open to use of all railroads. Record 2301. It was operated in competition with both bridges, hereafter referred to as the "Eads Bridge" and the "Merchants Bridge," Record, 82, 85, 86.

At the outset the ferry company was essentially a ferry company. As railroads came to have their termini in East St. Louis and cars came to be ferried across the river, the ferry company acquired and operated various terminal and connecting railroad lines, so that in 1902, when the ferry company passed into the control of the "proprietary companies," it was operating the East St. Louis connecting Railway Company in Illinois, which crossed and practically connected all railroads coming to the river; and on the west side it was operating the St. Louis Transfer Railway, which ran on the river front and connected lines of the "proprietary companies" on the west side of the river. In 1902 the company owned the entire river front for about three miles on the main shore and the entire front of the Island, and on the property owned by it between the river front and

the termini of the "proprietary companies" were the tracks (some twenty-five or thirty miles) of the Wiggins Ferry connecting with such roads—Record, Vol. 2, page 76—and was operating the Transfer Railway which on the west side connected the "Merchants Bridge" with the "Iron Mountain," the "Missouri Pacific," the "Burlington" and the "Wabash"—Record, Vol. 2, pages 78, 79. The company reached a larger body of private industries and independently, by reason of the extent of its tracks, had more **complete** and direct connection with individual railroads than had the "Terminal Association." Record, Vol. 5, page 2746. "On the east side of the river, the Wiggins Ferry Company had connection with all the lines up and down the levee; their connections there were complete and of a direct nature with all of the railroads." Record, Vol. 5, page 2747. **All** the railroads on the west side could and did use the Wiggins Ferry Tracks for the purpose of handling the commerce of St. Louis and East St. Louis across the river. Record, Vol. 5, page 2748.

3. The St. Louis Bridge, known as the **"Eads Bridge"—and its connections.**

The St. Louis Bridge Company known as "Eads Bridge"—created December 18, 1878.

Complainant Exhibit 2, Record, Vol. 2, page 12.

This company acquired the properties of the St. Louis & Illinois Bridge Company and maintained a railroad, wagon and pedestrian bridge across the Mississippi River from East St. Louis, Illinois, to St. Louis, Missouri, connecting with a tunnel lead-

ing from the western end of the bridge, which was owned by the St. Louis Tunnel Railroad Co.

This purchase was made in 1878.

April 13, 1874, the Union Railway and Transit Company was created under the laws of Missouri —Record, Vol. 2, page 11.

December 18, 1878, the **Tunnel Railroad** of St. Louis, which acquired the property of the **St. Louis Tunnel Railroad Co.** was created. Record, Vol. 2, page 12.

February 25, 1880, the **Terminal Railroad of St. Louis,** was created under the laws of Missouri. Record, Vol. 2, page 12.

January 1, 1879, the Bridge and Tunnel companies leased the properties of the Union Railway and Transit Company and **March 3, 1880,** they leased the properties of the Terminal Railroad of St. Louis and the Terminal Railroad of East St. Louis. Record, Vol. 2, page 12.

July 30, 1889, the Union Railway and Transit Company and the **Terminal Railroad of St. Louis** were consolidated under the name of the **Terminal Railroad Association of St. Louis.** Record, Vol. 2, page 12.

These various railroads and other companies were created to enable the Bridge Company to secure the use of its bridge by the railroads having termini in East St. Louis and those having termini or starting points in the City of St. Louis.

October 3, 1889, the **Terminal Railroad Association** succeeded as lessee in perpetuity to the entire property of the **"Eads Bridge" and Tunnel Railroad, cars, engines and stations.**

This was the situation August 17, 1893.

The pooling of earnings by defendants, Wiggins Ferry Company and Terminal Company, to eliminate competition and maintain monopoly and arbitrary.

After the "Eads Bridge" had been built and acquired by the railroads, the Wiggins Company and the railroads, acting through the defendant, The Terminal Association, entered into a **pooling** agreement whereby competition in the interstate haul from Illinois to Missouri was eliminated and the rates to be charged were agreed upon. See Record, pages 86 and 87.

Wiggins Company, Terminal Company and Merchants Terminal Company Pool.

After the Merchants Bridge and Terminal Railway was completed, rates for the interstate haul between the termini in Illinois of the Eastern roads and St. Louis, Missouri, were cut by the Merchants Company. See Record, page 86.

This rate cutting was followed by an agreement between the three companies, the Merchants Company, the Wiggins Company and the Terminal Company, for a division of the earnings of the three roads on a tonnage basis, for the traffic carried between the termini of the Eastern railroads in Illinois and St. Louis, Mo. This will be shown by the testimony of the president of the Wiggins Company in Record, page 86; also by the testimony of the man who had charge of the records of the pool. Record, Vol. 2, pages 112 to 122, and 86, 180, 181, 183.

Control of Conlogue Road and Interstate Car and Transfer Secured by Terminal Railroad Association.

Prior to 1902, the Pennsylvania Company had built a road known as the "Conlogue" road, extending southward from a connection with the railroads in Illinois to a point on the Illinois side of the Mississippi River, where connection was made with a car transfer ferry in South St. Louis operated by the Missouri Pacific Railway Company. Over this line several hundred freight cars were sent daily by ferry by the Pennsylvania Railroad across the Mississippi River. This haul was made at the rate of $2.00 per car. This was about one-third of what the Terminal charged for the same haul.

Mr. Walsh testified the Terminal bought the "Conlogue" road, six miles in length, and paid $1,250,000 cash for it from the proceeds of the sale of bonds authorized and issued after the Wiggins Company passed into the hands of the Terminal Company. Record, Vol. 2, pages 500, 501 and Vol. 4, page 2282.

Interstate Car and Transfer.

Was an association organized to compete with the Terminal; had car ferries to transfer trains across the river to St. Louis; had property worth about $225,000, according to the testimony of its manager, and sold to the Terminal for $640,000. Record, Vol. 4, pages 2360, 2541-44-47; Vol. 2, page 539.

4. The St. Louis Merchants Bridge Company, known as the **"Merchants Bridge,"** and **its connections.**

St. Louis Merchants Bridge Company organized under laws of Illinois, **May 11, 1886.** Record, 12.

Organized to compete with Eads Bridge and Wiggins Ferry Company. Record, page 40.

By Act of Congress, February 3, 1887, Section 11, it was provided that no person who was a stockholder or manager, or director of any other bridge over the Mississippi River should be a **stockholder**, director, or manager of the bridge therein provided for, but September 1, 1888, this act was amended by striking out the word "stockholder" in the section wherever it appeared. This was done obviously to permit the sale of the bridge stock and control to some other bridge company or its stockholders. It was done without the knowledge of the chairman of the finance committee of the Bridge Company. Record, Vol. 2, 40 et seq.

Operated a railroad bridge across the Mississippi River between Venice, Illinois, and St. Louis, Missouri, and owned a franchise to operate a railroad in the City of St. Louis, to-wit, the Merchants Terminal Railway, which extended to the Union Depot in St. Louis. Record, Vol. 2, page 36.

August 1, 1893, the Bridge Company leased its property to the Madison, Illinois and St. Louis Railway Company.

August 17, 1893, the Terminal Railroad Association acquired the use and control of the Madison, Illinois and St. Louis Railway and the Merchants Bridge and the Merchants Terminal Railroad. Exhibit, Record, Vol. 9, pages 3333, 3334.

CONSEQUENCES OF FOREGOING ACTS.

As of date December 18th, 1878.

1. Wiggins Ferry Company — medium of interstate commerce operating railroad, team and passenger ferry between Illinois and Missouri.

2. St. Louis Bridge—

"Eads Bridge"—medium of interstate commerce, operating in competition with Wiggins Ferry Company a railroad, team and passenger bridge between Illinois and Missouri.

As to date May 11th, 1886.

St. Louis Merchants Bridge Company—

"Merchants Bridge" operating as a medium of interstate commerce a railroad bridge between Illinois and Missouri in competition with "Eads Bridge" and Wiggins Ferry Company.

All of the foregoing competing companies owned and operated in both Illinois and Missouri tracks and railroad lines connecting with railroads whose commerce crossed the Mississippi River, through the medium of said companies.

As to date August 17th, 1893.

The **Terminal Railroad Association**, then owned by seven "proprietary railroad" companies defendants herein, having October 3rd, 1889, acquired the "Eads Bridge" and connecting tracks and railroads, acquired the "Merchants Bridge" and connecting tracks and operated both bridges as one, thus ending all competition between them.

As of date December 16th, 1902.

The **Terminal Railroad Association,** owned by fourteen railroad companies defendants herein, which companies practically carried on all of the interstate commerce across the Mississippi between East St. Louis, Illinois, and St. Louis, Missouri, acquired the Wiggins Ferry Company and properties by purchase of its stock divided equally among the "railroad companies" and at the date of the filing of the petition, was operating in the same interest all three of the formerly competing media of interstate commerce.

Matters Evidential of Combination, Monopoly and Consequences Injurious to Interstate Commerce

MATTERS EVIDENTIAL OF COMBINATION IN RESTRAINT OF COMMERCE BETWEEN STATES IN VIOLATION OF THE ACT OF CONGRESS.

1. **The Terminal Railroad Association.**

Organized by consolidation of **Terminal Railroad of St. Louis** and **Union Railway and Transit Company—July 30th, 1889.**

The Terminal Railroad Association of St. Louis formed by "Missouri Pacific," "Wabash," "Iron Mountain," "Cleveland, Cincinnati, Chicago & St. Louis," "Ohio & Mississippi," "Louisville & Nashville" and "Vandalia" railroads each owning one-seventh of the stock—October 1st, 1889.

The control of the capital stock and properties of the Union Railway and Transit Company of Illinois, the Terminal Railroad of East St. Louis and the Union Depot Company of St. Louis (corporations incident to the "Eads Bridge"), was acquired by the consolidated company. The lease of the St. Louis Bridge and Tunnel Company was assigned and all the property of the "Eads Bridge" acquired by the consolidated company, October 3rd, 1889. Record Exhibits, pages 1846 to 1853.

Contracts Made By Defendants in Restraint of Interstate Commerce.

The Terminal Railroad Association of St. Louis was organized for the purpose of and was used

to unreasonably restrain and monopolize interstate commerce.

This is clearly shown by the agreement of Oct. 1st, 1889, between Jay Gould, of New York City, and six railroads, in which contract Gould **agreed to** (and did afterwards) **organize the Terminal Railroad Association of St. Louis** by consolidating railroad companies and a bridge and tunnel he owned and controlled in Missouri and Illinois and which were engaged in interstate commerce at St. Louis, Missouri; and in said contract Gould agreed to convey to each of the seven roads a one-seventh of the seven millions of dollars of capital stock of The Terminal Railroad Association of St. Louis **whenever** each of said companies should sign a written agreement (which the railroad companies did) containing the following clause, relative to the use of the properties of The Terminal Railroad Association, to-wit:

"Each of the proprietary companies * * * hereby covenant and agree that it will forever make use of the bridge **and terminal properties of the first party as above described, for all freight and passenger traffic within its control, through, to and from St. Louis and destined to cross** the Mississippi River at St. Louis, and pay therefor **as herein provided.**"

Vol. 8, of Exhibits, p. 1861, clause 3.

See agreement for organization of Terminal Railroad Association of St. Louis, Vol. 8, of Exhibits, pp. 1849 to 1853.

This clause **restrained** commerce handled by the seven railroads for all time, to **the particular in-**

struments used for the **movement of** interstate traffic, at St. Louis, Mo., controlled by the Terminal Railroad Association.

The same clause practically was written into the Guaranty Agreement of 1902, when the Wiggins property was bought and the eight additional lines became part owners of the property of the Terminal Railroad.

See Exhibits, Vol. 8, p. 1868.

These two contracts each prohibited the admission of the new members except by unanimous consent.

These contracts show clearly **the intent and purpose** in creating The Terminal Railroad Association of St. Louis was to control and restrain and monopolize interstate commerce at St. Louis, Mo. These **contracts were not in aid of but in restraint of interstate commerce.**

August 17th, 1893, the consolidated company acquired the "Merchants Bridge and properties."

Afterwards in 1902, other companies making up the fourteen "proprietary companies" became joint owners with the original seven companies. The additional companies were the "St. Louis & San Francisco Company," the "Rock Island," the "Missouri, Kansas & Texas," the "Southern," "Illinois Central," "Chicago & Alton" and the "Burlington."

The **Consolidated Company** acquired the stock of the Wiggins Ferry Company and thenceforward operated the "Eads Bridge," the "Merchants Bridge" and the "Wiggins Ferry" in the same interest.

Prior to October, 1905, the defendant Terminal Association carried freight and passengers to and from the States of Illinois and Missouri. Record, Vol. 2, page 282.

The combination represented by the Terminal Association handled fully **ninety-five** per cent of the business, consisting of in-bound and out-bound freight, between the States of Illinois and Missouri at the City of St. Louis. Record, Vol. 2, page 286.

The consolidation handled and routed over its lines all of the through business in every direction passing through St. Louis and coming from all parts of the country.

In November, 1891, a **tonnage** pool was made between the Merchants Terminal Railway, the St. Louis Terminal Railroad Association and the Wiggins Ferry which lasted four or five years. Record, Vol. 2, page 106. This was with reference to a division of the earnings of the three corporations. Record, Vol. 2, page 85.

The combination—The Terminal Railroad Association—operates passenger trains for fares charged passengers over the "Merchants Bridge" between the Union Station in St. Louis and the Cities of Madison and Granite City in Illinois. Record, Vol. 2, pages 515, 516; Vol. 4, page 2424. It owns freight cars and machine shops.

It operates what is known as a "stock yards train," for fares received from passengers over the "Eads Bridge," between St. Louis, Missouri, and the "National Stock Yards" in East St. Louis, Illinois. Record, Vol. 2, page 518.

It receives all revenues from the foot passengers and wagon traffic over the "Eads Bridge." Record, Vol. 2, page 519.

It receives all revenues derived from the operation of the ferry and transfer boats of the "Wiggins Ferry Company," which carry wagons, railroad cars, passengers and vehicles of all kinds.

The aggregate gross receipts of the **Terminal Railroad Association** from all sources are about **six millions of dollars** per annum. Record, Vol. 2, page 510.

2. **The Guaranty Agreement.**

The fourteen "proprietary railroads" **December 16th, 1902,** made with each other and with the **Terminal Railroad Association** an agreement entitled "**Guaranty Agreement**" whereby it was recited, that at the instance of the "**proprietary companies,**" the Terminal Association was about to issue bonds limited in extent of issue to $50,000,000 and to secure such bonds by mortgage upon all of its properties.

It was agreed, that the rates of toll for the use of the properties of the **Terminal Association** should be fixed from time to time by the Association so as to pay certain charges.

The "proprietary companies" agreed to **forever** use the properties of the Terminal Association for "**all passenger and freight traffic within their control through, to and from St. Louis and destined to cross the Mississippi River at St. Louis.**"

The tariff rates were agreed to be so as to insure the production of sufficient revenue **at all times** to enable the Terminal Association to punctually meet and discharge **the fixed charges specified in the guaranty agreement.** Exhibits, Vol. 8, page 1932.

By reference to an agreement of October 1, 1889, between **seven** of the proprietary companies and the Terminal Association, it was agreed "in the guaranty agreement" that no railroad not a party to the agreement should be admitted to the use of the tracks and properties of the Terminal Association, except by "unanimous consent" of the railroads, parties to the "guaranty agreement." Exhibits, Vol. 8, page 1868.

After the consolidation of the business of the "Eads Bridge," the "Merchants Bridge" and the "Wiggins Ferry" in the sole control of the **Terminal Association**, it acquired control of the **Interstate Car and Transfer Company** (a corporation operating railroad transfer boats between St. Louis and East St. Louis), buying its entire capital stock February, 1903. In October, 1902, it purchased the entire capital stock of the **St. Louis Belt and Terminal** Company which was organized in the interest of **Interstate** Company and the **Missouri Pacific** and **San Francisco** Railroad Companies.

In 1903 or 1904, seven of the "proprietary companies" bought a bridge built at Alton, Illinois, across the Mississippi river, and proceeded to increase rates over the bridge to correspond with rates over the consolidated properties of the Terminal Association. Record, Vol. 2, pages 574-5; Vol. 4, pages 2448-49.

After the consolidation of the bridge and ferry properties, the Terminal Association operated and controlled **two hundred and forty miles of railroad including main and side, yard and storage tracks.** Exhibit, page 3348. The railroads—proprietary lines—control over **fifty thousand miles of railway**

or more than 25% of the total mileage of the United States. Exhibit, Vol. 9, page 3346.

3. Delays in transit and delivery caused by combination.

O. A. Orvis testified has been in grain business in St. Louis fourteen years; that sometimes would **be eight or ten days getting a car across the river** at St. Louis, this rather as to grain moving eastward than that moving westward. Record, Vol. 2, page 223.

E. H. Ehrler testified that he is traffic manager of Graham Paper Company doing business in St. Louis. Handled ninety-five per cent of business to and from East St. Louis, with their own teams. This by reason of **delays** on account of Terminal service. Record, Vol. 2, page 224.

F. H. Blankenmeister testified; wholesale glass and queensware business St. Louis, twenty-one years. Uses own teams in transferring goods from St. Louis to East St. Louis and vice versa on account of saving of time in delivering and receiving his own goods—difference because of delays in delivering bulk cars by Terminal Association. Record, Vol. 2, pages 229-231.

Edward Knippenburg, jobber of groceries, St. Louis, transfers all goods between St. Louis and East St. Louis with his own teams—this because Terminal Association service is **too slow** and **charges enormous.** Unless transferred with own teams could **not compete** with jobbers in other cities. Record, Vol. 2, page 237.

Edward F. Daly, commission business, St. Louis. Concern handles **three thousand cars per year**. "Sometimes it would take ten or twelve or thirty days to get over the river." Have known it to be as long as forty days. Record, Vol. 2, page 240.

G. M. F. Ward, merchant, Mount Vernon, Illinois. **Two hundred miles from Chicago, seventy-eight from St. Louis.** Difference in favor of delivery from Chicago **over** St. Louis **from twenty-four to forty-eight hours.** Record, Vol. 2, pages 294-301.

G. A. Madden, merchant, Mount Sterling, Illinois—takes **one day to get goods from Chicago, four days from St. Louis.** Record, Vol. 2, page 327.

Jesse French, manufacturer, formerly of St. Louis. Moved to Peoria, Illinois. Main cause was **delay in receiving and delivering goods between St. Louis and East St. Louis**. Record, Vol. 2, pages 338-339.

F. Ernest Cramer, manufacturer, St. Louis, handled goods between East St. Louis and St. Louis with own teams. Cause delays never less than a week or ten days account Terminal Association. Record, Vol. 2, pages 340-341.

John Wulfing, wholesale grocer, St. Louis. Always figure that it takes from ten to fifteen days for goods to come from East St. Louis to St. Louis. Record, Vol. 2, page 346.

Abraham Friedman, wholesale manufacturer of shoes. Uses own team in hauling goods. There

were unusual delays between East St. Louis and St. Louis. Record, Vol. 2, page 410.

Carl H. Schlapp, wholesale grocer, St. Louis. Did hauling themselves between St. Louis and East St. Louis. This is to save time—three or four days. Record, Vol. 2, page 411.

Thomas A. Pullen, wholesale grocer, St. Louis. Hauls goods to East St. Louis to "expedite shipment." Record, Vol. 2, pages 413-416.

F. B. Hornsby, wholesale grocer, St. Louis. Handled with own wagons to save time. Record, Vol. 2, page 418.

S. R. Haines, merchant, Tamaroo, Illinois. Delays in shipments from St. Louis from three to six days. Record, Vol. 2, page 437.

Louis Landau, wholesale grocer, St. Louis, testified to extensive delays in transferring goods from East St. Louis to St. Louis. Record, Vol. 2, pages 438-443.

T. F. Lehne, merchant, Alton, Illinois. Alton is twenty-three miles by rail from St. Louis; from Chicago two hundred and seventy-two miles. Difference in time of delivery at Alton three or four days in favor of Chicago. Record, Vol. 2, page 534.

L. A. Miller, Jerseyville, Illinois, testified to similar delays. Record, Vol. 2, page 456.

F. G. Haueisen, produce business, St. Louis, testified as to delays in shipments between East St. Louis and St. Louis. Record, Vol. 2, page 562.

A. M. Field, Traffic Manager Wrought Iron Range Company, St. Louis, testified to delays. Inbound freight takes from two to four days in crossing river; out-bound from twenty-four to forty-eight hours. Record, Vol. 2, page 570.

M. B. Hilliard, produce commission, St. Louis. "Generally takes from three to four days to get a car of stuff from East St. Louis to St. Louis." Record, Vol. 2, page 590.

James Clausen, shoe polish factory. We have delays of three and four days in getting freight over from East St. Louis. The railroad companies would say they had delivered the goods to the Terminal Railroad but we could get absolutely no satisfaction. Record, Vol. 2, page 334.

C. I. Milliard, wholesale lumber, St. Louis. The delays are very frequent and annoying. **The great difficulty we have had was to get the Terminal Railroad** to receive and handle freight. Record, Vol. 2, page 335.

John Henneberger, Wulfing Grocer Co. When they changed the terminal to the west side (by the Terminal Railroad), we tried shipping from the west side for about three or four weeks and we got so many complaints, that we again adopted the old way of hauling all our goods over to East St. Louis. Record, Vol. 2, page 423.

William Ross, Traffic Manager Garnett, Allen & Grubb Paper Company. All our out-bound shipments are hauled to East St. Louis. We make better time in hauling them to the east side and taking them from there. Record, Vol. 2, page 430.

Charles Hopper, Jacksonville, Illinois. Shipments are **longer coming to us from St. Louis, 100 miles, than from Chicago, 250 miles.** We use the Chicago & Alton both ways. Record, Vol. 2, page 436.

W. B. Cain, Canton, Illinois. We have about **four days' delay** in getting goods from St. Louis, **175 miles.** We get shipments **from Chicago, 192 miles, in two days.** I complained to the agent of the delay. He said it was the "damn Terminal." Record, Vol. 2, page 437.

James A. McConnell, Marx & Haas Clothing Co. We have constant delays. Very often we find from days to a week difference between East St. Louis and St. Louis. Record, Vol. 2, page 445.

George T. McClure, Traffic Manager, Rice, Stix D. G. Co. We have experienced delays both on inbound and out-bound freight. I have personally investigated many of them. I found the Terminal was at fault in many instances. The average time to get goods across the river for us is two or three days. We sent a package of goods to Murphysboro, Illinois, to the Young Dry Goods Company. They want the goods the next day and must have them. If we deliver that shipment to the Terminal Railroad at 4:45 p. m., the Young Dry Goods Co. will never get it under four days. The Illinois Central and C. & A. are the only roads having through cars at the Terminal's 10th and Poplar street depot which do not break bulk in East St. Louis. We could not meet competition of Chicago or cities of that kind anyhow if we have to load

here and break bulk at East St. Louis. Record, Vol. 2, page 465.

Charles E. McEwing, Calhoun Co., Ill. Fire Brick Works, **43 miles from St. Louis.** We are unable to get into St. Louis on the Terminal tracks. Calhoun county is isolated, but isolated as it is, it is a fact that we can **reach Canada, Winnipeg, Duluth, Minneapolis and St. Paul quicker than St. Louis.** Record, Vol. 2, page 528.

Fred W. Hofman, Produce. We handle a great number of cars. Our cars are often delayed, which puts us to expense. The delay happens largely between East St. Louis and St. Louis with the Terminal Railroad. Record, Vol. 2, page 537.

Jams H. McCabe, Carriages. We deliver our goods on the east side to the railroads. The Terminal people refused to accept them, claiming they are too bulky, but the east side railroads accept them. It has cost us considerable more. Record, Vol. 2, page 551.

George Schopp, Produce. We handle 400 to 500 cars per year. We have considerable trouble handling them backwards and forwards over the river. There are delays of one to two days up to five days and when a cold wave comes, we cannot assume the risk. Record, Vol. 2, page 599.

J. E. Stewart, Wholesale Produce. We handle 800 to 1,000 cars per year. We experience considerable difficulty and delay between East St. Louis and St. Louis. About 75% of our business is potatoes in car-loads. They come from Wisconsin

and Minnesota. If a shipment comes to us from Chicago, on the Wabash, its delivery in St. Louis is 60 hours from shipment. From the Illinois Central or C. & A. it is 60 hours to East St. Louis and the average time for getting a car over here after it has gotten to East St. Louis and been put on the Terminal track is anywhere from two to four or five days. Record, Vol. 2, page 611.

Wm. J. Branchvogel, Carriages. Goods are shipped us from Rochester in car-load lots. We have a good deal of difficulty getting them across the river from East St. Louis. There are delays of sometimes four or five days and sometimes two weeks. Record, Vol. 2, page 649.

E. E. Rand, Roberts, Johnson & Rand Shoe Co. The greater bulk of our Eastern business is being handled by the Wabash (3rd and Franklin Ave.) yard. Formerly we handled by wagon. We got into that on account of the delays we had with the Terminal Railroad here. We have not for several years delivered goods to amount to anything to the Terminal Railroad. We have repeated complaints from our customers that they could receive goods **from Chicago quite a good deal earlier than they could from us and for that reason we have been deprived of orders we might have gotten.** Record, Vol. 2, page 669.

5. Testimony as to connections between and favoritism shown by Terminal Railroad Association to the St. Louis Transfer Company.

E. H. Ehrler, Traffic Manager, Graham Paper Co.: The railroads did not allow 2 cts. per 100 lbs.

to any company but the St. Louis Transfer Company. Record, Vol. 2, page 228.

A. De Figuerido, Secretary, St. Louis Transfer Co.: This company hauls about 400,000 tons of freight to and from St. Louis and East St. Louis per year. We handle the entire business of the Carleton Dry Goods Co. The railroads pay the Transfer Company 2 cents per 100 lbs.

The railroad freight depot crews help to load Transfer wagons.

Q. **If a similar shipment of goods started to be hauled by your company and the Terminal Railroad, which would be more rapid between the two cities?** A. There is only one answer. **We are the more rapid of the two. And that is the reason our company is so largely used by shippers.** Our capital stock is $850,322. Record, Vol. 2, pages 305, 320, 321.

John Wulfing, Wholesale Grocer: I think the St. Louis Transfer Company is in a class by itself. It seems to be much more favored than any other Transfer Company. **It is considered a part of either the Terminal Railroad or the railroad companies.** Record, Vol. 2, page 346.

William Ross, Garnett, Allen & Grubb Paper Co.: Formerly the Terminal Association maintained what they call **"pull-up" teams to assist the draymen** at the incline at the eastern approach of the Eads bridge and those were taken off (about the time the Terminal Railroad bought the Wiggins Ferry). About the same time the Wiggins Ferry

Co. issued a circular that teams would not be permitted on their boats that were loaded with more than the team could handle itself. That reduced my earning capacity in this way; when "pull-up teams" were in service I could handle 10,000 lbs. per load and today only 7,500 lbs. Record, Vol. 2, page 430.

George Hendricks, Treasurer, Wiggins Ferry Co.: The St. Louis Transfer Co. does a pretty extensive business, most of it over ferries. **There is a contract between the Transfer Co. and the Ferry Co. giving the Transfer Co. a rate of 17% lower than to an ordinary team. It has been in force since prior to 1881. Settlements are made monthly and the difference paid in a check.** Record, Vol. 2, page 521.

George A. Rhodes, Rhodes Transfer Co.: **The St. Louis Transfer Co. is paid 2 cts. per 100 lbs. differential over us by the railroads. That puts us out of business so far as East St. Louis is concerned.** Record, Vol. 2, page 530.

John Scullin, formerly President Wiggins Ferry Co.: At the time of the sale of the Wiggins Ferry stock to **the Terminal Railroad, the Ferry Company had quite a bunch of St. Louis Transfer stock, several hundred shares, but I don't remember how much. The Wiggins Ferry had considerable Transfer stock; it went with the Ferry Company as one of its assets at the time of the sale.** Record, Vol. 2, page 547.

Armen Traxel, General Teamster: **I did a good business in East St. Louis until the order was is-**

sued not to honor any charges for independent teamsters, only through the Transfer Company. The effect was a clean loss of about $4,000 per year on my business. The railroads at East St. Louis pay the Transfer Company 2 cts. per 100 lbs. rebate. It practically puts us out of business. Record, Vol. 2, page 650.

6. The Freight Tariffs of the Terminal Railroad and their Effect on St. Louis Industries.

George L. Sands, formerly Manager St. Louis Transfer Ry.: The coal rate on the Wiggins Ferry to industries on their tracks was 15 cts. per ton. When the Terminal Railroad bought the Wiggins Ferry, the rate was restored to 30 cts. per ton. Record, Vol. 2, page 151.

R. L. Connor, Hoyt Metal Co.: We use 200 tons of coal per day. The Terminal Bridge charge on coal had something to do with our moving from St. Louis to Granite City. Record, Vol. 2, page 512.

E. O. Stanard, Flour Mills: Our largest mill is at Alton. We sell 6,000 barrels of oufir per month, and it is all made in Alton and shipped down here. The bridge arbitrary had a good deal to do with our removal from St. Louis, as 85% to 90% of our flour went east and our coal also comes from the East. Record, Vol. 2, page 513.

Charles E. McEwing, Calhoun Co., Ill.: Prior to the sale of the Alton bridge we paid 4/10's of a cent per 100 lbs. for crossing it. Now they charge us 1 cent per hundred pounds. The in-

crease was made about six months after its sale to the Terminal Railroad. Record, Vol. 2, page 529.

W. T. Loudon, Manager Alton Bridge: Our coal tariff Oct. 1st, 1899, was 8 cts. per ton. The next one was June 25th, 1905, after the purchase of the Alton Bridge by the present company. The rate under it was 30 cts. per ton. The next tariff is January 10th, 1906. It is 20 cts. per ton and is still in force. Record, Vol. 2, page 671.

A. C. Harris Coal Company, Alton: Our coal crossed the Mississippi River into Missouri at Alton. When we started into business in 1901, the rate was 8 cts. per ton. We continued to June, 1905, at which the rate was raised to 30 cts. per ton and we had to quit business. Record, Vol. 2. page 677.

S. B. Schuyler, General Auditor Missouri Pacific R. R.: **The transfer rate on coal to Mississippi River and Bonne Terre points (transferred over Ivory Station car transfer) is $2.18 per car,** this being the proportionate through rate from East St. Louis.

The rate from Riverside (35 miles south of St. Louis) over Iron Mountain, Ferry and Conlogue Road to East St. Louis, was $4.50 per car of which $3.00 to the Iron Mountain and $1.50 to the Ferry and the Conlogue. Of that ($1.50) the Conlogue and Ferry each got one-half, but they pay the Missouri Pacific 25 cts. per car for "incline service," giving them thus 62½ cts. per car each. Record, Vol. 4, pages 2335, 2522.

As far as the Terminal Railroad properties are concerned, there have been no material reductions on soft coal. Record, Vol. 4, pages 2538, 2539.

Albert L. Perkins, City Railway Expert: The boat that was operated in connection with the Conlogue Road, was transferred down to Ivory Station because the Terminal Railroad (after buying up the Conlogue—East St. Louis & Carondelet Road) would **not make connection with the Missouri Pacific Railroad any longer.**

The Missouri Pacific Railroad now takes cars over its "Valley Road" from East St. Louis to Bixby and over the Ivory Station Ferry and Oak Hill Railroad to the central portion of St. Louis.

The Merchants Terminal and the Transfer Railway ordinances limit the switching charges on those roads to $1 per car, but the Terminal Railroad charges $2.00 per car and over. The Municipal Terminal Commission knows this and has investigated it but took no action.

The consolidation (that is the purchase of the Wiggins, Conlogue and other properties by the Terminal Railroad) **simply wiped out competition in the transfer agencies across the river or any competition. Since 1902 there is no competition as to charge.**

Mr. Ives, the Traffic Manager Wabash R. R., announced that on all coal originating on the Wabash, destined for industries on the Wabash in St. Louis, there would be no switching charge. This **forced** the Terminal Railroad to absorb the 10 cts. per ton switching charge to industries. Record, Vol. 5, page 2667.

D. O. Ives, Traffic Manager Wabash R. R.: The effect of the order was to announce to patrons of the road originating business thereon, that the Wabash was willing to switch free of charge on the St. Louis side of the river all coal originating on its Illinois lines. But that was not the sole object or effect. I had no consultation with any coal man, only with my subordinates and President Delano. I assumed the responsibility and originated the idea. My order resulted in reducing the rates from Illinois mines to St. Louis from thirty cents to twenty cents per ton. **Naturally, as I supposed when I did it,** the competition would have to be met and the **Terminal promptly met it** by making the rate 20 cts. per ton to all their industries. That was the way the ten cent reduction in the bridge arbitrary was brought about. Record, Vol. 4, page 2470.

7. The Money the Terminal Railroad has had since 1889 and how it has spent it.

The Terminal Railroad was incorporated in 1889. It acquired from Jay Gould the land, tracks and buildings east of 18th street, including the old Union Depot, for $5,000,000. The first bond issue was in 1889 covering an issue of $7,000,000 bonds. The expenditures out of that issue are given below.

C. A. Vinnedge, auditor, Terminal Railroad, paid Jay Gould for properties of Union Railway & Transit Co., Terminal Railway of East St. Louis and associated properties, $5,000,000. Construction of new Union Station, $1,746,000. Discount

on sale of bonds, $254,000. That is for land for present Union Station. Record, Vol. 4, page 2435.

First consolidated Mortgage 1893 issued $5,000,000. Expenditures, discount, $387,792.73. Purchase of St. Louis Merchants Bridge and Terminal Railroad stocks and bonds. 17,800 shares, $1,113,400. Purchase of St. Louis Terminal Railway stocks and bonds, $120,000. Used in construction of Union Station yards and belt lines, $3,078,307.27 make up that $5,000,000. Record, Vol. 4, pages 2436, 2393.

There is an item $3,500,000 St. Louis Merchants Bridge and Terminal Railway Company first mortgage Bonds. That is the entire indebtedness. The first item is $1,265,727.98 for the elevated structure. That belongs to the Merchants Bridge Terminal Railway. Construction of southwest approach of Merchants Bridge, $121,757. There are two approaches, one from the north and one from the south. Other construction items, $1,648,161.50. That represents a great many small items in the construction of the Merchants Bridge Terminal Railway. Discount on bonds, $464,353.52. The sums all represent money expended by the Merchants Bridge Terminal Railway. Next is the St. Louis Merchants Bridge Company, bonds, $2,000,000. Record, Vol. 4, pages 2436, 2437.

That represents the cost of the bridge and its approaches. Next is the General Mortgage issue of 1902 of which $18,000,000 had been issued and sold. They will show the expenditures set forth here:

Purchase of Wiggins Ferry Company stock	$7,426,356.15
St. Louis Belt & Terminal Railway stock	160,000.00
Interstate Car Transfer Company stock	640,274.38
East St. Louis & Carondelet R. R. stock	1,250,000.00
Louisiana Purchase Exposition stock	50,000.00
Real estate for Union Station, $2,627,867.80. That was for real estate alone and includes the general construction Union Station, additions, betterments. This includes the real estate before stated	5,482.419.27
Equipment, including new locomotives	702,533.01
Construction of St. Louis Belt & Terminal R. R.	1,630,015.46
Illinois Transfer Railway. That was a road that was built by the Terminal Railroad in East St. Louis	218,405.05
East St. Louis & Carondelet Railway additions	19,106.20
East St. Louis Connecting Railroad additions	7,297.83
	$17,586,407.25

Record, pages 2438, 2442.

These sworn statements of the Terminal Railroad show that, in the 17 years from 1889 to 1906, inclusive, that Association issued and sold three sets of mortgage bonds having a total aggregate par value of		$30,000,000.00
The discount paid thereon was		1,376,384.38
Leaving net cash proceeds of		$28,623,615.62

Which was expended as follows:

Purchase of Old Union Station	$ 5,000,000.00	
New Union Station, land and construction and land for yards and "Inner Belt" line	10,307,226.54	
Building "Outer Belt" line	1,630,015.46	
Illinois Transfer Ry.	217,406.05	
E. St. L. & Carondelet	19,106.20	
E. St. L. Belt Line Ry.	7,297.83	
Total for Union Station and constructing new lines		17,181,052.08
Leaving a balance for other purposes of		$11,442,563.54

Out of which there was paid to buy up competing railroads and ferries:		
17,800 shares Merchants Terminal R. R.	1,113,400.00	
St. Louis Terminal Railway stock	120,000.00	
Wiggins Ferry Co. stock	7,426,356.15	
St. Louis Belt and Terminal Ry. stock	160,000.00	
Interstate Car Transfer Co. stock	620,274.38	
E. St. L. & Carondelet R. R. Stock	1,250,000.00	
		10,690,030.53
Leaving a balance of		752,533.01

Which was expended for new locomotives and equipment ($702,523.01) and subscription to the World's Fair ($50,000).

8. The Terminal Railroad's Failure to Provide Adequate Freight Facilities for the Growing Commerce of St. Louis.

J. L. Penney, Traffic Manager of the Terminal R. R.: The Terminal Railroad has two freight depots in St. Louis, at 12th and 9th and Poplar streets. They are not the largest in the city. It has none elsewhere. The Merchants Terminal has no freight depots. Record, Vol. 2, page 195.

Albert L. Perkins, City Railway Expert: The Cupples Station is owned by the Washington University.

The two warehouses of the Terminal Railroad cover about 3 acres. It has 514 car-lengths of team tracks.

The Merchants Terminal has 205 car-lengths of team tracks in the Mill Creek Valley.

The total track room of the Terminal Railroad Association in St. Louis is practically the same as it was 10 years ago.

The Terminal Railroad could have acquired extensive properties for additional terminal facilities such as team tracks and additional warehouses, **if they had been disposed to spend the money therefor.** I do not think the Terminal Railroad proper had acquired property to any great **extent prior** to the filing of the Government suit in 1905. But the Merchants Terminal had.

The Wabash, Missouri Pacific and Frisco had acquired extensive properties for team tracks and railroad warehouse purposes in the City of St. Louis on the west side of the river in the last ten years.

Q. In the ten years prior to the filing of this suit, has the Merchants Bridge Terminal Railroad, the Wiggins Ferry Co., the St. Louis Transfer Railway or the Terminal Railroad Association of St. Louis or their allied or subsidiary corporations which they control, acquired in the business portion of the City of St. Louis, any extensive properties adapted to be used or designed to be used and which is now being used for team track purposes or for storage warehouse purposes to be used

in connection with the freight transportation business? A. I don't know of any extensive pieces. There have been some small pieces in North St. Louis.

In St. Louis the total team track room of the Terminal Railroad, including the Merchants Bridge Terminal Railroad, the Wiggins Ferry Company and the St. Louis Transfer Railway is about 1600 car-lengths or about 100 cars more for all the terminals in the City of St. Louis, than there is in the individual railroads in East St. Louis and it is wholly inadequate to the demand. Record, Vol. 5, pages 2645, 2647, 2651, 2654, 2656. 2657, 2676.

Complainant's Exhibit No. 209 furnished by the Auditor of the Terminal Railway.

Yards of the Terminal Railway Association in St. Louis, 8 yards. Area 2,216,109 square feet, cost $1,839,008.

Yards of the St. Louis Merchants Bridge Terminal Ry., 9 yards. Area 761,780 square feet, cost $580,944. Total, 17 yards. Area 2,977,889 square feet. Cost $2,419,952. Record, vol. 5 page 2674.

Complainant's Exhibit No. 210, furnished by the Auditor of the Terminal Railroad, shows amount expended for "Real Estate and Construction" (aside from extraordinary expense on Union Station and Bridge 1902-3-4) to be as follows:

1898	$106,395	1901	$ 431,095	1905	$1,107,755
1899	402,337	1902	1,254,435	1906	300,000
1900	192,152	1903	1,000,000.	Record, p. 2679.	

Making a total for ten years of $5,794,169. But of these expenditures, a large amount was for East

St. Louis, very large yards and machine shops, and approximately $1,000,000 went into the subway (Vol. 4, page 2431), so that the amount expended in St. Louis for "Real Estate and Construction" for additional freight facilities in that period of years was about $3,000,000.

9. Feature of purchase of Wiggins Ferry stock by proprietary companies.

Complainant clearly proved why this purchase was deemed imperative.

"We discussed the matter and I told Mr. Gould that the Missouri Pacific, the Iron Mountain and the Wabash Railroads could well afford to purchase the Wiggins Ferry Company in order to prevent such a valuable property from passing into the control of a competitor of those railways."

Ramsey's Testimony, Vol. 2, Terminal Case, page 253.

John Scullin: The Wiggins Ferry Company, the East St. Louis Connecting Railway and the Transfer Railroad. Scullin was president of the company. The Wiggins Ferry Company operated the East St. Louis Connecting Railway Company and portions of the Transfer Railway on this side of the river. Record, Vol. 2, page 74.

The East Connecting Railway extended from the lower part of East St. Louis, Illinois, up as far as Venice, and had switches connecting with the various railroads and with the Stock Yards in East St. Louis and connecting with the various industries up and down the river. Record, Vol. 2, page 74.

The East St. Louis Connecting Railway connected **with all of the railroads coming into East St. Louis, Illinois**. Record, Vol. 2, page 74.

The East St. Louis Connecting Railway had possibly twenty-five or thirty miles all told of tracks and switches. Record, Vol. 2, page 76.

The Wiggins Ferry Company owned the river front extending from the lower part of the town pretty near down to what was known as the "Pittsburg Dike" up to Venice less a strip of two thousand feet opposite Brooklyn, that other people owned. Record, Vol. 2, page 76.

This property was located between the river front and the termini of the Eastern roads entering East St. Louis, Illinois, from the East. Record, Vol. 2, page 76.

The Island is bounded by Cahokia Creek on one side and the Mississippi on the other.

The Wiggins Ferry Company ran five passenger boats at two landings on each side of the river; also two or three car transfer boats. Record, Vol. 2, pages 77-78.

On this side of the river (St. Louis side) the Wiggins Ferry Company owned what was known as the Transfer Railway Company extending from down near the Arsenal up to the northern part of the city. There was probably ten or twelve miles with the switches of said road. The road followed the river along the wharves and connected with the Iron Mountain, the Burlington, Wabash and the Missouri Pacific Railroad Companies. Record, Vol. 2, pages 78-79.

The Wiggins Ferry Company carried on the business of transferring cars loaded and empty

and different kinds of freight wagon traffic and passengers to and from East St. Louis, Illinois, and St. Louis. Record, Vol. 2, page 78.

The opening of the Merchants Bridge for business affected the rates and charges for transfer across the Mississippi river by the Wiggins Ferry Company and the Eads Bridge **and reduced them some.** Record, Vol. 2, page 82.

I remember there was a sharp competition for business. Record, Vol. 2, page 82.

There was a bill of lading issued by the Wiggins Ferry Company for the goods it received. Record, Vol. 2, page 84.

There was a gentleman's agreement to maintain rates. Record, Vol. 2, page 87.

There has been the same rate charged for coal by the bridges and the ferry boats. Record, Vol. 2, page 88.

The three corporations were all doing an interstate business. Record, Vol. 2, page 88.

The Wiggins Ferry Company had locomotives. Record, Vol. 2, page 90.

There were ten thousand shares of the stock of the Wiggins Ferry Company, and I got five hundollars per share for the stock I sold. Record, Vol. 2, page 91.

The reason a price greater than the market value was paid for the stock of the Wiggins Ferry Company **was that the Rock Island people wanted it** for terminals of their great system of railroad. **They paid more than I thought it was worth or I would not have sold it.** I thought the price was a good price. We did not have the earning capacity to warrant **a payment of five hundred dollars.**

But to a large railroad system that could use it, that would induce them to do it, and that was the ground that induced them to pay the five hundred dollars a share for it. Record, Vol. 2, page 91.

The answer does not say the Terminal Railroad Association of St. Louis now controls the Wiggins Ferry Company, but it says it is controlled by "the railroads of St. Louis." Record, Vol. 2, page 92.

Scullin says the Wiggins Ferry Company had a connection with the Merchants Terminal Company. Record, Vol. 2, page 98.

The Wiggins Ferry Company, the Merchants Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, have practically all of the facilities for handling the commerce between the States of Illinois and Missouri.

S. D. Webster: Webster says he is railroad freight claim agent of the Terminal Railroad Association. Record, page 102. That he has been connected with the Terminal Railroad Association since 1889 and for a part of that period he has been secretary to the president and attended to his official correspondence. That he also adjusted claims for overcharge, loss and damage of freight which are presented against the company. Record, Vol. 2, page 101.

In 1892, W. S. Hodges was the general freight agent of the Wiggins Ferry Company.

H. W. Gays was general freight agent or manager of the Merchants Bridge Terminal Railway Company.

That in 1877, when the St. Louis Bridge was in the hands of a receiver an arrangement was entered into with the Wiggins Ferry Company which provided for **a pooling of the net cash earnings**—net cash receipts—of the St. Louis Bridge Company and the Wiggins Ferry Company. Record, Vol. 2, pages 103-104-105.

After the reorganization of the bridge company there was **another arrangement somewhat similar to the one I have referred to and I was auditor or commissioner of that.** Record, Vol. 2, page 105.

There was also an arrangement with the Madison County Ferry Company. I think this latter company was bought out by the Wiggins Ferry Company. Record, Vol. 2, page 106. I think I was commissioner **of a tonnage pool formed some** time in 1891, between the Merchants, the Terminal Railroad Association and the Wiggins Ferry Company. Record, Vol. 2, page 106.

I know there was a difference in the published tariffs of the Merchants Terminal Railway Company and the other companies, rates on certain classes of articles. Record, Vol. 2, page 107.

I know there was **a tonnage agreement in 1893,** or about that date, **and it was practically an agreement to maintain rates.** Record, Vol. 2, pages 116-117-118.

The records of the earnings and the statements of the roads as filed with Webster were offered in evidence. Record, Vol. 2, pages 119-120-121.

10. Showing as to Traffic Associations.

Various traffic associations were formed of the representatives of the freight departments of the

various railroads for the purpose of fixing and maintaining freight rates. The fourteen railroads owning the stock of the Terminal Association belong to different traffic associations that have jurisdiction over the interstate commerce business going through the St. Louis gateway and passing through all portions of the Republic and into foreign countries.

The Central Freight Traffic Association with headquarters at Chicago, Illinois, had jurisdiction from Buffalo on the north, Pittsburg on the south and the Mississippi River on the west, including Chicago, Illinois. Record, Vol. 2, page 557. The East-Bound Freight Committee, with headquarters at St. Louis, was a subsidiary organization of the Central Traffic Association. The following defendants belonged to the St. Louis East-Bound Freight Committee: Baltimore & Ohio Southwestern; Chicago & Alton; Chicago, Peoria & St. Louis; "The Big Four"; the Illinois Central; the Henderson & St. Louis R. R. Co.; the Chicago & Eastern Illinois; the Vandalia; the Wabash; the Southern Railway; the Terminal Railroad Association of St. Louis. Record, Vol. 2, page 557.

These Associations all had secretaries and they would meet from time to time and after fixing a rate would name it the **"authorized"** rate instead of calling it an **"agreed"** rate; then the tariffs would be promulgated which would thereafter be known as "the authorized rates." Other traffic associations organized in the territory traversed by the fourteen railroads, defendants herein, were: The Southern Traffic Association; Southwestern Traffic Association; St. Louis, Cincin-

nati & Louisville Traffic Association, and others. There was no class of freight business that these associations did not regulate and control and no road had authority to charge a tariff rate or make a different rate without the permission of the Central Traffic Association, and if any road did so without such permission it was sharply called to task for so doing and compelled to restore the so-called "authorized rate." This control by the traffic association of interstate commerce in the States of Illinois and Missouri is shown in the effort of the Burlington Railroad **to issue through bills of lading some years ago, by routing its goods over its own rails across the Alton Bridge and into the City of St. Louis,** and it made application to the Central Freight Association at Chicago for permission to do so, but was refused. Record, Vol. 4, pp. 1729, 1730-31 and 32. Wherever agreements, assurances and pledges were made in correspondence set forth in the Record to absolutely maintain the so-called "authorized rate," and whenever and wherever the expression "authorized rate" is employed, it means the agreed rates of the Traffic Associations. This term was introduced in railroad usage soon after the decision of the Supreme Court in the **Trans-Missouri and General Traffic Association case,** in order to avoid the use of the term which would imply an agreement on rates. The "authorized rate," therefore, is a rate which has been literally *agreed* upon by all lines in interest and which has then been promulgated by the Central Traffic Association. An indication of the absolute control of the Traffic Associations over interstate commerce of the country by reason of the

promulgation of what is termed "authorized rates" will be found in Vol. 4 of the Record, pp. 1799 to 1811, showing correspondence between officials of the Central Freight Association and the St. Louis East-Bound Freight Committee, in regard to maintenance of rates from Mississippi River Crossings to Eastern points. On page 1801 of Vol. 4 of the Record is set out the record of the Chicago East Bound Traffic Association showing that the "authorized rates from Mississippi River, Peoria and Chicago are to be absolutely maintained."

Again on page 1802, Vol. 4, under subject "Miscellaneous Rates" it was stated that "each road will decline to accept from connecting lines anything less than the authorized through rates," and would maintain the "present authorized tariff rates on provisions, agricultural implements, machinery, cotton, lumber and all other commodities, regardless of the point of origin, route, or destination of the property."

Again, in a letter dated Chicago, March 30th, 1900, signed by J. F. Tucker, Chairman of the Central Freight Association, addressed to R. M. Fraser, Secretary of a sub-committee, it was stated that "at a meeting of the Chicago East-Bound roads held yesterday it was unanimously stated that the authorized tariff rates would be charged from today, each road stating that they would at once notify all shippers and connections to this effect." Record, Vol. 4, p. 1802. R. M. Fraser, Secretary of the sub-committee of the Central Freight Association of St. Louis, writes J. F. Tucker, chairman of the Central Freight Associa-

tion at Chicago: "Your wires thirtieth. As per your request the St. Louis Committee convened this morning. The understanding of the St. Louis Committee is in line with action or agreement of executive officers in New York, February twenty-eighth, and reaffirmed in Chicago, March fifteenth, as to the maintenance of **the agreed authorized** rates effective April second, are in line to conform thereto."

These tariff associations also **had inspectors** that were sent over the country to see that various railroads through their respective agents in the territory in which they had jurisdiction did not cut the authorized and agreed rates. Evidence of this is found in Record, Vol. 4, at page 1809, where it was directed that if a general inspector of the Association discovered that any line or lines members of the Association were waybilling any freight, either export or domestic, at **unauthorized** rates, including switching charges, such information should be promptly sent in writing to the Chairman of such committee and upon receipt thereof such Chairman should immediately call a **meeting** of his committee and submit the matter in full to the members of such committee for their information and action. Pages 1317-19-20, Vol. 3, show where **a rate was cut and the Central Freight Association** compelled the Wabash Railroad to restore it. On page 1829 of Vol. 4 of the Record will be found another letter signed by Chairman Tucker relating to cancellation of unauthorized freight rate on fire brick from St. Louis to Eastern cities.

By reference to Vol. 4 of the Record, pages 1837 to 1843, a complete history will be found of the

conference of the executives of east-bound and initial roads, **forty-three in number, constituting the** principal trunk lines of railway in the United States, held October 1st, 1901, at 143 Liberty street, New York City. At this conference an agreement was made to maintain rates to Eastern points via East St. Louis, Peoria and other gateways. At said meeting a resolution was adopted stating that the agreed rates on both domestic and east-bound traffic on every class and commodity must be absolutely maintained without reservation or evasion. And it was further resolved that the traffic officers at Chicago, Peoria and St. Louis should be instructed to convene on Friday, the 12th of July, their local committees and send for the **representatives of the packing** houses and say to them that the authorized rates of June 1st, 1901, on all packing house products would be absolutely maintained from and after July 22d, 1901, regardless of whether it originates east or west of the Mississippi River, and further, that the respective committees above named give notice to all shippers, agents, representatives and connections **that the full authorized rates only** would be accepted on all kinds of traffic regardless of origin or destination. Record, Vol. 4, pp. 1840-1841.

In Vol. 4, Record, pp. 1897-1918, will be found recorded correspondence with the Traffic Association and the St. Louis East-Bound Freight Committee, concerning attempt by cotton shippers to get a lower rate on round bales of cotton, and the St. Louis sub-committee of the Central Traffic Association, and the refusal of the latter association to allow the local lines to make a rate.

Another method the railroads had through the traffic associations of keeping track of whether or not rates agreed upon were being violated was a system of **checking rates, whereby clerks were** sent from each road and the tariffs of the different roads belonging to the association were checked up. This method was also followed when it was desired to establish a system of tariffs to be agreed upon. Vol. 4 of the Record, pp. 1920-21 and 23.

On Record, Vol. 4, pp. 1918-1926, will be found a history of a meeting of the general traffic officials of twenty-five or thirty of the principal roads in the Central Traffic Association territory, at which meeting tariffs were agreed upon and which was afterwards referred to in correspondence as the **"Chicago Agreement,"** the object of which was to maintain these rates throughout the territory.

At pages 1931 to 1934 of Vol. 4 of the Record, will be found an instance where the St. Louis lines had reduced the rate on packing house products and the Central Freight Association compelled the restoration to the agreed rate. At pages 1934 to 40 of Vol. 4 of the Record, will be found where the Central Traffic Association, through the St. Louis East-Bound Freight Committee, fixed and controlled the rate on lumber from various Mississippi and Ohio River crossings, to Eastern points, and at pages 1940 to 47, Vol. 4, is recorded an unsuccessful effort of one of the roads in the Central Traffic Association to reduce the rate on interstate shipments of scrap iron from East St. Louis to Indiana points. The reduction was not made because the Chairman of the Central Traffic Association at Chicago would not consent thereto.

At pages 1948 to 49 of Vol. 4 of the record will be found an instance of where St. Louis lines made request for special commodity rate from St. Louis to New York and the Chairman of the Central Traffic Association refused to allow the request for special rate.

At pages 1949 to 1964 of Vol. 4 of the Record will be found recorded another unsuccessful attempt to reduce rates by St. Louis lines from Mississippi and Ohio gateways on eastern shipments and the Chairman of the Central Traffic Association refused to allow a reduction in any such rate to be made.

On page 1964 of Vol. 4 of the Record will be found where St. Louis lines applied to the Central Traffic Association, through the St. Louis East-Bound Freight Committee, to make a rate on pig lead and other commodities and such rate was refused by the Central Traffic Association.

Pages 1968 to 1974 of Vol. 4 of the Record show how the Central Traffic Association instructed the lines out of St. Louis to act in unison in order to maintain intact the agreed rate on lumber.

Pages 1974-1978 of Vol. 4 of the Record refer to the discontinuance of the joint tariff issued by the St. Louis East-Bound Freight Committee. As far back as 1870 the **various railroads had pools, and trusts and associations** and often issued joint tariffs carrying rates unanimously agreed by the lines composing such pool or trust or association. Such tariffs had been filed with the Interstate Commerce Commission at Washington, and inasmuch as the railroads wished to show a semblance of submission to the Supreme Court and the con-

tinuance of the association's tariffs in the face of the decision of the Court could only be regarded as a defiance of the law, instead of issuing tariffs as formerly, the "Information Circular" was substituted and instead of the old time term "agreed rate" the term "authorized rate" was employed, and instead of issuing proceedings of meetings, which on their face were violations of law, the records of meetings were so contrived as to mystify and deceive those not familiar with their true nature. **Instead of using the word "resolved"** when a resolution was adopted, the term **"recommended"** was employed and the compromising term "Traffic Association" was discontinued and the insignificant words **"Freight Association"** were substituted. A reference to pages 1974 and 1975 of Vol. 4 of the Record will show such changes.

In Record, Vol. 4, pages 1978 to 2001, will be found an adjustment by the Central Freight Association and various other traffic associations of **rates on lumber from the Pacific Coast and Northwestern points through the Mississippi River gateways, including St. Louis and East St. Louis.**

On pages 2009 to 2011 will be found correspondence that shows how the Central Traffic Association sought to stifle competition of individual companies, by ordering (page 2010) that such restraint be placed upon the freight traffic as will preclude the possibility of store-door delivery at St. Louis.

At pages 2011 to 2015, Vol. 4, will be found further control by the Central Traffic Association over the rates in car-load lots of potatoes through the St. Louis gateway to the East.

Pages 2019 to 2026 of the Record, Vol. 4, contain correspondence showing the Central Traffic Association acting with the St. Louis East-Bound Freight Committee, raised the rate on wheat over the various lines to and through and from St. Louis to points East. Page 2015, Record, Vol. 4, shows how the Central Traffic Association made the St. Louis railroad lines through their local committee establish a rate on grain for export.

Pages 2026 to 2028 of Vol. 4 of the Record, show how the same Central Traffic Association fixed the rates over St. Louis lines on provisions and at page 2033 will be seen how the Central Traffic Association advanced freight rates on the St. Louis lines for hauling government freight. At pages 2036 to 2065, Vol. 4, will be found how the Central Traffic Association advanced freight rates on grain at Mississippi River crossings.

At pages 2065 to 2067 of the Record, Vol. 4, will be found how the Central Traffic Association fixed an agreed rate **for the different roads to charge the Government for carrying its exhibits to the St. Louis Exposition.**

Pages 2068-9 of Record, Vol. 4, show how the Central Traffic Association interfered with and controlled the switching charges at East St. Louis.

Pages 2070-71 of the Record, Vol. 4, show how the Central Traffic Association determined the routing and icing of cars containing perishable freight, and also show a formal agreement between the roads in interstate traffic.

Pages 2073 to 80 of the Record, Vol. 4, show how the Central Traffic Association, through the St. Louis lines, advanced the freight rate of

peaches from St. Louis and East St. Louis and Mississippi River crossings to Eastern points. Pages 2080-81 show how the Central Traffic Association advanced the freight rate on apples from Western Colorado to points beyond and through East St. Louis in the Central Freight Association territory. Pages 2082-3, Vol. 4 of the Record show that the Central Traffic Association fixed the rate on dressed beef, and pages 2095 to 2104, Vol. 4, show how the Central Traffic Association prevented individual lines at St. Louis and East St. Louis from making rates on pig lead and spelter to Eastern points.

Pages 2105 to 2130 of the Record, Vol. 4, show the Central Freight Association and the St. Louis East-Bound Freight Committee and the Trunk Line Association acting jointly to change the classification on brick from East St. Louis to Eastern points, and raised the rate from 26 cents to 30 cents per hundred pounds.

Pages 2130 to 2147 of the Record, Vol. 4, show an agreement with the various trunk line associations and the fixing of rates to be charged to and from the Louisiana Purchase Exposition.

Pages 2161 to 2167 of Vol. 4 of the Record show how the Central Traffic Association prohibited individual lines at St. Louis and East St. Louis from making a rate on pig lead and spelter from East St. Louis to Eastern points.

Pages 2184 to 2186 of Vol. 4 of the Record show how after the flood at St. Louis and East St. Louis in 1903 some of the individual lines wanted a special rate on damaged packing house products and and applied to the Central Traffic association for permission to make the same and it was refused.

Pages 2186 to 2192 of Vol. 4 of the Record show how the Chairman of the Central Traffic Association tried to prohibit individual lines at St. Louis and East St. Louis from allowing return trip passes to shippers of stock.

Pages 2193 to 2207 of Vol. 4 of the Record show how the Central Traffic Association fixed rates on sand to and from St. Louis.

Pages 2212 to 2217 of Vol. 4 of the Record show how the Central Traffic Association fixed, and compelled the individual lines at St. Louis, through the St. Louis East-Bound Freight Committee, to maintain rates on lumber from St. Louis and East St. Louis, Illinois, to Eastern points.

Pages 2223 to 2342 of Vol. 4 of the Record show how the Central Traffic Association working with the St. Louis sub-committee, fixed rates on grain and flour. Pages 2242 to 2246 of Vol. 4 of the Record show how the Central Traffic Association fixed and maintained the rate on old clothes.

Pages 2246 to 2266 of Vol. 4 of the Record show how the same Association fixed and maintained the rate on wall plaster from St. Louis to Eastern points.

Pages 2266 to 2274, Vol. 4, show how the Central Traffic Association through the St. Louis East-Bound Freight Committee made an agreement between the individual roads to raise the rates on scrap iron, and which said agreement was carried out and said rates were maintained.

11. Evidence as to Coal Business and Rates from Illinois to St. Louis, Missouri.

Twenty years ago an average coal car contained 18 tons; they now contain about 40 tons. Record, Vol. 5, pp. 2941-2943.

The coal trains now carry from 800 to 2,000 tons of coal or about double what they did formerly. R., Vol. 5, p. 2943.

The large per cent of coal for St. Louis comes from Illinois. Record, Vol. 5, page 2796.

About 7,000,000 tons of coal came from Illinois to St. Louis, Missouri, in 1907. Record, Vol. 5, p. 2924.

The average car of merchandise netted the Terminal Association about $4.50. The average car of coal nets it about $8.00. Exhibits, Vol. 6, pp. 8-12.

Before the combination of all the proprietary lines into the Terminal Association, the Burlington railroad hauled coal from Illinois across the bridge at Alton, Illinois, and 23 miles into the City of St. Louis, Missouri, for 35 cents per ton, and this included the bridge charges. The charge of 30 cents per ton over the Eads Bridge is therefore too high. Exhibits, Vol. 6, p. 7.

This statement was made by the manager of a coal road in a meeting of the Coal Traffic Association. Exhibits, Vol. 6, p. 7.

This same manager stated in the Coal Traffic Bureau meeting that the 30 cents per ton rate was adopted when coal cars only contained 12 tons, and now they contain 30 tons or more, and this made the rate too high. Exhibits, Vol. 6, p. 8.

The records of the meetings of the Coal Traffic Bureau show that the rates were agreed upon and maintained from Illinois to Missouri, and that this continued down to and was in force up to the beginning of this suit. Exhibits, Vol. 6, pp. 152-153.

A full record of the meetings and proceedings of the Coal Traffic Bureau showing its object and purpose to be the fixing and maintaining of rates, will be found in Vol. 6 of the Exhibits, pp. 1-158.

In 1901 the coal roads met and by resolution divided the **coal tonnage** from Illinois to Missouri. Exhibits, Vol. 6, pp. 155-158.

Proceedings of the meeting of the St. Louis Coal Traffic Association for July 16th, 1897 (Vol. 6, Exhibits, p. 62); also proceedings of the meeting of August 25th (Vol. 6, Exhibits, p. 66); also proceedings of meeting of September 29th (Vol. 6, Exhibits, pp. 69-70); also proceedings of meeting of April 8th, 1898 (Vol. 6, Exhibits, pp. 75-81), show that by resolution the lines in this Association pledged themselves **not to take contracts for the future delivery of coal at the 25 cent basis of rates to extend beyond August 1st, 1898, and that no line should take any contract at any rate extending beyond April 1st of each year, which date had been previously agreed upon as the end of the contract year.** Also that the rate of the Association should be, on and after August 1st, 1898, 35 cents per ton. The constant re-affirmation of this resolution was thought necessary in order to **prevent** any line from **loading up with 25 cent contract which would of course, have prevented the placing into effect of the 35 cent rate on August 1st, 1898, as per agreement.** Pages 2035-40, Vol. 8.

125

Exhibits, show that the minimum rate on this coal, as carried in the Association **Tariff No. 5**, effective June 3rd, 1897, was, **at the time these resolutions were adopted,** twenty-five cents per ton from the so-called minimum territory, and that the rates from the other outlying territories were somewhat higher—the **agreed** differentials higher. Proceedings of meeting of the Association (pp. 45-6-7-8-9-50-1-2-3-4-5-6-7-8, Vol. 6 Exhibits) **show the reason** of this 25-cent rate. It was **made necessary by the fact** that the Chicago, Peoria & St. Louis Railway (an independent line, a line not a member of the Association) had contracted for the **future delivery of coal at less than** the existing rate of 35 cents per ton (pp. 47-56, Vol. 6 Exhibits). These contracts were taken on a basis of 25 cents per ton —one of them on a basis of twenty cents per ton. It is seen from this tariff of Association rates that the agreed minimum rate was 25 cents per ton at the time of these numerous resolutions, looking to a concurrent raising of the minimum rate to 35 cents per ton on August 1st, 1898, were being adopted and re-affirmed. It is also seen why the 25-cent rate became necessary. Pages, 2041-49, Vol. 8, Exhibits, show that coal tariff No. 6 superseding coal tariff No. 5, carries the agreed minimum rate of 35 cents per ton, and that the same became effective on August 1st, 1898, which is entirely in accord with the resolutions of the Association to that end adopted from time to time. These proceedings of meetings wherein the joint concurrent unanimous action of the lines is fully set out, showing on their faces the methods by which an increase in the rate is arrived at,

fairly reflect the usual methods of traffic associations in arriving **at their sole object of existence**—the highest rate **obtainable**. Pages 106-7-8-9-10-11-12-13, Vol. 6 Exhibits, show how the old organization, the St. Louis Coal Traffic Bureau was changed into the new body, the St. Louis Coal Traffic Bureau, and that instead of agreeing upon rates the lines, members of the body, **confer** on rates **and then** individually advise that the rates **will be raised** on March 1st, 1900. Something happened to prevent the carrying into effect of this milder, but vague and significant conspiracy, and this is fully set out in the pages last referred to. Shown here—that while the roads seriously go through **the farce of** proclaiming individual independent action, the fact is that such action depends entirely upon the full concurrent unanimous action of all the lines. The effort to raise the rate (pages 108-9, Vol. 6 Exhibits) 5 cents per ton on 4,500,000 tons of coal (for that was the tonnage in the year 1900), a clear yearly increase in the revenues of the lines of $225,000 to $250,000, immediately upon the reorganization of the association or bureau, shown to be significant. Shown (Vol. 6, page 108) that, at the meeting of the reorganized bureau on January 4th, 1900, the Secretary was instructed to issue an **"Information Circular"** showing the rates charged by the several roads for the transportation of coal to East St. Louis as per memorandum furnished. This so-called "Information Circular' 'took **the place** of the former association tariff and carried the **identical rates** the tariffs carried. The change in the name of this tariff sheet **was a mere evasion, and so understood.**

Pages 2041-2-3-4-5-6-7-8-9, Vol. 8 Exhibits, show that coal tariff No. 6, effective August 1st, 1898, carries the freight rates applying to East St. Louis; also page 2050, Vol. 8 Exhibits, shows that the "Informtaion Circular" contains "copies of individual rates charged by the several roads, etc., etc." So-called "Information Circular" carries the **same rate** as the tariff it succeeded and was issued in accordance with the instructions of the meeting of January 4th, 1900. An information circular is merely another name for a tariff sheet of rates. The object in the change is to avoid any semblance of agreed rates which is implied in an association tariff. It is a change of form, but not of substance.

After the reorganization of this body on January 4th, 1900, the method of fixing the rates—that is, the method which was made a part of the records of the association—was changed. An example of this "new method" is set out in subsequent proceedings, and for the purpose of illustrating this method reference is made to them. Information Circular No. 4 effective January 10th, 1903 (page 2106, Vol. 8 Exhibits), cancels Information Circular No. 3 (page 2098, Vol. 8 Exhibits), and increases the minimum on coal from **30 cents** per ton to **40 cents** per ton— a clean raise of 33⅓% in the rate.

The rate in this Information Circular No. 4 remained in effect from January 10th, 1903, to and including April 30th, 1905—a period of two years and three months.

During the years 1902-3-4, the St. Louis, Iron Mountain and Southern Railway extended its line into the State of Illinois, from Thebes, Illinois, to

East St. Louis. A branch of this line was extended into the coal fields of Southern Illinois in Williamson County. Upon the completion of this line that company was in a position to carry coal from Williamson County to East St. Louis. Finding that the St. Louis Coal Traffic Bureau was maintaining a higher remuneration rate on coal from the minimum territory in Illinois to a territory extending some eight miles from the Mississippi River to perhaps sixty miles—and that this rate was forty cents per ton, the Iron Mountain proceeded to apply the same rate (40 cents per ton) from its coal mines, **one hundred and thirty-two miles distant,** to East St. Louis. The agreed rate of the Coal Traffic Bureau from that territory—the "Carterville territory"—which had been invaded by the Iron Mountain, was sixty-two and a half cents per ton—a differential of twenty-two and a half cents per ton above the agreed minimum rate of forty cents per ton, applying from the so-called minimum territory. The Iron Mountain not being a member of the Coal Traffic Bureau and not bound by its rules or rates, ignored the 62½ cent rate from the Carterville territory and put into effect from that field the 40 cent minimum rate of the Coal Traffic Bureau. Page 173 and pages 238-239, pages 272-3 and 627, Vol. 2, Record.

Complaint having been made to the St. Louis Coal Traffic Bureau by the Illinois Central Railway of this independent action of the Iron Mountain Railway, a meeting of that Bureau was held on April 29th, 1905 (p. 140-1, Vol. 6 Exhibits) and as a result of that meeting the minimum rate was forced down to 30 cents per ton. This action was com-

pelled by the independence of the Iron Mountain in insisting on making the same rate (40 cents) for a haul of one hundred and thirty-two miles as the Bureau had prescribed for a haul of eight or ten miles (p. 2116-2124, Vol. 8, Exhibits). Proceedings of meeting of April 29th, 1905 (p. 1340-1 Vol. 7, Exhibits), show how the association reduced the rate from 40 cents to 30 cents per ton.

On Saturday, May 20th, 1905, the Mobile & Ohio Railway served notice on the Coal Traffic Bureau, and the numerous member of it, that, effective Monday, May 22d, 1905, that line (the M. & O. Ry.) would make the coal rate from the minimum territory 20 cents per ton, instead of the agreed rate of 30 cents per ton which had been fixed at the meeting April 29th, 1905, previously mentioned. This action precipitated a rate war wherein the minimum rate fell to one and two dollars per car. (Circular letters, May 22nd, 24th, and 25th, pp. 151-2-3, Vol. 6, Exhibits). This rate war lasted until June 5th, when the rate of 25 cents per ton became effective. This rate was agreed on at the meeting of May 29th, 1905 (p. 142-3, Vol. 6, Exhibits; pp. 2223-2230, Vol. 8, Exhibits). Attention is again called to the vague but significant methods by which unity of action was secured. And this is called the individual action of the individual lines.

These proceedings of meetings of traffic associations, wherein rates are agreed upon, fixed and determined, fairly illustrate the methods employed before and after the decisions of the Supreme Court in the Traffic Association cases.

That the **recorded** proceedings of the acts and

doings of the traffic association are not a faithful record, attention is called to the proceedings of the meeting of the Coal Traffic Bureau of March 7th, 1901 (p. 118, Vol. 6, Exhibits).

Circulars are shown which were subsequently furnished the various railroads, members of the bureau, showing the **real actions** of the body in the meeting Exhibit 42, p. 153-158, Vol. 6, Exhibits).

The St. Louis Coal Traffic Bureau since the filing of this suit, has raised this minimum coal rate from 25 cents per ton to 42 cents per ton, and this was the agreed rate of that association up to the first of January, 1969. That a 40-cent or 42-cent minimum rate is an exorbitant rate for the service performed in carrying this coal to the St. Louis market, attention is called to the fact that certain lines were willing to and did, and the exhibits in this case show they did, contract **to carry coal to East St. Louis for the St. Louis market at a 25-cent rate.** This is the face of the fact that the Traffic Bureau was strenuously trying to, and for a considerable period did, maintain a 25-cent, 30-cent and 35-cent rate meanwhile (proceedings of meeting, May 25th and June 2nd, 1897, pp. 45 to 58, Vol. 6, Exhibits). These proceedings show that the Chicago, Peoria and St. Louis Railway, an independent line, a line entirely outside of the Bureau, and not restrained by its rates or rules, contracted for the future delivery of coal to the St. Louis market on a rate basis as low as 25 cents per ton, and possibly lower (pp. 47 and 65, Vol. 6, Exhibits). At this time the Louisville, Evansville & St. Louis Railway (not the Southern Railway)

was in the hands of the Federal Court, and was not a full member of the Coal Traffic Bureau; it was what was known as a "co-operative member"; that is, it would promise co-operation, and then when its interests required it would be the judge of the measure of the co-operation which it would render. At this time, June 2nd, 1897, to July 31st, 1898. the agreed minimum rate of the Bureau was 25 cents per ton; and, as has been shown, this rate became necessary **because** of the 25-cent contract rate of the C. P. & St. L. (pp. 47 and 56, Vol. 6, Exhibits). It was generally understood among the officers of the numerous coal carriers, that this 25-cent rate on the C. P. & St. L. Ry. extended from the year 1897 to the year 1902—a period of five years. This was never seriously denied by that line; nor was it openly admitted. The L. E. & St. L. Ry. being at this time (1897) only a so-called co-operative member, and in a measure at least independent, and having lost some of its coal tonnage, and with a view of further developing its coal fields and regaining its lost coal tonnage, entered into an arrangement, verbal or otherwise, with a new coal mine located on its line for the future delivery of coal on a basis as low as 25 cents per ton. This action was rendered necessary in order to meet the 25-cent contract in effect on the C. P. & St. L. Ry. As a result of this "arrangement" the coal tonnage of the L. E. & St. L. Ry. (Southern Ry.) increased enormously during the succeeding five years.

IN THE

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1911.

No. 386.

THE UNITED STATES OF AMERICA, APPELLANT,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET AL.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF MISSOURI.

INDEX TO AVERMENTS AND ADMISSIONS OF PLEADINGS.

IN THE

SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, 1911.

THE UNITED STATES OF AMERICA,
Appellant,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS, et al.,
Appellees.

No. 386.

APPELLEES' STATEMENT AND BRIEF.

STATEMENT.

Fourteen large railroad systems, owned and controlled by a like number of companies, made defendants in this case, enter the City of St. Louis. At the time this suit was brought defendant companies owned all the shares of stock of the Terminal Railroad Association of St. Louis, and all the shares of stock of the Wiggins Ferry Company.

The Terminal Railroad Association under a contract with the St. Louis Merchants Bridge Terminal Railway Company, dated August 17th, 1893, acquired the right to use, in perpetuity, all the terminal facilities then or thereafter constructed by the latter com-

pany, together with four thousand, three hundred and eighty-four shares of its capital stock. Contemporaneously it acquired thirteen thousand, five hundred additional shares of stock from shareholders of the Merchants Company, which gave it the majority of the shares of that company's stock.

This grant of perpetual use was not to interfere with the Merchants Terminal right of use of its own tracks, and was made pursuant to requirement of Section 9, of an Ordinance of the City of St. Louis, granting the Merchants Terminal the right to lay down its tracks and terminal facilities in the City of St. Louis. That provision of the Ordinance is as follows:

> "Said Merchants Bridge Terminal Railway Company * * * and shall also permit any other railroad company, having connection with it, to run its trains, locomotives, engines and cars, loaded or empty, over its railway tracks, side tracks, switches, turn-outs, and turn-tables, for such reasonable compensation and under such reasonable rules and regulations as may be agreed upon, etc."

These three companies, (viz.: Terminal Railroad Association of St. Louis, St. Louis Merchants Bridge Terminal Railway Company, and the Wiggins Ferry Company), at that time owned and controlled substantially all the connecting or terminal facilities at St. Louis, Missouri, and East St. Louis, Illinois, except the individual yards of the defendant railway companies. The unification, in the use of the Terminal Association and Merchants Bridge Terminal systems of terminal facilities, was accomplished through the contract above referred to, in 1893. The railway companies who owned all of the stock of the Terminal Association, to increase their terminal or connecting facilities and to provide means for further

expanding them, in 1903 acquired all of the stock of the Wiggins Ferry Company.

In 1904, the then Attorney General of the State of Missouri, (Special counsel in this case) conceiving the foregoing relation between the three terminal companies to be in effect a consolidation between parallel and competing lines of railroad, and a combination in restraint of State and interstate trade, filed an information in the nature of *quo warranto* (the usual remedy in Missouri for disrupting trusts), against the Terminal Association in the Supreme Court of Missouri.

Upon demurrer to the information a judgment was given against the informant (State v. Terminal Railroad, 182 Mo. 284); the Court holding substantially that these terminal and connecting facilities for the use of all railroads entering the City of St. Louis in common and upon equal terms, did not violate the law prohibiting the consolidation or unification of parallel or competing railroads within the legal and economic meaning of those words; and that such an arrangement promoted and facilitated trade instead of restraining it. That Court said:

> **"We gather from the information that all along the lines of the Terminal tracks, intersecting the city from north to south, from east to west, and belting it on the west, there are manufacturing and other business concerns with switch tracks or spurs into their premises, which enable the shipper to load the cars on the switch tracks on his premises and have them delivered to any railroad that reaches the City. A more effectual means of keeping competition up to the highest point between parallel or competing lines could not be devised. The destruction of the system would result in compelling the shipper to employ the railroad with which he has switch connection, or else cart his product to a distant part of**

the city, at a cost possibly as great as the railroad tariff.

St. Louis is a city of great magnitude in the extent of its area, its population, and its manufacturing and other business. A very large number of trunk line railroads converge in this City. In the brief of one of the well-informed counsel in this case it is said that St. Louis is one of the largest railroad centers in the world. Suppose it were required of every railroad company to effect its entrance to the city as best it could and establish its own terminal facilities, we would have a large number of passenger stations, freight depots and switch yards scattered all over the vast area and innumerable vehicles employed in hauling passengers and freight to and from those stations and depots. Or suppose it became necessary in the exigency of commerce that all incoming trains should reach a common focus, but every railroad company provide its own track; then not only would the expense of obtaining the necessary rights of way be so enormous as to amount to the exclusion of all but a few of the strongest roads, but, if it could be accomplished, the city would be cut to pieces with the many lines of railroad intersecting it in every direction, and thus the greatest agency of commerce would become the greatest burden.

This is what our General Assembly, as early as 1871, to some extent at least, foresaw and attempted to relieve against, and we cannot believe that the Constitutional Convention in 1875 was less appreciative of the conditions then present or in prospect, and hence we cannot believe that the Convention, when it said that two lines of railroads that were parallel or competing should not be brought under one ownership or management, meant that two lines, used exclusively for bringing the trains from the several railroad termini in the city or at the city's border to a common terminus, should not be so consolidated; because, as we have seen, the consolidation of the terminal facilities promotes the competition that this

clause in the Constitution was designed to preserve."

An ineffectual effort was then made by the special counsel in this case to have the then secretary of War (now the President), declare the Merchants Bridge forfeited under the terms of Section 11 of an Act of Congress authorizing that structure across the Mississippi River.

The matter was then brought to the attention of the Department of Justice and this suit was begun in the United States Circuit Court at St. Louis, where at trial upon bill, answer and proof, the bill was dismissed by an equally divided Court.

THE BILL.

The essence of the charge is, that the fourteen railroad companies, named in the bill, and generally referred to as the Proprietary Companies, in the manner hereinbefore stated, acquired the control of the three Terminal Companies, viz: The Terminal Railroad Association, St. Louis Merchants Bridge Terminal Railway Company, and the Wiggins Ferry Company, each competitor with the others for the purpose of stifling competition, compelling all other railroad companies to use the facilities of the Terminal Companies and imposing unreasonable charges for their use in the transfer of freight and passengers between St. Louis and East St. Louis and all the States of the United States and foreign countries.

THE ANSWER.

There is no denial in the joint answer of the co-defendants that the use of terminal systems, so designating them for convenience, has been subjected to

the control of the railroad companies and each is being operated as part of one general and comprehensive terminal plan or arrangement; but it is averred that each of the three was incomplete in itself, and that they were brought into unison in order to supplement each the deficiency of the other, and perform more economically and with more facility and dispatch the terminal service for all the railroads which enter St. Louis and East St. Louis, (both places commercially considered as a single city), giving each railroad free and undiscriminating access to every shipping or receiving interest located upon any of the three systems.

It is further averred that the combination was not made and is not operated for the purpose of a distinct profit, but that the charge for service is simply sufficient to meet cost of operation, proper maintenance and fixed charges, and that the use of the terminals is open to the non-proprietary lines upon the same terms as to the proprietors. No dividends are paid upon the shares of either of the three terminal companies, and the proprietary lines are not any of them interested in the fixed charges except as guarantors. As a result of the union, the efficiency of the terminal facilities has been greatly increased, and the cost and charge for the services has been greatly reduced; all the railways, small and great, have been put upon an equality in this respect, competition between them has been encouraged, trade promoted and a monopoly avoided.

THE ISSUE.

The essential and controlling facts seem not to be in dispute. The question as it occurs to us is: Whether the common control or ownership of all the

terminal facilities (mechanical devices for the exchange, receipt and distribution of traffic,) of a large commercial and manufacturing center by all the railroad companies, and for the benefit of all upon equal terms and facilities, without discrimination, is condemned by the Sherman Act as a conspiracy in restraint of trade or an effort to monopolize trade.

The Government affirms it is, while the defendant contends it is in harmony with the law because it expands competition by extending equal conveniences and advantages to all shippers located upon each of the three systems for all traffic to and from St. Louis:—expedites and economizes the service. The arrangement is justified by (1) the physical or topographic conditions peculiar to this locality; by (2) its commercial, industrial and railroad development and history; by (3) public opinion expressed legislatively and judicially, and (4) by the judgment of experienced railroad engineers and managers.

We do not understand that a combination between competitors for business that will give them equal opportunity for competition, as in Joy v. St. Louis, 138 U. S. 1, and Ry. v. Ry., 47 Fed. Rep't. 15, S. W. 163 U. S. 564, S. C. 217, U. S. 247, is under the condemnation of the Sherman Act. All it requires is that they shall race fairly after they have toed the mark. If one railway company may equip itself with terminals and contract their equal use to another, may they not with no less legal objection unite in joint ownership.

The Court will look at the purpose of the parties and determine from the circumstances whether, the purpose being within the law, the means, rightfully used, are reasonably calculated to attain the purpose.

It seems to us that the Government is in this fundamental error—that it regards the community sur-

rounding St. Louis, because divided physically and politically by the Mississippi River, as distinct competitive commercial integers instead of a commercial industrial unit. The traffic in this community which may properly be called greater St. Louis, is casual and incidental and is a very small per cent of the traffic, and such as would ordinarily be served by drays.

PHYSICAL AND TOPOGRAPHIC CONDITIONS.

Space for terminals in the City of St. Louis is a serious problem. While St. Louis, East St. Louis, Venice, Granite City, Madison, and the towns which lie opposite St. Louis on the east side of the Mississippi River, constitute a single commercial and industrial community, the commerce of the City of St. Louis is of the greatest consequence.

Any plan looking to the service of this commercial and industrial community must make the amplest provision for the immensely greater magnitude of it in the City of St. Louis. Its population and commerce has grown immensely in the past ten or fifteen years. Its location was originally made with reference to the Mississippi River as a highway of travel and commerce.

In 1873 practically one-fourth of its tonnage was by river. Its total tonnage at that time was nearly six million. Its total tonnage in 1905 was about forty millions, thirty-nine millions of which was served by rail, and less than four hundred thousand by river. This tonnage doubles at the rate of once every seven years.

The valley of the Mississippi River at St. Louis is on the east side and the hills on the west side. The

entire city of St. Louis is located upon hills which rapidly recede from the river shore. Its river frontage is of several miles. To the north of the city the hills recede into a valley, formed by the Missouri and Mississippi Rivers. Mill Creek, a small stream, traverses about midway east and west the center of the City. The river front is bordered by a levee, rather narrow, midway of the city; northwardly it widens at the foot of the hills. Railroads coming into the city from the north enter from the valley, those from the west come into Mill Creek Valley, those from the south along the river bluffs up to the levee. The valley on the east side of the Mississippi River is about eight to ten miles in width, and there is no natural obstacle in the way of railroad entrance into East St. Louis and the adjacent towns.

In 1893 the Mill Creek Valley was entirely occupied by the yards and tracks of the Terminal Railroad Association of St. Louis, and the tracks of the Wabash, Missouri Pacific, St. Louis and San Francisco, and the Iron Mountain Companies. At this time the only rail connection these roads had with the east was over the tracks of the Terminal Railroad Association, through a tunnel and over the Eads Bridge to East St. Louis. On these tracks was located the Union Station, to which all railroads had access, those of the east over the Eads Bridge and through the tunnel, then the only means of railroad connection between St. Louis and East St. Louis. There was no room for the expansion of terminals in the Mill Creek Valley. However great the area for expansion of terminals on the east side of the river, it would be unavailing to the commerce of St. Louis, which was limited to its own available territory and the capacity of the tunnel and the Eads Bridge. All of the terminals of the St. Louis Terminal Railway As-

sociation on the west side of the river were confined to the Mill Creek Valley, the tunnel and the Eads Bridge. It did not serve either north or south St. Louis. There were two insurmountable obstacles to the extension of its terminals either north or south—topographical and municipal. Topographical because the available space was already occupied by railroad tracks, and municipal, because it could not get the consent of the Municipal authorities. At one time it made a serious and expensive effort to do so, but the effort failed by the refusal of the Municipal Assembly to grant the right to cross or occupy overhead, or at surface, the public highways.

The Eads Bridge was completed in 1874. It is a double decked structure, the lower for railroad tracks, the upper, for street cars, vehicles and pedestrians, the surface of which was practically even with the surface of the streets in St. Louis. The exit of the railroad trains from the bridge into St. Louis was through a tunnel into the Mill Creek Valley. It was conceived as a bridge company with the right to collect tolls. Experience and necessity made it a part of a terminal system.

The Merchants Bridge was promoted in 1896 with the like idea, but long before completion it inevitably followed the same development as the Eads Bridge, and became merely a part of a projected Terminal system. It was built several miles north of the Eads Bridge; and on the St. Louis side of the river formed terminals whose plans, so far as completed in 1893, had no direct connection with the Eads Bridge Terminals, and served that part of St. Louis lying north of the Eads Bridge. Its terminals and the individual tracks and yards of the railroad companies that entered St. Louis at the north occupied practically all the territory available for railroad tracks. There

was certainly neither room for duplication, nor necessity for it. Its system was at right angles with Eads Bridge System, although the two bridges were gramatically parallel across the river.

There was no single point of connection between the terminals connected with the Eads Bridge and those constructed in connection with the Merchants Bridge. They each occupied and served distinctly different municipal territory. If they exchanged business at all it must be through their connections.

After the contract of 1893 this connection was brought about by a union of the Terminal tracks with the elevated tracks of the Merchants Company, near the foot of the Mill Creek Valley.

The system of the Wiggins Ferry Company was constituted of a track on the east side about seven miles in length, running along the levee, and the west shore of the river, connecting with the Iron Mountain tracks and through it with the Terminal Association tracks, near a station in St. Louis called Ivory. On the east side of the river this company owned a large body of land extending along the river shore for a long distance, which was available for manufacturing sites and railroad terminals.

An effort was made in 1903 by the Rock Island Railroad Company to acquire the Wiggins Ferry property for its individual use. This was contested by other companies, and ultimately the stock was acquired by all of the railroad companies at St. Louis for their equal use and benefits, just as the other two systems were acquired. Of course, as the commerce of these cities grew, the railroad terminals must be expanded to meet its necessities. When the terminals cease to expand, as one witness expressed it, the commerce of St. Louis would cease to grow. So that, of physical and commercial necessity, the terminal

facilities of this greater St. Louis community was compelled to create a more rapid, continuous and general service and to seek to expand the terminals as then constructed.

We have seen that railroad access to the commerce of St. Louis is naturally divided into four sections—North St. Louis, Middle St. Louis, which comprises the Mill Creek Valley, South St. Louis and East St. Louis. All of the railroads which enter St. Louis have their termini at one of these four points; none of them run through St. Louis. They are all connected with each other and with the traffic of St. Louis by means of the Terminal Railroad Association tracks.

When these railroads were originally established, had the growth of St. Louis and the modern conditions of municipal life been foreseen, a different and more efficient plan might have been devised for terminals, but railroad companies in those days did not take serious thought of terminals in large cities. They did not take foresight of the immense future development of industry and commerce beyond their own immediate needs. It was then thought of railways, as well as highways, that if they brought persons to the City the service was sufficient and complete. The growth in the population of cities and in the volume of traffic has brought the subject of terminal facilities more seriously and pressingly, not only to the attention of the operators of railroads, but also to the public.

The ground required for terminals in large cities is enormously expensive. As the cost of terminal service must be borne by those who benefit by it, they are interested to keep that down to the lowest possible point. Railroad tracks and yards are unsightly; the movement of trains through them is attended with noise and smoke and dust; and so they

should be confined and restricted as closely as may be consistent with the needs of the community. As a city grows it needs more sewers and more water pipes, but it does not need more sewer systems and more water systems. In like manner, as a city grows it needs more terminal facilities, but it does not need more terminal companies. Indeed, all local or municipal public utilities tend necessarily to a unitary system, for physical reasons, if for no other.

And if each railroad in a city had its own comprehensive terminus, they would still fail of their highest efficiency unless they were brought into connection with each other, for often traffic must pass from one line to another, even where those lines considered in their entirety are competitive. A factory in St. Louis might be situated on a Wabash track, and yet have its freight from Chicago brought in over the Alton, and unless the Alton could use the Wabash switch, it could not make delivery at the factory, and bulk must be broken and delivery made by wagon.

We have twenty-four roads coming into the St. Louis community from various directions, and no through roads. Each of these has, and must have, terminals for its own distinctive purpose, and none of them has, or can have, comprehensive terminals giving it access to every portion of the city. It has its own station and side tracks for the freight to be delivered to the consignee at that station or sidetrack, but this will be a small part of the freight it brings to the city, and it will not be all of that even which finds ultimate delivery in the city. Most of what it brings in is to go out to some point beyond or is to be delivered at a warehouse or factory located upon the track of some other road.

There must then be a physical bond or union between the different railroads entering a city or their

highest efficiency cannot be reached. To accomplish this union there must be some arrangement between them. An independent company may build the connecting tracks and operate them, but that does not obviate the arrangement between the railroad companies; it simply makes necessary another party to the arrangement, and it involves a distinctive profit for a distinctive service. If one terminal company does not connect up all the lines, and two or more companies divide the field, so much the worse in every respect. Each company then must have its own engines, its own crews, its own receiving and delivery tracks, its own inspection, its own billing, multiplying the labor and expense of the terminal function by the unnecessary division of the function itself. It is to the public interest and advantage that all the railroads entering a city be brought into physical union, and the function of the terminal railroad is to effect that union, and the question of competition is not involved any more than in any other case of union of connecting lines; for only in so far as they form connecting lines, have the railroads any occasion for the union effected by the Terminal Company. The best solution of the terminal problem is, therefore, the simplest one.

Radical improvement and enlargement of St. Louis terminals began with the construction of the Eads Bridge. This was the work of a bridge company which did nothing but build the bridge, and which was independent of all the railroad companies, save as it desired them to use the bridge. Another independent company constructed the tunnel; a third, connecting tracks on the east side; a fourth, connecting tracks on the west side, and a fifth built the Union Station.

The facilities of the five companies must be used to

bring passengers from the terminus of the railroad in East St. Louis, and debark them at the Union Station. This was a clumsy and inconvenient arrangement, but it was the work of thirty years ago. It should all have been done by one company, and the obvious advantages of a single system resulted in bringing these several facilities under one control in the year 1889. It is obvious also that the railroad companies having occasion to use these facilities should have the right to use them upon equal terms.

As a consequence of the construction of the Eads Bridge, the Wiggins Ferry Company was compelled to make great changes in its mode of business. Through companies, one on the east side of the river and one on the west side, it constructed tracks along the river shores connecting with inclines, by means of which it was enabled to transfer cars from one side of the river to the other and avoid the breaking of bulk.

In 1886, a new bridge, the Merchants, was projected and was authorized by Act of Congress of February 3rd, 1887. The St. Louis Merchants Bridge Company was incorporated to build the bridge. An Illinois Company was organized to construct connecting tracks on the Illinois side, and a Missouri corporation, the St. Louis Merchants' Bridge Terminal Railway Company, was organized to construct connecting tracks on the Missouri side. Here were three links in one and the same chain of communication. These three links were, and properly, brought under one control and constituted the Merchants' Terminal System. None of the railroad companies entering St. Louis had any ownership or control of this system.

Here now were three distinct terminal systems no one of which, however, was sufficient for the needs of the situation.

As to the passenger business, the older company was in control. It had the Union Station and connecting tracks, and all passenger trains must come in and go out of the Union Station. Its bridge, however, could be reached only by means of the tunnel and so all passengers to and from the East must go through the tunnel. The Merchants' Bridge had open approaches on both sides of the river, but no connections with the Union Station.

As to freight, each of the companies had its own way of getting across the river and the old company had some sort of connection direct or indirect with all of the railroads on both sides of the river. The connections of the Wiggins Ferry and Merchants companies were not complete. But each of the companies could handle some of the business across the river and there was potential, if not actual, competition between them for some of it. How much of this business was thus open to competition is not shown by the testimony, but the physical conditions indicate that it could not have been a large proportion.

On the west side of the river there was but little territory common to the three systems or to any two of them. The old company had the Mill Creek Valley, the Merchants Company had North St. Louis, and the Wiggins Ferry the southern section of the city. To transfer or switch from one section of the city to the other required the use of the tracks of two and often three of the companies.

Neither of these systems, then, was a complete one either as to passenger or freight service. If passengers to or from the east were to be spared the passage of the tunnel, properties of the older terminal company and the Merchants Company must both be used, the station and tracks of the one, and the bridge and tracks of the other. If the different railroads

entering into the city were to be brought into efficient union with each other, and if the warehouses and factories of the city were, each and all of them, to be brought into track connections with each and all of the railroads, the facilities of all the terminal companies must be united and used in common for that purpose. Either that must be done or each of the three terminal companies must develop a complete system of its own.

The railroad companies determined upon one system of terminals, and to accomplish this, the leading ones among them acquired control in the manner alleged in the answer of the three terminal companies. Fourteen railroad companies are spoken of in the pleadings as proprietors, but some of these companies have such inter-relation with others, that, excepting two short coal roads on the East side and the Chicago, Peoria and St. Louis road, and the St. Louis and Southwestern, every railroad entering the cities of St. Louis and East St. Louis is represented in the proprietorship of the consolidated terminal system; and beyond this, the roads not so represented have the use of the terminals for the actual cost of that use. No charge of discrimination or oppression by any railroad company is to be found in all this enormous record. As proprietorship carries with it nothing distinctive except an obligation to join in the guaranty of fixed charges, no application for partnership therein ever has been, and we may safely add, ever will be refused.

ADVANTAGES OF UNITARY TERMINAL SYSTEM OWNED AND CONTROLLED BY THE RAILROAD COMPANIES USING IT.

The bill of complaint seeks to dissolve the present terminal system and asks that the three elements composing it be maintained, operated and developed as independent institutions. We have one system now owned and controlled by the companies using it; will it promote the public welfare to have three systems owned independently and operated for a distinctive profit?

If we had our three independent terminal companies, we should find that with the present facilities, no one of them could of itself render satisfactory service to any one railroad company. For example, the Terminal Association has the Union Station for passengers, but its terminal connection with the Eads Bridge is very objectionable to many people. The Merchants Bridge has open approaches and is preferred to such an extent by some companies that they make detours of several miles to use it. To avoid the tunnel and still use the Station involves an arrangement or combination between the two terminal companies. We have that now, and to avoid it and still get the service desired, either the Terminal Association must build a new bridge or the Merchants Company must supersede the present Union Station.

To give all of the industries in the community access to all the lines of railroad, requires, as far as concerns conditions, in most cases, the use of tracks of two or more of the terminal companies and this again would involve a combination or agreement be-

tween them. We have that now and to avoid it and still get the service desired, each of the companies must extend its tracks in every direction to reach every point now reached by any of them.

A view of the conditions will show this to be physically impossible. Mill Creek Valley divides the city into North side and South side. It is the natural location for the railroads leading to the West. So far as the terminals are concerned, it is fully occupied by the Terminal Association and there is room for nothing more. The same is measurably true of the Northern field, occupied by the Merchants Company, and of the river front district, occupied by the Wiggins Ferry.

Even if it were physically possible, unsightly tracks and yards should not be duplicated and triplicated unless there is absolute necessity for it. They do not in themselves contribute to the beauty of the city, nor does the operation of them add to the comfort and convenience of the inhabitants. Besides, the cost would be enormous and would impose a useless burden of expense upon the business done over the terminals.

These objections to three separate systems are all of a public nature; they are, all of them, obvious and they are overcome, so far as is humanly possible, by a unitary plan.

The only objection that is made or can be made to the unitary plan is that it eliminates competition as to the terminal service. There was some territory common to two or all of the separate terminal systems, and there was some competition as to traffic in this territory. This competition, it may be urged, would have become general with the development and extension of each separate system. We may grant this, for the sake of argument, but we still in-

sist that it proves nothing in favor of numerous and independent terminals.

The transportation of any commodity begins at the point of its production and ends only at the place of its consumption. This may involve carriage over a number of roads, crossing over several ferries or bridges, and hauling in a number of wagons. Every instrumentality used in the course of this transportation is a connection, and being connections, they may all be brought under one control. The competition which public policy demands, is competition between the point of production and the place of consumption. A river breaks the continuity of transportation by rail. Freight must be unloaded and ferried across and there may be two or more ferry companies, and if so, they should compete with each other. But this does not prohibit the railroad companies, the continuity of whose lines is broken by the river, from uniting in the construction of a bridge to be used by them in common. And as they may unite to build the bridge, they may unite to acquire ferries.

A great city operates in many cases, and it certainly does in St. Louis, to break the continuity of transportation. No line runs through St. Louis, and yet freight must go through. Here, as in the case of the river, is an obstacle to be overcome. How shall it be done? The answer is the same as in the case of river—in the most economical way possible. Bulk may be broken and freight hauled through the city, but however great the competition between teamsters, this means great delay and great expense. To build a line of railway through the city destroys the competition of the teamsters and yet the law authorizes this to be done, because it is in the interest of economy. And as railway construction through a

great city is enormously expensive, two or more companies combine, as in the case of the bridge, and build one line which they use in common. The competition between the carriers remains as to the transportation from the point of production to the place of consumption. The agreement as to the line through the city is simply an agreement as to a common means for overcoming a common obstacle.

The work done over terminals is practically all of it work done for railroad companies. It is a part of the transportation of commodities from the place of origin to the ultimate destination. Most of it is the haul from one road over which it is brought into the city to another road over which it is to be taken out of the city. A lesser portion of the work, although a very considerable part of it is hauling the commodity from the shippers' place of business to the place of receiving by the railroad company, or from the place of delivery by the railroad company to the place of business of the consignee.

Competition as to service of this kind, concerns directly and primarily the railroad companies, because it is a service which they may themselves perform and which they should perform whenever they can economically do so. The fewer the distinct agents of transportation between the point of production and the place of consumption, the better for the producer and consumer, because there are fewer profits to be paid.

Whatever in the nature of transportation others may do for the railroad company or for the shipper, the railroad company itself may do. When the business justifies it, the company may build a switch to a warehouse, mine, mill or factory, and indeed the statutes of many states requires this to be done. Competition between teamsters is destroyed when the

monopoly of the switch is established, but the switch is an economy to the shipper and the railroad company and to the general public, and this includes everybody interested to preserve competition between the teamsters so long as the work was done by them.

Our contention comes to no more than this, that the terminal service necessary to be done in a great city may, any or all of it, be done by the railroad companies for themselves. A company may build its own line connecting with another road on the other side of the city, and it may use its own wagons to receive and deliver freight at store doors.

This, and no more, the railroad companies of St. Louis have done. They have acquired the terminal facilities of St. Louis for themselves and are operating them as a part of the instrumentalities of their business. That each one might do this if the instrumentalities employed were its own is conceded, but it is denied that they may combine with each other for that purpose.

THE UNITARY SYSTEM IS IN ACCORD WITH PUBLIC POLICY.

The illegality of such a combination, if it is illegal, grows out of its subject-matter and does not depend upon the number of parties to it. Railroad companies have transportation to sell and if there are three railroad companies doing business between Chicago and St. Louis, a combination between any two of them pooling business between St. Louis and Chicago, is just as illegal as a combination of the same kind in which the three engage. These companies are interested in terminal service in the two cities, and if this service stands upon the same footing as transportation between the two cities, then no two

of them may combine as to that service, either directly or through the common use of terminals furnished by a third party, but each must possess its own facilities.

We submit that terminal service is a matter of internal economy which the companies may adjust to mutual advantage and that no arrangement respecting it operates to restrict competition between them as to the transportation service for the public in which they are engaged.

Albeit the companies operating between Chicago and St. Louis, own in common the terminals in both cities, each has still its individual interest to do all the business possible between the two places. They stand in the same relation to the tracks which constitute their terminals that they do to the bridge spanning the Mississippi. They may use one and the same bridge and what difference does it make whether they own the bridge or lease it, or pay for its use on the wheelage basis. There is in any event a common use and a common charge. There is an arrangement between them, or should be, which puts them on an equality as to this bridge, and none the less so that each of them contracts with a bridge company, instead of with the other railroad companies, and so it is with the rest of the terminal facilities. There is a common use and a common charge and a common agreement even though it be made effective through a fourth party.

Whatever facility railroad companies may use in common, they may own in common. Whether the facility is hired or owned is a mere matter of convenience or economy. If the railroad company is poor in purse and credit, it must hire many things which otherwise it would prefer to own. If the terminals are distinctly owned, there must be a distinct

profit for their use. In our large cities it is found that one plant may furnish heat, light and power to two or more buildings. One proprietor puts in a large plant, one with capacity beyond his own needs, and he serves his neighbors, to a better advantage than they can serve themselves, and with a profit to himself. In such a case, the other owners might well conclude that one man should not reap all the profit resulting from this service and so make an arrangement that the plant which rendered this common service should be owned in common. This certainly is not on the same basis as an agreement between them fixing a schedule of rents which they all pledged themselves to maintain. The one is an adjustment of a matter of internal economy in which all participate and benefit who are concerned, while the other is a combination of landlords on the one side against tenants upon the other, in which the tenants do not participate and the benefits of which they do not share. Common arrangements affecting internal economy have never been held to be in violation of public policy and whenever, in the advance of civilization, they have suggested themselves as feasible, they have been recognized by law, and appropriate regulations have been prescribed for them. In the country every man builds independently. The man who has a hundred and sixty acres of land to build upon does not consider the question of party walls. But if in the crowded section of a great city all construction were done independently; if each building had its own distinctive walls; the waste in space and the increase in cost of construction would be very great. We are coming more and more to a common use of things and to a common ownership of the things of common use. The disposition of sewage, the supply of water and light are familiar examples of functions,

which once were performed by private agencies and under conditions of competition, the common interest in which led to the common use and common ownership of the facilities involved. There is a monopoly now of the performance of these functions, but it is not an illegal one, for the people who are to be served own, or if they do not own, through their power to regulate, control the exercise of the monopoly.

Community of use of terminals in a large city is more than a matter of convenience, or economy, it is an absolute public necessity. The bill of complaint recognizes this, and is distinctly at cross purposes with itself. It alleges that the railroad companies which are proprietors of the Terminal Association "compel all other railroad companies which are not owners of stock in said Terminal Association for inter-state commerce between Illinois and Missouri and * * * * jointly and arbitrarily fix unreasonable charges and tolls to be paid for freight and passengers to be hauled and transferred in the interstate business between Illinois and Missouri."

As to the averment respecting tolls and charges, we have to answer: First, that under the Interstate Commerce law and, indeed under the common law of the land, these must be reasonable and the government has the power to make them so if they are not. But the charge of extortion is absolutely without support in the testimony. There was not even an effort to support it, and on the other hand, the evidence is conclusive that the charges are based on cost of operation, proper maintenance and fixed charges. No one of the proprietary companies is interested in the fixed charges except as a guarantor and as helping to pay them through its use of terminal facilities.

The charge of the bill that the proprietary railroad companies compel all other railroad companies

to use the facilities is not true. There is, indeed, a compulsion, but it is inherent in the situation. The other companies use the terminal property because it is not possible to acquire adequate facilities for themselves. The cost to any one company is prohibitive. Beyond this, the city of St. Louis would not and should not permit the laying of tracks and establishment of yards everywhere throughout the city in order that each company might have a terminal system of its own. And even if it were done, if the necessary cost were incurred and the city laid waste to the extent required, these terminals to be effective of their purpose must still be co-ordinated in some way. Some arrangement must be made by the companies if freight is to pass from one road to another. The moment we deal with freight passing through here, or either originating here or destined here, which must make use of more than one line, and this means by far the greater portion of all that is handled here, that moment we find that these so-called terminals are really connections binding the various lines of railroad together so that continuous transportation can be had over them from one part of the city to the other. A common use of all the facilities in the city is thus unavoidable. A company may, indeed, as is the case with most of them, have a station and sidetracks exclusively its own, but so far as these are used exclusively by itself, it is, and can be, only for freight which it takes on at its station for shipment over its line, or which comes in over its own line and is destined for delivery at its own station.

Union stations and union terminals of all kinds are not an invention or discovery. They are a new development. They have grown out of the necessities of municipal conditions. Two railroads in the west projected as independent lines can cross a moun-

tain range only through one pass, and this of a width which permits the construction of but one line. What is to be done in such case? Is the first line to reach the pass to have a monopoly of its use? If so, the second line must be abandoned or resort to tunnels, perhaps, which will overburden it with the expense involved. The common sense solution of the problem is that both may use the pass, and whether the line through this is built on joint account or whether it is built by one of the companies, the result is still the same; there is a common use and this may properly be under a common ownership.

And so it is in a great city. Undoubtedly it would be of great advantage to the first company building in, if it acquired an extensive terminal system enabling it to reach all the different sections of the city. Companies coming in later, in order to compete successfully, must acquire like facilities and at greatly increased cost or they must be admitted to the use of those already existing and owned by the other company. The first course would be an increasingly expensive one and increasingly objectionable from the civic standpoint. The second course would leave the latter companies too much at the mercy of the earlier one. They should all have equal facilities for the proper transaction of their business, and they get this when they are admitted to the use of the existing terminals upon equal terms.

The convenience of transportation also requires the unification of terminal systems. If we have as many systems as we have railroads, it might require a dozen handlings, in some cases, to move freight from one part of the city to another. Each company must handle it over its own road, greatly increasing both the time required and the expense involved. How it would be done is described by the witness,

Perkins. The first company takes a car over its own track and delivers it to the connecting line upon a receiving track appointed for that purpose. Then follows inspection, receipting, billing, etc.; and a new engine and crew to take the car over the second link of the chain with a repetition of the performance had at the first delivery; and so at the end of each link in the chain of connections. Delays would be unavoidable and expense would be enormous. The repetition of the performance at each delivery of the car to a connection is obviously something that should be dispensed with, but can not be except as the various links are brought under one direction and the chain is dealt with as a single line. Another great practical advantage is that at all times the route through the terminals which can be used to the best advantage is employed. If one track is occupied or otherwise obstructed, the train may be sent over another. If something has happened on the Eads Bridge, the Merchants is open for use. Thus as many routes are available as can be made up out of the various tracks and always the best one for the purpose in hand may be used.

Every consideration of a public nature points to a consolidation of the terminals and to a common use of them by all the railroad companies coming into the city. But to avoid the odious phases of a monopoly this use must be open to all upon equal terms. It matters not whether the ownership be a distinct one, or whether it be by the railroad companies, so be it the use is common and upon equal terms. Ownership by all the railroad companies gives the best assurance of the best conditions of use, and that is practically what we have in St. Louis. Fourteen companies own the stocks of the Terminal Association, and while there are some companies outside the proprietorship,

none are excluded. They remain outside of their own accord, probably because proprietorship involves guaranty of the liabilities of the Terminal Association. But they have only to knock at the door and it will be opened. Meanwhile they use the terminal facilities upon the same terms with the proprietary companies. The charge for service in any case can be stated in one word—cost. No money received for the service rendered goes to any other purpose than paying expenses of operation, taxes, fixed charges, and proper maintenance. No dividends are paid upon terminal shares, and no proprietary railroad company is a beneficiary of fixed charges. Any new railroad built into St. Louis now has but to secure a way to a Terminal track and it has at once the advantages of the entire Terminal system.

STATUTES RELATIVE TO TERMINALS.

The public policy of the country as indicated by statutory enactments has been in favor of combination by railroad companies whenever any common matter of internal economy is involved, and also where the combination is in the nature of connecting lines of railroad for the purposes of continuous transportation.

We might cite numberless charters for bridges across the navigable rivers of the country intended to be used in common by two or more railroad companies which may be either common proprietors or may be tenants of a distinctive bridge company. Two bridges across a great river, where one will serve, do not facilitate commerce, but burden it with an unnecessary charge, and one bridge being constructed, the requirement of freedom from restraint of trade is met when all have occasion to use the bridge can do so upon

reasonable and equal terms. And it has never been enacted by any legislature that those who use the bridge might not have a proprietary interest in it and neither has any court decided that such an interest was against public policy.

Common use of the same facilities by different railroad companies has not only been approved, but has been enforced whenever there has been good reason therefor. The Act of Congress of March 3rd, 1875, provides that no company which shall locate its road through any canyon, pass or defile shall prevent any other company from the use of the same canyon, pass or defile for the purpose of its road, in common with the road first located.

The combination of connecting lines of road has, from the beginning, been regulated as in harmony with public policy and is provided for by the laws of perhaps every State in the Union. The combination facilitates commerce but not more so than does the combination of the various connections that make up the terminals of a great city.

The essential quality of terminals in a city, that of connections between the lines of railroad entering the city, may not have been generally perceived in the beginning, but when the railroads of the country had been fairly well developed, it became obvious that each new road, as it was constructed, could not acquire for itself a comprehensive system of terminals, and union stations and terminals were authorized by statute.

Sections 1164 and 1165, Revised Statutes of Missouri, make elaborate provisions for terminal companies to be formed either by individuals or by railroad companies, and this is done "in order to facilitate the public convenience and safety in the transmission of goods and passengers in and in the neigh-

borhood of large cities, from one railroad to another, and to prevent the unnecessary expense, inconvenience and loss attending the accumulation of a number of stations."

The State of Illinois also by an Act approved April 7th, 1875, declared the same public policy and authorized the formation of Union Depot Companies, either by individuals or by railroad companies.

The Act of Alabama, approved February 15th, 1907, respecting the establishment of depots, contains the proviso "that this Act shall not prevent the establishment or maintenance of union depots by two or more such railroad companies or corporations"

Indiana, so early as 1852, provided for "union roads," enacting that, "It shall be lawful for two or more railroad companies running railroads to the same town or city, to locate, construct, keep up, repair and use a common or union railroad of one or more tracks, connecting the railroads of such companies for business purposes." Burns Annotated Statutes, Col. 2, Secs. 5345 to 5374.

Iowa authorizes union terminals and the shareholders in the terminal company may be either individuals or railroad companies, Secs. 2099 to 2102, Annotated Code of 1897.

Maine provides for joint use of passenger stations by section 60, chapter 51, Revised Statutes of 1903.

Massachusetts has at different times passed laws requiring railroad companies to unite in stations.

Michigan has an elaborate code governing union depot companies. Chap. 166, Compiled Laws of 1897, Railroad companies may be shareholders in the union depot companies.

Minnesota, by Act of March 5th, 1879, provided for the St. Paul Union Depot Company and authorized subscription to its stock by any railroad then

or thereafter constructed and running to or into St. Paul.

Nebraska, by Chapter 20, Laws of 1887, makes express provision for union depot companies, and by section 1816, Compiled Statutes of 1901, provides for joint terminals.

North Carolina has a union depot law and under its provisions the Corporation Commissioners may compel the establishment of such depots by the railroad companies.

Ohio expressly authorizes union depot companies to be formed and operated by railroad companies. Chapter 3, Title 2, vol. 2 of Bates' Annotated Statutes.

The South Carolina Code of 1902, vol. 1, page 813, requires the railroads entering or passing through a city to build connecting tracks.

Tennessee authorizes terminal companies with very broad powers, and provides that they may lease their properties to railroad companies having occasion to use them, and it authorizes railroad companies to become shareholders in terminal corporations. Sections 2429 to 2437, Code of 1896.

Texas, by Chapter 16a, of the Civil Statutes of 1897, authorizes corporations for union depot purposes and empowers railway companies to subscribe for their stock.

Virginia, by Section 1294, of the Code of 1904, provides that where two or more railroads terminate in a city or town and they cannot get permission from the city authorities to connect their lines within the corporate limits, they may make the connection outside of those limits.

These various statutes all recognize the essential nature of the terminals in a city as being connec-

tions between the different railroad companies and the function performed by them as being an integral part of the function of transportation undertaken by the companies severally. They recognize also that co-operation as to this terminal function does not affect competition between the companies, and further, that general economy and the comfort and convenience of life in a great city are promoted by a unitary terminal system used in common by all the railroad companies entering the city.

Union depots and union terminals exist in States which have made no provision for them by name, and they were built up not in disregard of law, but in response to the demands of the public interest and general welfare, and under the sanction of the general railroad law which in every State we have been able to examine contains provisions broad enough for the purpose.

Among the general powers conferred upon railroad companies by Section 4096, of the Mississippi Code of 1906, is that, "To cross, intersect, join or unite its railroad with any other railroad heretofore constructed at any points on their routes, and upon the ground of such other railroad company, with the necessary and proper turnouts, sidings, switches and other conveniences and to exercise the right of eminent domain for that purpose."

This may be taken as a fair example of the laws of every State of the Union. It has no reference to the combination of long connecting lines and it gives no sanction to the combination of competing lines. The same laws which contain provisions like that quoted, also contain provisions authorizing the combination of connecting lines and prohibiting the combination of competing lines. The section has in view

of coming together at a city or town of two or more railroads, whether by mere convergence or by crossing, and recognizes that whenever this occurs there is a public need for the common use to some extent of the facilities of all the companies. Two railroad companies coming into a city may be in true sense parallel and competing lines, but unless they are as two tracks of one road each one has a large territory in addition to that which it serves in common with its competitor. The Wabash and the Missouri Pacific are competing lines between Kansas City and St. Louis, but not for any intermediate points. This is generally, if not universally, true of all so-called competing railroads. A shipment from an intermediate point on one of the roads to an intermediate point on the other must pass over both roads, and as to such a shipment the two roads are connecting lines. Beyond this, while at a city or town where the two roads closely converge, or cross each other, one or more factories may be so situated as to have track connections directly with both, this cannot be true generally of the factories and warehouses in the city, and to give a factory or warehouse located on one line the advantage of the use of the other line, there must be established a connection between the two. Ever such connection involves a common use and a common arrangement for that use. And so from the beginning the laws provided for it and even required it, placing the public interest above what the management might conceive to be the interest of the individual company.

The United States has also recognized the propriety of union stations and terminals and to the extent of compelling the railroads entering the city of

Washington to join in the construction and maintenance of the Union Station which has recently been opened to public use.

It would be singular, indeed, if all of the States severally and the United States as well were giving their sanction to arrangements and agreements which are in violation of the Sherman Act, and it is much more probable that a construction of that Act leading to such a result is entirely without warrant.

JUDICIAL DECISIONS RESPECTING TERMINALS.

Union terminals have been frequently before the courts for consideration, and have always been recognized and approved as legitimate agencies in the work of railroad transportation.

The very arrangement we have to deal with in the present case was the subject of direct attack by the Attorney General of Missouri in State vs. Terminal Railroad Asociation, 182 Mo. 284. It was contended that the arrangement was in violation of section 17, Article 12 of the Constitution of Missouri, prohibiting the combination or consolidation of competing lines of railroad. The court said:

> "The purpose of the General Assembly was to allow such combination among the managers of the railroads entering the city as to reduce to the minimum the number of tracks, bring all the trains to one terminus, all freight to a common point for distribution, all cars to a common yard. It expressly authorized two or more railroad companies to do this and put no limit to the number that might so combine.
>
> The railroad companies in this State have for thirty years past been acting on the theory that

they had the right to do that, and so they have, unless we can say that the framers of the Constitution intended to forbid them doing so.

The purpose of the statute is not only not in conflict with the purposes of the Constitution, but is in aid of it. We have between our two great cities, St. Louis and Kansas City, four or five railroads which, in the sense above mentioned, are parallel and competing lines for the traffic between those two cities. Suppose a manufacturing concern in the northern part of the city has a switch track to its establishment connecting it with the Merchants Terminal tracks and desires to make shipments of its products to Kansas City, the business of the concern being of such magnitude as to make its patronage an object of rivalry between all the railroad companies reaching that market. But if the Merchants Terminal Company can deliver the cars which are loaded on the switch at the manufacturer's establishment to one railroad only that railroad has a practical monopoly of the business of that manufacturer. But if the whole terminal system is open to the shipper he may invite bids on his freight and employ the railroad that will take it at the lowest rate. That is the system that this respondent has established, and it is bound to serve all railroad companies approaching St. Louis on the same terms; in the language of the information "the general object and purpose being to provide the most ample and convenient connections, accommodations and terminal facilities in St. Louis for all railroads now entering, or hereafter to enter the same, and all individuals and companies doing business with said railroads." The State has ample power to hold the respondent to a faithful performance of that public duty, to prevent favoritism and to prevent extortion.

We gather from the information that all along the lines of the terminal tracks, intersecting the city from north to south, from east to west, and

belting it on the west, there are manufacuring and other business concerns with switch tracks or spurs into their premises, which enable the shipper to load the cars on the switch tracks on his premises and have them delivered to any railroad that reached the city. **A more effectual means of keeping competition up to the highest point between parallel or competing lines could not be devised.** The destruction of the system would result in compelling the shipper to employ the railroad with which he has switch connection, or else cart his product to a distant part of the city, at a cost possibly as great as the railroad tariff. St. Louis is a city of great magnitude in the extent of its area, its population, and its manufacturing and other business. A very large number of trunk line railroads converge in this city. In the brief of one of the well-informed counsel in this case it is said that St. Louis is one of the largest railroad centers in the world. **Suppose it were required of every railroad company to effect its entrance to the city as best it could and establish its own terminal facilities, we would have a large number of passenger stations, freight depots and switch yards scattered all over the vast area and innumerable vehicles employed in hauling passengers and freight to and from those stations and depots. Or suppose it became necessary in the existence of commerce that all incoming trains should reach a common focus, but every railroad company provide its own tracks; then not only would the expense of obtaining the necessary rights of way be so enormous as to amount to the exclusion of all but a few of the strongest roads, but, if it could be accomplished, the city would be cut to pieces with the many lines of railroad intersecting it in every direction, and thus the greatest agency of commerce would become the greatest burden.**

This is what our General Assembly as early as 1871, to some extent at least, foresaw and attempted to relieve against, and we cannot believe

that the Constitutional Convention of 1875, was less appreciative of the conditions then present or in prospect, and hence **we cannot believe that the Convention, when it said that two lines of railroads that were parallel or competing should not be brought under one ownership or management, meant that two lines, used exclusively for bringing the trains from the several railroad termini in the city or at the city's border to a common terminus, should not be so consolidated; because, as we have seen, the consolidation of the terminal facilities promotes the competition that this clause in the Constitution was designed to preserve.''**

People ex rel. Bernard vs. Cheesman, 7 Colo. 376, was an action of *quo warranto*, and in this a Union Depot Company was sustained as valid and for a lawful purpose under the general incorporation laws of the State.

In Central Railroad Company vs. Perry, 58 Ga., 461, it was held that where one company owned a track and depot and permitted another company to use them jointly with itself, the track and depot might be considered as belonging to each relatively to its own business.

In Birdwell vs. Gate City Terminal Company (Ga.) 10 L. R. A., new series 909, the company was organized under the general railroad law. Its right to exercise the power of eminent domain was contested upon the ground that it was a terminal and not a railroad company. The Court, however, held it to be a railroad company and its use to be a public use, and it saw no objection to the exercise of the power of eminent domain, that it might thereafter "sell, lease, assign, or transfer its stock, property, or franchises to or consolidate with some other

company whose road connects with or forms a continuous line with it."

In Indianapolis Union Railway Company vs. Cooper, 6 Indiana Appeals, 202, it was held that a Terminal Company assumes to carry out a portion of the obligations which the railroad company owes to the public.

In Reisner vs. Strong, 24 Kan. 410, the Atchison Union Depot and Railroad Company was sustained as a corporation *de facto* and held to have the right of eminent domain.

State ex rel. vs. Martin, 51 Kan. 462, is very like the case at bar. The Union Terminal Company of Kansas City, Kansas, was organized under the general railroad law of the State, and was purely a terminal company intended to build terminals in Kansas City, Kansas, and designed to be united with similar companies in Kansas City, Missouri, its facilities to form a part of the Missouri system for switching and terminals. The suit was *quo warranto* by the Attorney General of Kansas. The Court said:

> "Even the averments of the plaintiff do not show that the proposed use of the road is not a public one. Besides switching cars from one part of the city to another, it is alleged that the road is to be leased to other railroad companies for terminal facilities. Nothing is stated which shows that the companies to which the road is intended to be leased will not afford transportation to all who may apply or to all who under ordinary circumstances would be entitled to such service. The convenience and necessity of belt and terminal roads in crowded and populous cities is well understood and has been frequently demonstrated. **A single road which reaches a union and other depots, as well as warehouses,**

> **elevators and other places in the city, is made to serve all the railway companies operating to and from the city, when it would be impracticable and perhaps impossible, for each of the companies to secure an entrance and build its own line to the depots, stations and storehouses in all parts of the city where the railroad service is required.** By this means unnecessary roads and expenses are avoided, and the facilities and convenience of the public are greatly enlarged. Every unnecessary mile of railroad track adds to the cost of transportation; and as the public which uses these roads is required to bear the burden of this extra cost, it is clearly in the interest of the public that a terminal road, which affords transportation to all companies and people, should be constructed and maintained."

Here without express statutory sanction and simply as inherent in the situation, a single terminal system is recognized to be a public convenience and necessity, and as not restricting, but as greatly enlarging the facilities for public use.

In Mayor vs. Norwich, etc., R. R. Co., 109 Mass. 103, the Legislature had passed an act requiring certain railroad companies to unite in a passenger station in the city of Worcester and the validity of this act was drawn in question in the case, but the contention against it was overruled. The Court said:

> "The Boston & Albany Railroad Company must of necessity have a passenger station in Worcester, and it is obviously important to the public that all the other railroads named shall be connected with it."

The same legislation was sustained in Mayor vs. Railroad Commissioners, 113 Mass. 161.

In Union Depot Company vs. Morton, 83 Mich. 265, the Union Depot Company sought to condemn

land and its right to do this was contested upon the ground that the use to which the land was to be devoted was not a public one. The Depot Company, it was contended, was not a railroad company, and the use of its property under the law chartering it was not open to the general public, but only to the railroad companies. The Court said:

> "The main argument against the constitutionality of the act conferring the power of eminent domain upon these companies (see laws of 1881, page 320, How. Stat., p. 888), is based upon the proposition that they must acquire such power entirely from the act itself; that the Union Depot Company is not a railroad company; it is not a common carrier, it is a new artificial person deriving all its rights and powers and finding absolutely all its obligations in this, its organic act. Therefore, it is argued it is clearly independent of and not affected by the body of the railroad laws and amendments embraced in Chapters 91 and 92, How. Stat., which confer rights and privileges upon railroad companies and also provide certain and clearly-defined reciprocal duties to the people, the imposition of which duties by law is the criterion which makes the use for railroad purposes a public one. It may be admitted for the purposes of this case, that so far the contention of counsel is correct, and that we must look to the act itself to support the claim of the company to the right to acquire land by condemnation for public use.
>
> But going further, the counsel also claim that in this act nothing can be found conferring upon the public at large any rights in the contemplated passenger depots and freight houses; that the people at large—the common public—are given by this statute no fixed and definite rights in these depots; and that there is nothing to prevent the companies organized under it from charging what they please for depot services to the public at large.

It is said that the provisions of the statute apply only to dealings between the depot companies and the railroad companies who may use the property of the former companies; that this company, for instance, 'may shut its doors against the approaching passenger unless he pays its price to go in, and that there is nothing in the act to compel it to open its passenger depot or its freight house at all to the community in which it is proposed to erect this structure.' That the act only provides for those entering the same by the railroads that terminate or connect with it.

The argument is, if we understand it, that the public at large have no rights specified by the act, unless they act and use the same under the privileges granted to the railroads. It appears from the record that the Fourth Street Union Depot Company was organized for the purpose of furnishing depot and terminal facilities for four different railroad corporations and for all other railroads that may hereafter desire admission thereto. The four companies now interested are the Flint & Pere Marquette Railroad Company, the Wabash Western Railroad Company, the Detroit, Lansing & Northern Railroad Company, and the Canadian Pacific Railroad Company. It would seem that a depot built to accommodate all the railroads coming into Detroit, or, any considerable number of them, and to be used by them for the same purposes that any one railroad company would use its own single depot, would be, when so used, without question, put to a public use, as it has long been settled that a railroad company may acquire, by the right of eminent domain, grounds for its depots and station houses; and this right is not questioned by the counsel for respondents.

The Act (Section 6) confers in express terms, this right upon companies organized under it, and provides that such right shall be exercised, and title to be acquired to the lands sought, in

the manner and by the special proceedings prescribed in the Act. How. Stat., Sec. 3463. Section 28 of the Act provides that all companies formed under this Act shall, for a reasonable compensation, provide suitable depot accommodations for the passengers and freight of the railroads terminating or connecting with it or desiring access thereto; and shall provide suitable tracks therefor without discrimination in favor of or against any of such roads. If the corporations cannot agree upon the terms and conditions upon which such accommodations shall be furnished, and the business transacted, the Commissioner of Railroads shall determine the rate of compensation to be paid for the accommodations required, which shall be uniform to all such railroad companies, but no such rate shall be fixed as will reduce the net annual income of the business of said company to less than seven per cent. of the cost of the property used. Section 29. Companies formed under this Act shall not at any time charge or receive for warehouse or elevator service or use more than the average rates then prevailing at the cities of Toledo, in Ohio, and Port Huron, in Michigan, for like service or use. Section 30. Any Union Railroad station and depot company may, and whenever it is expedient, and such trains will pay the expenses thereof, shall put on local passenger trains to do a local and suburban passenger business, and for such local business upon or to the end of its tracks shall be entitled to charge for each passenger not exceeding four cents per mile; and upon the application of any ten suburban citizens for the establishment of such trains, unless the company comply with the request, it shall be, upon the same request to the Commissioner of Railroads, competent for him to investigate and determine whether such trains shall be established and, if in favor thereof, it shall be the duty of such company to establish and maintain them so long as he shall re-

quire it to be done. How. Stat., Secs. 3485-3487.

It seems to me that the rights of the public to use the depots of these companies, their freight houses and elevators and, in certain cases, their trains, which under certain conditions they must operate, is fixed, definite and certain.

The public at large have the same right in them as they have in the depots and freight house and cars of railroad companies in this State; and the representative of the public, the Commissioner of Railroads in this State, is given powers of control and regulation over them. Their charges must be reasonable, and the maximum is under State control, as in the case of railroads.

No additional charge can be imposed upon the public by any railroad contracting with the Union Depot Company, by reason of its agreement with such depot company, while the public is benefited as well as the railroad companies by increased facilities of travel and transportation. **That a union depot like the one sought to be established by the petitioner in the City of Detroit, would be of great and incalculable public benefit, no one who reads this record can doubt.** The act stamps the property to be taken with a public character and imposes upon it a trust for the public use, which cannot be divested by any act of the corporators of the company. The law of its existence plainly prevents it from becoming a mere private corporation, or from disregarding its public use."

In Detroit Station Company vs. Detroit, 88 Mich. 347, it was held that a union station company might, as a part of its facilities, maintain an elevator, this being "as essential and necessary to the complainant in the handling of its grain as is its depot for the use of passengers, or its freight depot for the handling of the general merchandise it carries."

The General Statutes of Minnesota, Title 1, Chapter 34, authorized a union depot company whose business was "to build, purchase or lease and operate transfer tracks or railways in the city of St. Paul, open alike to the use of all railroads now constructed or which may hereafter be constructed to or into St. Paul. Any railroad might become a stockholder in said union depot company.

In State vs. St. Paul Union Depot Company, 42 Minn. 142, the Court speaking of the depot company said:

> "It is evident that this act contemplated that the entire stock of defendant should be owned by and equitably apportioned among the various roads desiring to use its terminal facilities * * * It is also apparent that it was never intended nor contemplated that the defendant should do what may be termed a 'separate and independent railroad business of its own,' but that it was merely designed as an agency through which there might be furnished, for the common benefit and use of all railroads coming into the city, a union depot and terminal facilities, to better enable them to perform their duties as common carriers in receiving, delivering and transferring passengers and freight in the city."

The matter was further considered in St. Paul Union Depot Company, vs. M. & N. R. Company, 47 Minn. 154, wherein the Court said:

> "It seems apparent that the object sought to be accomplished was to bring all the railroads whose lines of road should enter the city into a legal, acting efficient combination, as a convenient and advantageous means of providing and maintaining suitable depot and terminal facilities for the common use of all the roads, facilitating transfers from one line of road to another,

and contributing to the convenience and advantage both of the railroad companies and of the public."

In Chicago, St. Paul and Kansas City Railway Company vs. Union Depot Railway Company, 54 Minn. 411, the terms and conditions upon which a new railroad company might enjoy the facilities of the depot company was determined.

In Dewey vs. Railroad, 142 N. C. 392, the Court sustained the act of the Legislature empowering the Corporation Commissioners where practicable, to require railroads to construct and maintain a union depot in cities and towns.

In Riley vs. Union Station Company, 71 S. C. 457, the defendant was a union station company chartered under a special act of the Legislature. Its stock was owned by the Southern Railway Company, and the Atlantic Coast Line Railroad Company, the only two railroad systems entering the city of Charleston and having termini in the city. The right of defendant to exercise the power of eminent domain was challenged because among other reasons, its organization was in violation of the Sherman Act. The Court said:

"We do not find in this case anything to warrant a conclusion that the organization of the defendant company is a scheme by the Southern Railway Company and the Atlantic Coast Line Railroad to do something which they could not lawfully do under their own chartered powers. They have become stockholders in defendant company by authority of a valid act of the Legislature, and the plan of organizing the defendant company for the purpose of securing an important public utility in the line of their own chartered purpose has legislative sanction. **The case**

presented has no similarity to the Northern Securities case, 193 U. S. 358, and other cases on that line, relied on by appellants relating to combination in restraint of trade, in violation of anti-trust legislation."

In Ryan vs. Terminal Company, 102 Tenn. 124, sanction was given to the Terminal Company as promoting a legitimate public use. The Court said:

"If it is true, then, that a depot erected by the Louisville and Chattanooga Road was a public use, why should a union depot, laid out and constructed for the accommodation of all roads now concentrated at Nashville, where for greater convenience, all travel and freight will be gathered, and to be used by these roads for no other purpose than this railroad would use its own depot, be any the less a public use? **The rapid growth of population, the yearly increase in volume and value of commercial interests, the pressing necessity for the speedy handling, delivery and transmission of freight to prevent accumulations and often ruinous delays, the vast economy in the matter of transfers, are among the considerations which have multiplied these depots in cities where railroads centralize, and we are satisfied no improvement in railway intercommunication more nearly touches the public than this.** * * * But it is said this is a private enterprise because the Act on which the charter rests fixes no rates to be charged by the corporation for the use of its tracks, etc. This is immaterial. The corporation and its property being affected by a public use will be under governmental control and the Legislature may at any time fix rates and make more specific the duties clearly implied from the act of incorporation. Minn. vs. Illinois, 94 U. S. 113. Budd vs. New York, 143 U. S. 517. Brass vs. North Dakota, 153 U. S. 391."

In Collier vs. Union Railway Company, 113 Tenn. 96, a belt line railroad was under consideration and the Court approved its purpose as a valid public use, saying:

> "In the present case it is shown by the principal officers of the road that it is the purpose of the company to switch cars from one road to another, to receive freight on the line of its road and give bills lading over its own and other roads to any part of the world, in other words, to perform all the functions of any ordinary railroad.
>
> We think, therefore, that it is clearly established, both by the charter and parol evidence, that the road is intended to subserve a public use, to conserve a public necessity; in short, to do any and everything that is required of an ordinary public commercial railroad."

The propriety of combinations among railroad companies with respect to their tracks and other facilities in large cities has been fully recognized by the Federal Tribunals.

In Joy vs. St. Louis, 138 U. S. 1, there was under consideration a contract between the Park Commissioners of Forest Park and two railroad companies under which the Colorado Company asserted the right to use the tracks of the Wabash Company through Forest Park and to the Union Station. The Wabash Company resisted this contention upon various grounds. The Court laid great stress upon the civic interest involved, and among other things, said:

> "Railroads are common carriers and owe duties to the public. The rights of the public in respect to these great highways of communication should be fostered by the courts; and it is one of the most useful functions of a court of equity that its methods of procedure are capable

of being made such as to accommodate themselves to the development of the interests of the public, in the progress of trade and traffic, by new methods of intercourse and transportation. The present case is a striking illustration. Here is a great public park, one of the lungs of an important city, which, in order to maintain its usefulness as a park, must be as free as possible from being serrated by railroads; and yet the interests of the public demand that it shall be crossed by a railroad. But the evil consequences of such crossing are to be reduced to a minimum by having a single right of way, and a single set of tracks, to be used by all the railroads which desire to cross the park. These two antagonisms must be reconciled, and that can be done only by the interposition of a court of equity, which thus will be exercising one of its most beneficient functions."

In C., R. I. & P. Ry. Co. vs. U. P. Ry. Co., 47 F. R. 15, was involved a contract for the joint use of the railway tracks and facilities which were located in part in the cities of Council Bluffs and Omaha. It was objected that the contract was **ultra vires**. The case came originally before Justice Brewer. Considering the phase of it relevant to the present inquiry, he said:

> "It (the contract) is for the interest of the public in preventing the destruction of valuable property, and the cutting up of a large city by new tracks and right of way, and in avoiding an unnecessary investment of large sums of money in railroad building, and thus increasing the railroad burden."

The case came then before the Circuit Court of Appeals for this Circuit, 51 F. R. 309. Sanborn, J., delivering the opinion of the Court affirming the decree of the Circuit Court, said:

"These tracks are at one of its (U. P.) terminals, at the junction of three great systems of railroad, aggregating more than 14,000 miles in extent, at the crossing of the Missouri river where three large cities stand. **Courts cannot be blind to the fact that railroad companies do, and every public interest requires that they should, make proper contracts for terminal facilities over the roads of each other.**"

On appeal to the Supreme Court, 163 U. S. 564, the case was again affirmed, and in its opinion the Supreme Court quoted with approval what we have quoted from Judge Sanborn.

THE SHERMAN ACT.

This suit is based upon the Sherman Act and we must therefore consider whether the arrangement in question is in restraint of trade or commerce among the several States or whether it is a monopoly of any part of the trade or commerce among the several States.

To determine this, we should disregard all matters of form and look at the substance of things. The arrangement involves actually nearly all of the railroads entering the St. Louis community from whatever direction, and potentially all of them.

The fourteen proprietary companies named as defendants own directly seventeen of the roads into St. Louis and indirectly three more. Four companies only are not represented in the Terminal proprietorship, and these are the owners of two short coal roads and of the Bluff Line and the Cotton Belt, but these four companies participate in all the benefits of the terminal arrangement upon equal terms

with the proprietors, except that they have not incurred the contingent liability assumed by the proprietors for the financial obligations of the Terminal Companies.

The arrangement then is one, practically speaking, by all the railroad companies for a common control or ownership and a common use upon equal terms of the terminal facilities at St. Louis. It does not prohibit any company from acquiring such facilities as it may need or desire for its own individual purposes. It deals only with facilities which all of them have occasion to use. It comprehends the gap which exists between the terminus of one road and the termini of all the other roads, and the industries located upon other tracks than its own. It provides for continuous transportation from those industries and termini to and over the one road. This is its dominant, characteristic, and almost exclusive function. Everything else is petty and incidental. It is in recognition of the policy declared by section 7 of the Interstate Commerce Act, which makes unlawful "any combination, contract or agreement, expressed or implied to prevent, by change of time, schedule, carriage in different cars, or by other means or devices, the carriage of freight from being continuous from the place of shipment to the place of destination." The Terminal Association has no facilities for doing anything else than help to such continuous carriage, for it has no cars of its own, and can simply transfer cars from one railroad to another or from or to a railroad or from a warehouse or factory. What is thus approved and required by the Interstate Commerce Act cannot be in violation of the Sherman Act.

Aside from the requirements of the Interstate

Commerce Act, how can this common control and use of terminals, essential to the efficiency of each and all of the railroads, restrain trade, which, as applied to this case, means to suppress competition among the railroads themselves. They have each and all of them the right to provide the best means of receiving and delivering freight and the best means of crossing a river. A union of effort to solve a common problem in the mere operation of their roads can of itself have no effect upon their competitive relations.

The common interest of the companies as to which they may agree extends to many things; indeed, to everything which relates to the construction, maintenance and operation of their properties. They may impart to each other their experiences and they may share the cost of experimentation as to these things. We have now everywhere, the same gauge of tracks, standard types of cars, uniform coupling devices and air brakes, and as a consequence a car, freight or passenger, can move east or west, north or south, from one end of the country to the other, from Tampa in Florida, to Los Angeles in California. This has not been accomplished without concert and agreement between all of the railroad companies, as well those in competition as those not in competition with each other. And we are dealing here with something of the same general nature, a subordinate agency or instrumentality on the practical, operative side of travel and transportation. The advantages from the standpoint of the business are obvious and so are those of public comfort, public safety and public economy.

The only suggestion in the record as to the manner in which competition between railroad companies is

affected by their common use and control of the terminals is to be found in the cross-examination of the defendant's witness Perkins, vol. 4, pp. 2843 to 2846. Counsel for the Government indicated his view in the question:

> "If from East St. Louis to St. Louis the Illinois Central and the Chicago and Alton Railroad Company had equal access to the terminal facilities of the Terminal Railroad Association and paid the same price for the service rendered by the Terminal Association, and if that service price, whatever it was, was added into the rate from Chicago to St. Louis by both roads, then there would be no competition on that rate for that service from East St. Louis to St. Louis in the Chicago rate, would there?"

And this view of the matter is repeated, varied in form of expression, in question after question.

By the same token we may say that if the Alton and the Central companies pay the same price for coal, there is no competition between them as to that part of their charge for transportation which covers the cost of coal.

In each case we deal with a part of the work which must be done in conducting transportation between St. Louis and Chicago, and as to that, the companies may join their efforts whenever it is to their mutual advantage to do so. In the case of the C., R. I. & P. Ry. Co. vs. U. P. Ry. Co., 47 F. R. 15, the companies united with respect to a bridge across the Missouri, tracks in Council Bluffs and Omaha, and a railroad between Lincoln and Beatrice in Nebraska, and yet the arrangement was approved in turn by the three courts before which it came and it never occurred to any of them to condemn it as in restraint of trade. And so it was in the case of Joy vs. St. Louis. The

companies involved, the Colorado, now the Rock Island, and the Wabash come into St. Louis on the same tracks from the western limits of Forest Park and at the same cost for the use of the tracks, and so in view of counsel there is a combination between them on their Kansas City and St. Louis business as to that part of the haul of such business which lies between their point of junction on the west line of Forest Park and the Union Station. The Circuit Court and the Supreme Court none the less enforced the joint use of the tracks through the park by the two companies, being evidently of opinion that if competition was not restricted as to the rest of the haul between the two cities, it was left free as to the business in its entirety.

The journey of a passenger between Chicago and St. Louis is an entirety and so is the shipment of freight from one of the cities to the other. The Alton and Central companies might combine as to this business and divide either the traffic or the earnings. But the combination to be effective must deal with the journey or the shipment in its entirety. Such a thing as a combination as to the initial or terminal three miles of the route and competition as to the rest of it is inconceivable.

Traffic for the purposes of combination or competition cannot be split in the manner suggested but must be dealt with in its entirety. The rate for passengers or for freight between the two cities is single and indivisible. Different elements may enter into the determination of what that rate shall be, but however much may be taken into account for one thing or another, the resulting rate is unit and is fixed for the entire service. Arrangements as to joint use of bridges, terminals and tracks have no-

thing to do with the rate, save as elements of cost and expense. If the arangements lessen cost, they tend to lessen charges, precisely as do cheap fuel, more powerful engines, and more capacious rolling stock. Two carriers might use the same road throughout from St. Louis to Chicago and pay at the same rate for wheelage over it and still be competitors. When railroad construction began it was supposed that each road would be a common highway for many carriers. This is true of water transportation today. There are many carriers over the same canal, paying the same tolls for its use, and still competing with each other. So it is with traffic on the rivers, lakes and oceans; the waterway is there, open to the use of whomsoever may launch his vessel upon it.

Two manufacturers may not combine to limit the amount of their output or to fix the price at which their products are to be sold. They may, however, derive their raw material from the same source and pay the same price for it. The same railroad may bring it to their doors and collect the same rate of freight. Water may be furnished by the city and light and power by companies chartered for the purpose, and upon a uniform schedule. But none nor all of these things constitute a combination, agreement or arrangement in restraint of trade. They each and all relate to cost of production and not to the price at which the products are to be sold.

Counsel for the government confuse the operation of the railroad and the cost of it, with the service rendered to the public and the charge for it. The Sherman Act has nothing to do with the former; its restrictions fall altogether upon the latter. No matter how many subordinate agencies of transpor-

tation different railroad companies employ in common, no matter how many combinations they may make to secure economy in operation, so long as they do not pool their business or their earnings, so long as they are left free in their relations to the shipping and the traveling public, every motive of self-interest remains to incite to competition. And when economy of operation, however accomplished, reduces costs, the end hoped for through competition, is aided, and charges are reduced to a still lower level.

These economic arrangements have received the sanction of State and National legislation and of judicial decision alike in State and Federal Courts and in the case of terminals they are supported by considerations of a higher nature. Unsightly, disturbing and dangerous railway tracks must be confined closely as may be to the mills, the factories and the warehouses, whose servitors they are, and limited in extent to the necessities of their use, if our cities are to be more than workshops and car yards, if they are to attain to something of beauty in landscape and architecture, if any evenfall there may be escape from the dust and din of the day, if pleasant homes may be reached in safety, and quiet and repose enjoyed at the winter fireside and in the summer shade.

Respectfully Submitted,

H. S. PRIEST,
T. M. PIERCE,
Solicitors for Appellees.

IN THE

SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, 1911.

THE UNITED STATES OF AMERICA,
Appellant,
vs.
THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS, et al.,
Appellees.
No. 386.

Appellees' Statement and Abstract.

STATEMENT.

Parties. A brief reference to and classification of the parties defendant may assist the court in more readily comprehending the issue involved.

Some thirty-eight companies and individuals were made parties defendant. They may be classified as follows:

First: Defendant corporations operating three terminal systems, namely: Terminal Railroad Association of St. Louis (hereinafter designated Terminal Association), lessee of the property of the St. Louis Bridge Company (hereinafter designated Eads Bridge), also lessee of the property of the Tun-

nel Railroad of St. Louis, and owning the stock of a number of subsidiary companies, comprising one system; St. Louis Merchants Bridge Terminal Railway Company (hereinafter designated Merchants Company), owning the stock of the Madison, Illinois & St. Louis Railroad Company, which is lessee of the property of the St. Louis Merchants Bridge Company (hereinafter designated Merchants Bridge), comprising another system; and Wiggins Ferry Company, controlling the stock of the St. Louis Transfer Railroad Company and the East St. Louis Connecting Railway Company, comprising a third system.

Second: Fourteen railway companies, in the pleadings and evidence and herein designated Proprietary Companies, each owning one-fourteenth of the issued stock of the Terminal Association; and,

Third: Thirteen individuals, each owning two shares of stock of the Terminal Association, as representative of a proprietary company, or to qualify the holder as a director or an inspector of elections.

The cause was dismissed as to the Central Trust Company of New York and five of the original individual defendants.

The answer disclosed and the evidence showed that prior to the filing of the complaint three individuals named had become directors of the Terminal Association and had each acquired two qualifying shares of stock. These individuals were not made parties defendant.

The answer disclosed and the evidence showed that prior to the filing of the complaint a number of mortgages, issued by the Terminal Association, the Merchants Company and the Merchants Bridge Company and subsidiary companies, were outstanding;

none of the holders of bonds issued under these mortgages and none of the trustees of these mortgages were made parties defendant.

Pleadings. The complaint is founded upon alleged violations of the Act of Congress of July 2, 1890, commonly known as the Sherman Anti-Trust Act. The gist of the complaint is that the fourteen Proprietary Companies, having acquired the stock of the Terminal Association, which is the owner of the majority of the stock of the Merchants Company and the Wiggins Ferry Company, through this ownership and the various agreements entered into between them and the Terminal Companies, practically controlled the operation of terminal facilities of St. Louis and East St. Louis, and immediate vicinity, employed in the handling of interstate traffic across the Mississippi River at St. Louis.

The complaint alleges that unreasonable charges have been imposed upon this traffic, and finally that Congress enacted certain legislation in furtherance of some of the alleged illegal acts complained of. It may not be improper to suggest in passing that no proof was offered as to unreasonable charges or as to the charge that Congress was **particeps criminis.** There may be some question as to the pertinency (none as to the impertinency) of these averments in the complaint, especially in view of the fact that Congress was not made a party defendant.

The answer not only admits, but expressly avers, the ownership by the Proprietary Companies, each in equal proportion, of all of the issued stock of the Terminal Association and of the Wiggins Ferry Company, the control of the Terminal Association of the majority of the stock of the Merchants Company, recites the corporate history of each of these

companies, the consolidations and acquisitions of the stock ownership and control, as well as the purpose and effect thereof.

Evidence. The printed record comprises some nine volumes, four of which are entitled "Record," four "Exhibits," while one contains a copy of the mortgage of the Terminal Association, reports of the St. Louis Municipal Bridge and Terminal Commission and classification of the Illinois Railroad and Warehouse Commission. The four volumes entitled "Record" contain 2,953 pages; the four volumes entitled "Exhibits" 3,348 pages, and the ninth volume 250 pages, making in all 6,557 pages.

The complainant produced some one hundred and twenty-one witnesses and the defendants produced one. The testimony of the witnesses covers about 1,000 pages of the Record, of which something over 500 are found in Volume I of the Record, something over 300 in Volume IV and about 200 pages in Volume III; the remainder of the Record, comprising all of Volume II and a greater part of Volume III, is devoted to the Alton Bridge, Central Car Service Association, Belleville & St. Louis Traffic Bureau, Central Freight Association, Chicago & Ohio River Committee, Coal Traffic Bureau, St. Louis, Cincinnati & Louisville Freight Committee, St. Louis Coal Traffic Association, St. Louis Eastbound Freight Company and Southern Freight Association.

Of the four volumes entiled "Exhibits" the first 1,488 pages contain exhibits relating solely to the various freight bureaus, associations and committees; pages 1,598 to 1,738 contain exhibits as to tariffs; pages 1,739 to 1,809 contain returns for taxation and resolution of the State Board of Equalization. Pages 1,954 to 2,530 contain also freight tar-

iffs, as do also pages 2,689 to 3,124. The remainder of the pages of "Exhibits" contain the articles of incorporation, mortgages, contracts of various companies referred to in the pleadings and municipal ordinances.

Aside from the articles of association, mortgages and contracts of the various companies, 200 pages, or less, will contain all the testimony which we deem relevant, pertinent or germane to the issues involved. By far the greater part of the documentary evidence consists wholly of the proceedings of various freight and traffic bureaus, associations and committees, correspondence between officials of these associations and tariffs of various railway companies, none of which, it seems to us, can have any possible bearing upon any issue in this case.

If we are right in our conception of the complaint, the sole question is whether or not the unification of the several terminal properties in St. Louis and East St. Louis in the manner set forth in the answer, for the sole purpose of creating a single system, serving alike and without discrimination or profit to any one, all railway lines entering St. Louis and East St. Louis, is in restraint of trade and hence in violation of the Sherman Anti-Trust Act.

The testimony relating to the character of the service rendered, delays in the handling of freight and the action of the various freight bureaus with reference to classification of freight and maintenance of rates between all points in the United States, can, in our opinion, have no possible bearing upon any feature of the case.

In their answer the defendants admitted every averment of the bill of complaint which they conceived to be in any manner pertinent, relevant or material; these admissions were followed by full and

explicit averments setting forth the corporate history and acts of each defendant company, the various contracts between them, and an attempt to state precisely, yet fully and clearly, every act and fact relating to the origin, history, control, operation and unification of the terminal systems of St. Louis and East St. Louis. These facts, as stated in the answer and as shown by the evidence, are, in substance, as follows:

The first step in the creation of distinct railway terminals for the use of all railway lines was taken early in 1864 when the Legislature of the State of Missouri, by special act, incorporated the St. Louis & Illinois Bridge Company for the purpose of constructing a bridge over the Mississippi River betwen St. Louis and East St. Louis. In 1865 the State of Illinois gave to this Company the right to construct its bridge over that portion of the river within the jurisdiction of the State of Illinois; and in 1866 Congress granted the right to erect the bridge. In 1867 Illinois incorporated the Illinois & St. Louis Bridge Company, and its consolidation with the St. Louis & Illinois Bridge Company was effected in 1868, the State of Missouri and Congress consenting thereto, under the name of Illinois and St. Louis Bridge Company.

The Illinois and St. Louis Bridge Company completed the construction of the bridge, referred to in the pleadings as the Eads Bridge, July 1, 1874. The western terminus of this bridge is near the intersection of Washington Avenue and Third Street in the City of St. Louis. In order that the bridge might be available for railway traffic it was necessary to connect the western terminus of the bridge with the railways then operating in St. Louis in the Mill Creek Valley about a mile southwest of the western

terminus of the bridge. This connection was made by means of a tunnel, and for this purpose the St. Louis Tunnel Railroad Company was incorporated under the laws of the State of Missouri, with power to construct the tunnel and make suitable connections with the tracks of the Missouri Pacific Company and any other railway, and provide necessary sidetracks. While the Eads Bridge was being constructed this Tunnel Company undertook also the construction of the tunnel which was completed practically concurrent with the completion of the bridge.

It is manifest from the articles of association of the two Bridge Companies and the articles of association of the St. Louis Tunnel Railroad Company that it was the intention that the properties of these two companies should be operated, as the physical necessities of the situation required, jointly, for the use of all railroad companies desiring to cross the bridge and enter the City of St. Louis; and that the railway companies themselves would provide their own facilities for the handling of freight and passenger traffic. The idea of the builders of the Eads Bridge seems to have been that this bridge would simply be a toll bridge, charging so much per car for the privilege of moving the car over the bridge; hence no rolling stock was acquired by either the Bridge or Tunnel Company for the purpose of handling, as a common carrier, either freight or passenger traffic. Shortly before the completion of the bridge and tunnel, however, it was discovered that to make these properties available for the purposes for which they were intended, connections must be made with the various railway companies, and for this purpose land must be acquired and tracks laid; and furthermore

that the Bridge and Tunnel Companies must make provision themselves for moving trains through the tunnel and over the bridge. Accordingly in 1874, a few months before the completion of the bridge and tunnel, there was incorporated under the laws of Missouri the Union Railway and Transit Company of St. Louis, and under the laws of Illinois the Union Railway and Transit Company of Illinois. It appears from the articles of association of the Missouri company that the purpose of its incorporation was to construct tracks from the western end of the tunnel connecting it with the railway companies then entering, and thereafter to enter, the City of St. Louis, to provide sidetracks for the proper handling of trains and to operate trains through the tunnel and over the bridge. The Illinois company was organized for the purpose of performing similar functions in the City of East St. Louis, Illinois. In futherance of these objects, the Missouri company acquired land near the western end of the tunnel upon which tracks were laid connecting the tunnel with the railway companies, and the Illinois company also acquired land in East St. Louis connecting the eastern approach of the bridge, upon which it laid tracks for connection with the railroads in East St. Louis. Neither the Missouri nor the Illinois company became common carriers of passengers or freight in the ordinary acceptation of the term: upon the completion of the bridge and tunnel they confined their operations simply to furnishing motive power for the movement of cars and trains through the tunnel and over the bridge and receiving from and delivering to the different railway lines.

As the bridge and tunnel neared completion it was found necessary to make some provision for the passenger traffic, as had been made for freight traffic

through the formation of the two Union Railway and Transit Companies, by the construction of a passenger station in St. Louis connecting the same with the tracks of the two Union Railway and Transit Companies and various railway companies. Accordingly an agreement was entered into between the Atlantic and Pacific Railway Company, on the west side of the river, the Terre Haute & Indianapolis Railroad Company, the Indianapolis & St. Louis Railroad Company, St. Louis and Southeastern Railway Company, the Ohio & Mississippi Railway Company, on the east side of the river, and certain individuals, providing for the incorporation of a Union Depot Company for the use of the railroad companies. This corporation was organized in pursuance of an Act of the Legislature of the State of Missouri providing for union terminals and passed "to facilitate public convenience and safety for the transportation of goods and pasengers in large cities from one railroad to another and to prevent unnecessary expense, inconvenience and loss attending the accumulation of a number of stations." This Act of the Missouri Legislature, passed in 1871, has from time to time been amended, giving enlarged and additional powers to corporations formed in pursuance thereof, thus encouraging and fostering the construction and development of union terminals. These acts of the Missouri Legislature expressly provide that corporations organized thereunder may be formed by any number of railroad companies.

Shortly after the completion of the Eads Bridge the Union Railway and Transit Company of St. Louis provided itself with locomotives for handling, and did handle, freight and passenger trains over the Eads Bridge and through the tunnel, receiving such trains from and delivering the same to the various rail-

way lines in St. Louis and East St. Louis, and upon completion of the Union Station brought passenger trains into and out of this station. This method of operating the bridge and tunnel and the terminal facilities afforded by the two Union Railway and Transit Companies continued for about four years, when, in 1879, the Bridge and Tunnel Companies became the joint lessees of the properties of the two Union railway lines in St. Louis and East St. Louis, and upon a time the service performed by them.

The operations, however, of the Illinois & St. Louis Bridge Company and the St. Louis Tunnel Railroad Company resulted in great financial loss; suits were brought for the foreclosure of the various mortgages of these companies, receivers were appointed and in 1878 foreclosure was had and the property of the Illinois & St. Louis Bridge Company was purchased by the St. Louis Bridge Company (the present owning company), incorporated under the laws of the State of Missouri in 1878; and the property of the St. Louis Tunnel Railroad Company was purchased by the Tunnel Railroad of St. Louis (the present owning company), also incorporated under the laws of the State of Missouri. This Bridge Company is one of the defendants in this cause. The Tunnel Railroad of St. Louis is not made defendant.

The combined properties, however, of the two Union Railway and Transit and the Bridge and Tunnel Companies proved inadequate for the demands of traffic and in 1880 there was incorporated the Terminal Railroad of St. Louis for the purpose of constructing, maintaining and operating a railroad in St. Louis between the tracks of the Union Railway and Transit Company of St. Louis, the Union Depot Company of St. Louis, the Tunnel Railroad of St. Louis, and a number of railway lines entering the city as well

as other railway lines that might hereafter enter, connections with railroads constructed or to be constructed, as might be found necessary and convenient; the general object and purpose being "to provide the most ample and convenient connections and accomodations and terminal facilities in St. Louis for all railroads now entering or hereafter to enter the same and all individuals and companies doing business with said railroads." This company acquired land between 12th and 18th streets in St. Louis and subsequently made the connections as provided in its articles of association. Concurrent with the organization of the Terminal Railroad of St. Louis there was formed the Terminal Railroad of East St. Louis for the purpose of performing the same functions in the City of East St. Louis that were to be performed by the Terminal Railroad of St. Louis in the City of St. Louis. Upon the completion of the system of tracks of these two companies last named, their properties were also leased to the Bridge and Tunnel Companies; so that in 1880 we find the St. Louis Bridge Company and the Tunnel Railroad of St. Louis operating their own properties and leasing and operating the properties of the two Union Railway and Transit Companies and of the two Terminal Railroads. The placing of all of these properties under one control was made effective in 1880 and thus constituted the first complete, though small, system of terminals for the handling of the interstate traffic between restricted territories in St. Louis and East St. Louis. This method of operation, however, continued for only about one year, when the Wabash, St. Louis & Pacific Railway Company and the Missouri Pacific Railway Company became joint lessees of the properties of the Bridge and Tunnel Companies, and through those companies sub-lessees

of the two Union Railway and Transit Companies and of the two Terminal Railroads, for a period commensurate with the corporate existence of the lessor companies; as rental the lessees agreed to pay the interest on the bonds of the Bridge Company and fixed dividends on the first and second preferred stock of the Bridge Company and fixed dividends on the stock of the Tunnel Company. Thus in 1880 two railway companies, the Wabash, St. Louis & Pacific and the Missouri Pacific, secured entire control of the system of terminals which had been created for the use of all of the railway lines entering St. Louis and East St. Louis, and continued in such control until 1889. The integrity, however, of the system was not disturbed and it was operated as a separate and distinct property apart from the other properties of these two railway companies. At that time, in 1889, Mr. Jay Gould controlled the corporate action of these two railway companies, the Missouri Pacific and the Wabash Railroad Company, which had become the successor of the Wabash, St. Louis & Pacific, and on October 1st of that year Mr. Gould entered into an agreement with the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, Wabash Railroad Company, Ohio & Mississippi Railway Company (now Baltimore & Ohio Southwestern Railway Company), St. Louis, Iron Mountain & Southern Railway Company, Louisville & Nashville Railway Company and Missouri Pacific Railway Company. This agreement recites the ownership and operation by each of the railway companies named of a railroad terminating in St. Louis or in East St. Louis and the interest each company thus has in securing efficient and economical system in handling freight and passenger traffic at these cities, including the river transfer; the then ownership of the existing terminal facilities; the

leases above referred to; and the desire of the several railway companies to obtain control of these terminal properties for the purpose of enlarging and making more perfect the system of receiving transfer and interchanging passenger and freight traffic at St. Louis and East St. Louis. By this agreement Mr. Gould undertook upon his part to cause the consolidation of the Union Railway and Transit Company of St. Louis and Terminal Railroad of St. Louis, thus forming the Terminal Railroad Association of St. Louis (first named defendant in this cause and herein designated Terminal Association); the purchase by this company of the property of the Union Depot Company and the stock of the Union Railway and Transit Company of East St. Louis and Terminal Railroad of East St. Louis; and an assignment to the Terminal Association of the above mentioned lease by the Missouri Pacific and Wabash Railroad Companies of the properties of the St. Louis Bridge Company and Tunnel Railroad of St. Louis. This agreement further contemplated the issue of $7,000,000 of bonds, of which $5,000,000 constituted the purchase price of the properties, stocks and leaseholds to be conveyed as just mentioned, and an issue of a part of the capital stock of the Terminal Railroad Association of St. Louis, in equal porportions, to the six railway companies, parties to the agreement, the remainder of the stock to be issued to such other railroad companies as might from time to time thereafter become parties to the agreement; and the remaining $2,000,000 of bonds to be used for the enfargement of the terminal facilities of St. Louis and East St. Louis. By a concurrent agreement these six railway companies were granted the right in perpetuity of joint use, with each other and such other

companies as might from time to time be admitted as proprietary lines of the Terminal Association, of all of the properties of that company, such use, however, to be appurtenant to the railway companies. On their part the railway companies accepted, in perpetuity, the joint use of the properties of the Terminal Association and agreed that the charges for the use so granted should be regulated as to enable it to pay the rental of the Bridge and Tunnel properties, the interest on the bonds given for the purchase price of the terminal properties as well as interest on such future sums as might be expended in the acquisition of additional properties, and also taxes and operating expenses. This agrement further provided for the subsequent admission at any time thereafter of any other railroad company desiring admission.

Accordingly and in pursuance of these agreements the Union Railway and Transit Company of St. Louis and the Terminal Railroad of St. Louis consolidated in 1889 forming the Terminal Association; the lease of the Bridge and Tunnel properties was assigned to the Terminal Association, which then became the owner of the properties theretofore belonging to the Union Railway and Transit Company of St. Louis, the Union Depot Company, the Terminal Railroad of St. Louis, the owner of the stock of the Union Railway and Transit Company of Illinois and of the Terminal Railroad of Illinois and lessee of the Eads Bridge and Tunnel. The effect of this agreement was that in lieu of the ownership and control of this terminal system, which had been the growth of some fifteen years, by two railway companies, controlled by one individual,—this system passed to one company, the stock of which was owned in equal proportions by six railway companies, and which stock ownership was acquired under an agreement where-

by the terminal system should be open to the use not only of these six railway companies, but on like terms and conditions to all other railroad companies desiring such use; the operation of the properties to be without profit, but for the purpose of furnishing convenient and ample facilities for all railroad lines. From 1889 to the present time, a period of twenty years, it appears from the evidence that the properties of the Terminal Association have been operated as contemplated by this agrement, no dividends have ever been declared or paid upon any of its stock and that its charges have at all times been so regulated as to produce revenues sufficient only to meet its fixed charges and operating expenses and make necessary alterations, improvements and repairs.

The life of the Terminal Association begins then in 1889, when by virtue of its lease it assumed control of the Eads Bridge and the Tunnel, became the owner of land East St. Louis abutting the east approach of the bridge, the owner of a right-of-way some one hundred feet in width extending from 8th and Poplar streets in St. Louis westward to about 20th street, and various parcels of land adjoining this right-of-way on which were located switches and sidetracks. These terminals at that time were connected in St. Louis with tracks of railways entering that city from the south and west; while the terminals in East St. Louis were connected with certain railways entering that city; so that in 1889 the Terminal Association was able to switch for all railway companies connecting with it in St. Louis trains between 20th street in St. Louis and a point near the Relay Station in East St. Louis.

The growth of the terminal system since 1889 has been rapid, and is probably best evidenced by the increase in the issue of its bonds, the proceeds of

which have been expended in the development of this system. Beginning with a bond issue of $7,000,000 in 1889, the outstanding bonded indebtedness today is some $35,000,000. Among the properties acquired since 1889 is the passenger station fronting on Market street between 18th and 20th streets, which was completed in 1894, which station has since its completion been used and is now used by all railway companies entering St. Louis, without dicrimination, and without regard to any proprietary rights as stockholders of the Terminal Association.

Since 1889 various other railway lines have been admitted into membership in the Terminal Association and the Proprietary Companies are now the Missouri, Kansas & Texas Railway Company, Chicago & Alton Railway Company, St. Louis & San Francisco Railway Company, Baltimore & Ohio Southwestern Railway Company, Illinois Central Railroad Company, St. Louis, Iron Mountain & Southern Railway Company, Chicago, Burlington & Quincy Railway Company, Vandalia Railroad Company, Wabash Railroad Company, Cleveland, Cincinnati, Chicago & St. Louis Railroad Company, Louisville & Nashville Railway Company, Southern Railway Company, Chicago, Rock Island & Pacific Railway Company and Missouri Pacific Railway Company.

The defendant, St. Louis Merchants Bridge Company, was incorporated in 1886 under the laws of Illinois for the purpose of constructing a bridge over the Mississippi river at St. Louis, and in 1887 Congress authorized the construction of the bridge (known as the Merchants Bridge and so referred to in the evidence), which was completed in 1890. While this bridge was in process of construction there was incorporated the St. Louis Merchants

Bridge Terminal Railway Company (a defendant in this case, referred to as the Merchants Company) under the laws of Missouri for the purpose of operating a railroad from 8th and Gratiot streets in St. Louis to the Western approach of the Merchants Bridge. The Merchants Company became, in 1889, the lessee of the Merchants bridge. In that year there was incorporated under the laws of the State of Illinois the Electric City & Illinois Railway Company for the purpose of constructing a railway from the east approach of the Merchants Bridge to the City of East St. Louis. This company subsequently changed its name to Madison, Illinois & St. Louis Railway Company and constructed a railway from the east approach of the Merchants Bridge to Granite City. It never constructed a railway into the city of East St. Louis. The Merchants Company owns all of the stock of this company. In 1893 the lease of the Merchants Bridge to the Merchants Company was cancelled and the bridge was leased to the Madison, Illinois and St. Louis Railway Company. This company is not a defendant. Through its lease of the Merchants Bridge and ownership of stock of the Madison, Illinois & St. Louis Railway Company, the Merchants Company switches cars from 7th and Gratiot streets in St. Louis to the levee or wharf, thence northwardly to the Merchants Bridge and over that bridge to Granite City, Illinois.

None of the holders of the bonds nor trustees of any of the mortgages of the Merchants Company or the Merchants Bridge Company are defendants in this case.

In 1893 the Merchants Company was insolvent, was unable to make provision for a large floating indebtedness or pay interest upon its own bonds or the bonds of the Bridge Company, or of the Madison,

Illinois & St. Louis Railway Company. The facilities controlled by the Merchants Company were separate and distinct from the system of the Terminal Association. The tracks of the Merchants Company (treating the Merchants Company, the Bridge Company and the Madison, Illinois & St. Louis Railway Company as one) began at 8th and Gratiot streets in St. Louis, ran thence eastwardly to the river front, northwardly along the river front to Hall street and along that street to Ferry street,—a distance of about four miles from 8th and Gratiot streets,—thence across the Merchants Bridge and northwardly to Granite City, Illinois; while the tracks of the Terminal Association began at 20th street and Clark avenue in St. Louis, extended eastwardly through the tunnel and over Eads Bridge to a point near the Relay Station in East St. Louis, Illinois. There was no industry located at any point on the track of either company which was reached by the tracks of the other. The Merchants Company had no passenger or freight station in St. Louis and did not connect in any manner with the Union passenger station of the Terminal Association or with any of the railway lines entering St. Louis from the south or west, or East St. Louis from the south or east. At this time, in 1893, new railway lines were seeking entrance to the City of St. Louis and were desirous of reaching the new Union passenger station which the Terminal Association was then constructing on Market street between 18th and 20th streets; other railway lines having termini in the City of East St. Louis could more advantageously reach this Union Station if connection could be formed between the tracks of the Terminal Association and the Merchants Company in such a way that trains could by continuous movements and under one control pass

between the Cities of St. Louis and East St. Louis over the tracks of the Merchants Company and the Terminal Association. In addition to this passenger service for which it was desired to arrange, much of the freight traffic between these cities could be more economically and expeditiously handled through such a connection between the tracks of the Merchants Company and Terminal Association. The facilities of the Terminal Association had become inadequate for the proper handling of railway traffic, and it was manifest that it would be greatly to the interest of all the railway lines converging at St. Louis and East St. Louis, or having termini in either of these cities, if some arrangement could be affected whereby the terminals of the Terminal Association and the Merchants Company could be so connected and operated that the traffic between St. Louis and East St. Louis, crossing the river, and destined from one railway to another, or to any industry located on the tracks of either of these companies, or the tracks of any one of the railway companies, could be moved without change of motive power, with a single charge for service, so that all industries in either city, located on the tracks of either company could have equally efficient switching service, without discrimination, preference or advantage with respect to such service or the charges therefor. To this end and for this purpose and to prevent the disintegration of the properties of the Merchants Company, which would result from the foreclosure of the mortgages, and to secure the use in common, without discrimination, for all railway lines of the properties of the Merchants Company, an agreement was entered into in 1893 between that company and the Terminal Association. This agreement made provision for the floating debt of the

Merchants Company which was pressing, and prevented a foreclosure of the various mortgages covering the properties of the Merchants Company. Under this agreement the Terminal Association guaranteed the payment of the interest on the bonds of the Merchants Company, purchased from it something over 4,000 shares of its stock and advanced it a sum sufficient to enable it to meet its current obligations. At the same time the Terminal Association acquired other shares of stock of the Merchants Company, thus securing a control of the majority of the stock of the Merchants Company. This control the Terminal Association still has. On its part the Merchants Company, by this agreement, granted to the Terminal Association the right to operate its trains over all the properties controlled by the Merchants Company. The Terminal Association agreed to construct, and since then has constructed a line of railway connecting its Union Passenger Station with the Merchants tracks, so that passenger trains pass over the Merchants Bridge and into and out of the Terminal Association at Union Station, and freight trains and cars passing over the Merchants properties have direct communication with the tracks of the Terminal Association. This agreement between the two companies was not only a matter of public record and general knowledge, but was recorded in the office of the secretary of State of Missouri. In 1903 the State of Missouri at the relation of the Attorney General filed an information in the Supreme Court of the State of Missouri alleging the illegality of this agreement and of the ownership of the Terminal Association of the stock of the Merchants Company. The Supreme Court of Missouri held that this acquisition and ownership by the Terminal Association and the control of the majority of the

stock of the Merchants Company was authorized by the laws of Missouri and was in harmony with the statutes of Missouri which made special provision for such ownership of stock and control and operation of one terminal company of the tracks and facilities of other terminal companies.

The Wiggins Ferry Company was incorporated in 1853 by special act of the Legislature of Illinois for the purpose of operating ferries across the river at St. Louis; it is the owner of large tracts of land in East St. Louis available for terminal purposes and is the owner of all the capital stock of the East St. Louis Connecting Railway Company, a corporation of the State of Illinois, operating railway tracks along the river front in East St. Louis and connecting with various railways entering that city. The Wiggins Ferry Company is also the owner of the capital stock of the St. Louis Transfer Railway Company, a Missouri corporation, which operates railway tracks about six miles in length along the river front in St. Louis. The tracks of the St. Louis Transfer Railway Company and of the East St. Louis Connecting Railway Company connect with inclines of the Wiggins Ferry Company. The Wiggins Ferry Company owns land on the east bank of the river, beginning at Eads Bridge and extending northwardly a distance of several miles, and operates a number of ferry boats for the trasportation of wagon traffic and freight cars. The lands of the Wiggins Ferry Company are extensive and so located as to be readily utilized for terminal facilities and connections with the properties of the Terminal Association. Neither the St. Louis Transfer Railway Company nor the East St. Louis Connecting Railway Company are parties defendant.

In 1902 the Missouri Pacific Railway Company, Louisville & Nashville Railway Company, St. Louis, Iron Mountain & Southern Railway Company, Wabash Railroad Company, Cleveland, Cincinnati, Chicago & St. Louis Railway Company, Baltimore & Ohio Southwestern Railway Company, St. Louis & San Francisco Railway Company,—seven railway companies,—then Proprietary Companies of the Terminal Association, the Pennsylvania Company (controlling the Vandalia Railroad Company also a Proprietary Company), and the Chicago, Rock Island & Pacific Railway Company acquired the capital stock of the Wiggins Ferry Company. Negotiations were opened with the Southern Railway Company, Missouri Kansas & Texas Railway Company, Chicago & Alton Railway Company, Illinois Central Railroad Company and Chicago Burlington & Quincy Railway Company and the Chicago, Rock Island & Pacific Railway Company, which were not then proprietary lines of the Terminal Association, with the view of having these companies participate in the ownership with the purchasers of the stock of the Wiggins Ferry Company and become members of the Terminal Association on the same terms and conditions upon which all other lines had theretofore been admitted. These negotiations resulted in the execution of agreements whereby the last named companies became members of the Terminal Association, making the total membership fourteen, all being admitted in the membership upon the same terms and conditions as the other railway companies had theretofore been admitted and were accorded in common with such companies the equal joint use and benefit of the properties of the Terminal Association: and the title to the stock of the Wiggins Ferry Company was vested in the Propri-

etary Companies, other than the Vandalia Company, and in the Pennsylvania Company as equal Owners. At the time this agreement was made the Terminal Association was contemplating the acquisition of a large amount of land in St. Louis, making additions to and changes in its terminal facilities, and the building of a belt line in the County of St. Louis for the purpose of connecting these facilities with the various railway lines entering St. Louis to the end that traffic between such lines, as well as traffic across the river, might be handled more expeditiously and avoid delays incident to passing through the city; and for this purpose the Terminal Association was about to issue a large amount of bonds to be secured by general mortgage. The properties then owned being all incumbered by outstanding mortgages and the properties to be acquired not being of sufficient value in themselves to form satisfactory security for the contemplated loan, it was necessary that such loan should be guaranteed, as to payment of interest, by the Proprietary Companies, and the payment of the principal by pledge of the stock of the Wiggins Ferry Company in such manner that the proposed general mortgage would constitute a first loan upon such stock. This general mortgage was accordingly issued under date of December 16, 1902, and some $20,000,000 of bonds have been issued thereunder and are now outstanding. The Central Trust Company of New York an William Taussig, trustee in this mortgage, are not parties defendant. The Central Trust Company was originally made a party defendant, but the cause dismissed as to it. Concurrent with the execution of this mortgage and as additional security for the bonds issued thereunder, the fourteen Proprietary Companies entered into an agreement with the Terminal Association binding

themselves in perpetuity to use the facilities owned and controlled by the Termial Association; the Terminal Association upon its part agreed to provide from time to time such additional terminal facilities as may be requisite for handling the traffic of the railway lines in St. Louis and East St. Louis; and to this end this general mortgage provides for the taking down annually of $1,000,000. The Proprietary Companies also guaranteed, each to the extent of its interest in the Terminal Association, payment of interest on all bonds issued by that company. These several agreements further provided that the charges of the Terminal Association shall be so regulated as to meet the fixed charges, taxes, maintenance and operation, to the end that these properties may be operated at cost, and in the event of a deficit at any time in the revenue sufficient to meet such charges, each one of the Proprietary Companies shall advance one-fourteenth of such deficit.

For the purpose of increasing its facilities the Terminal Association has, from time to time, as the demands of railway traffic have required, caused to be incorporated, or acquired the control, of other terminal companies. Among the companies so incorporated are the East St. Louis Belt Railroad Company, which was incorporated under the laws of Illinois in 1898, and which has constructed tracks connecting the tracks of the Madison, Illinois & St. Louis Railway Company with the tracks of the East St. Louis & Carondelet Railway Company; the Illinois Transfer Railroad Company, incorporated under the laws of the State of Illinois in 1889, which has constructed a connection between the tracks of the East St. Louis Belt Railroad Company on the north with the tracks of the Illinois Central Railroad Company on the south. In 1893 the Terminal Asso-

ciation acquired the stock of the St. Louis Terminal Railway Company and has since then caused the tracks of that company to be built from a connection with the tracks of the Merchants Company in North St. Louis to a connection with the Wabash Railroad Company in the County of St. Louis; in 1902 the Terminal Association acquired the stock of the St. Louis Belt & Terminal Railway Company, incorporated under the laws of the State of Missouri, and is now causing to be constructed the tracks of that company, forming a connection between the St. Louis Terminal Railway Company and the St. Louis & San Francisco Railroad Company on the south and the Chicago, Burlington & Quincy Railway Company on the north, and with all intermediate railway companies; in 1900 the Terminal Association acquired the capital stock of the Granite City & Madison Belt Line Railroad Company, a company incorporated under the laws of the State of Illinois, for the purpose of constructing a belt line around Granite City; about seven-tenths of a mile of tracks has been built by this company; in 1903 the Terminal Association acquired all the stock of the East St. Louis & Carondelet Railway Company, which owns tracks connecting with the East St. Louis Belt Railroad Company and extending southwardly to East Carondelet; in 1903 the Terminal Association acquired all the capital stock of the Interstate Car & Transfer Company, a corporation organized in 1896 under the laws of the State of Missouri, and which operates a ferry transfer between an incline of the Chicago, Burlington & Quincy Railroad Company in the northern part of the City of St. Louis, and inclines of the Southern Railway Company on the east side of the river.

The capital required for the construction and

acquisition of the various properties heretofore mentioned has been secured from time to time by the issue of bonds secured by mortgages now outstanding as follows:

Mortgage of St. Louis Bridge Company, $5,000,000; first mortgage Terminal Association, $7,000,000; second mortgage Terminal Association, $5,000,000, outstanding; general mortgage Terminal Association, $20,000,000, outstanding; mortgage St. Louis Merchants Bridge Terminal Railway Company, $3,500,000; Mortgage St. Louis Merchants Bridge Company, $2,000,000; mortgage Madison, Illinois & St. Louis Railway Company, $500,000; mortgage St. Louis Terminal Railway Company, $1,500,000.

None of the bondholders or trustees in any of these mortgages are parties defendant. As security for the mortgages of the Terminal Association there are pledged the stock of the Union Railway & Transit Company of Illinois, Terminal Railroad of East St. Louis, East St. Louis Belt Railway Company, St. Louis Terminal Railroad Company, Illinois Transfer Railroad Company, Granite City, Madison & Belt Line Railroad Company, St. Louis Belt & Terminal Railway Company and East St. Louis & Carondelet Railway Company, none of which are parties defendant; and as like security has also pledged 17,800 shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, and thirteen of the Proprietary Companies and the Pennsylvania Company have pledged all of the stock of the Wiggins Ferry Company.

The properties of the Terminal Association and its subsidiary companies constitute one system of terminals extending from 20th street in St. Louis eastwardly across the bridge to the Relay Station in East St. Louis, running in the main east and

west; the properties of the Merchants Company, including the Merchants Bridge and the Madison, Illinois & St. Louis Railway Company, constitute another system the tracks of which extend from 7th and Gratiot streets northwardly across the Merchants Bridge to Granite City; while the Wiggins Ferry Company operates ferries across the river and in connection with its two subsidiary companies owning tracks on the levees on either side of the river, forms a third system; in addition to these three systems, the Terminal Association, through the St. Louis Terminal Railway Company and the St. Louis Belt & Terminal Railway Company, has two lines of belt railway in the County of St. Louis, and by means of the Illinois Transfer Railway Company and the East St. Louis Belt Railway Company has a belt line in Illinois extending practically from the county line dividing Madison and St. Clair counties on the north around the City of East St. Louis to a connection with the Illinois Central Railroad Company. Neither one of these three systems is complete or adequate in itself; each, in the main, reaches a territory different from that reached by the other two. The physical location of the properties appears upon the Pitzman map. For the purpose of making a more complete and perfect system of terminals and to facilitate the rapid and safe handling of trains, since it acquired control of the stock of the Merchants Company in 1893, the Terminal Association has, from time to time, by the construction of additional tracks, connected the various systems; agreements have been entered into whereby the tracks of one company may be operated for the traffic passing in one direction, and tracks of another company may be used for traffic passing in an opposite direction, thus facilitating the handling

of trains and avoiding accidents and delays. The operation of passenger trains through the tunnels has been to a considerable extent avoided. Every passenger train from the east enters the Union Station in St. Louis. If all passenger trains crossing the river were required to pass over Eads Bridge and through the tunnel, this traffic, together with the large volume of freight traffic, would produce congestion and materially interfere with and restrain traffic crossing the river. To avoid the physical discomfort to passengers and this congestion and delay of traffic, arrangements were made between the Terminal Association and the Merchants Company for operation over the Merchants Bridge of the considerable portion of traffic, which, in the absence of such an arrangement, would pass over the Eads Bridge. Such arrangements were possible only by reason of the control which the Terminal Association exercises over the operation of the Merchants Company. Under like agreements between these two companies each is permitted the use of the facilities of the other. Such use must, of necessity, be under one control and management. The effect of these arrangements and this method of operation has not only increased the service of each company, but has reduced the cost of operation, resulting in a continued and steady decrease in freight charges on all interstate traffic. The charge on coal which in the beginning was fifty cents a ton is now twenty cents per ton. Of the entire revenue of the Terminal Association about 90 per cent is paid directly by the railway companies. The fourteen Proprietary Companies, either through direct ownership or through control of the leased and subsidiary companies, operate about one-third of the railway mileage of the

United States. These lines are under contract with the Terminal Association to use, in perpetuity, all the terminal facilities owned or controlled by the Terminal Association, and are further bound until maturity of the bonds of the Terminal Association to payment of interest on these bonds and the operating expenses of the Terminal Association. There are two other railroad lines crossing the river which are not members of the Terminal Association; between these lines and the Proprietary Companies and between the Proprietary Companies there is a constant interchange of traffic, which is made possible only by the use of the terminal facilities of the Terminal Association, as few of the railway lines have connections directly each with the other. All railway lines, not members of the Terminal Association, have been, and are, granted the use of all the facilities of the Terminal Association, and on the same terms and conditions that such use is granted to the Proprietary Companies, save that the non-proprietary lines guarantee none of the obligations of the Terminal Association. No distinction is made between Proprietary Companies and non-proprietary companies in the handling of traffic, either in respect to charge or character of service; all are upon exact equality with respect to use of terminals.

Not one of the terminal companies has any freight cars of its own or handles freight traffic on its own account, with the exception of an occasional delivery of package freight between East St. Louis and Granite City. The Terminal companies receive freight for railway lines with which they connect and simply furnish the motive power for interchange of traffic between the various lines of railway, between such lines and industries and between industries on their own lines.

The Terminal Association is the only one of the terminal companies which has a passenger or freight station in the City of St. Louis. In the passenger station every railway line entering St. Louis receives and discharges its passengers; for such use all railway lines, without regard to membership in the Terminal Association, and without discrimination or preference, are charged like compensation on a basis so regulated that the charge equals only the cost of maintenance and operation.

Freight destined for any line of railway may be Terminal Association, which acts as the agent of all railway lines.

At all times the tolls and charges of the Terminal Association have been so regulated as to cover only fixed charges and expenses of operation, maintereceived or delivered at any freight station of the nance, alterations, betterments and repairs. The agreements whereby the railway lines are granted the use of the properties of the Terminal Association preclude profit to that Company. No dividends have ever been paid on any of the stocks of the Terminal Association or its subsidiary companies.

ABSTRACT.

Pleadings.

The petition names as defendants Terminal Railroad Association of St. Louis (hereinafter designated Terminal Association); St. Louis Merchants Bridge Terminal Railway Company (hereinafter designated Merchants Company); St. Louis Bridge Company; St. Louis Merchants Bridge Company; fourteen railroad companies, owners of the capital stock of the Terminal Association (hereinafter designated Proprietary Companies); and a number of individuals, each owning two shares of stock, either as representative of one of the Proprietary Companies or as qualifying him as a director of the Terminal Association or inspector of its elections; and the Central Trust Company of New York; and charges,—

That each of the defendants, corporations, other than the Central Trust Company, were common carriers employed in handling interstate freight and passenger traffic, and as such engaged in trade and commerce among the several states and foreign nations;

That the St. Louis Merchants Bridge (hereinafter designated Merchants Bridge) and the St. Louis Bridge (hereinafter designated Eads Bridge) are the only two bridges across the Mississippi river at St. Louis; the Eads Bridge, owned by the St. Louis Bridge Company, was completed in 1874 and has its western approach at Washington avenue in St. Louis and its eastern terminus in East St. Louis, and is equipped with railroad tracks, reached from the west by a tunnel, and a wagon way, tracks for

electric street railway lines, and a sidewalk for pedestrians, reached by the street surface at Washington avenue; while the Merchants Bridge has its western approach at Hall street in St. Louis and its eastern terminus at Venice, Illinois, and was completed in 1890;

That the Terminal Association and the Merchants Company, prior to August 17, 1893, operated parallel, independent, and competing lines of railroad in Missouri and Illinois, the Terminal Association crossing the Mississippi river by the Eads Bridge and the Merchants Company crossing by the Merchants Bridge, and the two companies control all lines of railway and means of transportation of passengers and interstate freight at St. Louis, Missouri, East St. Louis, East Carondelet, Madison, and Granite City, Illinois;

That on July 3, 1889, the capital stock of the Terminal Association was owned by six railroad companies, and subsequently eight other railroad companies have become owners of the shares of stock, making fourteen Proprietary Companies, which, together with their representatives and inspectors of election, now own all of the issued stock of the Terminal Association;

That the fourteen Proprietary Companies are the principal trunk lines entering St. Louis and East St. Louis, and control the interstate commerce crossing the river at St. Louis;

That the Terminal Association was formed by the consolidation of the Union Railway & Transit Company (of St. Louis) and the Terminal Railroad of St. Louis, each of which owned, at the time of the consolidation, a completely equipped railway, so connected as to form a continuous line in Missouri and Illinois, crossing the Eads Bridge; that by this

consolidation the Terminal Association secured control of the Eads Bridge, the Tunnel, the properties of the consolidated companies, and also the properties of the Union Railway & Transit Company (of Illinois) and the Terminal Railroad of East St. Louis, which were also engaged in interstate commerce, all of which properties the Terminal Association now operates, and which are connected with the main lines of railway entering the cities heretofore named;

That the line of railway of the Terminal Association is described as beginning at the Eads Bridge and thence running southwardly through the tunnel to Spruce and Eighth streets, thence to the Union Station at Nineteenth and Twenty-first streets, where connections are made with the tracks and termini of railroads entering St. Louis from the north, south, west, and southwest; and beginning at the west end of the Eads Bridge, over the bridge into East St. Louis and in East Carondelet, Illinois, connecting with lines of railway extending northwardly and eastwardly; that in addition to its main lines of track the Terminal Association maintains depots and operates switches and tracks connecting with warehouses, factories, and business establishments in the cities named, by means of which it handles freight between such factories and establishments and the various lines of railway in the City of St. Louis and in the cities in Illinois immediately opposite;

That the Madison, Illinois & St. Louis Railroad Company owns a railroad extending from the east end of the Merchants Bridge to Granite City, Illinois;

That the St. Louis Terminal Railway Company operates a railroad from a point on the line of the Merchants Company near the western approach of

the Merchants Bridge, northwestwardly through the city and county of St. Louis;

That the East St. Louis Terminal Railway Company owns a railroad extending from the east end of the Merchants Bridge to a connection with other lines of railroad in Illinois;

That the St. Louis Belt & Terminal Railway Company operates a railroad in the City and County of St. Louis;

That the Granite City & Madison Belt Railway Company operates a line of railway connecting the Merchants Bridge and the various lines of railway entering Granite City, Madison and East St. Louis;

That the Illinois Transfer Railway Company operates a line of railway connecting the Merchants Bridge and the tracks of the Merchants Company in Illinois;

That the last named six companies prior to August 17, 1893, were operated by the Merchants Company;

That the Merchants Company owns the stock of the Merchants Bridge Company, and was in 1889 the lessee of the Bridge of that Company for a term of forty years, which lease was canceled and a similar lease of the Bridge made to the Madison, Illinois & St. Louis Railway Company;

That on August 17, 1893, and prior thereto, the Merchants Company operated a railroad beginning at the Union Station in St. Louis, thence eastwardly by an elevated road to the wharf on the west bank on the Mississippi river, thence northwardly to Hall street, thence over the Merchants Bridge to Venice, East St. Louis, Madison and Granite City, connecting with the Illinois Transfer Railway Company, East St. Louis Connecting Railway Company, East St. Louis Belt Railway Company, East St. Louis & Carondelet Railway Company, and the main lines of

railway leading from the cities last named to cities and ports on the great lakes and Atlantic Coast; and in addition to this line the Merchants Company also operated a line beginning at the west end of the Merchants Bridge, extending southwestwardly and southwardly about a distance of twenty-five miles, connecting with the tracks and termini of all the railroads extending from St. Louis westward, northwestward, and southwestward, and also owned connections with various industries and manufacturing establishments between which and the various lines of railway in St. Louis, East St. Louis, Venice, Madison and Granite City, Illinois, it handled freight;

That the Wiggins Ferry Company owned and operated ferry and transfer boats across the Mississippi river at St. Louis for transfer of cars and trains; and also controlled the St. Louis Transfer Railway Company, operating a railway from Grand avenue to Arsenal street in St. Louis, and the East St. Louis Connecting Railroad, connecting with various railroad lines entering the Illinois cities named; that by means of its ferries and the two railways named, the Wiggins Company transferred a large number of freight cars daily and was thus engaged in interstate commerce;

That in 1881 the Missouri Pacific Railway Company and the Wabash Railroad Company, and other corporations and persons unknown to the complainant, entered into a combination to consolidate and control, by the Missouri Pacific and Wabash, the properties of the St. Louis Bridge Company, Union Railway and Transit Company, Terminal Railroad Company of St. Louis, and Terminal Railroad of East St. Louis, with the intention thereby to place restraint upon all competitive interstate traffic carried on by all railroads entering St. Louis and East

St. Louis, and to monopolize interstate commerce and trade and suppress competition between the railroads, and to that end the Missouri Pacific Railway Company and the Wabash Railroad Company entered into an agreement with the St. Louis Bridge Company and the Tunnel Railroad Company for a lease of all of the properties of the latter companies; and the lease was made to the Missouri Pacific Railway Company and the Wabash Railroad Company of the properties of the Bridge and Tunnel Companies, and the Terminal Railroad Company of East St. Louis and Union Railway & Transit Company, and possession given;

That by means of such control the Missouri Pacific Railway Company and Wabash were enabled to arbitrarily fix and maintain whatsoever price they wished on interstate traffic between Illinois and Missouri, and exacted and charged unreasonable and extortionate bridge toll for handling such traffic, and subjected the public to unnecessary delays in respect thereto;

That to secure competition and obtain relief from the condition just mentioned, upon application of certain citizens of St. Louis, Congress, on February 3, 1887, granted a charter for the erection of a bridge, which charter stated that the principal reason for granting the same was to secure reasonable rates and tolls at St. Louis; the grantee, its successors or assigns, should not agree or consent to the consolidation of the bridge to be erected thereunder with any other bridge across the Mississippi, or to the pooling of the earnings of the proposed bridge with any other bridge; or that any stockholder, director, or manager of any other bridge should be a stockholder, director, or manager of the contemplated bridge, and in case of the violation of this

provision the proposed bridge should become the property of the United States; that in 1888 some persons or corporations unknown, contriving to defeat the object for which the proposed new bridge was to be built, and with the design of maintaining monopoly and destroying competition of interstate traffic, secured an amendment by Congress of the Act of 1887, striking out the word "stockholder," so that the owners of the Eads Bridge and the railroads used in connection therewith might control the Merchants Bridge and the roads connected with it;

That in pursuance of the combination referred to, on October 3, 1889, an agreement was entered into between the Terminal Association, the Bridge and Tunnel Companies, and the Missouri Pacific Railway Company and Wabash Railroad, whereby the lease of 1881 was canceled and a new agreement entered into whereby the Terminal Association became lessee of the Eads Bridge and Tunnel;

That on August 17, 1893, the six original Proprietary Companies of the Terminal Association, the St. Louis Bridge Company, Tunnel Railroad Company of St. Louis, Terminal Railroad Company of St. Louis, Terminal Railroad of East St. Louis, Merchants Company, St. Louis Merchants Bridge Company, East St. Louis & Carondelet Railroad Company, Ilinois Transfer Railway Company, Granite City & Madison Belt Railway Company, St. Louis Belt & Terminal Railway Company, and the officers and directors of each, intending unlawfully and unreasonably to restrain interstate trade and commerce and monopolize the same, and restrain and prevent competition therein at St. Louis and East St. Louis, between all railways, bridges, and ferries at these cities, and to deprive the public of facilities

and advantages resulting from competition, entered into an unlawful combination to effect a consolidation of the properties of the Bridge and Tunnel Companies, the Union Railway and Transit Company, Terminal Railroad Company of St. Louis, Merchants Company and its subsidiary companies, and the Proprietary Companies, under the control of the Terminal Association; that such consolidation was effected on August 17, 1893, by means of an agreement entered into between the Terminal Association and the Merchants Company whereby the Merchants Company granted the perpetual use of its terminal facilities then owned or thereafter controlled, in the City of St. Louis, to the Terminal Association, which accepted the grant and as consideration therefor guaranteed payment of the liabilities of the Merchants Company, and purchased a large number of its shares of stock; and at the same time another agreement was made between the Terminal Association and the Merchants Company, whereby the Terminal Association came into control of the St. Louis Terminal Railway Company;

That on May 1, 1897, the Merchants Company sold the Terminal Association additional shares of the Merchants Company stock, thus giving the Terminal Association control of the majority of the stock of the Merchants Company, which control the Terminal Association now enjoys; that the Terminal Association fixes the rates of the Merchants Company and, without ocmpetition, fixes unreasonable rates and tolls on both bridges, which it operates as a single instrument of interstate commerce, thus enjoying a monopoly.

That from 1893 to 1897, a pooling arrangement existed betweeen the Wiggins Company, the Terminal Association, and the Merchants Company, which

was thereafter continued between the Terminal Association and Wiggins Company;

That on the 17th day of August, 1893, the Missouri, Kansas & Texas Railway Company, Chicago & Alton Railway Company, St. Louis & San Francisco Railway Company, Baltimore & Ohio Southwestern Railway Company, Illinois Central Railroad Company, Southern Railway Company, Chicago, Burlington & Quincy Railway Company, St. Louis, Vandalia & Terre Haute Railway Company, and Chicago, Rock Island & Pacific Railway Company became stockholders in the Terminal Association, and each is now the owner of that portion of the capital stock in the petition set forth;

That the fourteen Proprietary Companies were on July 15, 1902, through their ownership of Terminal Association stock, operating under one control and management the properties of the Merchants Company and the Terminal Association, including the two bridges, and fixed the charges and tolls, making a uniform charge for interstate service over the two bridges, which was unreasonable and which stifled and destroyed competition;

That in 1902, by an agreement, the exact terms of which are unknown to complainant, entered into between the Terminal Association and Wiggins Ferry Company, the former obtained control of the latter Company and its properties, and 9,500 shares out of the 10,000 shares of stock of the Wiggins Company was deposited with the Mercantile Trust Company of New York, to be held and voted by it for the Proprietary Companies of the Terminal Association, and as security for an issue of $50,000,000 of bonds of the Terminal Association, since which date all competition in interstate commerce between the said three companies has been stifled and destroyed;

The prayer of the petition is,—

That the combination hereinbefore described as unlawful, and all acts in pursuance thereof, be adjudged in derogation of the common rights of the people and in violation of the Act of Congress of July 2, 1890, entitled "An Act to protect trade and commerce against unlawful restraints and monopolies;" that defendants, their officers, directors, stockholders, agents, and servants be enjoined from doing any act in pursuance of or for the purpose for carrying out the same in the future; that all agreements looking to the operation of the Eads Bridge and terminals connecting therewith in common with the Merchants Bridge and its terminals be declared void and parties to such agreements be enjoined from the operation of such bridges and terminals in common, and maintaining the properties as a common instrument of interstate commerce;

That the Proprietary Companies, their stockholders, officers, directors, and executive committees, agents, and servants be enjoined from voting or acting as owner of any of the stock of the Terminal Association, Wiggins Company or Merchants Company; that the Terminal Association be enjoined from recognizing the fourteen Proprietary Companies, or any of them, as owners of its capital stock;

That the Terminal Association and the Proprietary Companies, their stockholders, officers, directors, agents, and servants be enjoined from voting or acting as owner of any of the stock of the Merchants Company, Merchants Bridge Company, Wiggins Company, or any of its subsidiary companies; that the Merchants Company, Merchants Bridge Company, Wiggins Company, and the various subsidiary companies, be enjoined from recognizing or accepting the Terminal Association and the Proprietary

Companies as the holders of any shares of stock in their respective companies, and from permitting the Terminal Association, or any of the Proprietary Companies, their directors, stockholders, officers, agents, or servants from voting such stock in any of said companies, or paying any dividends upon the stock of the Merchants Company, Merchants Bridge Company, or any of the subsidiary companies, to any one of the fourteen Proprietary Companies, or any other company named in the petition;

That the individual defendants, their trustees, agents, and assigns, be enjoined from doing any act complained of, or placing the capital stock of the Terminal Association in any corporation controlled by it, or the stock of the Merchants Company in any corporation controlled by it, or the two bridges, or competitive interstate commerce under the control of the Terminal Association, or any one of the fourteen Proprietary Companies;

And for such further relief as the case may require and the court may deem proper in the premises.

Answer. The defendants made joint and several answer, admitting that the Proprietary Companies were common carriers of interstate freight, but averred that the Terminal Association, Merchants Company, and Wiggins Company were common carriers only for the purpose of furnishing terminal facilities to the extent and in the manner as stated in the answer;

Admitted the ownership of the two bridges as alleged in the petition, but denied the ownership by the Terminal Association and the Merchants Company of parallel or competing lines of road, or that these two companies and the Wiggins Company

operated all methods of transporting interstate traffic in St. Louis;

Admitted that the fourteen Proprietary Companies were owners in equal proportions of the stock of the Terminal Association, and that these Proprietary Lines constituted the principal trunk lines entering St. Louis and East St. Louis and engaged in interstate commerce;

Admitted the consolidation of the two companies forming the Terminal Association, as alleged in the petition, but denied that either of the constituent companies owned or operated any continuous line of railway across the Mississippi river, or that any other company except the two constituent companies was concerned in the consolidation, and averred that all the properties owned at the time of the consolidation by the constituent companies were located in St. Louis;

Averred that the Union Station in St. Louis was not constructed until some five years after the consolidation, and at the time of the consolidation the Missouri Pacific Railway Company and the Wabash Railroad Company were lessees of the Eads Bridge and Tunnel and sub-lessees of the Union Railway & Transit Company and of the Tunnel Railroad of St. Louis, and operated the properties of these companies and the Eads Bridge and Tunnel;

Denied the location of the tracks of the Terminal Association and connections as averred in the petition; denied that the Terminal Association owned tracks in East Carondelet, Madison, or Granite City, but averred that the Terminal Association had for many years owned tracks connecting with industries in St. Louis and East St. Louis and operated extensive terminals in each of these cities;

Denied that the facilities of the Terminal Association extended into Madison, East Carondelet, and Granite City, and averred that the Terminal Association reached these and adjacent cities in Illinois through trackage contracts, leases, and stock ownership which enabled it to provide facilities for interchange of traffic between these cities and the City of St. Louis;

Admitted the organization of the Merchants Company, but denied that it constructed or operated a railroad into Union Station;

Admitted the corporate existence of the Madison, Illinois & St. Louis Railway Company and ownership of stock in the Merchants Company;

Admitted the organization of the St. Louis Terminal Railway Company, but averred that no part of its line was constructed until the Terminal Association became the owner of its stock, and denied the lease of its property at any time to the Merchants Company;

Admitted the incorporation of the St. Louis Transfer Railway Company and operation of the railway from Grand avenue to Arsenal street, a distance of six miles, in lieu of forty, and admitted the ownership of the stock of this Company by the Wiggins Company;

Admitted the organization of the Illinois Transfer Railway Company and the Granite City & Madison Belt Railway Company, but denied the organization for the purposes stated in the petition, or that either was at any time operated by the Merchants Company;

Denied that the St. Louis Belt & Terminal Railway Company existed in 1893, and averred it was not organized until 1902;

Admitted ownership by the Merchants Company

of the stock of the St. Louis Merchants Bridge Company and the lease of the Merchants Bridge to the Merchants Company, the cancellation of this lease and the subsequent lease to the Madison, Illinois & St. Louis Railway Company, and the ownership of the stock of that Company by the Merchants Company;

Denied location and termini of the properties of the Merchants Company as stated in the petition; and averred that the Merchants Company owned no tracks except tracks extending from 8th and Gratiot streets eastwardly and northwardly to a connection with the western approach of the Merchants Bridge and to Carrie avenue;

Denied that the Merchants Company controlled or operated the terminal facilities of or substantially of the character or located as in the petition described;

Admitted the incorporation of the Wiggins Company, the operation of boats and barges for transporting trains across the Mississippi river; the ownership of the stock of the East St. Louis Connecting Railway Company and the St. Louis Transfer Railway Company, and the connection between the tracks of the East St. Louis Connecting Railway Company and railroads entering East St. Louis, and connection between the St. Louis Transfer Railway Company and the incline of the Wiggins Company; admitted the operation by the Wiggins Company of these two subsidiary companies and the handling of a large number of freight cars daily;

Admitted the lease by the Missouri Pacific Railway Company and the Wabash Railroad Company of the Eads Bridge and Tunnel; and the operation of these railway companies of the Bridge and Tunnel, but denied that the purpose, effect, or object of such

lease was to place any restraint upon or monopolize interstate commerce or suppress competition, or resulted in maintaining arbitrary charges, or that the charges were unreasonable or extortionate;

Admitted the grant by Congress of the charter of the St. Louis Merchants Bridge Company and the amendment thereof as alleged in the petition, but denied that Congress acted improperly or was unmindful of the public welfare;

Admitted that on October 1, 1889, an agreement was entered into between the Terminal Association, the St. Louis Bridge Company, the Tunnel Railroad of St. Louis, Missouri Pacific Railway Company, and the Wabash Railroad Company, whereby the lease referred to in the petition was canceled and the Terminal Association became the lessee of the Eads Bridge and Tunnel; but denied that this agreement was in pursuance of any combination to control or restrain trade or commerce; but averred that the purpose was to promote trade and commerce and the effect was to prevent monopoly;

Denied that any of the matters complained of had resulted in the restraint of trade or commerce, but, on the contrary, had promoted competition and fostered trade and commerce;

Admitted the agreement of August 17, 1893, between the Merchants Company and Terminal Association, and the acquisition and control by the Terminal Association of the St. Louis Terminal Railway Company; denied any agreement between the Wiggins Company, Terminal Association, and Merchants Company for establishing rates between Illinois and St. Louis; and denied any combination, conspiracy, or agreement of any kind on the part of any of the defendants made for the purpose of controlling or restraining interstate commerce;

Denied the acquisition by the Terminal Association of the stock of the Merchants Company in 1897, but averred that in 1893 the Terminal Association acquired the control of the majority of the stock of the Merchants Company; and denied that the operation of the Terminal properties deprived the people of the benefit of competition;

Admitted that subsequent to August 17, 1893, eight of the Proprietary Companies named in the petition had become such, and that the Proprietary Companies were owners of the stock of the Terminal Association;

Denied the fixing or exaction of unreasonable charges by either the Merchants Company or the Terminal Association, or that the Terminal Association was merely holding company for the Proprietary Companies; but averred that the Terminal Association had entered into an agreement with the Proprietary Companies whereby it regulated its charges and tolls in such manner that the revenue derived therefrom should be sufficient only to meet its fixed charges and operating expenses; averred that the system of the Merchants Company, though separate and distinct, but complemented the system of the Terminal Association, and that between these two companies arrangements were necessary and had been made whereby traffic passing over the two systems paid a single charge, which arrangement resulted in efficiency in service, economy in operation, and reduction in rates;

Denied that competition in interstate commerce had been in any manner stifled, destroyed, or restrained by any of the matters complained of, or that unreasonable charges had at any time been exacted, but averred, on the contrary, the promotion and encouragement of competition and commerce;

Denied the ownership by the Terminal Association of the stock of the Wiggins Ferry Company, and averred such ownership to be as thereinafter more fully stated;

The remainder of the answer is as follows:

The organization of the Terminal, Bridge and Ferry Companies, named in the petition, the purposes of such organization, the properties at any time owned or controlled by any of them, the relations of these properties to each other and the agreements with respect to the use thereof, the growth and development of terminal facilities in the Cities of St. Louis and East St. Louis and the uses to which they are put, as well as the terms and conditions upon, and the purposes for which the same are operated and controlled, and the effect thereof, are as follows:

With respect to the Eads Bridge and the tracks connecting therewith upon each side of the Mississippi river:—Prior to the year 1874 there were few industries located in, or in the neighborhood of, St. Louis or East St. Louis which had railway connections, and the freight and passenger traffic between the various lines then entering the City of St. Louis and the City of East St. Louis, and between such railway lines and industries located in these cities, was handled by means of wagons and ferries. For the purpose of facilitating public convenience and safety in the handling of freight and passenger traffic between and in these cities there was constructed, in 1874, the railway bridge herein referred to as the Eads Bridge across the Mississippi river, between these cities, and terminal facilities were constructed connecting with the bridge. The construction of this bridge, and of these terminals, came about in the following manner:

On February 5, 1864, the St. Louis & Illinois Bridge

Company was incorporated by special act of the Legislature of the State of Missouri, entitled "An act to incorporate the St. Louis & Illinois Bridge Company," and authorized to construct a bridge over the Mississippi river at St. Louis. This act was amended February 20, 1865, by an act entitled "An act to amend an act entitled 'An act to incorporate the St. Louis & Illinois Bridge Company,' approved February 5, 1864." February 16, 1865, the Legislature of the State of Illinois, by special act, entitled "An act to empower the persons mentioned in an act passed by the General Assembly of the State of Missouri, entitled, 'An act to incorporate the St. Louis & Illinois Bridge Company,' approved February 5, 1864, to form a corporation and build a bridge across the Mississippi river at St. Louis," authorized the construction of this bridge over that portion of the river within the jurisdiction of the State of Illinois, and, on July 25, 1866, was approved an Act of the Congress of the United States, empowering the St. Louis & Illinois Bridge Company to erect a bridge at St. Louis;

February 21, 1867, by special act of the Legislature of the State of Illinois, entitled "An act to incorporate the Illinois & St. Louis Bridge Company," the Illinois & St. Louis Bridge Company was incorporated, with power to construct a bridge over the Mississippi river at St. Louis, and authorized to consolidate with any bridge company incorporated under the laws of Missouri having like power;

March 19, 1868, the Missouri Legislature passed a special act, entitled "An act to authorize the consolidation of the St. Louis & Illinois Bridge Company with the Illinois & St. Louis Bridge Company," authorizing the consolidation of the St. Louis & Illinois Bridge Company and the Illinois & St. Louis

Bridge Company, and on July 9, 1868, these corporations were consolidated under the name of Illinois & St. Louis Bridge Company. By an act approved July 20, 1868, Congress recognized the consolidation and granted the consolidated company authority to construct a bridge, as authorized by the Act of Congress of July 25, 1866;

The Illinois & St. Louis Bridge Company (the consolidated company) began the construction of the Eads Bridge and completed the same on July 1, 1874; pending the construction of this bridge a mortgage was executed by the Bridge Company under date of March 15, 1870, securing $4,000,000.00 of bonds; a second mortgage was executed May 15, 1871, securing $2,000,000.00 of bonds, and a third mortgage March 2, 1874, securing $3,000,000.00 of bonds. All of these bonds were issued, and the proceeds used in the construction of the bridge. November 8, 1872, and while work on the Eads Bridge was in progress, the St. Louis Tunnel Railroad Company was incorporated under the laws of Missouri for the purpose of constructing a railroad from the terminus of the bridge, near Third street, in the City of St. Louis, to a point between Poplar and Cerre streets, and between Eighth and Tayon avenue (now Eighteenth street) so as to make connection with the track of the Missouri Pacific Railway Company and the track of any other railroad company and provide necessary sidetracks in the City of St. Louis. Shortly after the incorporation of this company, work was begun upon its railway, commonly known and herein referred to as the Tunnel, and on November 29, 1872, the City of St. Louis, by ordinance No. 8101, transferred to and vested in the St. Louis Tunnel Railroad Company the rights and privileges with respect to the building

of the tunnel which it had theretofore conferred upon the consolidated bridge company. This tunnel was completed on July 4, 1874, concurrent with the completion of the bridge. Pending the construction of the tunnel, the Tunnel Company executed its mortgage under date of January 1, 1873, securing 250,000 pounds sterling bonds, which were issued and the proceeds in the construction of the tunnel;

Default was made in payment of the interest on the bonds secured by these mortgages of the Bridge and Tunnel Companies, receivers were appointed and the mortgages foreclosed by proceedings in the Cirsuit Court of the United States in and for the Eastern District of Missouri, and a decree was entered April 24, 1878, ordering the sale of the properties of the Bridge and Tunnel Companies;

For the purpose of purchasing the bridge and Tunnel properties at the sale to be made under this decree, the St. Louis Bridge Company was incorporated under the laws of the State of Missouri, December 18, 1878, and the Tunnel Railroad of St. Louis was incorporated under the laws of the same state on the same day. Shortly thereafter the St. Louis Bridge Company became the purchaser under this foreclosure proceeding, and now is the owner of the Eads Bridge, and the Tunnel Railroad of St. Louis became the purchaser under the same foreclosure proceeding and now is the owner of the tunnel. The St. Louis Bridge Company has an outstanding capital stock of $7,990,000, of which $2,490,000 are first preferred, $3,000,000 second preferred and $2,500,000 common; it has also issued $5,000,000 of bonds, secured by mortgages to J. C. Rogers and E. C. Tracy, trustees, dated April 1, 1879. The Tunnel Railroad of St. Louis has an outstanding capital stock of $1,250,000; the proceeds of the Bridge Company

stock and bonds and of the Tunnel Company stock were used in payment for the bridge and tunnel properties, and these bonds and stocks are now principally held and owned in Europe;

While the Eads Bridge and the tunnel were in course of construction it was the intention and purpose of the Bridge and Tunnel Companies that the bridge and tunnel would be used by all railroad companies desiring such use, with their own motive power, and that such railway companies would furnish their own respective terminal facilities in the way of switches, sidetracks, freight houses and passenger depots, for the handling of freight and passenger traffic, which would be separately and independently transported through the tunnel and over the bridge by the various railroad companies; for this reason up to within a short time before the completion of the bridge and tunnel no provision had been made for the acquisition of locomotives, acquisition of land for or construction of sidetracks, warehouses, passenger stations or terminals of any character, or for the operation, by the Bridge and Tunnel Companies, of trains of any character through the tunnel or over the bridge. The Bridge and Tunnel Companies, however, discovering within a few months before the completion of their respective properties, that none of the railroads then entering the City of St. Louis or East St. Louis had made, or intended to make, any provision for making any connection with the bridge or tunnel in either city, found it necessary to cause to be constructed terminal tracks in each city connecting, in the City of East St. Louis, with the eastern approach of the bridge, and, in the City of St. Louis, with the tunnel, and also to make provision for transferring, through the tunnel and over the bridge, such cars as might

be tendered for that purpose by such railway companies as might connect with the terminals and tracks so to be constructed; and to this end the Bridge and Tunnel Companies caused to be incorporated under the laws of the State of Missouri, the Union Railway & Transit Company of St. Louis, on April 13, 1874, and, under the laws of the State of Illinois, the Union Railway & Transit Company of Illinois, on April 14, 1874. The articles of incorporation of the Missouri company declared the purpose of its incorporation was to construct tracks from the western end of the tunnel for railway connection between the bridge and tunnel and any railroads then and thereafter to be constructed in the City of St. Louis, and approaching the tunnel; to provide switches, sidetracks and other necessary appurtenances, and to operate trains through the tunnel and over the bridge; while the articles of association of the Illinois company declared the object of its incorporation to be the construction of tracks and yards in the City of East St. Louis, Illinois, to connect the railroads then entering, or that might thereafter enter, East St. Louis, with the east approach of the bridge, and for the operation of the railroad tracks over the bridge and through the tunnel. In pursuance of this purpose the Union Railway & Transit Company of St. Louis acquired a small tract of land near the western end of the tunnel and extending westwardly a short distance, on which were constructed railway tracks, switches and sidetracks connecting with the tunnel, and the Union Railway & Terminal Company of Illinois acquired a small tract of land in East St. Louis, near the bridge approach, on which railway tracks and switches were constructed. Neither of the transit companies had any passenger stations, either in the City of St. Louis

or East St. Louis, or undertook to transport, as common carriers, passengers or freight; the business conducted by the transit companies consisted solely of transporting, with their locomotives, the cars, and trains of cars, which were received by them from the various railway companies connecting with them in the cities of St. Louis and East St. Louis;

As the bridge and tunnel properties had been constructed simply for the purpose of furnishing railway tracks for the operation thereover, by the railway companies, of their freight and passenger trains, no provision was made by either the Bridge or Tunnel Company for the accommodation or handling of passenger traffic, and on April 10th, 1874, there was incorporated under the laws of Missouri the Union Depot Company of St. Louis for the purpose of constructing and maintaining union stations for passengers and freight in the City of St. Louis, and constructing and maintaining railway tracks to connect such freight and passenger stations with the terminals, and such railroads as might desire such connections. This company was formed in pursuance of an agreement theretofore entered into between the Atlantic & Pacific Railroad Company, Terre Haute & Indianapolis Railroad Company, Indianapolis & St. Louis Railroad Company, St. Louis & Southeastern Railway Company, the Ohio & Mississippi Railway Company, and certain individuals who were willing to furnish the necessary capital for the purchase of the ground and construction of the Union Depot in the City of St. Louis, from and to which passenger trains of all railroad companies terminating in St. Louis, or entering the city over the bridge and tunnel tracks, might run, and for the rental of the depot, so to be constructed, to all the railway lines in common, and the operation and management

of the depot by such railway lines, with the right on the part of the lessees to purchase the depot properties at any time after fifteen years. In pursuance of this agreement, and of the articles of association of the Union Depot Company, a Union Passenger Station was constructed, and tracks connecting it with the tracks of the Union Railway & Transit Company of St. Louis (the tracks of which connected with the tunnel as stated) were laid, and thereafter the Union Station, so built between Eleventh and Twelfth streets, on Poplar street, was operated by the railroad companies entering the cities of St. Louis and East St. Louis, until 1894. This station was opened in 1875;

The Union Depot Company of St. Louis was incorporated in pursuance of an act of the Legislature of the State of Missouri, which provided for the formation of companies in order to facilitate the public convenience and safety in the transmission of goods and passengers in large cities from one railroad to another, and to prevent the unneccessary expense, inconvenience and loss attending the accumulation of a number of stations. The act further provided that any railroad company or companies might incorporate such company and become stockholders thereof;

In 1875, the bridge and tunnel having been completed, and the terminals established in connection therewith by the Union Railway & Transit Company of St. Louis and the Union Railway & Transit Company of Illinois, as hereinbefore stated, the Union Railway & Transit Company of St. Louis undertook to provide, and did provide, locomotives and train crews for the handling of freight and passenger trains over the bridge and through the tunnel, and delivering the same to and for the various railway

lines in St. Louis and East St. Louis; and when the Union Station was completed, in 1875, the Union Railway & Transit Company also, for the railway companies terminating in the City of East St. Louis, brought their passenger trains into St. Louis and into and out of the Union Station in St. Louis, through the tunnel and over the bridge. This method of operating the bridge and tunnel, and the terminals connected therewith, continued until 1879, when, on the first day of January, of that year, the Union Railway & Transit Company of St. Louis and the Union Railway & Transit Company of Illinois leased all their properties, including their locomotives, to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, at an annual rental, with the right, upon the part of the lessees, to purchase the properties;

The terminal facilities provided, as stated, by the Union Railway & Transit Company of St. Louis, in the City of St. Louis, and by the Union Railway & Transit Company of Illinois, in the City of East St. Louis, proving inadequate for the demands of traffic, there was incorporated, under the laws of the State of Missouri, on February 25, 1880, the Terminal Railroad of St. Louis, for the purpose of constructing railroad tracks in the City of St. Louis connecting the tracks of the Union Railway & Transit Company of St. Louis, the Union Depot Company of St. Louis, the Tunnel Railroad of St. Louis, and all railroads entering, or to enter, the City of St. Louis, so as to provide the most ample and convenient connections, accommodations and terminal facilities in St. Louis for all railroads then, or thereafter, to enter St. Louis, and all parties doing business with such railroads. This company acquired small tracts of land between Twelfth and Eighteenth streets, and,

on the land so acquired, tracks were laid and connections made with the Union Depot, Union Railway & Transit Company and the various railway lines connecting with those companies. On February 23, 1880, there was incorporated, under the laws of the State of Illinois, the Terminal Railroad of East St. Railroad (referred to herein at times as Terminal Railroad of Illinois), for the purpose of connecting, in that city, the bridge approach and the tracks of the Union Railway & Transit Company of Illinois with the tracks of other railroads entering, or that might thereafter enter, the City of East St. Louis, the general object and purpose being to provide ample and convenient connections, accommodations and terminal facilities in and near the City of East St. Louis for all railroads then or thereafter entering that city; this company acquired lands in East St. Louis adjacent to the lands of the Union Railway and Transit Company of Illinois;

On March 3, 1880, the Terminal Railroad of St. Louis and the Terminal Railroad of East St. Louis, owning no motive power, but simply small parcels of land on which tracks had been constructed, leased their properties to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis at an annual rental based upon the cost of the properties and with the right, on the part of the lessees, to purchase the properties;

By virtue of the control of the properties of the two Union Railway & Transit Companies, and of the two Terminal Railroads acquired through these leases, the St. Louis Bridge Company and the Tunnel Railroad of St. Louis assumed the operation, through the tunnel and over the bridge, of the cars and trains of the various railroad companies entering the cities of St. Louis and East St. Louis, and connecting with

the leased and operated terminals. This method of handling trains and cars of the various railroad companies continued until July 1, 1881, when the St. Louis Bridge Company and Tunnel Railroad of St. Louis jointly leased their properties, and assigned their leases of the properties of the two Union Railway and Transit Companies, and of the two Terminal Railroads to the Wabash, St. Lous & Pacific Railway Company and the Missouri Pacific Railway Company, for and during the term of the corporate existences of the lessor companies, and of each of them, and of any and all renewals and extensions of such corporate existences; the lessees, agreed to pay by way of rental, the interest and principal of the $5,000,000 of bonds of the St. Louis Bridge Company, dividends at the rate of $5.00 per share for three years, and thereafter at the rate of $6.00 per share, on $2,490,000 of the first preferred capital stock of the Bridge Company, dividends at the rate of $3.00 per share, yearly, on $3,000,000 on the second preferred capital stock of the Bridge Company, dividends at the rate of $6.00 per share annually on $1,250,000 of the capital stock of the Tunnel Railroad of St. Louis, and all taxes and assessments upon the properties leased. By this lease the Wabash, St. Louis & Pacific and Missouri Pacific Railway Companies secured control of the bridge and tunnel, and of the grounds and tracks of the two Union Railway & Transit Companies and the two Terminal Railroads, and operated these properties thereafter until 1889. During this period the bridge and tunnel and terminal properties were operated by the Wabash, St. Louis & Pacific, and Missouri Pacific Railway Companies separately from their other properties. The operation of the bridge and tunnel and terminal properties consisted in the switching of trains and

cars through the tunnel and over the bridge for all railway companies in the cities of St. Louis and East St. Louis, connecting with terminals on either side of the river and desiring such service. The operation of the bridge and tunnel properties by these railway companies, as lessees, was not a source of revenue or profit, as the charges were at all times so regulated as to produce only revenue sufficient to pay the fixed charges, payment of which had been assumed under the leases, and the cost of operation. In 1889 Mr. Jay Gould, who was then in control, through stock ownership, of the Missouri Pacific Railway Company and of the Wabash Railroad Company) the successor of the Wabash, St. Louis & Pacific Railway Company), both of which companies had termini in the City of St. Louis, and were largely interested in the development and growth of the city, entered into an agreement, under date of October 1, 1889, with the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, Wabash Railroad Company, Ohio & Mississippi Railway Company (now the Baltimore & Ohio Southwestern Railroad Company), St. Louis, Iron Mountain & Southern Railway Company, Louisville & Nashville Railroad Company and the Missouri Pacific Railway Company, for the purpose of securing an efficient and economical system of handling freight and passenger traffic at St. Louis and East St. Louis, and enlarging and perfecting the system for handling such traffic. By the terms of this agreement, Mr. Gould, who had by individual purchase personally acquired the capital stock of the two Union Railway & Transit Companies, the two Terminal Railroads and the Union Depot Company, agreed with the railroad companies just named, parties to the agreement, to cause the Union Railway & Transit Company of St. Louis and

the Terminal Railroad of St. Louis to be consolidated as the Terminal Railroad Association of St. Louis (herein referred to as Terminal Association) and to cause to be conveyed to this consolidated company the property of the Union Depot Company and the capital stock of the Union Railway & Transit Company of Illinois, and the Terminal Railroad of Illinois, and to further cause a portion of the capital stock of the Terminal Railroad Association of St. Louis to be issued, in equal parts, to the six railway companies named, the remainder of the stock to be retained and to be issued to such other railroad companies as might thereafter desire to become parties to the agreement. The agreement further provided that Mr. Gould would cause to be transferred to the Terminal Association the leasehold interests of the Missouri Pacific Railway Company and Wabash Railroad Company in the bridge and tunnel above described. It was also provided that the Terminal Association should issue its bonds to the extent of $7,000,000, of which $5,000,000 should be used in payment for the purchase of the properties to be conveyed to and vested in the Terminal Association, and the remaining $2,000,000 should be used to purchase additional real estate and construct additional passenger and freight terminal facilities in St. Louis and East St. Louis. The railroad companies, parties to this agreement, were by a concurrent agreement granted the right in perpetuity of joint use with each other, and such other companies as might from time to time be admitted as proprietary lines of the Terminal Association, of all its properties, the use so granted to be appurtenant to each railroad company. The railroad companies, parties to this agreement, on their part, accepted in perpetuity the joint use of the property of the Ter-

minal Association, and agreed that the charges for the use so granted should be sufficient to pay the fixed charges provided for in the leases of the bridge and tunnel properties, the interest on the bonds given for the purchase price of the terminal properties, interest on such future sums as might be expended in the acquisition of additional properties, and to pay taxes and operating expenses. The agreement also provided for the subsequent admission, at any time thereafter, of any other railroad company desiring such admission. The fixed charges on the bridge and tunnel properties thus assumed by the Terminal Association were and are interest at seven per centum on $5,000,000 of bridge bonds, annual dividends of $6.00 per share on $2,490,000 of first preferred bridge stock, $3.00 per share on $3,000,000 of second preferred bridge stock, $6.00 per share on $1,250,000 of tunnel stock, and all taxes on these properties;

In pursuance of these agreements, the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis were consolidated on July 30, 1889, as the Terminal Railroad Association of St. Louis (herein referred to as Terminal Association). The lease of the bridge and tunnel properties was assigned (with the consent of the Bridge Company and Tunnel Railroad) by the Missouri Pacific and Wabash Railroad Companies to the Terminal Association, and, in this way, the Terminal Association, in 1889, became the owner of the properties of the Union Railway & Transit Company of St. Louis, the Union Depot Company, the Terminal Railroad of St. Louis, the owner of the stock of the Union Railway and Transit Company of Illinois and the Terminal Railroad of Illinois, and the lessee of the Eads Bridge and the tunnel, and

thereafter operated and does now operate the same in pursuance of the agreement just mentioned. The object and purpose of this agreement were to provide terminal facilities in the cities of St. Louis and East St. Louis, and for the switching of cars and trains between the cities, such use and service to be open, not only to the six railway companies parties to the agreement, but also, and upon like terms and conditions, to any and all other railroad companies desiring such use and service; the operation of the properties to be without profit to the stockholders of the Terminal Association, but for the purpose of furnishing convenient and ample facilities for the railway lines entering the cities of St. Louis and East St. Louis; and, in conformity with this object and purpose, the properties of the Terminal Association have been, since the formation of the Association, in 1889, so operated, and have at all times been, and now are, open to the use of all railway lines not members of the Terminal Association upon the same terms and conditions accorded the Proprietary Companies. No dividends have been declared or paid on any of the stock of the Terminal Association, and its charges have at all times been so regulated as to produce revenue sufficient only to meet its fixed charges and operating expenses, and make necessary alterations, improvements and repairs;

The properties, the control of which the Terminal Association acquired in 1889, consist of the bridge and tunnel, a small tract of land in the city of East St. Louis, near the east approach of the bridge, and a right-of-way some hundred feet in width extending from Eighth and Poplar streets, in the city of St. Louis, westward to about Twentieth street, and adjoining this right-of-way, various parcels of land, on which are located switches and sidetracks. With

these terminals, at that time, were connected, in St. Louis, the tracks of railways entering the city from the south and southwest, while the terminals in East St. Louis were connected with some of the railways entering the city, so that, by virtue of this control of the properties named, the Terminal Association, in 1889, was able to switch, for all railways connecting, trains and cars between Twentieth street, in the City of St. Louis, and a point near the Relay Station in the City of East St. Louis. Under date October 1, 1889, the Terminal Association executed its mortgage to the Central Trust Company of New York, trustee, securing $7,000,000 of four and one-half per cent. bonds, payable October 1, 1939; and, under date August 1, 1893, to the same trustee, a second mortgage securing $5,000,000 of five per cent. bonds, payable August 1, 1943. All of the first mortgage bonds were issued, and are now outstanding; $3,500.00 of the second mortgage bonds were exchanged for bonds issued by the Terminal Association under a consolidated mortgage dated November 10, 1894, to the Central Trust Company of New York, trustee, securing $12,000,000 of five per cent. bonds; of the authorized issue of $12,000,000 of these consolidated bonds, $5,000,000 have been issued, and are now outstanding, $3,500,000 taking the place of a like amount of second mortgage bonds. The proceeds of these bond issues were used, in part, for the purchase of the properties acquired from Mr. Gould, in the manner and at the time hereinbefore stated, and the remainder in the acquisition of properties, the construction of terminal tracks and facilities thereon, and in the construction of the new Union Passenger Station in the City of St. Louis, fronting on Market street, between Eighteenth and Twentieth streets, the construction of which was completed in 1894. This pas-

senger station is now, and, since its completion, has been, used by every railway line entering the City of St. Louis for receiving and discharging their passengers in the City of St. Louis. For such use of this station all railway lines are charged, without discrimination or preference, like compensation and without regard to membership in the Terminal Association, on a wheelage basis. Through such use of this station a passenger reaching the City of St. Louis on any railway line, and desiring to leave the city on any other railway line, effects the change for himself and baggage without leaving the station, and in this manner passenger traffic is promoted and encouraged;

The St. Louis Merchants Bridge Company was incorporated under the laws of the State of Illinois on April 4th, 1886, for the purpose of constructing a bridge over the Mississippi river at St. Louis, and on February 3, 1887, the Congress of the United States authorized this company, and any incorporated railroad companies associated with it, to build a bridge across the Mississippi river at some suitable point between the Eads Bridge and the mouth of the Missouri river. This Act of Congress provided that all railroad companies desiring to use this bridge should have equal rights and privileges for the passage of railway trains upon the payment of reasonable compensation, and, in the event of disagreement as to the compensation and terms of use, the matter should be determined by the Secretary of War. The bridge was completed and opened for operation in May of 1890, and is the structure referred to in the petition as the Merchants Bridge;

The St. Louis Merchants Bridge Terminal Railway Company (herein referred to as Merchants Company), was incorporated August 17, 1887, under the laws of Missouri, for the purpose of operating a rail-

road within the corporate limits of the City of St. Louis, from Eighth and Gratiot streets to the western approach of the Merchants Bridge, and, by ordinance of the City of St. Louis, approved in 1887, was authorized to construct its railway tracks over the route designated, and to receive from and deliver to any railroad company connecting with it all cars tendered, and to permit all railroads connecting with it to operate their trains, locomotives, engines and cars over its tracks, upon such terms and conditions as might be agreed upon; this ordinance also provided for arbitration in the event the parties could not agree, and, in default of arbitration, the railroad commissioners of the State of Missouri should determine the matter in controversy;

The tracks authorized by this ordinance were constructed, and, on February 1, 1889, the Merchants Company leased the Merchants Bridge, which was then under course of construction. This lease provided that all railroad companies desiring the use of the property should be entitled to the equal rights and privileges relative to the passage of trains thereon as were enjoyed by the lessee. As payment for rental, the lessee agreed to pay interest on $2,000,000.00 of the bonds of the Bridge Company, taxes on the bridge property, and three-fourths of the net income accruing from the operation and use of the bridge. On March 4, 1889, there was incorporated under the laws of the State of Illinois the Electric City & Illinois Railway Company, for the purpose of contructing a railway from the east approach of the Merchants Bridge, through Madison county, Illinois, to the City of East St. Louis. The name of this company was changed to Madison, Illinois & St. Louis Railway Company. This company constructed a line from the east approach of the Merchants Bridge to

Granite City, Illinois, but never constructed a line into the City of East St. Louis. This company was incorporated in the interest of the Merchants Company, and all of its stock is owned by that company. In 1893 the lease of the Merchants Bridge to the Merchants Company was cancelled and the bridge was leased to the Madison, Illinois & St. Louis Railway Company. Through this lease of the Merchants Bridge and its ownership of the stock of the Madison, Illinois & St. Louis Railway Company, the Merchants Company switches cars trains of cars from Seventh and Gratiot streets, in the City of St. Louis, to the levee or wharf, thence northwardly to Ferry street, in the City of St. Louis, and over the Merchants Bridge to Granite City, Illinois.

In order to secure funds for the erection of the Merchants Bridge and constructing the tracks of the Merchants Company and of the Madison, Illinois & St. Louis Railway, bonds were issued as follows: $3,500,00 of bonds of the St. Louis Merchants Bridge Terminal Railway Company, secured by mortgage dated October 1, 1890, to the St. Louis Trust Company, bearing five per cent. interest, payable semi-annually; $2,000,000 of bonds of the St. Louis Merchants Bridge Company, secured by mortgage dated February 1, 1890, to Farmers Loan & Trust Company of New York, bearing six per cent. interest, payable semi-annually; and $500,000.00 of bonds of the Madison, Illinois & St. Louis Railway Company, secured by mortgage dated October 1, 1891, to the St. Louis Trust Company, bearing six per cent interest, payable annually;

The operation of the Merchants Bridge, the Merchants Company and the Madison, Illinois & St. Louis Railway Company proved unprofitable, and in 1893 the Merchants Company was insolvent, having

a large floating indebtedness, and was unable to meet its obligations at maturity or pay interest maturing upon its own bonded indebtedness, that of the Madison, Illinois & St. Louis Railway Company, or upon the bonded indebtedness of the Merchants Bridge. The facilities so owned and controlled by the Merchants Company were separate and distinct from the system of terminals owned and controlled by the Terminal Association. The tracks controlled and operated by the Merchants Company were at right angles with the tracks operated by the Terminal Association—the tracks of the Merchants Company beginning at Eighth and Gratiot streets, in the City of St. Louis, and running to the river front northwardly and diverging to Hall street about four miles to Ferry street, there crossing the Merchants Bridge and continuing northwardly to Granite City in Illinois; while the tracks operated by the Terminal Association began at Twentieth street and Clark avenue, in the City of St. Louis, and extended eastwardly, through the tunnel and over the Eads Bridge, to a point near the Relay Station, in the City of East St. Louis, Illinois. There was no industry located at any point on the tracks of either company which was reached by the tracks of the other. The Merchants Company had no passenger station in the City of St. Louis, and did not connect in any manner with the Union Station or with any of the railway lines entering the City of St. Louis from the south or west, or with any of the railway lines entering the City of East St. Louis from the south or east;

In 1893 several of the railway lines entering, or about to enter, the City of St. Louis from the north, were desirous of reaching the new Union Passenger Station of the Terminal Association, which was in course of construction, while some of the railway companies entering the City of East St. Louis could

more advantageously reach the Union Station, in the City of St. Louis, if connections could be formed between the tracks of the Terminal Association and the Merchants Company, in such a way that trains and cars could, by continuous movement, pass between the Cities of St. Louis and East St. Louis over the tracks of these two systems. Much of the freight traffic coming into the Cities of St. Louis and East St. Louis was through traffic, destined to cross the Mississippi river at St. Louis. The facilities of the Terminal Association had become inadequate for the proper handling of the increased traffic, and it was manifest it would be greatly to the interest of all the railroads then entering the City of St. Louis or the Cities of East St. Louis, Madison, Granite City, Venice and East Carondelet, as well as of the public, if some arrangement could be effected whereby the two systems of terminals could be so connected and operated that freight traffic, through or local, between and in the Cities of St. Louis and East St. Louis, or destined to cross the Mississippi river, or destined from one railway to another, or to any industry located on the tracks of either of the terminal systems, or the tracks of any one of the railway companies, could be moved without change of motive power, and with a single charge for the service so performed, so that all industries in the Cities of St. Louis and East St. Louis, and located on the tracks of either system could have equally efficient switching service, and without discrimination, preference or advantage with respect to such service or the charges therefor. To this end and for this purpose, and to prevent the disintegration of the properties operated by the Merchants Company and to secure the use in common without discrimination for all railway lines of these properties, an agreement was

entered into on the 13th day of August, 1893, between the Merchants Company and the Terminal Association, whereby the Terminal Association agreed to guarantee payment of the $3,500,000.00 of bonds of the Merchants Company, and to purchase from the Merchants Company 4,384 shares of its stock, and advance to the Merchants Company a sufficient amount to enable it to meet its current and pressing obligations. At the same time that this agreement was entered into, the Terminal Association acquired other shares of the stock of the Merchants Company, so that the aggregate of the shares of stock thus acquired by it constitutes a majority of the stock of the Merchants Company. On its part the Merchants Company granted to the Terminal Association the right to operate its trains over all the terminal properties owned or controlled by the Merchants Company. The Terminal Association agreed to construct a line of railway connecting the Union Passenger Station with the Merchants Company, so that passenger trains might pass over the Merchants Bridge and into and out of the Union Station, and freight trains and cars passing over the Merchants Bridge and Merchants Company system, might connect with the tracks of the Terminal Association;

This agreement of August 13, 1893, between the Merchants Company and the Terminal Association was recorded in the office of the Secretary of State of Missouri at the time of its execution, and has continually been a matter of public record and general knowledge. In 1903 the State of Missouri, at the relation of the Attorney General, filed an information in the Supreme Court of the State of Missouri alleging the illegality of this agreement, and of the ownership by the Terminal Association of the stock of the Merchants Company; upon the hearing of this pro-

ceeding the Supreme Court of Missouri held that the acquisition and ownership by the Terminal Association of the stock of the Merchants Company was authorized by the laws of the State of Missouri, and was in harmony with the statutes of the State of Missouri, which made special provision for such ownership of stock, and control and operation by one terminal company of the tracks and facilities of other terminal companies;

The Wiggins Ferry Company is a corporation organized in 1853 under special act of the Legislature of the State of Illinois, entitled "An Act to incorporate the Wiggins Ferry Company," for the purpose of operating ferries across the Mississippi river at St. Louis. It is the owner of large tracts of land in the City of East St. Louis available for terminal uses, and is the owner of all the capital stock of the East St. Louis Connecting Railway Company, a corporation organized under the laws of the State of Illinois, in 1878, and which owns railway tracks along the river front in East St. Louis connecting with some of the railways entering that city. The Wiggins Ferry Company also owns all the stock of the St. Louis Transfer Railway Company, a corporation organized under the laws of the State of Missouri in 1884, and which owns railway tracks about six miles in length, between Arsenal street on the south, and Calvary avenue on the north. The tracks of the St. Louis Transfer Railway Company and of the East St. Louis Connecting Railway Company connect with the inclines of the Wiggins Ferry Company. The Wiggins Ferry Company owns almost the entire river front north of the Eads Bridge opposite the City of St. Louis and operates a number of ferry boats for transportation across the river of wagon traffic and freight cars. The lands of the Wiggins Ferry Company in

East St. Louis are very extensive and are so located as to be readily utilized for terminal facilities used in connection with the properties owned and operated by the Terminal Association in the Cities of St. Louis and East St. Louis;

In 1902 the Chicago, Rock Island & Pacific Railway Company, Missouri Pacific Railway Company, Louisville & Nashville Railway Company, St. Louis, Iron Mountain & Southern Railway Company, Wabash Railroad Company, Cleveland, Cincinnati, Chicago & St. Louis Railway Company, Baltimore & Ohio Southwestern Railroad Company, St. Louis & San Francisco Railway Company, then Proprietary Companies of the Terminal Association, and Pennsylvania Company (controlling the St. Louis, Vandalia & Terre Haute Railway Company, now Vandalia Railroad Company), with the object and purpose of causing the terminals of the Wiggins Ferry Company to be opened to the joint and equal use, upon like terms and conditions with themselves, of all railway lines then entering, or that thereafter might enter, St. Louis or East St. Louis, and which might desire such use, either for intrastate or interstate traffic, purchased the capital stock of the Wiggins Ferry Company; and negotiations were opened with the Southern Railway Company, Missouri, Kansas & Texas Railway Company, Chicago & Alton Railway Company, Illinois Central Railroad Company and Chicago, Burlington & Quincy Railway Company with a view of uniting all railway companies entering St. Louis or East St. Louis in the ownership and control in common of all the stock of the Wiggins Ferry Company, and for the admission of all non-proprietary lines into membership in the Terminal Association on the same terms and conditions upon which all the other lines had theretofore been admit-

ted. These negotiations resulted in the execution of agreements whereby the title to all the stock of the Wiggins Ferry Company was vested in the Proprietary Companies—other than the Vandalia Railroad Company—and in the Pennsylvania Company, as equal owners, and all the railway companies named, not then members of the Terminal Association, were admitted into membership upon the same terms and conditions as the other railway companies had heretofore been admitted, and were accorded, in common with such companies, equal joint use and benefit of all the terminals of the Terminal Association. At the time this agreement was entered into, the Terminal Association was contemplating the acquisition of a large amount of land in the City of St. Louis, making additions to and changes in its terminal facilities in St. Louis and the building of a belt line in the county of St. Louis for the purpose of connecting its facilities with the various railway lines entering St. Louis, to the end that traffic between such lines, as well as through traffic crossing the river at St. Louis, might be handled more expeditiously and thus avoid the delays incident to passing through the city. For this purpose the Terminal Association contemplated the issue of a large amount of bonds, to be secured by a general mortgage. The properties then owned by it being all incumbered and the properties to be acquired being not of sufficient value in thesmelves to form satisfactory security for the contemplated loan, it was necessary that such loan should be guaranteed, as to payment of interest thereon, by all the Proprietary Companies, and the payment of the principal by the pledge of all the stock of the Wiggins Ferry Company in such manner that the general mortgage would constitute a first lien upon such stock; and accordingly this general mortgage was issued, under

date of December 16, 1902, and $18,000,000 of bonds have been issued thereunder and are now outstanding. The main security for these bonds is the agreement of each of the proprietary lines to use, in perpetuity, the facilities owned and controlled by the Terminal Association, and the pledge of the Wiggins Ferry stock. The Terminal Association is under obligation to the proprietary lines to provide, from time to time, such additional terminal facilities as may be requisite for handling the traffic of these lines in the cities of St. Louis and East St. Louis. To enable the Terminal Association to carry out this obligation, and provide these facilities, the general mortgage just referred to provides for an issue thereunder of an aggregate amount of $14,000,000 of bonds, these bonds to be issued to the extent of $1,000,000 annually, beginning with the year 1906. It is the purpose of the Terminal Association to so issue these bonds and, with the proceeds thereof, increase its terminal facilities and re-arrange track connections and crossovers between all of the terminal properties, to the end that, so far as possible, such terminals may be operated as an entirety, traffic moved between all points for a single charge and without change of motive power, and all railway lines served equally and without discrimination with respect to promptness of service, charges and extent of facilities afforded. To this end, agreements were entered into between the non-proprietary railway companies named and the Terminal Association, which provided, among other things, that in consideration of the use granted thereby to the railway companies of all of the terminal properties of the Terminal Association, the railway companies accepted such use and agreed forever to employ these facilities for all railroad traffic controlled by them crossing the river at the

City of St. Louis, and guaranteed, each to the extent of its interest in the Terminal Association, payment of interest on the bonds which the Terminal Association had theretofore issued and which it was then about to issue. These agreements further provided that the tolls or charges of the Terminal Association derived from the operation of its terminals should be so regulated as to meet the fixed charges, taxes, maintenance and operation of its facilities, to the end that the properties of the Terminal Association might be operated at cost, and in the event of a deficit at any time in the revenue sufficient to meet such charges, each proprietary company would advance one-fourteenth of such deficit. As further security for the bonds of the Terminal Association, and as a guarantee of their agreement to make use of the properties of that company, the railway companies, owners of all the stock of the Wiggins Ferry Company, pledged that stock with the trustee in the general mortgage of the Terminal Association, and all of the stock of the Wiggins Ferry Company is now so pledged;

The necessity for the joint ownership and control of common terminals in all large cities, for the joint and common use of all railway lines entering such cities, has been recognized, and the development of such systems of terminals, fostered and encouraged by legislation in many states. The Congress of the United States has likewise recognized such necessity and has enacted laws, applicable to the District of Columbia, whereby the railway lines entering the city of Washington and engaged in interstate trade and commerce, are authorized to unite in the ownership, management and control of terminals in Washington City, for the joint use of all railway lines entering that city. In no other way can the through and local traffic in large cities be expeditiously or

economically handled, or the imposing of unnecessary charges upon such traffic be avoided;

The Terminal Association and the Merchants Company are each incorporated, as hereinbefore fully stated, under the laws of the State of Missouri, for the specific purpose of providing terminal facilities for railroad companies. For the incorporation and conduct of the business of such companies, the State of Missouri has by legislative enactement made special provision, giving to such companies power to build, maintain and operate terminal railroads and terminal facilities for the use of all railroad companies, to own and operate ferries and bridges, to construct tunnels, and to hold the stock and bonds of any company operated in connection with or forming a part of such terminal facilities.

As shown by the articles of association of the constituent companies forming the Terminal Association, and of the terminal companies whose stock the Terminal Association acquired at the time of the consolidation, and of the Union Depot Company, as hereinbefore fully stated, the purpose and object of the organization of these companies were to meet these well recognized requirements of railway traffic. In pursuance of this purpose and object, and to increase terminal facilities from time to time, as the demands of railway traffic have required, the Terminal Association has caused to be incorporated, and has acquired control of other terminal companies. Among the companies so incorporated are the East St. Louis Belt Railroad Company, which was incorporated under the laws of the State of Illinois in 1898, and which has constructed tracks connecting the tracks of the Madison, Illinois & St. Louis Railway with the tracks of the East St. Louis & Carondelet Railroad Company; the Illinois Transfer Railroad Company,

incorporated under the laws of the State of Illinois in 1889, which has constructed a connection between the tracks of the East St. Louis Belt Railroad Company on the north with the tracks of the Illinois Central Railroad Company on the south. In 1893 the Terminal Association asquired the stock of the St. Louis Terminal Railway Company and has since then caused the tracks of that company to be built from a connection with the tracks of the Merchants Company in North St. Louis to a connection with the Wabash Railroad Company in the county of St. Louis, in 1902 the Terminal Association acquired the stock of the St. Louis Belt & Terminal Railway Company incorporated under the laws of the State of Missouri, and is now causing to be constructed the tracks of that company, forming a connection between the St. Louis Terminal Railway Company and the St. Louis & San Francisco Railroad Company on the south and the Chicago, Burlington & Quincy Railway Company on the north, and with all intermediate railway companies; in 1900 the Terminal Association acquired the capital stock of the Granite City & Madison Belt Line Railroad Company, a company incorporated under the laws of the State of Illinois, for the purpose of constructing a belt line around Granite City; about seven-tenths of a mile of track has been built by this company; in 1903 the Terminal Association acquired all the stock of the East St. Louis & Carondelet Railway Company, which owns tracks connecting with the East St. Louis Belt Railroad Company and extending southwardly to East Carondelet; in 1903 the Terminal Association acquired all the capital stock of the Interstate Car Transfer Company, a corporation organized in 1896 under the laws of the State of Missouri, and which operates a ferry transfer between an incline of the

Chicago, Burlington & Quincy Railroad Company in the northern part of the City of St. Louis, and inclines of the Southern Railway Company;

The capital required for the construction and acquisition of the bridges, tunnel and the various terminal properties, operated and controlled as hereinbefore stated, has been largely secured, from time to time, by the issuing of bonds, and there are now outsanding a number of bond issues, secured by mortgages, affecting these terminal properties, as follows;

Mortgage of the St. Louis Bridge Company of April 1, 1879, to J. C. Rogers and C. E. Tracy, trustees, securing $5,000,000 of bonds maturing April 1, 1929, all issued and outstanding; first mortgage of the Terminal Railroad Association of St. Louis, dated October 1, 1889, to Central Trust Company of New York, trustee, (which has been succeeded as trustee by Standard Trust Company of New York, trustee), securing $7,000,000 of bonds payable October 1, 1939, all issued and outsanding; first consolidated mortgage, dated November 10, 1894, to Central Trust Company of New ork, trustee, securing $12,-000,000 of bonds payable August 1, 1944, of which $5,000,000 are issued and outstanding; general mortgage, dated December 16, 1902, to Central Trust Company of New York, and William Taussig, trustees, securing $50,000,000 of bonds maturing January 1, 1953, of which $18,000,000 are issued and outstanding;

Mortgage of the St. Louis Merchants Bridge Terminal Railway Company, dated October 1, 1890, to the St. Louis Trust Company, trustee, securing $3,-500,000.00 of bonds, payable October 1, 1930, all issued and outstanding and guaranteed, as to payment of principal and interest, by the Terminal Association; mortgage of the St. Louis Merchants Bridge Company, dated February 1, 1889, to the Farmers'

Loan & Trust Company of New York, trustee, securing $2,000,000.00 of bonds, payable February 1, 1929, all of which are issued and outstanding and payment of interest thereon, guaranteed by the Terminal Association; mortgage of the Madison, Illinois & St. Louis Railway Company, dated October 1, 1891, securing $500,000.00 of bonds, payable October 1, 1911, all issued and outstanding and pledged as security for notes of the Merchants Company, held by the Terminal Association;

Mortgage of St. Louis Terminal Railway Company to the St. Louis Trust Company, trustee, dated January 2, 1893, securing $1,500,000 of bonds, maturing January 2, 1943, all issued and outstanding;

As security for loans, all the stock of the Union Railway & Transit Company of Illinois, Terminal Railroad of East St. Louis (Illinois), East St. Louis Belt Railroad Company, St. Louis Terminal Railroad Company, Illinois Transfer Railroad Company, Granite City, Madison & Belt Line Railroad Company, St. Louis Belt & Terminal Railway Company and East St. Louis & Carondelet Railway Company, and 17,800 shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company have been pledged, under the various above-mentioned mortgages of the Terminal Railroad Association of St. Louis, and the entire issue of the capital stock of the Wiggins Ferry Company, 10,000 shares, is also pledged to the Central Trust Company of New York, trustee, by the proprietary lines, other than the Vandalia Railroad Company, and Pennsylvania Company, to secure the bonds of the Terminal Association, and as a guaranty of the contract, upon the part of the proprietary lines, to make use of the properties of the Terminal Association;

While the properties of the Terminal Association

and its subsidiary companies, of the Merchants Company and its subsidiary companies, and of the Wiggins Ferry Company and its subsidiary companies, are now, and have at all times been, separately operated, no one of the systems is complete or adequate in itself, and for the purpose of making a more complete and perfect system of terminals, and, especially, for the more rapid and safe handling of trains, various track connections have from time to time, since 1893, been made between the tracks of thse different companies, and agreements have been entered into between them whereby, in some instances, the tracks of one company may be operated for all traffic passing in one direction, while the tracks of the other company may be used for traffic passing in the opposite direction, thus facilitating the handling of trains and the avoidance of accidents and delays. The operation of passenger trains through the tunnel is, at certain times of the year, attended with much complaint and some discomfort. If all the passenger trains of all the various railway lines crossing the river were required to pass over the Eads Bridge and through the tunnel, this passenger traffic, together with the large volume of freight traffic which must of necessity take this channel, would produce congestion and materially interfere with and restrain the traffic across the river. To avoid this physical discomfort to passengers, and the congestion of and delays to traffic, arrangements have been made between the Merchants Company and the Terminal Association for the operation, over the Merchants Bridge, of a considerable portion of the freight and passenger traffic which, in the absence of such arrangement, would pass over the Eads Bridge. These arrangements have been made possible only by reason of the control which the Terminal Association exercises, by

virtue of its ownership of the majority of the stock of the Merchants Company, in the conduct of the business of that company. Under like agreements between these companies, each is permitted the use of the facilities of the other, and such use of the facilities of each company by the other, must of necessity, be under one control and management. The effect of these arrangements and this method of operation not only largely increase the facilities of each company, but reduce the cost of operation, and, by reason of the economy so resulting from such operation, there has been a continued and steady decrease in all freight charges on interstate traffic; so that the tolls and charges for such traffic today, across the river, have been reduced from forty to sixty per cent;

In addition to the fourteen proprietary lines now using, and being required to use in perpetuity, under the contract hereinbefore mentioned, the facilities owned and controlled by the Terminal Association, there are other railway lines entering the cities of St. Louis and East St. Louis, which are engaged in interstate commerce. Between these lines and the proprietary lines there is an interchange of a large volume of traffic, a portion of which is interstate. Few of these railway lines connect directly with each other. All of the railway lines not members of the Terminal Association have been, and now are, granted the same use of all the facilities of the Terminal Association, on the same terms and conditions, that such use is granted to the proprietary lines; no distinction is made between a proprietary line and a non-proprietary line in the handling of traffic with respect to charges or services. All lines are upon an exact equality with respect to the use of all terminals. The purpose of so handling freight and passen-

ger traffic is to bring about economy in operation and expeditious interchange between all railway lines entering St. Louis and East St. Louis. The effect of this method of operation is to prevent any one line from securing an advantage or monopoly in the handling of freight or passenger traffic. No one of the terminal companies has any freight cars of its own or handles freight traffic on its own account. They receive freight only for some line with which they connect, and simply serve as a conduit through which the traffic of the various lines may pass in interchange. The Terminal Association is the only one of the terminal companies which has a passenger station in the City of St. Louis. In the passenger station of the Terminal Association every railway line entering the City of St. Louis receives and discharges its passengers; and for such use of this station all railway lines, without regard to membership in the Terminal Association, and without discrimination or preference, are charged like compensation upon a wheelage basis. Freight depots are maintained by each of the terminal companies where freight consigned to or from each railway line is received and delivered. Through the method of operation prevailing, freight destined for any line of railway may be received and delivered at any station of any one of the terminal companies, each terminal company acting as the agent of and serving equally all railway lines. Traffic between all large cities of the United States and the City of St. Louis is competitive. The method in which the terminals of St. Louis and East St. Louis are conducted, as herein stated, prevents any one railway line from obtaining any advantage over any other, with respect to facilities for the handling of its freight or passenger traffic in the City of St. Louis. The smaller railway lines

have the same facilities that stronger competitors might alone secure, and thus competition between all railway lines is encouraged, trade promoted and a monopoly avoided;

The method of operation of the terminal companies was never intended to result in profit to the owners, and there has never been, at any time, any profit in the operation. No dividends have ever been declared or paid on any of the stocks of any of the terminal companies or of their subsidiary companies. Now, and at all times tolls and charges are, and have been, so fixed as to cover only fixed charges, expenses of operation and maintenance, alterations, betterments and repairs;

None of the acts or matters complained of in the petition, which are herein admitted to be true, and none of the acts herein averred to have been done, has been in pursuance of any combination, conspiracy, contract or agreement to restrain or monopolize in any manner, or to any extent, interstate, trade or commerce. On the contrary, all of the acts complained of in the petition which are herein admitted to be true, and all of the acts averred in this answer to have been done, have been in pursuance of the object and purpose to create and develop in the cities of St. Louis and East St. Louis, and adjoining villages, a complete system of railway terminals, to be operated economically and without profit, for the joint and equal use upon like terms and conditions of all railway lines at any time entering either of the two cities, and thus foster and promote interstate commerce. In the carrying out of this purpose the effect has been, and must of necessity be, to avoid the creation of a monopoly in such commerce by any one railway company, or any number of railway companies;

The bonds of the terminal companies and the stocks of the St. Louis Bridge Company and Tunnel Railroad of St. Louis are held by many owners throughout the United States and Europe. The proceeds of these bonds have been used in the acquisition and development of the terminal properties mentioned in the petition. The main security for these bonds is the obligation of the proprietary lines to forever use these terminals for all traffic crossing the river at St. Louis, pay for this use such tolls and charges as will enable the Terminal Association to meet its operating expenses and interest on these bonds, and make good any deficit in revenue required to be made good for this purpose. This obligation of the proprietary lines has made possible the issue of these bonds and at a lower rate of interest than could have been otherwise secured, and has thus lessened the rates the Terminal Association charges for the use afforded and the service rendered, and diminished the traffic charge to the public. A large percentage of all charges made by the Terminal Association is paid and absorbed by the proprietary lines, and as there is no discrimination between the charges to the proprietary lines and outside companies, it is to the interest of the proprietary lines, through their control of the Terminal Association, to make these charges at all times as low as possible:

When the Terminal Association was formed, the Eads Bridge and the tunnel were under lease to two railway companies, and all the terminals in the City of St. Louis and East St. Louis connecting with the bridge and tunnel, were owned by a single individual who controlled the corporate action of the lessees of the bridge and tunnel. With the organization of the Terminal Association the control of these facilities passed to it, and, by the admission from time to time

of the various proprietary lines, today all of the main lines of railway in the United States have joint control and use of these facilities, which would otherwise be under the control of one individual or interest;

For the interchange, between the various railway lines, and continuous movement of interstate traffic in St. Louis and East St. Louis, there must of necessity be maintained a system of tracks connecting the different railways. Some of these railways have their termini in East St. Louis and others in St. Louis. The maintenance of this essential adjunct of railway commerce makes the co-operation of all railway lines indispensable. Of necessity the connecting links must be operated for the use and benefit of all. The practical operation of such a system requires a continuous movement; such continuous movement can only be effected under a single control and direction. The entrance by railway lines into the cities of St. Louis and East St. Louis has been effected with a view to the use of the terminals, as now constituted and operated, and the operation of these terminals as an entirety is essential to the proper and expeditious interchange of traffic between the various railway lines. In this manner each line has a direct connection with the others, and traffic from one to the others necessarily passes, in many instances, over the tracks of each one of the terminal companies. Tracks have been laid and track connections made with the special view of facilitating this interchange of traffic. Many manufacturing and industrial plants have been located and established upon the tracks of the several terminal companies, and large amounts of money expended in the construction thereof since 1893, because of the great advantage afforded shippers by reason of the railway

facilities furnished for switching to and from such establishments over all of the terminal systems for a single charge. Every industry or shipper located on any line of either terminal company is thus enabled to receive from and ship to any point on any line of railway in the United States, freight subject only to a single switching charge, and at the same time is given the benefit of competitive rates between all railway lines out of St. Louis or East St. Louis, and the cities adjacent, both on shipments coming to and going from said respective points;

While all the stock of the Wiggins Ferry Company is owned, in equal proportion, by the Pennsylvania Company and the fourteen proprietary lines (other than the Vandalia Railroad Company) the owners of this stock, who are, with the exception of the Pennsylvania Company, likewise owners of all the stock of the Terminal Association, have pledged the stock with the trustees in the general mortgage of the Terminal Association to secure its issue of $50,000,000 of bonds, as a guaranty of their contract to forever make use of the terminal facilities of the Terminal Association, and to pay for this use such charges as will enable that company to meet its operating expenses and interest on these bonds. Out of the proceeds of these bonds the Terminal Association has reimbursed the owners the amount expended in the purchase of the Wiggins Ferry stock and the Terminal Association is, in consideration of this reimbursement, granted, until the maturity of its general mortgage, the right to operate, and receive the revenue therefrom, all the properties of the Wiggins Ferry Company. The ownership of the stock of the Wiggins Ferry Company by each of the proprietary lines is incident to its membership in the Terminal Association. If any one of the proprietary lines abandons

the use of the properties of the Terminal Association, or defaults in its guaranty of the obligations of that company, its interest in the Wiggins Ferry Company passes to the other proprietary lines; so that, at all times, and until the maturity of the general mortgage bonds of the Terminal Association, all the properties of the Wiggins Ferry Company are open to the use of all the proprietary lines, thus making it impossible for any one railway company to secure the use of these properties to the exclusion of other companies;

At the time the Eads Bridge was completed in 1874, every railroad terminating on the east bank of the Mississippi river opposite St. Louis was owned by a company incorporated for the purpose of constructing and operating a railroad terminating on said east bank of the river, and every railroad entering St. Louis from the West was owned by a company incorporated for the purpose of constructing and operating a railroad terminating in the City of St. Louis. Prior to the opening of the Eads Bridge for traffic, no interchange of freight or passengers between the railroads thus terminating on opposite sides of the river could be made except by the use of team and wagons transported on ferry boats across the river, and no freight or passengers coming from the East over the railroads terminating on the east bank of the river and destined for the City of St. Louis could reach that city except by means of teams and wagons transported across the river on ferry boats. Every line of railroad on either side of the river had comparatively a short mileage, and the companies owning them were each and all without financial ability to defray the great cost of connecting their roads by means of a bridge across the river. The delays in handling freight and passengers, necessarily incident to the use of teams, wagons

and ferry boats were frequent and costly, and served in a great measure to retard the growth and development of the City of St. Louis, and to keep at a low ebb the traffic between the states lying east and west of the river that would otherwise naturally have passed through the St. Louis gateway;

The construction of the Eads Bridge alone could not and did not in the slightest degree relieve the situation. The west bank of the river is high, the east bank very low. The termini of all the western roads were some distance from the river; the height of the bridge made necessary a long and expensive approach on the east bank if connections were to be made with the railroads terminating on the east bank of the river. The scheme of a railroad through a tunnel was adopted to connect the western railroads with the bridge. But when all this had been done, terminal yards on either side of the river were absolutely essential to make possible the interchange of cars between the railroads, and there were needed freight stations in St. Louis for the handling of freight coming to that city from the East over the railroads terminating on the east bank of the river, or intended for shipment over those roads, and a passenger station in St. Louis for the accomodation of passengers that had been or were to be handled by the last mentioned railroads. The financial resources of the company which constructed the Eads Bridge were wholly exhausted in the building of the bridge; those of the Tunnel Company in constructing the tunnel and its railroad, and additional capital had to be obtained to do the other things which have been mentioned as necessary to make the bridge and tunnel available for use in the handling of freight and passengers. The formation of the several terminal companies, before mentioned in this answer

as having been incorporated in connection with the Eads Bridge, and the existence of numerous separate and diverse interests was the inevitable result. The use of the Eads Bridge did not have the effect of driving the ferry companies out of business; on the contrary, as the years passed, more railroads came to the east bank of the river opposite St. Louis, more came into St. Louis from the West, and those already in St. Louis were greatly extended through the South, Southwest, West and Northwest. St. Louis traffic proper, and traffic passing through the St. Louis gateway increased, and the ferry companies, as well as the terminal railroad companies,, were compelled to expend large sums in increasing their facilities;

The organization and operations of the Terminal Association made it possible to increase greatly the facilities for handling both freight and passengers. Large additions were made to the terminals and business tracks on both sides of the river. Numerous industrial establishments were erected and operated on these tracks, and access to all these establishments was given on equal terms to all of the railroads on either side of the river. The bringing together of all the disjointed and diverse interests under the single management of the Terminal Association resulted in the better handling of traffic, both freight and passenger, and, instead of restraining traffic, did much to stimulate and to facilitate the expeditious handling of it at a low charge;

The builders of the Merchants Bridge were confronted with difficulties of exactly the same character as those which confronted the builders of the Eads Bridge. The bridge alone was useless. The incorporation of companies to construct and operate connecting railroads on either side of the river was ab-

solutely essential. The financial resources of both bridge and connecting railroad companies became wholly exhausted. The bridge and its connecting railroads reached and accommodated territory and industrial establishments on both sides of the river which were not reached by the tracks of the Terminal Association, and a number of the railroads terminating on the east bank of the river could not reach the territory of the Merchants Bridge and its connecting railroads except over the tracks of the Terminal Association. The contract between the Merchants Company and the Terminal Association opened all the territory and industrial establishments reached exclusively by the Merchants Bridge and its connecting railroads to all the railroads on both sides of the river on equal terms, and gave all those industrial establishments unrestricted access to each and all of the railroads on either side of the river, and reduced the charges for handling freight to and from those estblishments;

The acts and doing of the said railroad companies forming the Terminal Association, as fully set forth and explained in this answer, have been and are in all respects lawful, and have not and do not tend in any way whatsoever to the restraint of trade or commerce among the several states or with foreign nations, and have not and do not monopolize, nor constitute an attempt to monopolize, any part of the trade or commerce among the several states or with foreign nations; on the contrary, each and all of the things done by the said railroad companies, as in this answer set forth, have been done for the sole purpose of furnishing those railroad companies with equal facilities for handling expeditiously, and at the least possible charge, all traffic, both freight and passenger, in which the City of St. Louis alone is concerned,

and also all traffic passing through the St. Louis gateway, and the sole result of all the things done as aforesaid, has been to enable all of the railroad companies whose railroads terminated on the east bank of the Mississippi river and in St. Louis, to interchange business across the river with greater promptness and economy, and to deliver and receive passengers at a Union Station in St. Louis, and to deliver and receive freight at numerous points and industrial establishments in St. Louis and on the east bank of the river, which otherwise they could not do;

The railroad companies in thus providing terminal facilities to be used by all on equal terms, have in no wise stifled competition as between themselves in the handling of either passengers or freight, but have simply made it possible for each railroad company to compete without restriction for both freight and passengers in an enlarged territory, made common to all on equal terms, so far as terminal facilities and charges for the use thereof are concerned; and every passenger and shipper or consignee of freight is given equal access to all of the railroads, and the opportunity to freely make selection of the railroad he will use;

Trans-continental traffic passes through various gateways, of which the City of St. Louis is one. Other such gateways are Kansas City, Omaha, Chicago, Minneapolis and St. Paul, Duluth, Memphis and New Orleans. At these gateways, connections are made between eastern and western lines of railway, forming through lines. The trans-continental traffic handled by these through lines is competitive. The facilities afforded by the Terminal Association, and operated with the other terminal properties referred to in the petition, and in the manner herein fully set forth, enables the through lines using the City of St. Louis

as their gateway, to compete with other through lines, using other gateways. The necessity of the use, in common, by railway lines converging at a river point of bridges at such points has been repeatedly recognized in acts of Congress authorizng the construction and operation of bridges by any number of railway companies in common, as the Eads Bridge and Merchants Bridge at St. Louis are operated in the manner stated herein. This use in common of the river crossings at St. Louis, and terminal facilities connected therewith, creates a competitive gateway for a number of lines of railway, and thus inures directly to the benefit of all shippers, in that it increases the number of competing railway lines;

The individual defendants named in the petition as holding each two shares of stock in the Terminal Association became such holders for the purposes only, and at the times, as follows: A. A. Allen, representing Missouri, Kansas & Texas Railway Company, March 24, 1903; S. M. Felton, representing Chicago & Alton Railway Company, March 24, 1903; A. J. Davidson, representing St. Louis & San Francisco Railroad Company, April 27, 1904; W. M. Greene, representing Baltimore & Ohio Southwestern Railroad Company, May 14, 1903; T. J. Harahan, representing Illinois Central Railroad Company, March 24, 1903; C. S. Clarke, representing St. Louis, Iron Mountain & Southern Railway Company, January 4, 1905; Benjamin McKeen, representing Vandalia Railroad Company, December 10, 1903; George E. Evans, representing Louisville & Nashville Railroad Company, January 4, 1905; C. E. Schaff, representing Cleveland, Cincinnati, Chicago & St. Louis Railway Company, May 4, 1903, T. C. Powell, representing Southern Railway Company, April 26, 1905; A. G. Cochran, re-

presenting Missouri Pacific Railway Company, June 22, 1904; the defendants W. S. McChesney, Jr., and Julius S. Walsh became the holders each of two shares of stock in the Terminal Association, respectively, March, 1903, and June, 1894, to qualify them as officials of the Terminal Association, and defendants V. W. Fisher and S. D. Webster are holders each of two shares of stock in the Terminal Association to qualify them as inspectors of its elections; H. C. Nutt, not named in the petition, became the holder of two shares of stock in the Terminal Association in October, 1905, as representing the Chicago, Burlington & Quincy Railroad Company; Henry Miller, not named in the petition, became the holder of two shares of stock in the Terminal Association in October, 1905, as representing the Wabash Railroad Company, and H. V. Mudge, not named in the petition, became the holder of two shares of stock in the Terminal Association in October, 1905, as representing the Chicago, Rock Island & Pacific Railway Company; the individuals named have no interest in any of the defendant companies named other than as just stated;

Deny all and all manner of unlawful combination and confederacy in the petition charged, without this, that there is any other matter, cause or thing in the petition contained, material or necessary to make answer unto and not herein and hereby well and sufficiently answered, confessed, traversed and avoided or denied, is true to the knowledge or belief of defendants;

All of which matters and things defendants are ready and willing to aver, maintain and prove, as this honorable court shall direct; and pray to be hence dismissed with their reasonable costs and charges in this behalf most wrongfully sustained.

COMPLAINANT'S TESTIMONY.

Complainant produced 121 witnesses; the defendants produced one, whose direct examination covers 40 pages, and cross-examination over 300 pages.

Of the complainant's witnesses, twenty, chiefly shippers in St. Louis, testified as to delays in the service furnished by the Terminal Association. The names of these witnesses and the pages upon which their testimony may be found, are as follows:

Brachvogel, pp. 648-650; Clausen, pp. 332-335; Cramer, pp. 339-341; Field, pp. 569-570; Friedman, pp. 408-411; Haueisen, pp. 561-563; Henneberger, 422-429; 434-435; Hilliard, pp. 589-598; Hoffman, pp. 536-537; Lederer, pp. 645-648; McClure, pp. 459-470; McConnell, pp. 444-445; Millard, pp. 335-338; Orvis, pp. 222-223; Pommer, p. 470; Pullen, pp. 413-417; Rand pp. 668-670; Schopp, pp. 598-601; Stewart, pp. 610-619; Wulfing, pp. 344-363.

The testimony of these witnesses tended to show delays, more or less frequent, in handling freight cars across the river. We consider this testimony wholly irrelevant, but for the purposes of this cause we will concede that this testimony tended to show delays and, at times, unsatisfactory service.

Eleven witnesses testified as to preference, upon the part of certain shippers, for team service to railway service for the river crossing, and in some cases, dissatisfaction with team service. The names of these witness, and the pages upon which their testimony may be found, are as follows:

Baker, pp. 471-472, who was dissatisfied with the drayage charges of the St. Louis Transfer Company; Blankenmeister, pp. 229-236, who preferred team service to railway service for fruit jars, and who had

trouble with the Southern Railway Company over delayed shipment; Hermann, pp. 342-344, who preferred team service for groceries; Hornby, pp. 417-422, who had like preference; Knippenberg, pp. 236-237, who was of like mind and who thought the railway charges were enormous; Landau, pp. 438-444, who used team service; Linn, pp. 629-631, who found wagon service better for heavy steel safes; McCabe, pp. 551-552, a carriage dealer, whose goods were too bulky for shipment by train; Ross, pp. 429-434, who preferred teams; Schlapp, pp. 411-412, who preferred teams to railway service for groceries, and Stern, pp. 491-492, who employed teams.

According to the testimony of these witnesses, transportation over the river by wagon service was preferable to that of railway service, the reasons varying in cases, depending at times upon the location of the industry and at other times upon the character of the goods. We concede, for the purposes of this cause, though foreign to any issue, that, in certain cases, and in all cases if the complainant desires the concession, team service may be preferable to railway service.

Six merchants residing at points in Illinois testified that, although located nearer St. Louis than to Chicago, in most cases, quicker railway service was had from Chicago than from St. Louis. The names of these witnesses, and the pages upon which their testimony may be found, are as follows:

Cain, pp. 437-438; Haines, pp. 436-437; Hopper, pp. 435-436; Lehne, pp. 534-536; Madden, pp. 328-332, and Ward, pp. 494-504.

We fail to see the relevancy of this testimony, but concede that these witness did receive quicker service from Chicago than from St. Louis.

Six other witnesses testified as to the purchase of

a bridge across the Mississippi river near Alton, Illinois, known as the "Alton Bridge." The names of these witnesses, and the pages upon which their testimony may be found, are as follows:

Ball, pp. 643-645; 666-667; Davidson, pp. 637-643; Gray, pp. 698-710; Lowden, pp. 570-577; 671-672; Miller, pp. 275 278; 285-286; Whitaker, pp. 2448-2450.

It appears, from the testimony of these witnesses, that the Alton Bridge is owned by the Illinois & Missouri Belt & Railway Company, the stock of which is owned by eleven railway companies, namely, Rock Island; Frisco; Missouri Pacific; Iron Mountain; Missouri, Kansas & Texas; Wabash; Vandalia; B. & O. Southwestern; Louisville & Nashville; Big Four and Chicago, Peoria & St. Louis; that ten of these railway companies are members of the Terminal Association, and one is not, and four of the proprietary lines of the Terminal Association have no interest in the Alton Bridge; that the purpose of the acquisition of the Alton Bridge was to furnish a river crossing for freight which might conveniently take that route; and that there was no connection, present or contemplated, between the operation of the Alton Bridge and the bridges at St. Louis.

We fail to see any connection between the ownership of the Alton Bridge and the issues in this cause. No reference is made to the Alton Bridge in the pleadings, and the testimony shows that its ownership and operation have no possible bearing upon this cause.

Two witnesses testified with reference to a rumored understanding between the Wiggins Ferry Company, the Merchants Company and the Terminal Association, as to maintenance of rates or division of tonnage, in 1891. These witnesses, and the pages

upon which their testimony may be found, are as follows:

Baulch, pp. 123-138; 568-569, and Webster, pp 102-103.

It would appear, from the testimony of one of these witnesses, that, when the Eads Bridge was in the hands of a receiver appointed by the Federal Court, the earnings of this brodge, under order of that court, were pooled with the earnings of the Wiggins Ferry Company, and that later, in 1891, there was some understanding between the Terminal Association, the Wiggins Ferry Company and the Merchants Company as to division of tonnage. Just what the understanding was does not appear. Another witness, Mr. Scullin, testified that whatever the understanding was it was not adhered to.

By far the greater part of the record is devoted to the proceedings of the St. Louis Coal Traffic Bureau; St. Louis Eastbound Freight Committee; St. Louis-Cincinnati-Louisville Freight Committee; St. Louis and Belleville Committee, and various, divers and sundry other freight committees. Eleven witnesses testified as to the membership in these various associations and their proceedings. The names of these witnesses, and the pages upon which their testimony may be found, are as follows:

Denyven, p. 2519; Fitzgerald, pp. 619-624, and 2518; Fraser, pp. 164-177; 554-559; 689-692; 702-705, and 1294; Frink, pp. 1285-1294; Hart, pp. 659-662 and 2517-2518; Harwood, pp. 268-275; Haynes, pp. 678-682; Peachy, pp. 2519-2520; Powell, pp. 663-666; Taylor, pp. 652-659; 2294-2300, Voorhis, pp. 177-178.

From the testimony of these witnesses, it appears that there was an existence at the time of the institution of this suit, and for many years prior thereto, and there still exists, a number of associations composed

of the representatives of various railway lines, formed for the purpose of classifying freight and dividing up the United States into different territories for the purpose of determining and regulating the rates between different points. Among these associations, referred to in the record, are the Belleville and St. Louis Traffic Bureau; Central Car Service Association; Central Freight Association; Chicago and Ohio River Committee; St. Louis Coal Traffic Bureau; St. Louis-Cincinnati-Louisville Freight Committee; St. Louis Eastbound Freight Committee; Southern Freight Association; St. Louis Coal Traffic Association, and, possibly, others. Much of the record is devoted to the proceedings of these associations and correspondence between their officials. The purpose of this testimony, we presume, was to show that freight rates between many competitive points in the United States are made and fixed by these various associations. Of some of these associations many of the Proprietary Lines of the Terminal Association were members; many other members were not proprietary lines. Of two of these associations the Terminal Association was a member. Whether this evidence does or does not establish the fact that freight rates between competitive points are fixed by competing lines, it has no possible bearing upon any phase of this cause.

Six witness testified as to certain Mississippi river ferries operated by the Missouri Pacific Railway Company at Robert avenue, in St. Louis, and at what is known as Ivory Station. The names of these witnesses, and the pages upon which their testimony may be found, are as follows:

Bland, pp. 2317-2323; Campbell, pp. 2303-2308, and 2350; Creveling, pp. 2308-2313; Ferguson, pp. 2313-

2316; Schuyler, pp. 2325-2330; 2334-2339; 2502-2506; 2520-2527; Stevens, pp. 2330-2334.

This testimony tended to show that the Missouri Pacific Railway Company, or the St. Louis, Iron Mountain & Southern Railway Company, has at times operated ferries across the Missippi river with inclines on the west bank, at Robert avenue, in St. Louis, and at Ivory Station, near the extreme southern limits of the city, in connection with either the East St. Louis & Carondelet Railway Company or with the Belt Line of the Southern Railway Company, in the City of East St. Louis and in St. Clair County, Illinois. For the purposes of this cause, it may be conyears these ferries were so operated, thus furnishing separate methods of river transfer for certain classes of freight crossing the river and handled by the Mishouri Pacific and Iron Mountain, on the west, and some of the railways on the east.

Two witnesses, Buente (pp. 489-490) and Kahle (pp. 490-491), residents of Granite City, Illinois, testified that they occasionally received small parcels of package freight shipped from St. Louis to them by the Merchants Company. For the purposes of this cause, although not pertinent or material, it is conceded that such deliveries of freight were made.

Five witness testified as to the purchase and ownership of the stock of the Wiggins Ferry Company. The names of these witnesses, and the pages upon which their testimony may be found, are as follows:

Jones, pp. 138-145; Ramsey, pp. 242-268; 279-294; 374-408; Scullin, pp. 74-102; 547-549; 674-676; 2300-2302; Wade, pp. 367-374; Walsh, pp. 472-488; 492-512; 2273-2283; 2383-2401.

The answer sets forth fully all the facts as to the Wiggins Company: the ownership by thirteen of the proprietary lines of the Terminal Association, and

by the Pennsylvania Company, not a member, of all the stock of the Wiggins Ferry Company, the pledging of that stock by the owners, with the trustees in the general mortgage of the Terminal Association, as security for the bonds, and as a guaranty of the obligation of the proprietary lines to use, in perpetuity, the properties of the Association, and to make good any default in revenue sufficient to meet fixed charges and operating expenses. These facts are shown by the following witnesses:

Mr. Breckenridge Jones (pp. 138-145) testified that in 1902, as an officer of the Mississippi Valley Trust Company, he acted for that Company as agent of the Missouri Pacific, Wabash, Iron Mountain, St. Louis & San Francisco, Big Four, and the Pennslyvania Company in the purchase of stock of the Wiggins Ferry Company; learning that the Ferry stock was on the market he, representing the Trust Company, presented the matter of its purchase to Mr. Ramsey, at that time president of the Wabash, and Mr. Harding, of the Missouri Pacific, with the view of interesting them in the purchase of the Wiggins Ferry stock; that subsequently the other five railroads named became interested, and the Trust Company succeeded in buying something over 5,700 out of 10,000 shares of the Wiggins Ferry stock, which it delivered to the representatives of the seven roads.

Festus J. Wade (pp. 367-374) testified that he is president of the Mercantile Trust Company of St. Louis, which Company was employed by the Chicago, Rock Island & Pacific Railroad Company to purchase was authorized to make the purchase, and in a few days had purchased a controlling interest. Immediately upon authorizing the purchase Mr. Ramsey notified the other interests in the Terminal Associathe stock of the Wiggins Ferry Company, and that

negotiations were opened with Mr. John Scullin, president of the Wiggins Ferry Company, and resulted in the purchase of some thousand shares of stock, which was delivered to and paid for by the Rock Island Company.

Joseph Ramsey, Jr. (pp 242-268) testified that in April 1902, he being then president of the Wabash Railroad Company, and in New York, was advised that a controlling interest in the Wiggins Ferry Company had been purchased; that he at once advised Mr. George Gould that the Missouri Pacific, Wabash and Iron Mountain roads should purchase the Wiggins Ferry stock to prevent its property from passing to the control of a competitor of those companies, and thereupon the Mississippi Valley Trust Company tion, namely,—the Baltimore & Ohio Southwestern, Pennsylvania, Louisville & Nashville, Cleveland, Cincinnati, Chicago & St. Louis and St. Louis & San Francisco Railroad Company, of what he had done and proposed to them to join in the purchase of this stock, each taking an equal interest. The other interests accepted the proposition and became co-purchasers of the stock; the sole object which induced the purchase of this stock was to prevent any one railroad from obtaining control of the Wiggins Ferry property and putting that road in a position to exclude other lines from the use of its properties and access to the industries located on or adjacent to the Wiggins Ferry properties; no objection was had to the admission of the Rock Island, but the objection was to the Rock Island, or any other company, securing control of valuable terminals which had been heretofore open to all lines, and shutting out other lines from the use of these terminals; the object of the purchase being to make the terminals of the Wiggins Ferry Company open on exactly the same terms

to outside companies as well as the members of the Terminal Association. Immediately upon securing control of the Wiggins Ferry stock the proposition was made to the Rock Island to become a member of the Terminal Association and share with the other members in the purchase of the Wiggins Ferry stock, which proposition was accepted. The only argument witness used with the other lines was that the Wiggins Ferry property should be kept open for the use of all railroads reaching St. Louis, and should not be kept open for only the Wabash or the Missouri Pacific, and that no one railroad should have control of the Wiggins Ferry property; that so long as the Wiggins Ferry terminals were open to all railroads no railroads desired to purchase, and its purchase became desirable only when one road was about to acquire the property and exclude all others.

Mr. Walsh (p. 481) testified that the stock of the Wiggins Ferry Company is owned in equal parts by all of the Proprietary Lines other than the Vandalia, and by the Pennsylvania Company, and all of the stock was deposited as security under the general mortgage of the Terminal Association.

Six witnesses testified as to passenger rates throughout the country and as to various passenger associations formed for the purpose of dealing with such rates; the pages of the record on which this testimony is found and the names of the witnesses are:

Chesbrough, (pp. 2450-2457) who explains the rates between New York and St. Louis, and St. Louis and New York, over the Vandalia road; Hannegan (pp. 2490-2495 and 2529-2538), testified that he was chairman of the Southwestern Excursion Bureau, validating agent of the St. Louis Association of General Passenger Agents, and secretary of the St. Louis

Local Bureau of the Western Passenger Association, and explained the functions of these associations; Hilton (pp 2474-2480), testified also as to the associations of passenger agents ;Lusk, (pp. 2515-2517) testified that the Diamond Jo line, a steamboat line operating between St. Louis and St. Paul, is a member of one of the passenger associations; Payne (pp. 2480-2487 and 2513-2514) testified as to passenger agents association; Townsend (pp. 2495-2502 and 2507-2513) testified with reference to the various passenger agents associations.

This testimony tended to show that there was an understanding between the various railways of the country as to fixing of passenger rates; but this is foreign to any issue in the case.

David R. Francis (pp. 34-69) testified as to his connection with the Merchants Company and the St. Louis Merchants Bridge Company, as to the purchase by the Terminal Association of stock of the Merchants Company, and the ownership by the Merchants Company of all the stock of the Merchants Bridge Company; that in 1893 these companies found themselves unable to pay interest on their bonds and unable to obtain loans for this purpose; that while in this position on offer was made, which he supposed came from the Burlington Railroad, for purchase of stock of the Merchants Company, which witness entertained, as the company was financially embarrassed and a receivership was imminent, which might have proven disastrous to the business interests of St. Louis; accordingly, a sale was made.

These are substantially the facts as stated in the answer.

So far we have endeavored to classify the witnesses with reference to the nature and purport of their

testimony. A number of other witness were introduced, testifying to other matters as follows:

Boehmer (pp. 2503-2507), that he paid regular rates on his coal shipments.

Burr (pp. 237-240), change in coal rates over the Illinois Central.

Carr (pp. 2292-2293), and Dubois (pp. 2283-2292 and 2342-2349), as to controversies between the Consolidated Coal Company and certain railway companies as to overcharges.

Connor (p. 512), moved his plant from St. Louis to Granite City, to get cheaper coal.

Conrades (pp. 631-637), reduction of coal rates.

Couchman (pp. 565-568), cutting of rates by Interstate Car Transfer Company.

Crundon (pp. 362-367), used only the ferry for his trans-river business.

Curtis (pp. 2323-2325 and 2339-2341), furnished statement as to business of Ivory Ferry.

Daley (pp. 240-241), no complaint as to service.

De Figueiredo (pp. 304-326) described the properties and operation of the St. Louis Transfer Company (wagon transfer).

Ehler (p. 223), as to methods of handling freight by teams.

Elliott (pp. 670-671) as to discrimination in coal rates from Illinois points to East St. Louis.

Fisher (pp. 515-520, 672-673 and 2381-2383) as to issue of tickets for Granite City and Madison, Illinois, via Merchants Company.

French (pp. 238-339), an automobile dealer, moved to Peoria, Illinois, because of the rate on automobiles.

Gathright (pp. 2446-2447), furnished statement as to business of the Wiggins Ferry.

Grosclose (pp. 587-589), that the Missouri, Kansas & Texas Railway Company had a special arrange-

ment at one time with the Interstate Car Transfer Company as to rates.

Handelman (pp. 564-565), that some unknown man representing some railroad that he could not remember, solicited business for the St. Louis Transfer Company.

Harris (pp. 676-677) as to a twenty per cent. per ton rate on coal.

Hendricks (pp. 520-523), as to an agreement made in 1881 between the Wiggins Ferry Company and the St. Louis Transfer Company as to rates for ferry service.

Heuer (pp. 577-584), as to servants and officers who were common to the Merchants Company and Terminal Association.

Ives (pp. 2469-2474), as to absorption of switching charges.

Johnson (pp. 2401-2406), explained the methods of keeping freight accounts.

Lockwood (pp. 552-553) had no knowledge as to rates.

McEwing (pp. 526-530) perferred Illinois to St. Louis as a location for a brick plant.

Nichols (pp. 601-608) gave location of coal mines on Big Four Railroad.

Parks (pp. 2527-2529), interrogated as to division of rates in handling of Government troops.

Peabody (pp. 178-179), had no knowledge with respect to St. Louis Coal Traffic Bureau.

Peachy (pp. 2519-2520) produced coal tariffs of the Illinois Railroad.

Putman (pp. 523-524), made rates for the Wiggins companies to certain wagon transfer companies.

Rhodes (530-531) and Stohlman (532-534) complained of allowances made by certain railroad companies to certain wagon transfer companies.

Roach (pp. 2363-2380) explained the working of the Central Car Servie Association with reference to demurrage charges.

Standard (pp. 513-515) found Alton preferable to St. Louis as a location for a flour mill.

Stith (pp. 624-628), interrogated as to movements of coal from points on the Illinois Central Railroad via Ivory Ferry.

Traxel (pp. 650-651) complained of discriminations by railroad companies in favor of certain wagon transfer companies.

Waddell (pp. 2458-2468) estimated the cost of reproducing the Eads and Merchants Bridges.

The last thirty-eight witnesses named have touched upon thirty-five different matters, not one of which has any connection with the issues in this case. To illustrate:

How are the issues affected by the fact that Boehmer, a coal shipper, paid regular rates; that the Illinois Central had changed its coal rates from certain mines to East. St. Louis; that the Consolidated Coal Company asked certain railroads for a refund of overcharges; that certain shippers preferred small towns in Illinois to St. Louis as desirable locations for manufacturing plants; that at times Interstate Car and Transfer Railway Company departed from its regular tariff rates; that a certain shipper located near the levee used the ferry in preference to bridges, and that another shipper had no complaint to make as to service? What connection has the following,—the manner in which the St. Louis Transfer Railway Company conducted its business; how freight was handled by teams; that there was discrimination in coal rates from points in Illinois to East St. Louis; that passengers were carried on the Merchants Terminal to Granite City; that the tonnage of the Wig-

gins Ferry was a certain amount between certain dates; that some stranger had solicited business for the St. Louis Transfer Company; that the Merchants Company and Terminal Association had in common certain officers; that the Wabash Railroad absorbed certain switching charges; that freight accounts were kept in a certain way; that a certain witness had no knowledge of rates; that coal mines were located at various points on the Big Four Railroad; that certain roads pooled earnings from the transportation and handling of Government troops; or that certain railroad companies made allowances to certain wagon transfer companies; that under the laws of Missouri, railway companies are entitled to make a demurrage charge?

The remaining witnesses for complainant testified to facts as follows:

Kavanaugh (pp. 537-545; 2349-2362, and 2416-2421), testified as to the property and business of the Interstate Car and Transfer Company and the purchase of the stock of that company by the Terminal Association (set forth in the answer); the ownership at one time by the Wiggins Ferry Company of street car franchise in St. Louis; the purchase by the Terminal Association of the St. Louis Belt & Terminal Railway Company and the advantages resulting from such a union of terminals.

McKeen (pp. 2487-2490) testified as to the per car charge by the Merchants Company and the Terminal Association for movement of passenger cars over the bridge.

Morgan (pp. 216-221) testified as to the growth of the commerce of the City of St. Louis.

Penney (pp. 179-215) and 2538-2539) testified that he was both traffic manager of the Terminal Association and commercial agent for the Merchants Com-

pany; that the two companies had the same rates and that freight crossing the river at St. Louis was handled over the route of least resistance; that no connection had existed between the tracks of the Terminal Association and Merchants Company prior to the purchase by the Terminal Association of the stock of the Merchants Company; that these companies had no shipping points in common; that about 7,000 freight cars were handled daily; as ti the advantages resulting from the union of terminals; and as to general reduction in freight charges.

Pitzman (pp. 16-18, 21-34, and 69-74) described a map which he prepared showing the location of the different terminal properties, the termini of the various railroads in St. Louis and East St. Louis, their connections with the terminal properties and the dates of organization of the different terminal companies.

Sands (pp. 145-164) testified that during his connection with the Wiggins Ferry Company it usually met the rates fixed by the Terminal Association; that there was no agreement as to rates or any physical connection between the properties of the Terminal Association and the Wiggins Ferry Company, and that the three main terminal companies served different business districts.

Sarber (pp. 445-459) testified that in the interests of certain labor organizations the Merchants Terminal operated passenger trains from St. Louis to Granite City for the use and accomodation of employes of industries at Granite City.

Vinnedge (pp. 2421-2445) auditor of the Terminal Association produced a number of statements called for by complainant giving the earnings of the various Terminal Companies, proceeds of bond sales, commissions on such sales and disbursements.

Walsh (pp. 472-488; 492-512; 2273-2283, and 2383-2401), chairman of the Board of Directors of the Terminal Association and Mississippi Valley Trust Company, testified as to the various leases and operations of the Terminal properties from inception; as to the agreement of Mr. Gould, set forth in the answer, as to the ownership of the Ferry stock, as stated in the answer, and described the properties of the Wiggins Ferry Company and of two belt lines,—The St. Louis Terminal Railway Company and the St. Louis Belt & Terminal Railway Company; the operation of the Union Station; the bond issue of the Terminal Association; the ownership of stock of the Merchants Company; purchase of the East St. Louis & Carondelet Railway Company, the admission of the Proprietary Lines and the purchase of the Interstate Car & Transfer Company.

Joseph Ramsey, Jr., abstract of whose testimony is given above with respect to the purchase of the Wiggins Ferry stock, testified with respect to other matters, as follows:

Mr. Ramsey came to St. Louis in 1893, to accept the position of General Manager of the Terminal Association,—having represented the Big Four in the Terminal Association since 1890,—and continued his connection with the Terminal Association until December, 1895, when he became General Manager and Vice President of the Wabash road, which position he held for ten years.

When Mr. Ramsey came to St. Louis, in 1893, the properties of the Terminal Association consisted of the East St. Louis properties, lease of the bridge and tunnel, Union Station, and properties in Mill Creek Valley in St. Louis, connecting with railroads in that valley. During Mr. Ramsey's managership the affairs of the Merchants Company were controlled by

its own directors. The Terminal Association acquired stock in the Merchants Company in 1893, and there was no arrangement for controlling rates over the Merchants and Eads Bridges, but the rates were practically the same over the two bridges and also over the Wiggins Ferry, with the exception of some special rates which the Merchants Company had with the Vandalia and Louisville & Nashville. There was no apportionment of tonnage between these three company, although there was a general understanding between them that the tonnage, as handled by the respective companies, should continue in order to prevent cutting of rates and payment of rebates, and returns of the companies were made showing the amount of traffic handled by each, and billing. This arrangement did not continue very long, probably a year or two, and there was no method of enforcing it. The purpose of the arrangement was simply to maintain the open published tariffs. Under this arrangement there was no controlling of traffic—no one of the terminals refused to accept any traffic and each accepted the traffic offered to it. The purpose of the arrangement was to prevent improper or illegal methods.

Mr. Ramsey further testified that when he was connected with the Terminal Association there were six Proprietary Lines, each having an equal interest, but now there were fourteen. When the Terminal Association was organized, in 1889, it was expected that seven roads would come in, of which the Pennsylvania was one, but this road did not come in until later, and the Rock Island, Frisco and Missouri, Kansas & Texas came in, making, with the Pennsylvania, ten Proprietary Lines. Then in 1903 the Burlington, Chicago & Alton, Southern and Illinois Central came in, making the fourteen Proprietary

Companies. That from the very beginning of the Terminal Association all lines had been invited and urged to take an equal interest in the Terminal Association, so that the terminal facilities here would be open to all roads, and not controlled by any one particular road or interest. Such was the plan to be carried out, and Mr. Ramsey had much to do with bringing in the other lines. More roads came in on the east side of the river than on the west,—East St. Louis being the terminus of the Eastern lines. Originally goods were billed over these Eastern lines to East St. Louis and the billing either delivered to the St. Louis Transfer Company or to the shipper who had the option of having his goods delivered in St. Louis either by his own wagons, the wagons of the Transfer Company or by the Terminal Association. On through freight the rates divided on East St. Louis, and the western roads paid the river transfer. As neither the eastern nor the western lines had any direct connection they had to employ a wagon transfer company or transfer the cars to St. Louis by the ferry or one of the bridges, just as roads entering Chicago have to pay a switching road for delivering freight from one to the other.

Mr. Ramsey testified that the properties of the Terminal Companies were operated not as railroads, but simply as switching roads, furnishing terminals and acting as transfer agents, and while similar arrangements are made elsewhere, none were so extensive as at St. Louis. In Chicago the Western Indiana Company, the stock of which is owned by five roads, is operated on exactly the same basis as the Terminal properties at St. Louis. Nowhere else is there such an extensive and general application of the single terminal proposition as at St. Louis, where, through the three terminal companies, any

one road can reach any point, or any industry, in the city on equal terms. In this St. Louis has a decided advantage, so far as the convenience of handling traffic, so far as the shipper being able to control the routing of his traffic by any road he may see fit, and so far as operation of the railroads is concerned. This arrangement results in economy of service, one charge taking the place of half a dozen, the service is better, and competition is greater, all lines have access to each industry. To illustrate: In Pittsburgh, any industry located on the line of the Pennsylvania road may have traffic for St. Louis which it desires to ship by the Baltimore & Ohio,—the Pennsylvania Company offers to take the shipment to St. Louis, but will decline to switch the shipment for the Baltimore & Ohio, or any other road. In St. Louis the shipper can take any road he desires and any road can reach any industry located on the properties of the Terminal Association or the Wiggins Company or the Merchants Company.

With respect to service to outside lines, Mr. Ramsey testified that all the terminals in St. Louis were open to any road, whether a member of the Terminal Association or not, on exactly the same terms and conditions as to rates and usage; that there was no advantage to the owner of stock in the Terminal Association, but a burden on him which the outsider did not bear; the owner guarantees, under certain conditions, the fixed charges of the Terminal Association, while the outsider has no such obligations and yet uses the facilities on the same terms. If he were building a railroad to St. Louis he would not bother about terminals,—he would reach some point within four or five miles of the city and would have access to all the terminals without putting up a

dollar or doing anything more than making connection with one of the terminal properties. All the roads terminating in East St. Louis are members of the Terminal Association except the Chicago, Peoria & St. Louis and Clover Leaf. The business of these two roads is handled on exactly the same terms and conditions as that of the Proprietary Lines; and these two roads have been invited to become members of the Terminal Association. If anything, the outside roads always had a little more interest shown them than was shown to the Proprietary Lines, to induce the outside lines to bring their river transfers to St. Louis. Mr. Ramsey testified that every railroad coming into East St. Louis had its terminus on the east side of the river, while every railroad coming into St. Louis had its terminus on the west, and the lines coming from the north terminated on the north side of the Cities of St. Louis and East St. Louis. and the lines coming from the south terminated on the south side, and that no line entering East St. Louis or St. Louis, from any direction, could form a through line except through a connection furnished by the tracks of one of the terminal companies; but by means of these connections every line coming into St. Louis or East St. Louis is enabled to make a through connection with every other railroad, thus forming a through line, and any new railroad desiring to enter St. Louis and reaching any outlying tracks of the terminal companies, has immediate connection with all other roads and with every industry in East St. Louis or St. Louis; and any industry accessible to any railroad track or railroad terminal in East St. Louis or St. Louis has access, through the properties of the terminal companies with every railroad entering either city. The same is true of passnger, mail and express traffic.

Mr. Ramsey further testified that there had been a continual effort to develop, increase and add to the terminal properties. Additional lands had been bought and new tracks put in, and a passenger station erected at an expense of about $6,000,000. That there had never been any purpose to operate the terminals for profit, the object being to make both ends meet, and in some years the revenue was not sufficient to meet the expenses, the deficit being carried on borrowed money until bonds were sold.

Mr. Ramsey testified that the development of terminals was one of the most important factors in, and must keep pace with, the growth of the City of St. Louis. St. Louis is a growing gateway, the percentage of through traffic increasing more rapidly at St. Louis than anywhere else, and that this increase of traffic can only be met by keeping the terminals open to all railroads.

Mr. Ramsey further testified that the Terminal Association ran no passenger trains, and handled no passengers, on its own account, but merely furnished facilities and transferred the trains of other companies, the railroads furnishing their own trains and cars and the Terminal Association furnishing engines to handle the trains, in some instances, in others the roads themselves operating the trains with their own motive power, using simply the tracks of the Terminal Association. The Merchants Company ran some trains of its own, for workmen living in St. Louis and employed at Granite City.

As to location of facilities, Mr. Ramsey testified that the Terminal Association owns all of the yards, team tracks, warehouses and passenger stations in Mill Creek Valley, except those owned by the Missouri Pacific, Wabash or Frisco, and its terminal properties extend from Manchester Road through

Mill Creek Valley to the tunnel; in addition to these, it has north and west belt lines reaching around and connecting with the railroads west and north of St. Louis; but has no property in the City of St. Louis north of the Eads Bridge; the Wiggins Ferry Company has tracks along the levee and yards in South St. Louis and North St. Louis, reaching connecting lines along the river front, while the Merchants Company has a yard at Gratiot street and an elevated track extending northwardly.

With reference to the reports (introduced in evidence) of the Municipal Bridge & Terminals Commission, Mr. Ramsey verified the growth of the commerce of the city as detailed in these reports, and he concurred in the report of this commission to the effect that the two sides of the river are so interdependent, as to form, in fact, a single traffic and manufacturing district, and that as space in large cities available for factories and terminals becomes more and more limited, and more costly, friction in handling terminal work and duplication should be reduced to the minimum. Referring to these reports, Mr. Ramsey said:

> "I certainly agree with Messrs. Moore and Perkins in the staement that one terminal by itself, a terminal operated by one management, practically, and in the interests of all the railroads, is better for the City of St. Louis, better for the railroad companies, and better for the development and handling of their traffic, than a half dozen independent operations, one covering one portion of the town, and another covering another portion of the town, and so on, requiring a duplication of switching and a duplication of charges. In my opinion, as a railroad man, and without the slightest interest, personally, officially, or otherwise, today, in St. Louis terminals, that is the best sort of terminal fa-

> cilities for the City of St. Louis, open to all, under one general management, with proper charges, and plenty of facilities for the handling of the traffic promptly and rapidly. St. Louis is and will be the greatest gateway between the east and west, and all it requies is proper terminal facilities."

Speaking of the Terminal Association Mr. Ramsey said:

> "The company was really organized, I believe, in December, 1889, or about that time; and I know, from my own direct connection with it, and I think I had considerable to do with the matter from that time on, that the sole object of the railroads interested was to furnish terminal facilities for themselves and all the lines in St. Louis, that would develop, aid and foster their traffic in and around St. Louis; and they could only secure traffic here by treating it properly, furnishing it proper facilities, and by encouraging the movement of traffic through St. Louis from the east and west."

With reference to the operation of the terminal properties, Mr .Ramsey testified that there had never been paid any dividends to the stockholders of the Terminal Association, nor was it contemplated that any dividends would ever be paid. Whatever surplus earnings it may have, if any, goes into the property. The Terminal Association cannot, out of its own earnings, provide for additional facilities and money is being constantly raised through bond issues, guaranteed by the Proprietary Lines. These bonds have been sold to the public, and none of them are held by the Proprietary Lines, which lines pay exactly the same charges as paid by the public for the use of the properties.

As to connection between the properties, Mr. Ram-

sey testified that the Terminal Association and the Merchants Company, segregated, did not reach any common point until the Terminal Association, in 1894, built a connection enabling the Merchants Terminal to reach the Union Station. It would be practically impossible to have two separate, distinct terminal companies in St. Louis and East St. Louis, covering the same territory.

As to the Alton Bridge, Mr. Ramsey testified that this bridge was bought by the Wabash, Missouri Pacific, Iron Mountain, St. Louis & San Francisco, Rock Island, Vandalia, Louisville & Nashville, Baltimore & Ohio Southwestern, Cleveland, Cincinnati, Chicago & St. Louis, Missouri, Kansas & Texas and Chicago, Peoria & St. Louis. This bridge was purchased for the purpose of keeping open a contemplated outside belt or delivery line between the roads on the east and the roads on the west, without having to pass through the St. Louis gateway. When the purchase was made consideration was had of the immense traffic expected by reason of the World's Fair to be held at St. Louis, and it was evident to the roads interested that the traffic through St. Louis was continuing, and would continue, to grow rapidly and it would be necessary ultimately to have an outside belt. The west belt of the Terminal Association was being built and would reach a point within about seven miles of the Alton Bridge, or a connection with that bridge. The distance from West St. Louis to Alton is shorter than through St. Louis and East St. Louis and thence by the east bank of the river. At Alton there are four or five principal roads from the north and east and an outer belt was contemplated from east of East St. Louis to Alton. The Terminal Association has no connection in any manner with the Alton Bridge.

Mr. John Scullin, who testified as to the sale and purchase of the Wiggins Ferry Company stock, also testified with reference to the character of business done by the Terminal Companies, and the advantages of union terminals, as follows:

Neither the East St. Louis Connecting Railway Company nor the St. Louis Transfer Railway Company, subsidiary companies of the Wiggins, operate any trains of their own cars. They provide motive power for cars furnished by the railroads with which they connect,—their business is simply a switching business.

Mr. Scullin further testified that he had been intimately connected with railroads, and the operation of railroads, for many years, and that where two independent railroads connect, and cars are to be delivered by one to the other, the custom is to have a delivery track for the exchange of cars, upon which cars to be delivered are placed to await the convenience of the receiving company, and where, before receiving, the cars must be inspected. Assuming that the Terminal Association had connection with the St. Louis Transfer Railway Company, and a car was to be exchanged between the two companies, the rule of operation would be that notice should be given to the receiving company that the car had been placed upon the delivery track; the receiving company would then inspect the car, and if in good order, receive it and deliver it to its connection. The Terminal Companies are switching lines, doing no general railroad business in the way of offering cars for service and handling trains, but are common carriers of the railroads entering St. Louis and East St. Louis. These Terminal Companies, being under one management can be much more conveniently and economically,—as far as service to the public is concerned,—conduct-

ed than if they were disconnected into a dozen different lines. Under consolidated operation a car moves from any point on one system to any point on the other system without change of motive power or car inspection.

As to the properties of the Wiggins Ferry Company, Mr. Scullin testified that it owns a large amount of property on the river bank in East St. Louis on what is known as the levee, where property is useful only for terminal purposes and railroad property, but which has not yet been developed to its full capacity. Terminal property of this character is very scarce in St. Louis and East St. Louis. Commercially speaking, East St. Louis and St. Louis are one town, as they constitute, for commercial purposes, one common center; the amount of traffic between East St. Louis and St. Louis,—that is originating in either city and destined to the other,—is comparatively small and insignificant; the great bulk of business between the two towns is that which originates abroad and goes through one of the two places.

The west bank of the Mississippi river at St. Louis is high and not accessible, except at certain points, for railroad tracks; the chief avenue for traffic is either around the city, as shown by the belt line on the Pitzman map, or by the Mill Creek Valley to Union Station. The St. Louis Transfer Railway Company had no track connection with any of the tracks of the Terminal Association, to which it made deliveries by way of the Iron Mountain. The same is true with reference to the tracks of the Merchants Company. From his long experience as a railroad man, and familiarity with traffic conditions, witness was of the decided opinion that the placing of all the terminal lines under one management and control

would be in the interest of economy and public service, and the growth of commerce and business in St. Louis has made such a union almost imperative.

W. K. Kavanaugh testified that the placing of the terminal tracks under one control would be beneficial to all concerned because avoiding delays, facilitating transfer and making more economical service.

EXHIBITS.

Volume I of "Exhibits" contains only matters relating to Traffic and Freight Bureaus and Committees, not relating, it seems to us, in any manner, to this case.

Volume II of "Exhibits" contains additional matters relating to such Bureaus and Committees and articles of incorporation of the various Terminal and Bridge Companies, increase of capital stock and change in name of some of these companies, and of consolidation of two of them; agreements between the Merchants and Terminal Companies; admission agreements of various Proprietary Companies; leases of the two Bridges; agreement of 1889 for reorganization of terminals; guaranty agreement of the Proprietary Companies; and, freight tariffs of various railroads; location of coal mines in Illinois on certain railroads, the pertinency of which is not manifest to us.

Volume IV of the "Exhibits" contains additional freight tariffs of various railroads; statements as to receipts and expenditures of the various Terminal Companies, and sundry matters relating to the Alton Bridge, none of which we consider material or relevant; also,

Articles of incorporation of other companies; acts of Congress; record of case of State of Missouri *ex Informatione* E. C. Crow, Attorney General, vs. Terminal Railroad Association of St. Louis; admission agreement of certain other Proprietary Companies and supplemental agreement between all Proprietary Companies and the Terminal Association; and corporate history of the various Terminal Companies.

Volume V of "Exhibits" (supplemental volume) contains the general mortgage of the Terminal Railroad Association of St. Louis; reports of the Municipal Bridge & Terminal Commission to the Municipal Assembly of St. Louis and Classification of the Illinois Railroad & Warehouse Commission.

Extracts from Articles of Association of Various Terminal Companies.

East St. Louis Connecting Railway Company:

> "This corporation is organized for the purpose of constructing and operating a single or double track railroad in the State of Illinois, from Venice, in Madison County, to the Illinois & St. Louis Railroad Company's tracks in St. Clair County, Illinois, with lateral tracks connecting the main track with various railroad depots, elevators, mills, warehouses, stockyards and numerous transfer tracks and landings between said points that are now or may hereafter be constructed."

Interstate Car & Transfer Company:

> "With the view of engaging in the dredging and sand digging business, and the ownership and use of boats connected therewith, and transfer of cars of freight in carload lots upon said

119

boats on the Mississippi river and its tributaries."

Madison, Illinois & St. Louis Railway Company:

"To construct a railway from the eastern approach of the bridge to be constructed by the St. Louis Merchants Bridge Company, thence through Madison County to the City of East St. Louis, in St. Clair County, all in the State of Illinois."

St. Louis Belt & Terminal Railway Company:

"To construct and operate a railroad for public use for conveyance of persons and property from a point on the west bank of the Mississippi river, in Carondelet Township, St. Louis County, Missouri, thence to a point on the right-of-way of the St. Louis & San Francisco Railroad Company at or near intersection with the dividing line of the City and County of St. Louis, thence west to Clayton court house, thence to a point on the west bank of the Mississippi river between Chain of Rocks and Eads Bridge, and also to construct and operate tracks, switches and sidetracks from points on its main line to points in the City and County of St. Louis, stations, warehouses, yards, depots and manufacturing establishments in the city and county, to connect with other railroads now or hereafter constructed in the city or county, and for the purpose of providing complete and convenient terminal railroad facilities, in connection with other accommodations in said city and county for all railroads now entering or which may hereafter be constructed in said city or county, and all individuals and corporations doing business with such railroads."

St. Louis Merchants Bridge Terminal Railway Company:

"For the purpose of constructing, maintaining and operating a standard gauge railroad within the corporate limits of the City of St. Louis, State of Missouri."

St. Louis Terminal Railway Company:

"Organized for the purpose of constructing and operating a standard-gauge railroad beginning at intersection of McKissock and Grand avenues, in St. Louis, thence westerly or northwesterly in the County of St. Louis, thence southwardly or southwesterly to a point near Ivory Station on the St. Louis, Iron Mountain & Southern Railway Company, in the County of St. Louis; also beginning at McKissock and Grand avenues, thence eastwardly to a point on the northern boundary of the City of St. Louis near the Chain of Rocks, thence through the County of St. Louis to a point on the north bank of the Missouri river in the County of St. Charles, between the City of St. Charles and the mouth of the Missouri river."

St. Louis Transfer Railway Company:

"To construct and operate a railroad in the City of St. Louis from Arsenal street northwardly, parallel with the Mississippi river, to Calvary avenue, with a branch to a point on Bellefontaine road."

Terminal Railroad of St. Louis:

"To construct and operate a railroad with tracks and termini in St. Louis from the Union Railway & Transit Company, Union Depot Company, Tunnel Railroad of St. Louis, St. Louis, Wabash & Pacific , Missouri Pacific, St. Louis, Iron Mountain & Southern and any other railroad company entering or to enter said city, and yards, depots, and sidetracks, now existing or to be provided in said city, in connection with other railroads constructed or to be constructed,

as has been found necessary or convenient, and such factories or other establishments as may need connections, the general object and purpose being to provide the most ample and convenient connections, accommodations and terminal facilities in St. Louis to all railroads now entering or hereafter to enter the same, and all individuals and companies doing business with said railroads."

Union Depot Company of St. Louis:

"To construct, establish and maintain a Union Station and depot for passengers, and freight, together or separately in the same or different localities in St. Louis, in the City of St. Louis and County of St. Louis; acquire the necessary ground, erect buildings, and lay necessary tracks and make arrangements with railroad, tunnel, bridge and other companies for track connections."

Tunnel Railroad of St. Louis:

"To construct and operate a railroad from the west approach of, or from the west end, of Eads Bridge, to a point near Poplar street and the western limits of the city and make suitable connection with tracks of the Union Depot Company, Missouri Pacific, St. Louis, Iron Mountain & Southern, and other railroads having termini in St. Louis, together with necessary sidetracks."

Extracts from Agreements.

Agreement of October 1, 1889, between Jay Gould, as first party, and Missouri Pacific Ry. Co., St. Louis, Iron Mountain & Southern Ry. Co., Wabash Railroad Company, Cleveland, Cincinnati, Chicago & St.

Louis Ry. Co., Ohio & Mississippi Railroad Company, and Louisville & Nashville Railroad Co., as second parties, reciting the terminal facilities of the Union Depot Company, Union Railway & Transit Company, of St. Louis and East St. Louis, and Terminal Association of St. Louis and East St. Louis, the operation of the properties of the Union Depot Company by the parties of the second part, lease of the properties of the two Union Railway & Transit Companies, and the two Terminal Railroads to the Bridge and Tunnel Companies, lease of the properties of the Bridge and Tunnel Companies to the Missouri Pacific Railway Company, and Wabash Railroad Company, and the desire of the parties of the second part to obtain control of the properties of the Bridge and Tunnel Companies and Union Depot Company, and of the two Transit and Terminal Companies, for the purpose of enlarging and making a more perfect system of receiving, transferring and interchanging passenger and freight traffic at St. Louis and East St. Louis;

Reciting, further, Mr. Gould's control of the corporate action of the Union Depot Company, the two Transit and two Terminal railroads and his desire to exercise such corporate control in furtherance of the plan of securing an efficient and economical system for handling freight and passenger traffic at St. Louis and East St. Louis; and the undertaking on the part of Mr. Gould, to consolidate the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis, thus forming the Terminal Railroad Association of St. Louis; to increase the capital stock of this company to an amount sufficient to authorize the issue of $7,000,000 of bonds, causing the consolidated company to purchase the property of the Union Depot Company with the capital stock of the Transit Company and Terminal Railroad of St.

Louis, and causing the Consolidated Company to procure an assignment of the lease of the Bridge and Tunnel properties and paying therefor $5,000,000 of the $7,000,000 of bonds issued, the remaining $2,000,000 to be expended for additional passenger and freight facilities;

An agreement on the part of Mr. Gould to cause the capital stock of the Terminal Railroad of St. Louis, to the extent of $1,500,000 to be transferred in equal portions to the parties fo the second part on the execution of agreement between them and the Terminal Railroad Association providing for their admission to general use of the terminal facilities of that company; the ownership of the stock to be inseparably associated with the railroads receiving the same.

Agreement between the Terminal Railroad Association of St. Louis and the proprietary companies named in the above agreement, being Exhibit A to said agreement of October 1, 1889, whereby:

The Terminal Association awards to each of the proprietary companies the right of joint use with each other, and such other companies as may be admitted as proprietary companies, of all the terminal facilities of the Terminal Association then held or thereafter acquired in St. Louis or East St. Louis, for passenger and freight business and interchange between each other and the public;

An agreement on the part of the Terminal Association to erect a New Union Passenger Station, freight stations, additional main and sidetracks, where necessary to perform promptly and efficiently the work of receiving, delivering and transferring passenger and freight traffic for the proprietary companies and other railroad companies which may thereafter become members, and an agreement on the

part of the proprietary companies to accept such joint use and agreeing to forever use the properties of the Terminal Company for all passenger and freight traffic within their control crossing the river at St. Louis:

The charges of the Terminal Association shall be sufficient to pay the rental of the Bridge and Tunnel properties, interest on the bonds of the Terminal Association, dividends on bonds or preferred stock not contemplated, but which may be necessary to be issued for extensions and betterments, taxes, insurance and expense of maintenance and operation, repair and renewal, and the expense of maintaining the corporate existence of the Terminal Association:

Agreement that, as the revenues are to be applied to paying the fixed charges, operating expenses and maintenance, rates shall be so regulated as to meet these charges, the proprietary lines may not be called upon to contribute unless, by reason of temporary unforseen circumstances there should be a deficit. In such case each proprietary line shall pay its proportion of such deficit:

Providing for the admission, from time to time, of other railroads.

Agreement of February 13th, 1902, admitting the Vandalia Company to membership in the Terminal Association, upon the same terms and conditions specified in the above mentioned agreement of October 1st, 1889.

Agreement of June 9th, 1902, admitting the St. Louis & San Francisco Railroad Company to membership in the Terminal Railroad Association on the same terms and conditions as the original proprietary lines were admitted.

Agreement of December 16th, 1902, admitting the

Chicago, Rock Island & Pacific Railway Co. to membership in the Terminal Association, upon like terms.

Agreement of December 16th, 1902, admitting the Southern Railway Company, Illinois Central Railroad Co., Chicago & Alton Ry. Co., Chicago, Burlington & Quincy Railway Co. and Missouri, Kansas & Texas Railway Co. to membership in the Terminal Association upon the same terms and conditions as the original proprietary lines were admitted.

Supplemental Agreement between the Terminal Association and proprietary lines giving the proprietary lines the right to use their own facilities for interchanging traffic with the Terminal Association and requiring the Terminal Association to accept the traffic offered to it at any point and handle the same with promptness and dispatch at points of interchange, and providing that there shall be no difference in river transfer, whether by bridge or by ferry, giving the Terminal Association the right to operate ferry facilities and, upon its failures so to do, the right of the proprietary lines to operate such ferry facilities, and the right to exclude any proprietary line from enjoyment of the terminal facilities in the event of default on its part in compliance with the admission agreemnt.

Agreement between the proprietary lines and the trustees of the general mortgage of Decembr 16th, 1902, of the Terminal Association, reciting the original agreement of October 1st, 1889, so fixing the rates of the Terminal Association as to produce revenue to pay its fixed charges, operation and maintenance, waiving the limitations upon the amount which each proprietary company might be called upon to pay to make up any deficit in earnings of the Terminal Association, to meet such charges, and, further, binding

the proprietary lines to forever use the properties of the Terminal Association for freight and passenger traffic controlled by them, and to pay for services rendered at rates sufficient to enable the Terminal Association to meet its fixed charges and operating expenses, and guaranteeing the interest upon the general mortgage bonds of the Terminal Association, and, as security for these obligations transferring and delivering to the trustees 9,500 shares of the capital stock of the Wiggins Ferry Company and all additional shares of stock of such company which might thereafter be acquired by the proprietary lines.

DEFENDANT'S TESTIMONY.

Mr. Albert T. Perkins, the only witness produced by defendants, testified that he had been a resident of St. Louis something over twelve years, and was familiar with the topography of St. Louis and vicinity. That he was the adviser of the Municipal Bridge and Terminals Commission of the City of St. Louis, a body created by ordinance, composed of nine members consisting of the Mayor of St. Louis, the President of the Board of Public Improvements and seven citizens, appointed by the Mayor, to examine into bridge and terminal conditions at St. Louis and advise what part the citizens and what part the city should take in correcting any hindrance to the commerce of St. Louis that might be found to arise from bridge and terminal conditions, and recommend necessary legislation in regard thereto. That he and Mr. Robert Moore were advisers to the Commission,

and after their appointment took up the matter of freight charges, and conditions surrounding the billing, receipt and delivery of freight, as affected by the bridge and terminal conditions, and the physical development of those terminals, and, in connection with the latter question, made a thorough investigation of St. Louis terminal conditions, and visited and examined the largest terminals in the United States, and their facilities; and witness made a trip alone over a number of the principal European terminals.

Mr. Perkins defined "terminals" as the tracks, warehouse and railroad facilities by means of which railroad companies interchange or transact their business with each other, in the way of collecting and distributing freight, and in connection with which they make up and distribute freight and passenger trains; and all facilities by which traffic is received and discharged in what may be properly called the "commercial district" of the city.

Mr. Perkins further testified that he was familiar with what is commonly called the Terminal Railroad Association of St. Louis System, the St. Louis Merchants Bridge Terminal Railway System and the Wiggins Ferry System, all of which he included in the term "St. Louis Terminals." He outlined the system of the Merchants Company as including the Merchants Bridge, starting with the bridge, on the west side, a small yard at Bremen avenue and connection with the Chicago, Burlington & Quincy Railroad, and the double tracks on Hall street and a portion of Main, and by elevated railroad to the Mill Creek Valley; and connecting also with a belt line around the west part of the city. That he would regard St. Louis and East St. Louis and manufacturing towns north of East St. Louis, as one commercial

manufacturing district, which necessarily must be treated as a whole. Business is transacted in such an interchangeable way that it is impossible to separate, as a terminal proposition, the two sides of the river.

Mr. Perkins described the terminals of the Merchants System in East St. Louis as consisting of a belt line connecting the several railroad lines in the north part of East St. Louis, Granite City and Madison with a line down to the stock yards and a line connecting with the East St. Louis Belt Line of the St. Louis Terminal Railroad Association; the System of the Terminal Association, on the west, as, the Eads Bridge and Tunnel, extending from the bridge to Eighth street and the Mill Creek Valley, the Union Passenger Station, between 18th and 20th streets, freight stations between 10th and 12th streets, south of Clark avenue, and yards of various kinds for team and track purposes, switching cars, teams, storage, etc., between 12th street and Compton avenue, in the Mill Creek Valley, and a belt line now under course of construction, and partially completed, around the west side of the city, from a point a short distance south of Clayton, to a connection with the Merchants Company; on the east side, as the Illinois Transfer Railway Company and the East St. Louis & Carondelet Railway Company, various connections with east side railroads and with the Relay Station in East St. Louis, machine shops, round houses, car repair yards and connection with the National Stock Yards; the Wiggins Ferry System as comprising transfer boats, inclines on both banks of the river, and on the west, the St. Louis Transfer Company, extending about seven miles from Grand avenue, down through Hall street and along the river bank to Arsenal street in the southern part of the city; yards at the south end

of Hall street and also at Mound street for making up trains and distributing cars in St. Louis; on the east side, almost exclusive control of the property from a point adjoining the Southern Railway's yards,—north of Pittsburgh Dike,—to a point midway between the Eads and Merchants Bridges, and the East St. Louis Railway connecting with all railroads entering East St. Louis, on the river bank, having some yards at the south end of its property and connecting with the terminal lines of East St. Louis.

The above described terminals constitute what Mr. Perkins defined as "St. Louis Terminals."

In addition to these there is the Venice and Carondelet Belt Line on the east side, and on the west side the small terminal property of the Manufacturers Railway Company and the individual terminals of the different railroad lines. Each railway line has, to a certain extent, its own yards and depots, and yards for making up trains and for interchange, as well as freight stations and team tracks for the conduct of their business in certain portions of the district.

With respect to the development of terminals in St. Louis, Mr. Perkins testified that the Terminal Association was organized in 1889 to take over the property of the Union Railway & Transit Company and the St. Louis Terminal Railroad, acquired for the benefit of a number of railroads, lease of the Eads Bridge and Tunnel, which were, at that time, in the control of the Missouri Pacific and Wabash roads, and which then constituted the roads entering St. Louis from the west,—the Burlington at that time coming in over Wabash tracks and the Missouri, Kansas & Texas not then entering the city. That the terminal properties, were taken over by the Terminal Com-

pany with the intention that they should be shared equally by all the roads that wanted to enter St. Louis and make use of the bridge and tunnel, and this was the real beginning of the development of the terminal system in St. Louis. At that time, 1889, the terminal properties consisted of the bridge and tunnel, the old Union Depot at 12th street, and some team and assembling tracks near the depot, the tracks of the Union Railway & Transit Company of Illinois and the Terminal Railroad of East St. Louis, having no connection with either the Illinois Central or the Mobile & Ohio. Since 1889 the Chicago, Burlington & Quincy, Missouri, Kansas & Texas, Chicago, Rock Island & Pacific, and St. Louis, Memphis and Southeastern roads have entered St. Louis and, on the east side, the St. Louis, Peoria & Northern and St. Louis Valley Railroad have entered East St. Louis, as have also a number of coal carrying roads.

Since the organization of the Terminal Association its rails have been extended west to Compton avenue, and the new Union Station has been built, with extensive yards east of 18th street and east of Compton ave. Freight stations have been built between 10th and 12th streets, and engine houses on the site of the old Union Depot. A belt line has been constructed around the west part of the city, and the St. Louis Transfer Railway Company has built its line along the levee and constructed yards in the northern part of the city. The Merchants Bridge has been built and the Merchants Company's line constructed from the west approach of the Merchants Bridge to 8th and Gratiot streets.

Mr. Perkins further testified that since the acquisition by the Terminal Association of the interests of the Wiggins Ferry Company and St. Louis Transfer

Railway Company properties, arrangements have been made whereby the tracks on Hall to Main street have been re-arranged so as to provide for through passenger train service via the Merchants Bridge, thus facilitating the movement of passenger traffic; prior to this time the Ferry Company had its tracks in the middle of Hall street which it crossed into adjacent industries, and when the Merchants tracks were laid in Hall street they were constructed outside the Wiggins Company's tracks, thus crossing the industrial tracks; that the connection between the terminus of the Merchants tracks at Gratiot street, with the Union Station, was made by the Terminal Association, in the first instance, for the purpose of enabling the Chicago, Burlington & Quincy Railroad Company to get into the Union Station, and this connection was subsequently used for the running of passenger trains over the Merchants Bridge into the Union Station, thus obviating the use of the tunnel and the discomfort to passengers incident thereto.

Mr. Perkins testified that in the past fifteen or twenty years the railroad tonnage of St. Louis had doubled at the rate of once every seven years.

With reference to the three systems, Mr. Perkins testified that, in general, they served rather separate sections and interests, the Terminal Association occupying mainly certain parts of the Mill Creek Valley, the business center of St. Louis; the Merchants System occupying certain portions of North St. Louis, and the Wiggins Ferry System the territory on the levee front from Grand avenue to Arsenal street,—a territory for the most part east and south of the Merchants System.

Mr. Perkins further testified that in the Mill Creek Valley there was no room for an additional terminal

system, and in the territory occupied by the Merchants System room for an additional system to a limited extent, but not for an independent system, without causing great damage to business interests and confusion in the operation of business. That in the territory covered by the Wiggins System there is no additional room except isolated tracks, but in the outlying districts, to the southwest, and far out in the Mill Creek Valley there is still room for some railroad facilities, but not for a very large portion of the business,—that conditions have so changed it is more difficult to build terminal tracks in the city than formerly; and it is generally admitted that no further terminals should be built at grade crossings or upon streets opened to any considerable amount of traffic.

Mr. Perkins further testified that for terminal purposes he would divide the territory into North St. Louis, South St. Louis, and Mill Creek Valley and East St. Louis,—including Madison, Granite City, Brooklyn and Venice; that such division is made for topographical reasons. The Mill Creek Valley, the North St. Louis Bottoms and South St. Louis form three natural divisions for railroad purposes, and form three separate groups of manufacturing and business interests. That intervening between North St. Louis and Mill Creek Valley the land is comparatively hilly and elevated, and the same conditions exist between Mill Creek Valley and South St. Louis, and in these three separate and distinct parts of the city the manufacturing interests have been grouped, with reference to terminals in these different districts.

With reference to the advantage or disadvantage of having all these systems under single control and

management, Mr. Perkins testified that, in his opinion, from many years of close study of terminals, in many places, the only real satisfactory system of terminals for any large city which is served by a considerable number of railroads must be an arrangement whereby all the railroads can reach, on practically even terms, all the business divisions of the city, and where manufacturers and merchants, located in each of the business parts of the city, will have free access to all railroads, because merchants and manufacturers cannot carry on their business profitably if they have convenient access to only one of perhaps fifteen or twenty or more railroads. That the business of most manufacturers and merchants is distributed over and comes from many different sources and it is very important for the business interests of the city that all merchants and manufacturers shall have the same means of access, without expensive teaming service, long hauls and inconvenient locations, to all the railroads. Conversely, all railroads which compete for the business of the city, must, under present conditions, have access to all business localities. That the monopoly by one railroad company of favorable terminals has been one of the greatest factors in producing discrimination and demoralizing service. To illustrate: if half a dozen railroads do business between St. Louis and New York and one of these lines has terminals in the heart of the city where business to and from New York is handled, which cannot be reached by other railroads except under some disadvantage, one or the other of two things has happened; either the other roads have lost the business or have paid for it in some way, by rate allowance, or by absorption of switching charges, or cartage charges. Since the Interstate

Commerce law has been made thoroughly effective the opportunities of railroads that have not had the first chance as to location of terminals, or foresight to secure terminals, have been very much diminished, so that under present conditions some arrangement must be made whereby all railroads can do business everywhere in large cities and such has been the general tendency and feeling for some years past. There has been a marked change of sentiment in this regard in the past six or eight years. If one road gets into, and has its tracks extended conveniently into a big manufacturing district it will fight the entrance of other lines and will keep them out of its monopoly in that particular district if it can.

Mr. Perkins further testified that the unification of terminals is brought about by the joint interests of the different lines which need service into a city; that such unification puts all these lines on an equal basis to compete for the traffic to and from the city. This makes the conditions such that each one of the roads to compete successfully for such business must give as good, or better, service than the others, or must give the best rates. The conditions for receiving or delivering freight are equal to all, but means of transportation, both in charge and service, must be the best possible to secure traffic, or to secure a large volume of traffic. Where all roads have an interest in unified terminals, as in St. Louis, the result is the cutting out of duplication, and often triplication, of service; reduction of much friction in operation and a very desirable reduction in the amount of valuable city room taken up by unsightly railroad tracks and taken away from other valuable uses; reduction in operating expenses, and reduction in the expense of the public. Furthermore the transfer

of traffic is decidedly more rapid under one management than it would be under three or four distinct managements. At Chicago it has been suggested that the terminals of nearly all the important lines should be put under the management of one man who should have entire charge of and direct the interchange of traffic.

Mr. Perkins illustrated the movement of a car from the terminus of the Missouri Pacific, in St. Louis, to the Vandalia, in East St. Louis, assuming that the three terminal systems were separately and independently operated, showing that the car must pass over the rails of five different companies. At the first exchange, or delivery, it would require a delivering track and notification to the connecting line that the car had been placed for delivery; an inspection of the car, as to its condition, and a switching crew to take the car from the delivery track to the next connecting carrier; the same process would be necessary with each connection, thus requiring five separate crews to handle, at these separate points, what could be done by one crew under a single management, and, in addition, causing a loss of several hours at each point of exchange, and congestion of traffic.

With reference to the functions of terminals in large cities, Mr. Perkins said: The functions of railroad facilities, coming under the head of "Terminals," may be divided into two parts, first, those facilities with which the railroads do business with the public, consisting of freight houses, passenger stations, team tracks, for loading and unloading freight by teams, and operation of tracks to industries; second, yards for the assembling and distribution of cars, making up and breaking up trains, storage of

freight and passenger cars, round houses, shops and repair facilities. The functions, in general, therefore, of the terminals are, for the assembling and distribution of freight and passengers which have been or are to be transported. Terminals are the facilities with which railroads interchange their business with the public and at which they handle their equipment at terminal points, which includes the furnishing of motive power in moving cars from point to point in the terminal districts provided for receiving and distribution of freight and passengers. The functions of the Terminal Association are,—first, to provide means for receiving and delivering passengers for all railroads entering St. Louis; second, to provide means for receiving and delivering freight, either on tracks or through warehouses, for all railroads entering St. Louis or East St. Louis, or those parts of these cities reached by the tracks of this company; third, to expedite the interchange of cars of all kinds between the different railroads; fourth, a very small factor, comparatively of the total business,—the switching of freight from one point of the properties to another,—to take the place of, presumably, more expensive teaming. In addition to this, its function is to provide full facilities for the passage of passenger trains of all roads desiring to cross the river, or, to express it briefly, the work of the Terminal Association is, acting as General Agent for all the railways which enter St. Louis and East St. Louis for assembling and distributing freight and passengers, either of local destination or passing through St. Louis as a gateway from the east to the west. The local business is extremely small, so small that it would probably not justify in any way the expenditures necessary to provide a system of rail-

road facilities for its handling. The main volume of business done by the Terminal Association is business originating in St. Louis, or destined to St. Louis from outside points, passing through St. Louis as a gateway, and which is handled by some one of the main lines of railroad entering St. Louis or East St. Louis. This is the great volume of business, and on this all terminal charges are absorbed by the railroad handling the business and the great volume of revenue of the Terminal Association is from charges paid directly by the railroads. At the present time rates are made direct to and from St. Louis, and transfer charges across the river are paid by the railroads out of their through rates. The only charges borne by the public, made by any of the terminal systems, are a switching charge from point to point within the switching districts, charges on local business across the river, demurrage charges for detention of cars, storage charges on freight not called for within the prescribed time, and charges for use of the upper roadway. The amount paid directly by the public would be between five and ten per cent of the total revenue of the Terminal Companies,— the rest of the revenue being paid by the railroads using these terminals.

Mr. Perkins testified that 28 railway lines enter St. Louis and East St. Louis, all of which use the facilities of the Terminal Association, and 14 of which are Proprietary Companies of the Terminal Association. The lines not proprietary lines having the same advantages, and the same use of the facilities, as the Proprietary Lines. Many of the non-proprietary lines are either allied in some way with or controlled by some of the Proprietary Lines, but all are on the same footing so far as the use of the facili-

ties of the terminals are concerned, both as to freight and passenger traffic.

Mr. Perkins testified that every important railroad should have its own individual assembling, distributing and storage yards, and a main freight house for the assembling and distribution of less than carload business, which can be located in any part of the general business district; but that by uniting the facilities and spreading over all parts of the business districts, service much more even to all concerned results; hence the consolidated operation of the various terminal properties of the Terminal Association, Merchants Company and Wiggins Ferry Company, in St. Louis and East St. Louis, is decidedly promotive of the facility with which commerce moves and is promotive of competition among the lines entering St. Louis. Such consolidated operation promotes, instead of retarding, destroying or impairing competition; and efforts and material progress are being made in many of the large cities to bring about such an arrangement. To illustrate,—two of the worst cases,—Buffalo and Chicago, where the diversified interests of a large number of separate properties causes a great burden on commerce. These are two of the largest terminal points in the country, where both the railroads and the public have been at work for years in endeavoring to perfect some arrangement for the unfication of passenger and freight terminals. In Chicago where the interchange of freight between the railroads requires movement over the tracks of several independent companies, there are tremendously high switching charges and numerous delays. At a Kansas City, also, and a great many other places, efforts are now being made to unify the terminals. At Washington City the passenger traffic is all

done under a union arrangement which was brought about by the action of the United States Government. There the Washington Terminal Company has been organized, of which the Pennsylvania lines and the Baltimore & Ohio own each one-half of the stock,—all the lines come in as tenants. In Paris there are two belt lines organized almost exactly as the Terminal Association of St. Louis; one of these belt lines provides connections inside the city, and the other connects the railroad facilities about Paris; the stock of these belt lines is owned by five of the seven railroad companies that enter Paris, and the facilities of these belt lines are used by all the roads. (Mr. Perkins produced a map of Paris, which is marked Defendants' Exhibit No. 1.) At Berlin there is a very similar arrangement which was illustrated by Defendants' Exhibit No. 2, produced by Mr. Perkins.

Extracts From Reports of Municipal Bridge and Terminals Commission to Municipal Assembly, (of St. Louis).

"The freight tonnage received and forwarded at St. Louis, and East St. Louis has practically doubled in seven years (from 20,042,169 tons in 1898 to 39,141,663 tons in 1905).

"In the three sections on the west side of the river we believe it to the interests of the city that, subject to the maintenance of streets necessary for public use, and subject to any desirable reservations for park and other public purposes, every facility should be given for acquiring and utilizing property for railroad purposes; and, for reason which we shall ex-

plain further on, it seems to us desirable that the property should be acquired and franchises granted in such shape that the property can be used for all railroads desiring to do business in those localities, rather than it should be tied up to the uses of single railroad companies.

"As, under Government control, the field of action of railroad companies is becoming more and more limited to the manufacture and sale of transportation; as the room in a large city for manufacturing, storage and railroad purposes becomes more and more limited and costly; and, as the total cost, direct and indirect, of transportation of commodities from the point of production to the point of consumption is more closely figured, it is desirable that the friction in handling terminal work and the duplication of facilities in any one section should be reduced to a minimum. On the other hand, efforts should be directed to securing facilities in those parts of the city where commercial and manufacturing interests center, through which our people may deal with all the railroads in the least burdensome and most economical manner.

"While we do not oppose, but would encourage a considerable development of individual railroad facilities, it seems to us that the development of freight houses, and team tracks most in line with economy and the most widely extended service, is that they should be furnished by a combination of the various railroads and operated for the joint benefit of all the railroads and the public. The association or agency that provides these facilities should not be a corporation doing terminal business for a direct profit, but should be organized and clearly recognized

as the agency of the combined railroads, acting for and representing each.

"Investigation indicates that, partly as a result of the improvements carried out by the Terminal Railroad Association in 1902-3-4, for the last year freight in larger volume than ever before has been passing through the St. Louis gateway more freely and with less delay than for many years previously. These improvements referred to were both in the way of furnishing greater yard room and in what has been described as good 'internal circulation,' i. e., additions and improvements to the main connections between the different parts of the terminal system, with independent drill tracks for keeping switch work off of main tracks; and in the cutting out of duplication of work by the treatment of the collection of terminal plants more as one machine The number of cars interchanged by the Terminal Railroad Association in March, 1906, was approximately 184,000, the largest number ever handled in one month, and in April, 1906, in spite of the almost complete loss of the usual coal business, the number of cars interchanged was 26,000 greater than in April, 1905.

"The Terminal Railroad Association interchanged on June 27, 1906, 7,239 cars, the largest number in any one day in its history."

State Case.

In 1894 the State of Missouri, *ex informatione*, Edward C. Crow, Attorney General, filed in the Supreme Court of Missouri its information against the Terminal Railroad Association of St. Louis, charging, in substance, as follows:

That the Terminal Association operated a railroad between the Union Station in St. Louis, where it connected with all railroads entering St. Louis, to a point in East St. Louis, Illinois, where it connected with all roads entering East St. Louis, and had connections with various industrial plants, and was thus able to transport freight between such plants and the termini of the various railroads;

That the St. Louis Terminal Railway Company operated a railroad from a point in the northern part of the City of St. Louis through the County of St. Louis to a point on the Missouri river in the County of St. Charles;

That the Merchants Company operated a railroad from the Union Station eastwardly to the wharf, thence along the wharf to the Merchants Bridge and across that structure to the City of East St. Louis, where it connected with all railroads entering East St. Louis; and also operated a line in the City of St. Louis connecting with all railroads entering that city, and the number of industrial plants, affording facilities similar to that of the Terminal Association; and was lessee of the Merchants Bridge;

That an agreement had been entered into between the St. Louis Terminal Railway Company and the Merchants Company whereby the latter became the lessee of the former;

That the Terminal Association and the Merchants Company were equipped with engines, freight and passenger cars and all equipment necessary for doing a general railroad business and were competing each with the other for the handling of traffic between the termini of different roads; that on the 17th of August, 1893, an agreement was made between the Terminal Association and the Merchants Company and

the St. Louis Terminal Railway Company whereby the Terminal Association succeeded to all of the rights of the Merchants Company with respect to the St. Louis Terminal Railway Company and its properties; that on the 17th of August, 1893, an agreement was entered into between the Merchants Company and the Terminal Association whereby the latter was granted the perpetual use of the facilities of the former, and as consideration therefor guaranteed the payment of its bonds, the Terminal Association also acquiring 4,384 shares of the capital stock of the Merchants Company; and that later the Terminal Association acquired 13,416 shares of the stock of the Merchants Company, thus giving it 17,800 shares of the total issue of 29,395;

That the Terminal Association was a competitor for traffic with the St. Louis Terminal Railway Company; and that the Terminal Association and Merchants Company were likewise competitors, and that by virtue of the agreement referred to the Terminal Association fixed the tariffs of the Merchants Company, so that competition between the two was stifled and destroyed.

The return of the respondent admitted its ownership of the stock of the Merchants Company, the execution of the various agreements referred to in the information and continued as follows:

Further and fully answering, respondent avers and states the facts to be that prior to the year 1874 there were few industries located in or in the neighborhood of St. Louis which had railway connection, and the freight and passenger traffic between the various railway lines then entering the City of St Louis and the City of East St. Louis, and between such railway

lines and the industries located in St. Louis, was handled by means of wagons and ferries. For the purpose of facilitating the handling of freight and passenger traffic between and in said cities, there was constructed in 1874 a railway bridge across the Mississippi river between said cities, commonly known and hereinafter referred to as the Eads Bridge, which bridge subsequently became and now is the property of the St. Louis Bridge Company. Concurrent with the construction of the Eads Bridge, and for use in connection therewith, there was constructed a tunnel commonly known and herein referred to as the Tunnel, from the western terminus of the Eads Bridge, at or near Washington avenue in St. Louis, to a point at or near Eighth and Poplar streets in said city, which tunnel subsequently became and now is the property of the Tunnel Railroad of St. Louis. The Tunnel was designed to be used in connection with the Eads Bridge, so that railway trains might make a continuous passage over the bridge and through the tunnel, which continuous passage was and is essential to the use of the bridge and tunnel for railway traffic. The Eads Bridge and Tunnel and the terminal facilities connected therewith were operated for a period of five years after construction continuously at a loss, and about the year 1879 various mortgages severally covering the Eads Bridge and Tunnel were foreclosed, and these properties of the St. Louis Bridge Company and the proprties of the St Louis Bridge Company and the Tunnel Railroad of St. Louis. While the Eads Bridge and Tunnel were nearing completion it became manifest for the operation of these properties and the handling of railway traffic in the City of St. Louis, that it was essential there should be constructed and

maintained, in connection with the Eads Bridge and Tunnel, a system of railway terminals consisting of main, lead and side tracks, a union station for passengers, and freight stations and warehouses for handling the commerce of the City of St. Louis. To accomplish these objects the Union Railway and Transit Company of St. Louis and the Union Depot Company of St. Louis were organized under the laws of Missouri, relating to union depot and terminal companies, the former for the purpose of making a continuous and connected route for trains through the tunnel and over the bridge and the railways constructed or to be constructed appreaching the entrance to the tunnel, and the further purposes of constructing and operating terminal facilities in connection with the Eads Bridge and Tunnel; and the latter company for the purpose of constructing passenger and freight stations for use in connection with the operation of the Eads Bridge and Tunnel and the properties of the Union Railway and Transit Company of St. Louis. Subsequently the Terminal Railroad of St. Louis was organized under the laws of Missouri relating to union depot and terminal companies, for the purpose of acquiring additional terminal facilities to be used in connection with the railway facilities of the Eads Bridge and Tunnel, the Union Depot Company of St. Louis and the Union Railway and Transit Company. To this end the Union Railway and Transit Company and the Terminal Railroad of St. Louis severally leased all of of their properties in perpetuity to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, and thereafter, and until 1881, the properties of these four companies were operated under one con-

trol and management, and on the 1st day of July, 1881, all of these properties were leased to the Wabash, St. Louis and Pacific Railway Co. and the Missouri Pacific Railway Company, and were operated by said lessees until October, 1889.

Further fully answering, respondent avers and states the facts to be that the operation of the Eads Bridge and Tunnel and of the terminal properties to be used in connection therewith, as hereinabove specified from the date of the completion of the Eads Bridge and Tunnel, in 1874, up to the year 1889, had been without profit at any time to any of the various operating companies. In the last named year the railway traffic at and between the Cities of St. Louis and East St. Louis, in and in the neighborhood of St. Louis, had greatly increased, and the City of St. Louis had become an important gateway for the passage of a large part of the through railway traffic of the country. A number of trunk lines had their termini either in St. Louis or East St. Louis, and it was important to these lines that traffic be directed to the St. Louis gateway.

The City of St. Louis was then growing rapidly in population and in commercial importance; a large number of manufacturing and industrial plants were seeking locations in the West, and it was to the interest of St. Louis and of the railway lines entering the city to encourage the location of such industries in and in the neighborhood of this city. To this end it was essential that the St. Louis terminal facilities should be made adequate and should be economically operated. The high values and restricted quantities of land available for terminal railway facilities in and in the neighborhood of St. Louis made it practically impossible for each railway company to own

and operate a separate and independent system of terminals, and had such separate ownership and operation been possible the operation thereof would have caused inconvenience and delay, and the expense incident thereto would have imposed heavy and unnecessary burdens upon the railway lines and the commerce of St. Louis. The then existing facilities were insufficient for the proper handling of the expected increase in freight and passenger traffic; the capital invested in the terminal properties having proven unremunerative, the companies then operating these properties were unwilling to make further investment or continue to carry, unassisted, the risk of loss incident to further operation.

Believing the preservation and enlargement of the terminal system was essential to the proper conduct of their business, and that this could be effected only by the co-operation of all railway lines, and to prevent the properties which had been developed by the Bridge, Tunnel, Union Depot, Union Railway and Transit, and Terminal Railroad Companies from passing under the control of a single interest which would endeavor to operate these properties upon the basis of profit earning, and which might exact burdensome rates and tolls, divert traffic, and discourage the location of industries in and in the neighborhood of St. Louis, a number of railway lines agreed to form respondent company, the stock of which would be owned in severalty in equal interest by all railway lines desiring the use of the terminal system and willing to assume the risks and burdens incident to its control and operation, and the properties of which would be available for the use of all railway lines and shippers without discrimination. With

these objects in view, in 1889, respondent company was formed by the consolidation of the Union Railway and Transit Company of St. Louis and the Terminal Railroad of St. Louis, and the issue of stock of respondent equally divided among the Missouri Pacific; St. Louis, Iron Mountain & Southern; Wabash, St. Louis & Pacific; Cleveland, Cincinnati, Chicago & St. Louis; Ohio & Mississippi and Louisville & Nashville Railroad Companies, then termed proprietary companies and hereinafter so designated, in connection with the railway lines which subsequently became proprietary companies of respondent company.

In order that respondent company might from time to time obtain necessary funds for the enlargement of its facilities, it was essential that its securities should be guaranteed in some form by the proprietary companies; and to the end that the proprietary companies might be protected in such guarantee it was essential that they should be granted the use in perpetuity of the facilities of the respondent. Accordingly it was agreed that respondent should take over the lease of the bridge and tunnel, acquire the stock of the Union Depot Company, erect new passenger and freight stations, and greatly enlarge the facilities for the handling of traffic between the railway lines and between such lines and industrial plants then and thereafter to be located in and in the neighborhood of St. Louis; that all of these properties should be operated for the equal and joint use and benefit of the proprietary companies and such other railway lines as might desire to become proprietary companies, and in the interest of facilitating the handling and increasing railway traffic in and in

the neighborhood of St. Louis; that the properties should be operated upon a safe and economic basis; and that the rates and charges should be so regulated that the revenue therefrom should be sufficient only to meet expenses of operation, repairs, improvements, maintenance and fixed charges.

In conformity with this understanding and agreement, from time to time various other railway lines entering the City of St. Louis or East St. Louis have been admitted as proprietary lines of respondent, on equal terms and with equal stock ownership, so that now the following railway lines: The Missouri Pacific Railway Company; St. Louis, Iron Mountain & Southern Railway Company; Wabash Railroad Company; The St. Louis, Vandalia & Terre Haute Railroad Company; Baltimore & Ohio Southwestern Railroad Company; Cleveland, Cincinnati, Chicago & St. Louis Railway Company; Louisville & Nashville Railroad Company; St. Louis & San Francisco Railroad Company; the Chicago, Rock Island & Pacific Railway Company; Southern Railway Company; Illinois Central Railroad Company; the Chicago & Alton Railway Company; Chicago, Burlington & Quincy Railway Company and Missouri, Kansas & Texas Railway Company have become and now are proprietary lines of respondent company owning in severalty each a like amount of the stock of respondent company, and all bound in severalty by an agreement with respondent, whereby each is granted the right in perpetuity to use jointly with the others all the terminal facilities at any time owned or controlled by respondent, and in consideration for such use each of the proprietary lines is bound to pay such tolls and charges as will enable respondent to meet

its fixed charges and expenses of operation, repair, improvement and maintenance. The said proprietary lines constitute all of the principal railway lines entering the Cities of St. Louis and East St. Louis.

Further, fully answering, respondent avers and states the facts to be that, in keeping with the policy inducing, as in the preceding paragraph stated, the formation of respondent company, and in furtherance of the purposes and objects therein outlined, respondent has from time to time, for the purpose of increasing its terminal facilities, borrowed large sums of money, issuing therefor its bonds secured by mortgages upon its property, and further secured by the agreement of the proprietary lines to forever make use of the terminal facilities of respondent. By reason of the premises, the interests of each and all of the proprietary lines have become identified in perpetuity with the interests of respondent, under terms and conditions whereby the railway facilities of respondent are operated at all times on the basis of practically actual cost, and open at all times to the equal joint use of the proprietary lines and of such other railway lines as may from time to time desire such use. The purpose and effect of such union of interest and joint use of properties were, are, and will at all times continue to be subservient to the best interests of the public and of the commerce of the City of St. Louis. In furtherance of this purpose, large sums of money have been recently invested by respondent in the enlargement and extension of its facilities, and respondent now has in course of construction and erection betterments and improvements which will cost many millions of dollars. It is the intention of respondent to continuously en-

large and increase its facilities so that the same will at all times be commensurate with the demands of railway traffic in and in the neighborhood of the City of St. Louis.

Further, fully answering, respondent avers and states the facts to be that the bridge known as the Merchants Bridge, and hereinafter so called, was completed about the year 1890, across the Mississippi river at a point near the northern limits of the City of St. Louis, by the St. Louis Merchants Bridge Company, under an act of Congress requiring the bridge to be open for the use of all railway companies. The railway of the St. Louis Merchants Bridge Terminal Railway Company (a company organized under the laws of Missouri relating to union depot and terminal companies), hereinafter referred to as Merchants Company, was constructed by that company in the year 1890, connecting with the Merchants Bridge and extending southwardly to a point at or near Seventh and Gratiot streets in the City of St. Louis. The properties of the Merchants Company have at no time had any direct connection with any of the railway lines entering the City of St. Louis, are not and at no time have been competing properties with the properties of respondent in the handling of freight and passenger traffic originating at and destined to any point in the State of Missouri. There are no industries located on the railway line of the Merchants Company, which are reached by the railway lines of respondent. The railway tracks of respondent, as well as the railway tracks of the Merchants Company, are constructed in part over and along the streets of the City of St. Louis and under ordinances of said city which compel the granting of the use of

the railway tracks of each company to any and all railway companies desiring such use.

The freight and passenger traffic in St. Louis is large and has been steadily increasing since the construction of the Eads Bridge in 1874; the volume and growth of this traffic are largely due to the facilities afforded by respondent for the handling of such traffic on the basis of practically the cost of operation. Few of the railway lines entering the City of St. Louis have direct connection with any other railway line entering the city, or connection with any industry not located upon or adjacent to its own right-of-way. To facilitate the public convenience and safety in the transmission of freight and passengers in the City of St. Louis and between the various railway lines entering the city and industrial plants located therein, to secure to such industries direct railway connection, and to prevent the unnccessary expense and inconvenience attending the accumulation of a large number of stations, warehouses and terminal yards, and to the end that all industrial plants might be served without discrimination and at like cost for like service, it was desirable and to the best interests of all railway lines and of all persons needing and using terminal facilities in St. Louis, and especially to the end that rapid and economic handling of freight and passenger traffic might be accomplished without change of cars or motive power, that respondent should be permitted to exercise the rights, secured by said ordinances of the City of St. Louis, to operate trains over the facilities of the Merchants Company; and, accordingly, on August 13, 1893, a trackage contract was entered into between respondent and the Merchants Company, whereby respond-

ent was permitted, in connection with other railway companies desiring such use, to move trains and cars over the facilities of the Merchants Company.

Further, fully answering, respondent avers and states the facts to be that at the time said contract was entered into, the Merchants Company had no passenger station in the City of St. Louis and had no connection with or means of access to the union passenger station or freight stations which respondent then had in said city, or to the new union passenger station which respondent was then erecting. To enable the Merchants Company to obtain access to his new union passenger station for the use of such railway companies as might desire to enter the same over the facilities of the Merchants Company, respondent caused to be constructed and now maintains, a connection between the southern terminus of the Merchants Company and the new union passenger station.

Further, fully answering, respondent avers and states the facts to be that the operation of a single union passenger station open to all railway lines, at which change of passengers and baggage may be effected without transfer, and the maintenance of a system of terminals by which freight originating at industries in the City of St. Louis having railway connection, destined to any railway line, or entering the city upon any railway line destined to any such industry, and freight between such industries, may be handled by a single movement, without change of motive power, and for a single charge, are objects which have been and could only be accomplished by the agreement between respondent and the Merchants Company herein referred to, and have re-

sulted in the rendition of railway service with greater facility and dispatch and at less expense than similar services are or can be rendered in any other large city, and have caused substantial and permanent growth in the commerce of the city.

Further, fully answering, respondent avers and states the fact to be that when the agreement of August 13, 1893, was entered into the only means of access to the new union passenger station in the City of St. Louis, which was then nearing completion, for trains crossing the Mississippi river at St. Louis, was through the tunnel; that the use of the tunnel for such purpose was a source of much complaint and annoyance; that by the making of said agreement and the construction of connections between the union passenger station and the tracks of the Merchants Company, hereinabove referred to, passenger trains crossing the river are now enabled to arrive at and depart from the union passenger station without passing through the tunnel. The several railway lines entering the City of St. Louis from the north, in order to reach the union passenger station and to connect with the railway lines entering the city from the south and west, find it convenient to use the facilities of the Merchants Company and of respondent. Such use required a joint agreement between such railway lines on the one part and the respondent and Merchants Company on the other. A large number of industries are so located in and in the neighborhood of the City of St. Louis that connection between the same and the trunk railway lines can only be affected by the use of the facilities of both the respondent and the Merchants Company; and to afford said railway lines and industrial plants such needed

facilities, without discrimination and with dispatch, it is essential that at all times respondent and Merchants Company shall co-operate.

Further, fully answering, respondent avers and states the facts to be that its acquisition of the stock and bonds of the St. Louis Terminal Railway Company, which respondent avers it acquired in the year 1893, was to enable respondent to construct and operate a line of railway connecting the various lines of railway entering St. Louis from the south, west and north, and thus enable respondent to handle with greater facility and convenience traffic to, from and between such railways. At the time such acquisition was effected, the line of said St. Louis Terminal Railway Company had not been constructed, and neither it, said St. Louis Terminal Railway Company, nor said Merchants Company was financially able to construct the line of said St. Louis Terminal Railway Company; that the line of said railway company has been constructed and completed by respondent, and forms a necessary and proper extension of the system of terminals respondent now and since its incorporation has been endeavoring to develop and complete, and furnishes many desirable locations for industrial plants.

Futher, fully answering, respondent avers and states the facts to be that in August, 1893, when the agreements between respondent and the Merchants Company, herein referred to, were entered into, the lease of the Merchants Bridge to the Merchants Company, referred to in the information, had been cancelled; that the earnings of the Merchants Company were, and since its incorporation had been, insufficient to meet its operating expenses and the rent due and payable under the terms of said lease.

Further, fully answering, respondent avers and states the facts to be that the railway tracks in this state owned by respondent are in no sense competitive with the railway tracks owned by the Merchants Company, but the tracks of the respondent and of the Merchants Companny are so constructed as to constitute a continuous line of railway, and the system of one forms a complement to and extension of the system of the other. No part of the traffic originating at or destined to any points on the tracks of the Merchants Company reaches any one of the railway lines entering St. Louis without passing over the facilities owned by respondent. The facilities of the Merchants Company are and can be of no practical value to it, to the commerce of St. Louis, or to local or through railway traffic unless operated in connection with the facilities of respondent company.

Further fully answering, respondent avers and states the facts to be that provisions of the state constitution and of the statutes referred to in the information cannot, do not, and were not intended to apply in any manner to properties or companies of the character of respondent or of the Merchants Company; that the properties of the two companies separately constituted and separately operated are not competitive; that the scarcity of lands in St. Louis available for terminal facilities, the fixed location of many industrial plants in and about the city requiring railway connections, the large number of railways entering the city, the necessity for connection between such railways and between such railways and such industrial plants, and the importance of making such connections with a single and continuous movement, and for a single charge, make it practically impossible to maintain separate and distinct systems of terminals.

The policy of the law and public interests are best subserved by the operation and maintenance of a system of terminals for the common and equal use of all shippers, and which afford all industries railway connections without discrimination and at equal rates and charges.

Further fully answering, respondent avers and states the fact to be that it was organized and exists under and by virtue of the laws of the State of Missouri, relating especially to union depot and terminal companies, for the purpose of maintaining and operating railway facilities for public convenience and safety, and for the transmission of freight and passengers in and in the neighborhood of St. Louis, between the various railway lines entering said city and industrial plants therein, and between such plants and such railways, in such manner as to prevent the unnecessary expense, inconvenience and loss attending the accumulation of a large number of passenger and freight stations; that respondent does not own or operate cars for the transportation of freight, but merely receives and delivers such cars of freight as are destined to or billed from points on its terminal facilities and from or to some one of the railways whose lines connect with respondent's terminal facilities; nor does respondent own or operate trains for the carriage of passengers, but merely furnishes motive power for the movement of passenger trains of various railway lines into and out of the Union Depot of the City of St. Louis, that being so organized and so existing, it operates and controls a large system of terminals in and in the neighborhood of the City of St. Louis, which system is the result of thirty years of growth and development and the expenditure of large sums of money.

It is the policy and purpose of respondent from time to time to add to and enlarge its system of terminals, and as rapidly as the demands of commerce require; to this end it has recently increased its authorized bonded indebtedness to $50,000,000, and has expended several million dollars in the acquisition of new facilities. The interest on its bonded indebtedness has been guaranteed proportionately by the proprietary lines hereinbefore referred to, and in consideration for, as well as protection against, loss on account of such guarantee, it has been agreed between respondent and the proprietary lines that respondent's facilities shall be forever used by the proprietary lines; in no other way can the acquisition, operation and maintenance of necessary and adequate terminal facilities in the City of St. Louis be effected.

Further, fully answering, respondent avers and states the facts to be that copies of the agreements of August, 1893, were duly filed with and in the office of the Railroad and Warehouse Commission of the State of Missouri, on or about the day of their execution, and ever since have been matters of public record and notice; that no question has ever been raised by the State of Missouri as to the validity of said agreements. Relying upon the validity of these agreements and the means afforded thereby to the respondent and Merchants Company of enlarging their respective facilities for the joint operation and more expeditious and convenient handling of traffic, respondent and Merchants Company have so developed their facilities as to avoid incurring unnecessary expense in the construction, maintenance and operation of tracks, and have so adjusted their tracks that trains may readily pass without

interruption from one system to the other, thus affording to all industries alike railway service, regardless of location on either system. Such enlargement of their respective systems and adjustment of tracks have been in the interest of economy, advantageous to the railroad lines, to the public and to shippers, and in keeping with the public policy as expressed in the Statutes in the State of Missouri, and as construed by its administrative officers.

Further, fully answering, respondent avers and states the facts to be that all of its acts herein set forth have been done in good faith and in keeping with public policy, in harmony with the Constitution and Statutes of Missouri, and for the purpose of acquiring, developing, maintaining and operating adequate terminal facilities at and in the neighborhood of the City of St. Louis, for the purpose of developing the commerce of the city and meeting its requirements, affording ready and convenient methods for the handling of freight and passenger traffic, and at all times operating the facilities with economy. Its tolls and charges have at all times been so regulated that the revenue therefrom has been adequate only to make needed improvements and repairs and pay the cost of maintenance, operation and interest on bonded indebtedness. No dividends nor profits in any form have ever been paid at any time to any of its stockholders. Its properties are, and by the terms of the agreements hereinbefore referred to must forever be operated without the purpose of producing profit, but solely for the handling of railway traffic at and in the neighborhood of the City of St. Louis.

Wherefore, having fully answered, respondent prays that its rights, franchises and corporate powers be confirmed as heretofore exercised and enjoyed.

This return was withdrawn, a demurrer filed to the information, upon which the case was submitted and decided.

The opinion of the court is as follows:

"This is a proceeding on information of the Attorney General, the object of which is to exclude the respondent corporation from all corporate franchises, and to annul its charter, on the ground that it has violated the law of this State which prohibits a railroad company from consolidating with another company which owns or controls a parallel or competing line.

The information sets out in chronological order the several corporations that have been chartered to handle the terminal railroad business in St. Louis. From its statements the following facts may be gathered.

In 1874 the structure now known as the Eads Bridge across the Mississippi was finished. The railroad tracks over that bridge extending from the east to the west entered a tunnel under Washington avenue, in St. Louis, which ran west and southwest until it merged at a point near Eighth and Poplar streets. In that year a Union Depot Company was chartered which erected a Union Depot and passenger station with switch tracks, yards, etc., at a point near Twelfth and Poplar streets. From that date on there were various companies chartered under the general railroad law whose object was to construct, maintain and use railroad tracks for the purpose of handling cars and trains of the various railroad companies coming into and out of the Union Depot from the south and the west, and also from the east over the Eads Bridge. Through these corporations, rights of way were acquired, tracks and switch

yards necessary for this business were constructed connected with the tracks of the Union Depot Company extending from Compton avenue on the west to the properties of the Union Depot Company, thence east and through the tunnel and across the Eads Bridge, by means of which trains of all railroads coming from the several directions above indicated were recieved by the agencies of the terminal company at the various termini of the railroads, and drawn into the premises of the Union Depot and in like manner trains departing from the city were taken charge of at the Union Depot by the Terminal Company and drawn over its tracks and delivered to the railroad companies at their respective termini, and there were also constructed switch tracks and spurs reaching to private business establishments located in the vicinity, or along the general course, of the terminal tracks. The Union Depot and passenger station, and all its equipments were subsequently moved farther west and now occupy blocks between Eighteenth and Twenty-first streets.

In 1889 the several corporations owning the terminal rights and properties above mentioned consolidated and took the name of the "Terminal Railroad Association of St. Louis," the original authorized capital stock of which was $7,000,000.00, which in 1893 was increased to $12,000,000,000, and in 1903 to $50,000,000. That consolidated corporation was organized under the general railroad laws of this State. It is the respondent in this suit. The respondent thus became the owner of all the rights and properties above mentioned, including those of the Union Depot Company, all of which, in the language of the information, "constituted the larger part of the terminal, switching and car storage facilities subject to use by persons and corporations engaged

in business in St. Louis and used by them in transferring and switching the products so dealt in or manufactured by them to and from the railroad tracks and lines of railroad companies running into, through and from said city, and to and from the various factories, manufacturing establisments, freight depots, warehouses, private tracks and switches and other places in said city from the factories, storage warehouses, depots, railroad tracks and switches in said city to the place of distribution or delivery depot in said city, and in switching and conveying the freight and passenger cars from and to the switches, side tracks, depots, warehouses and termini of the various railroads running into said city. This condition continued until August 17, 1893, when the respondent by agreement of that date with the St. Louis Merchants Bridge Terminal Railway Company acquired control and practical ownership of the properties of that company. It is that agreement that forms the chief ground of the charge in the information that the respondent has violated the law.

The structure known as the Merchants Bridge is a railroad bridge spanning the Mississippi about two miles north of the Eads Bridge, its west end being at Ferry street in St. Louis. The St. Louis Merchants Bridge Terminal Railway Company, which we will hereinafter call the Merchants Terminal, was incorporated under the general railroad law of this State in 1887. The object declared in its articles of Association was to construct and maintain a standard gauge railroad within the limits of the city from the Union Depot to the northern city limits; and from a point where it crosses North Market southwardly to Carr Street; and from Ferry street eastwardly across the Merchants Bridge into

the State of Illinois; also from the point where it crosses Pope Avenue northwardly to the intersection of Morin and Florissant avenues, in all fifteen miles.

In 1892 the Merchants Terminal Company acquired from another corporation called the St. Louis Terminal Railway Company a line of railroad which was to be constructed from a point near the northern limits of the city running north and westward and then southwestward, belting the city to Arloe station in St. Louis county, which is a station on the St. Louis & San Francisco Railroad. The design of this road was when it should be completed to furnish all persons and corporations in the city who might have use therefor "railroad connections, tracks, switches, freight cars, terminal and railroad terminal facilities including depots, warehouses, car storage therein, switching facilities, and railroad track and terminal connections with the various railroads running into the city," and in this respect the design was to compete with the respondent in doing that business.

On August 17th, 1893, the respondent entered into an agreement the particulars of which are set out in the information and a copy filed as an exhibit, the result of which was to give the respondent the practical ownership and control of the properties of the Merchants Terminal Company and, with the other properties held by respondent, to give to respondent control of all instrumentalities now in operation in the city designed for handling the terminal business of the railroads centering in St. Louis.

The conclusion drawn by the Attorney General from those facts is that the respondent, the Terminal Railroad Association of St. Louis, has violated the law as ordained in Section 17, Article XII of the

Constitution of this State and as declared in Section 1062 R. S. 1899.

The respondent demurs to the information assigning as grounds therefor that the information does not show:

1. That respondent's road and that of the Merchants Terminal are parallel or competing lines.

2. That they are railroads within the meaning of Sec. 17, Art. XII of the Constitution or of Section 1062 R. S.

3. It does show that the properties of the repondent are such as it was authorized to acquire and use by the provisions of Sections 1164-1165 and the amendments thereof by the Act of the General Assembly of 1903.

I.

The clause in the constitution which it is contended has been violated is found in Section 17, Article XII, which section is as follows:

> "No railroad or other corporation, or the lessees, purchasers or managers of any railroad corporation, shall consolidate the stock, property or franchises of such corporation with, or lease or purchase the works or franchises of, or in any way control, any railroad corporation owning or having under its control a parallel or competing line; nor shall any officer of such railroad corporation act as an officer of any other railroad corporation owning or having the control of a parallel or competing line. The question whether railroads are parallel or competing lines shall, when demanded, be decided by a jury, as in other civil issues."

In 1875 when the convention which framed our Constitution was in session there were already lines

of railroads running through the State which were parallel and competing, not parallel in a strictly governmental sense and not competing at all points, but parallel as that word has come to be used in a commercial sense as applied to railroads, and competing between principal termini for the business of carrying freight and passengers between those points. And it required then but little foresight to discern that other lines of railroads in a like sense parallel and susceptible of being used in a like sense in competition would be constructed crossing or traversing the state in all directions. The history of those times tells us that the people were already awakened to the advantage that competing roads would afford them and to the necessity of preserving that advantage. It was in view of the condition then existing and conditions then to be reasonably anticipated that the clause in the constitution above quoted was adopted. Courts should not lose sight of those conditions when construing that clause. In the language of the Attorney General "it must be construed in the light of its practical, popular and general sense, with the view of protecting the public against adversities and injuries which would naturally follow in the absence of this inhibition." And we make free to quote from the Attorney General again when he says: "The spirit and object of the constitutional inhibition must be regarded; it will not do to juggle with its technical meaning.'

Going back to the date when the constitutional convention was in session and viewing the physical and commercial conditions as they were at that date we must conclude either that a system of terminal railroad appliances such as the information shows has, since then, been involved in St. Louis, had not

then been conceived by the members of the convention, or else that they did not understand that they were affecting that class of public utilities when they adopted the clause now under consideration. Because if they had such traffic appurtenances in mind and if they intended to include them in the inhibition, they would have used words more apt to express such intention. The words as used are sufficient to forbid a consolidation of railroad companies whose lines are parallel or competing in the sense above mentioned tracking the state through its length or its breadth, they need no other words of explanation to give that effect and that is the effect that we would naturally conclude the framers of the constitution intended them to have.

We have a right to presume that a system of terminal railway appliances as a public utility was not altogether unknown to the members of the constitutional convention, though such a system was then in an undeveloped stage of existence, because, as early as 1871, the General Assembly had passed an act looking to the formation of such a system and, as the information shows, such a system was, in 1875, in a formative state in St. Louis. The act of 1871 amended from time to time as to the General Assembly seemed necessary to meet the wonderful growth of the city and its railroad traffic, has been preserved in our statutes and is now embodied in Sections 1164-1165, R. S., 1899, and Acts 1903, p. 130. The Act of 1871 (Sess. Acts 1871, p. 59) starts out with a declaration of the advantage to be attained and the disadvantages to be overcome by its enactment: "In order to facilitate the public convenience and safety in the transmission of goods and passengers in large cities

from one railroad to another and to prevent the unnecessary expense, inconveniences and loss attending the accumulation of a number of stations." Corporations to do the kind of traffic that the respondent is now engaged in doing were authorized to be found. Thus when the convention was in session there were in the state, corporations engaged in carrying over their railroads freight and passengers from one city to another, and other corporations engaged in trasferring the cars brought by a railroad to its terminus in a city to some other point in the same city or to a common terminus of all railroad traffic in that city. The characters of the business of the two kinds of corporations were essentiallly different though both related to railroad traffic. The one was railroad business in its ordinary meaning, the other railroad business of a special character. A law might naturally be designed with reference to the one without being intended to affect the other. The statute expressly authorizes the formation of a corporation to handle the traffic of all railroads approaching the city, and, to that end, to use a common track, to that extent therefore merging all the railroads in one; and it also authorizes the railroad companies to make such a combination among themselves. There is to be found in the Act of 1871 and its amendments, express authority for railroad companies parallel and competing or otherwise to unite or, if the term is preferred, consolidated, after they reach the city, so as to throw all their terminal business under a joint management. Thus at the time the constitutional convention was in session there was a law expressly permitting railroad companies to consolidate their properties and interests to this extent, and there was in fact, according to the averments in the information such a consolidation of in-

terests, by railroad companies, in operation in this city, therefore before we can say that the framers of the constitution intended this section to apply to corporations engaged in strictly terminal business, or to railroad companies uniting in a common terminal system, we must say that they intended to forbid the formation of such a union terminal system as the statute had expressly authorized.

The history of the railroad terminal business as disclosed in the information and the acts of the General Assembly affecting the same, show that neither the men engaged in the business nor the members of the General Assembly from first to last have ever put such an interpretation on the constitution.

The main purpose in the minds of the members of the convention in adopting this section was to preserve to the people who might have a choice of railroads between two points, the advantage in rates that would accrue to them from competition between rival companies. We must not lose sight of that purpose in our consideration of this subject.

The purpose of the statute of 1871 and its amendments as proclaimed in its preamble and as shown by its provisions is to obviate the necessity of every railroad having its own passenger station, freight depot and switch yard, involving the expense and inconvenience of moving passengers by means of omnibuses, and other such vehicles, to other stations in the city, and the unloading and hauling of freight from the terminus of one road to that of another or to the consignee's place of business in the city or from the manufactory to the railroad terminus all of which as appears in the now almost forgotten history of railroad traffic in the past, was accomplished at the great inconvenience and expense of the passenger and the shipper.

The purpose of the General Assembly was to allow such combination among the managers of the railroads entering the city as to reduce to the minimum the number of tracks, bring all the trains to one terminus, all freight to a common point for distribution, all cars to a common yard. It expressly authorized two or more railroad companies to do this and it put no limit to the number that might so combine.

The railroad companies in this state have for thirty years past been acting on the theory that they had the right to do that and so they have unless we can say that the framers of the constitution intended to forbid them doing so.

The purpose of the statute is not only not in conflict with the purpose of the constitution but is in aid of it. We have between our two greatest cities, St. Louis and Kansas City, four or five railroads which in the sense above mentioned are parallel and competing lines for the traffic between those two cities. Suppose a manufacturing concern in the northern part of the city has a switch track to its establishment connecting it with the Merchants Terminal tracks and desires to make shipments of its products to Kansas City, the business of the concern is of such magnitude as to make its patronage an object of rivalry ketween all the railroad companies reaching that market. But if the Merchants Terminal Company can deliver the cars which are loaded on the switch at the manufacturer's establishment to one railroad only that railroad has a practical monopoly of the business of that manufacturer. But if the whole terminal system is open to the shipper he may invite bids on his freight and employ the railroad that will take it at the lowest rate. That is the system that this respondent has established, and it is bound to serve all railroad companies ap-

proaching St. Louis on the same terms; in the language of the information (paragraph 10) " the general object and purpose being to provide the most ample and convenient connections, accomodations and terminal facilities in St. Louis for all railroads now entering, or hereafter to enter the same, and all individuals and companies doing business with said railroads." The state has ample power to hold the respondent to a faithful performance of that public duty, to prevent favoritism and to prevent extortion.

We gather from the information that all along the lines of the terminal tracks, intersecting the city from north to south, from east to west, and belting it on the west, there are manufacturing and other business concerns with switch tracks or spurs into their premises which enable the shipper to load the cars on the switch tracks on his premises and have them delivered to any railroad that reaches the city. A more effectual means of keeping competition up to the highest point between parallel or competing lines could not be devised. The destruction of the system would result in compelling the shipper to employ the railroad with which he has switch connections or else cart his product to a distant part of the city; at a cost possibly as great as the railroad tariff.

St. Louis is a city of great magnitude in the extent of its area, its population, and its manufacturing and other business. A very large number of trunk line railroads converge in this city. In the brief of one of the well informed counsel in this case it is said that St. Louis is one of the largest railroad centers in the world. Suppose it were required of every railroad company to effect its entrance to the city as best it could and establish its own terminal facilities, we would have a large number of passenger stations, freight depots and switch yards scattered all

over the vast area and innumerable vehicles employed in hauling passengers and freight to and from those stations and depots. Or suppose it became necessary in the exigency of commerce that all in-coming trains should reach a common focus, but every railroad company provide its own track; then not only would the expense of obtaining the necessary rights of way be so enormous as to amount to the exclusion of all but a few of the strongest roads, but, if it could be accomplished, the city would be cut to pieces with the many lines of railroad intersecting it in every direction, and thus the greatest agency of commerce would become the greatest burden.

This is what our General Assembly as early as 1871 to some extent at least foresaw and attempted to relieve against, and we cannot believe that the constitutional convention in 1875 was less appreciative of the conditions then present or in prospect, and hence we cannot believe that the convention, when it said that two lines of railroads that were parallel or competing should not be brought under one ownership or management, meant that two lines, used exclusively for bringing the trains from the several railroad termini in the city or at the city's border to a common terminus, should not be so consolidated; because as we have seen the consolidation of the terminal facilities promotes the competition that this clause in the constitution was designed to preserve.

What we have above said is intended to apply to the respondent in reference to the charge in the information that it has violated the clause of the constitution forbidding the consolidation of railroad companies whose lines are parrallel or competing; we hold that that constitutional inhibition was not

intended to apply to companies owning lines of railroads used alone in terminal business.

II.

The information charges that the roads owned by the respondent in 1893 and those owned by the Merchants Terminal Company were parallel or competing lines. That is the statement of a conclusion which depends for its correctness on the facts from which it is drawn. The words in the constitution descriptive of the lines are "parallel or competing." The conjunction "or" is there used to co-ordinate the two words which it connects, as equivalent, the one of the other. The law makers were concerned, not so much with the figure the lines of the roads would make when traced on the map, as they were with the commercial relation the lines bore to each other; the desideratum was to preserve the competition.

The two railroad bridges crossing the river are parallel, whether they could have been used in 1893 by their respective owners in competition with each other, depends on the facilities that each had for receiving and delivering trains from the various railroads approaching St. Louis from the east aimed for the Union Station or trains departing from the Union Station destined to the east.

The information gives us to understand that the respondent company was, already in 1893, before it acquired the right to use the Merchants Terminal tracks equipped to do that business, and it specifies the lines of railroad and appurtenances that constituted that equipment, but it it does not show that the Merchants Terminal Company was equipped o do a like business. In that important particular

this case differs from East St. Louis, etc., Ry. vs. Jarvis, 15 Am. & Eng. Ry. Cases (N. S.) 459, to which we are referred. In that case there were two belt lines which crossed and tapped all the railroads north of Cahokia Creek terminating in East St. Louis, and the two companies were in fact actively engaged in competing with each other for the same business. The court said: "It appears that in 1884 these two companies were cutting rates, buying business and losing money, and upon the advice of a mutual friend * * * the two companies concluded to put the two properties under the same management and as a result the leases in question were made." No such condition is shown in the case at bar.

In paragraph 26 of the information the lines of road owned and operated by the respondet at the date of the organization of the Merchants Terminal and thence down to the date of the agreement of consolidation complained of, are given, but in the next paragraph when the lines of the Merchants Terminal are given the present tense only is used. These lines are described as commencing at the Merchants Bridge thence going southwardly crossing certain streets and blocks described by name and number until it crosses block 419 and Eighth street, the description of the course then given is in these indefinite words "thence westwardly to the present Union Station." Whether the Merchants Terminal Company before the contract complained of had independent connection with the Union Station, or whether trains coming over the Merchants Bridge could have been delivered in the premises of the Union Station or trains destined for the east could have been taken thence over the route of the Merchants Terminal independent of the appliances of

the respondent the information does not say. It says the Merchants Terminal Company had a perpetual lease of the Merchants Bridge, but what connections it had on the east bank of the river or what facilities it had for receiving and delivering trains on that side it does not say. It does not say that before or at the time of the contract assailed the Merchants Terminal was in actual competition with the respondent in the hauling of trains, or that it had the means or equipment to compete with respondent for the business. The fact that connection is now made between the Merchants Terminal tracks and those of the Union Station do not justify the inference that such connections existed before the Merchants Terminal passed under control of the respondent.

The Merchants Terminal could not have been a competing line unless it had such connection, and it could not have become a competing line unless it had the right and power of acquiring such connection. The essential facts to constitute the Merchants Terminal a competing line with that of the respondent are not stated in the information, at most they are left to inference, but since the information is aimed at the life of the respondent it must be construed *contra proferentem.*

The facts stated in the information do not justify the conclusion therein drawn that the Merchants Terminal was at the time of the consolidation complained of, a competing line with the lines of the respondend.

III.

It is argued that the contract of August 17, 1893, whereby the consolidation was affected was *ultra vires* and that it was against public policy. This

assails the validity of the act of consolidation on grounds independent of the constitutional provision above discussed.

The Attorney General in his brief says: "And it has been time and again held that contracts made by and between *quasi* public corporations, whereby the corporate powers and duties of the one are delegated to the other, and where an attempt is made to alien either absolutely or conditionally the franchises essential to the performance of its public duties, are *ultra vires* and absolutely void." And authorities are cited in the brief which support the proposition.

Of course a statute cannot authorize the doing of an act which the constitution forbids. Since, however, we have concluded that the consolidation complained of is not within the range of the constitution inhibition we may now consider it in the light of the statute.

There is no controversy in this suit between individuals and the corporation; it is the state through its law officer that is here calling the corporation to the bar and demanding judgment of extinguishment of its corporate life on the ground that it has committed an act beyond its corporate power, and an act contrary to public policy.

It might be conceded without affecting the result, that in 1893 the respondent had not the corporate power to purchase the stock of the Merchants Terminal Company, but its act in that respect, even if *ultra vires*, was not for that reason necessarily against public policy. The effect of it was, according to the information, to put all the terminal railroad business under one management, but in so far as that concerned public policy it was in line with the policy declared in the preamble to the act of

1871 and repeated in every revision since that date. In 1903 Sections 1164, 1165 were amended expressly conferring on such terminal railroad companies the corporate power to acquire and hold the stock of other such companies. Sess. Acts 1903, p. 130.

The General Assembly is the source of corporate power and it is also the authority to declare the public policy of the State. Until the General Assembly has spoken on the subject, it is the province of the courts to judge whether or not a given act is contrary to public policy in the light of the common law, but after the law making power has declared the public policy, the courts must enforce the policy as so declared.

If it be conceded that in 1893 the acquisition by the respondent of the stock of the Merchants Terminal was against public policy, it is not so now because in 1903 the General Assembly expressly authorized it.

What right, therefore, has the state now to demand the annullment of the respondent's charter on the ground that it has done an act which it had no corporate power to do and which was then contrary to the public policy, when the state itself has, since the act was done, conferred on the respondent the right to do it and declared that it is in the interest of the public? In so far as it appears from the information, the state alone is interested in this matter, and since the state before this information was filed has expressly authorized the doing of the act in question, the court would not be justified in condemning the act as unlawful or against public policy.

The second count in the information relates to the acquiring by respondent of the property of the St. Louis Transfer Railway Company. What has al-

ready been said in reference to the first count applies with equal effect to this count.

The demurrer is sustained and ouster denied."

The sections of the Missouri Statutes referred to in the opinion are as follows:

Sections 1164 and 1165 as Amended 1903, of Statutes of Missouri

Section 1164.—In order to facilitate the public convenience and safety in the transmission of goods and passengers in and in the neighborhood of large cities, from one railroad to another, and to prevent the unnecessary expense, inconvenience and loss attending the accumulation of a number of stations, any number of persons not less than five, or any such number of persons, not less than five, and any railroad company or companies, are hereby authorized to form themselves into a corporation under the general laws of this state, relating to private corporations for the purpose of constructing, establishing and maintaining a union station for passengers or freight depots, or for both, in or in the neighborhood of any city of this state, with the necessary offices and rooms convenient therefor, and the appurtenances thereto, and, for that purpose, may make and sign articles in which shall be stated the number of years the same is to continue, the city in which the same is to be located, the amount of the capital stock of said company, which shall not exceed ten millions of dollars, the amount of each share of stock, the names and places of residence of its directors who shall manage its affairs for the first year and until others are chosen in their place, the number of its directors which shall not be less than five nor more than twenty, and shall also state the

amount of stock taken by each subscriber. And any railroad company may construct, build, operate and maintain a union station in, or in the neighborhood of any city of this state, for passengers or freight depots, or for both, with the necessary offices and rooms convenient therefor, and the appurtenances thereto, and shall have like powers in connection with any such union station or depots, or both, as are possessed by union depot companies formed under this act.

Section 1165.—**Powers of Such Corporation or Railroad Company.**—Every corporation formed under the preceding section, and every railroad company which may build and operate a union station or depot under said section, shall, in addition to the general powers conferred by the laws of this state, in relation to corporations, have power: First, to take and hold for the purposes mentioned in said section such real estate and railroad and other property as it may acquire by conveyance to said corporation, and such real estate as it may acquire under the provisions of said previous section by condemnation; second, to take, occupy and condemn any lands and real estate needed for the establishment of such union station or depot, or the terminal facilities in connection therewith, and the same proceedings shall be had therefor as provided by law relating to the appropriation and valuation of land taken for telegraph, macadamized, graded or plank or railroad purposes, so far as applicable thereto, and, when so condemned, the said land and any interest therein shall belong to such corporation or owner thereof; third, to hold and acquire, by purchase or condemnation, any such real estate as may be requisite or necessary for the purpose of constructing, erecting, maintaining and

operating terminal facilities for the use of the railroads occupying or having access to such union station or depot, and also to build, maintain and operate terminal railroads and terminal facilities to be used in connection with such union station or depot, and to build, maintain and operate railroads, ferries and bridges over navigable streams, or otherwise, and to construct tunnels as and for approaches to said union station or depot, and to such extent as may be deemed necessary by the corporation operating and maintaining such union station or depot, and for such purposes to acquire property and extend its terminal facilities beyond the limits of this state, and also to transport, or permit to be transported, persons and property over such railroads, ferries and bridges as may be built or operated by any corporation operating thereunder and to charge compensation therefor, and such depot or railroad company may acquire and hold the stock and obligations of any company operated in connection with or forming part of the terminal facilities of such union depot or railroad company, and may guarantee the principal and interest of such obligations and dividends upon such stock; fourth, to have the right to lay the necessary tracks across, over, upon or under such streets of the city in which said station or depot is to be constructed, and across, over, upon or under such roads of the county or counties into which such terminal facilities are to be extended, as may be necessary in order to make the necessary connections with all such railroads as are to have access to said station or depot, and also to construct such station or depot across, under, over or upon any such streets or roads: Provided, that nothing herein contained shall be construed to authorize the

construction of such tracks, or station or depot, not already located, across, under, over or upon any street in a city or a road of any county, without the consent of the corporate authorities of such city or the county court of said county; fifth, from time to time, to borrow such sums of money as may be necessary for the construction, completion, equipment, maintenance, finishing, operating or repairing of such station or depot, and the terminal facilities connected therewith, or for the purpose of funding its floating debt, or refunding its bonded debt, or for the purpose of making additions, alterations or betterments to its property, authorized by its charter, or for making any connection with any railroad which is to have access to such union station or depot, or with any bridge or tunnel connected with or forming a part of such terminal facilities, or for the construction, alteration or repair of any such bridge or tunnel connected with or forming a part of such terminal facilities, and for any or all of the above named purposes, may issue, sell, hypothecate and dispose of its corporate bonds for such amounts and at such prices as may by such corporation be deemed proper for obtaining any amount so borrowed, and may mortgage its corporate property and franchise or franchises, or any part or parts thereof, to secure the payment of such bonds or of any debt so contracted by such corporation for any of the purposes aforesaid; sixth, to open, from time to time, books of subscription to the remainder of the capital stock not taken by the subscribers to the articles of association: Provided, however, that any company organized under this act shall not have the power by condemnation to acquire the property now owned by any other union depot company or railroad com-

pany and used or needed for its corporate purposes, but any company formed hereunder shall have the same right and power to intersect, connect with and cross other railroads with its tracks, and to join and unite its tracks with those of similar companies or railroad companies as is by the constitution and laws of this state conferred upon railroad companies, and the same method of ascertaining the compensation to be made therefor shall apply as is provided in the case of railroad companies under similar circumstances.

STATEMENT 1

No. ~~686.~~ 385

IN THE

Supreme Court of the United States.

OCTOBER TERM, 1911.

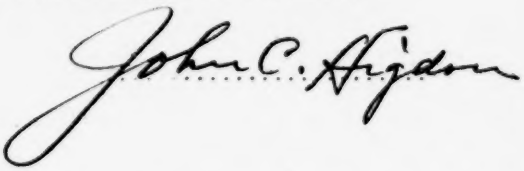
THE UNITED STATES,
Appellant,
vs.
THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al.,
Appellees.

MOTION FOR LEAVE AS AMICUS CURIAE TO FILE BRIEF AND MAKE ORAL ARGUMENT.

Now comes John C. Higdon and respectfully prays that leave may be granted unto him, as *amicus curiae*, to file herein a brief and make oral argument in support of the Government's position, **but more especially to suggest and show unto the Court that the Government is vitally interested in the subject-matter of this cause**, as shown by another cause now pending in the Circuit Court for the Eastern Judicial District of Missouri, in which your petitioner is a party complainant.

Such other cause is a suit filed by your petitioner on behalf of himself and all other citizens of the United

States against the said appellees (The Terminal Railroad Association) and others, for the appointment of a receiver, for an injunction and for an accounting of seventeen years' profits, **on the ground that said appellee , by its alleged illegal acts, long since forfeited to the United States the subject-matter herein mentioned, known as the Merchants Bridge, by violating the Bridge charter granted by Congress.** (Acts of February 3, 1887, and September 10, 1888.)



And in support of this motion your petitioner respectfully suggests and shows unto the Court that he and all citizens are substantially interested in the subject-matter as alleged in another cause now pending in the United States Circuit Court for the Eastern Division of the Eastern Judicial District of Missouri, in which your petitioner is a party complainant, entitled:

John C. Higdon and Numerous Citizens, Complainants, Versus St. Louis Merchants Bridge Company *et al.* and the Terminal Railroad Association of St. Louis, Defendants.	No. 5885.

That the defendants in said cause, St. Louis Merchants Bridge Company and the Terminal Railroad Association of St. Louis, are also defendants in the cause now before this Honorable Court and in which this motion is entitled.

That said other pending cause is founded upon a bill in equity, and involves the same identical and important question which is involved in the case at bar, to-wit:

> "Have the said defendants unreasonably and unlawfully combined, monopolized and operated, and are they now unreasonably and unlawfully operating the Eads Bridge and the Merchants Bridge (the only two steam railroad bridges across the Mississippi River at St. Louis) in interstate commerce between the States of Missouri and Illinois in violation of the acts of Congress?"

That said other cause also involves the question as to whether or not the said defendants have (by the al-

leged unreasonable and unlawful combination and operation of the said two bridge properties) violated and forfeited the charter of the said Merchants Bridge, granted by Congress, and forfeited the said Bridge itself to the United States?

That the bill of complaint in said other cause alleges, **and the said defendants have admitted,** in the answer filed by them in the cause in which this motion is entitled, that the said properties of the two bridge companies have been consolidated, combined, and are now being jointly operated by the said defendant, The Terminal Railroad Association of St. Louis.

Your petitioner respectfully suggests and shows unto the Court that the question of the unlawful consolidation, combination and operation of the said two bridges is of great interest and importance, not only to the parties to this cause, but to your petitioner, and also to the public.

This is so, because under the charter of said Merchants Bridge every citizen of the United States has a part ownership in the said Merchants Bridge.

The Merchants Bridge was chartered by Acts of February 3, 1887, and Sept. 10, 1888, and the act first referred to contained the following *proviso*, which said bill alleges (and the defendants admit) has been violated:

> "Provided, That if this provision of this act shall at any time be violated in any of these particulars, such violation **shall,** without legal proceedings, **at once forfeit the privilege hereby granted, and said bridge shall become the property of the United States, and** the Secretary of War shall take possession of the same in the name and for the use of the United States."
>
> 24 Stat. at Large, page 375.

Your petitioner respectfully suggests and shows unto the Court that the bill of complaint herein, and in the said other cause now pending in the court below (No. 5885) alleges that the said defendants herein have violated said Acts of February 3, 1887, and Sept. 10, 1888, by unlawfully and unreasonably combining the said two bridge properties.

Further, that your petitioner himself is a complainant in said co-pending cause; that in addition to being (as he is) a member of the bar of this honorable Court, he was a business man—a stockholder in a certain corporation which (as alleged in his said bill) was greatly damaged and driven out of business by reason of the alleged unreasonable, unlawful and fraudulent acts of said defendants herein; and that he filed a bill in equity in said cause on behalf of himself, as well as all other citizens of the United States who might join therein, praying for an injunction, suitable compensation for the seventeen (17) years' alleged unlawful operation of the said Merchants Bridge by the said defendants, and for a dissolution of the unlawful consolidation and monopoly complained of, all as will appear by a copy of said bill to be annexed to your petitioner's brief.

And your petitioner respectfully suggests and shows unto the Court that he has examined the briefs and pleadings in the case at bar (in which this motion is entitled) so far as the briefs have been exhibited to date hereof; has carefully studied the questions involved in both of said causes; and that the brief which your petitioner prays leave to file herein will contain certain considerations not found in the case now on file in this court, as your petitioner believes; and which considerations, as your petitioner believes, have an

important bearing upon the question of unreasonable combination and monopoly involved herein under the Sherman Anti-trust Act.

And therefore your petitioner prays leave, as *amicus curiae,* to file a brief and make oral argument in the cause in which this motion is entitled.

Respectfully submitted,

.....

THE UNITED STATES,
Appellant,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al.,
Appellees.

STATEMENT.

This is a petition, under the Sherman Act, to enforce that act as against the appellees to dissolve an alleged unreasonable monopoly in interstate commerce.

I cannot do better than to adopt the statement of the esteemed counsel for the Government, and especially that contained in the brief filed herein of the Hon. Edward C. Crow, special counsel for the Government.

In lieu of cumbering the records with another brief,

I have hereto attached a copy of the bill of complaint filed in another cause now pending in the court below, entitled:

John C. Higdon, and Numerous Citizens, Complainants, vs. St. Louis Merchants Bridge Company *et al.*, and the Terminal Railroad Association of St. Louis, Defendants.	No. 5885.

Attention is respectfully called to the statement (page 3) of the said bill of complaint, and to the prayer for relief.

Respectfully submitted,

John C. Higdon

IN THE

Circuit Court of the United States

EASTERN DIVISION

EASTERN DISTRICT OF MISSOURI

JNO. C. HIGDON, AND NUMEROUS OTHER CITIZENS,
Complainants,

vs.

ST. LOUIS MERCHANTS BRIDGE CO., DAVID R. FRANCIS; ST. LOUIS MERCHANTS TERMINAL RAILWAY CO., ST. LOUIS BRIDGE CO., AND THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS,
Defendants.

IN EQUITY
No. 5885.

BILL OF COMPLAINT.

To the Judges of the Circuit Court of the United States for the Eastern District of Missouri:

1. John C. Higdon, a citizen of the United States and of the State of Missouri, and a resident of St. Louis in said State, on behalf of himself and all other citizens of the United States who might join herein, brings this, his bill

of complaint, against David R. Francis, a resident of the City of St. Louis in said State of Missouri; the St. Louis Merchants' Bridge Company, the St. Louis Merchants' Bridge Terminal Railway Company; the St. Louis Bridge Company; and the Terminal Railroad Association of St. Louis, corporations organized, existing and doing business under and by virtue of the laws of said State of Missouri and having their principal offices and places of business at the said City of St. Louis.

STATEMENT.

And thereupon, your orator complains and says:

2. That the officials of the said defendant corporations, more than a quarter century ago, usurped the prerogative of the people of the City of St. Louis, and bound them with the chains of taxation without representation, and the same is true of the people throughout the entire State of Missouri; the plutocracy thereby established entrenching itself so firmly that it became and is notorious under the various appellations of the "Bridge Arbitrary," the "Bridge Trust" and the "Big Cinch."

3. Their said nefarious object, the said defendant corporations accomplished by their monopolistic ownership and operation of the one existing bridge extending across the Mississippi River at St. Louis, at that time.

4. On information and belief, your orator and innumerable other citizens of St. Louis and of the State of Missouri, occupying territory west of the Mississippi River, have been for more than twenty-five years, and now are, in this boasted twentieth century, in abject commercial servitude to the despotic decrees of the defendant corporations, as our forefathers were in 1766 to the monstrous "Stamp Act" of George III., culminating in the signing of the immortal Declaration of Independence.

The First Bridge at St. Louis.

5. The first bridge across the Mississippi at St. Louis (known and called hereinafter the Eads Bridge) was built at St. Louis by the Illinois Bridge Company, and opened for operation on July 4th, 1874. This bridge was built by

a corporation independent of any railroad company, and was erected as an independent instrument of interstate commerce, and has its western approach at the foot of Washington avenue, in the City of St. Louis and its eastern terminus in East St. Louis, Illinois; it has a double deck and has a double track, standard gauge railroad, on its lower or first deck, and immediately over the said railroad tracks a wagonway and sidewalk for pedestrians and a double track electric line.

6. The above described deplorable condition of the people continued on down to 1887, when a number of leading citizens of St. Louis, spurred by their guiding spirit, the said defendant, David R. Francis, undertook to get rid of the discrimination against the business interests of their State, and of the high freight rates, by building a second bridge over the Mississippi River to compete with the Eads Bridge.

The Second Bridge at St. Louis.

7. The said defendant, David R. Francis, patriotically headed the movement for the second bridge at St. Louis; he was then President of the St. Louis Merchants' Exchange; he, together with other leading citizens and the business men generally of the City of St. Louis, banded together and appealed to Congress for a franchise to erect a competing bridge over the Mississippi River; the charter was granted by Congress, and the bridge was duly erected and opened for business in 1890, as a competing instrument of interstate commerce.

8. There was inserted in the charter of this bridge (hereinafter known as the Merchants' Bridge) at the urgent request of the said defendant, David R. Francis, and others, *the provision that if said bridge should ever be consolidated with any other bridge across the Mississippi*

River, or that its earnings be pooled with the earnings of any other bridge company on said river, or that if any person who is or may be a director or manager in any other bridge company over said river, be a director or manager of the said Merchants' Bridge, or that if any stockholder in any other bridge over the Mississippi be a stockholder, director or officer of the said Merchants' Bridge, then the bridge company should forfeit its charter and the said bridge should become the property of the United States.

St. Louis' Declaration of Independence.

9. This charter was hailed with delight by the citizens of the State of Missouri, and it may be truthfully said to have constituted their Declaration of Independence of the "Bridge Trust" hereinbefore described.

10. The said act of Congress was approved February 3rd, 1887, and contains the following:

"Section II. That, whereas, the principal reason for giving authority to build the bridge herein contemplated is to secure reasonable rates and tolls for corporations and individuals for passing over the same, the St. Louis Merchants' Bridge Company or its successors or assigns shall not agree or consent to the consolidation of this bridge with any other bridge across the Mississippi River, or to the pooling of the earnings of this bridge company with the earnings of any other bridge company on said river, nor shall any person who is or may be a stockholder, or director, or manager, of any other bridge over said river be a stockholder, or director or manager of the bridge herein provided for:

PROVIDED: That if this provision of this act shall at any time be violated in any of these particulars, such violation shall, without legal proceeding, at once forfeit the privilege hereby granted, and said bridge shall become the

property of the United States, and the Secretary of War shall take possession of the same in the name and for the use of the United States." (24 Stat. at large, p. 375).

11. Your orator, and thousands of other citizens of the State of Missouri had hoped that the said defendant, David R. Francis, and the officers of the said defendant corporations, would have faithfully performed their promises to the people by permitting the said Merchants' Bridge to become and remain an independent instrument of interstate commerce, as in justice and equity they should have done.

12. But now, so it is may please your honors, the said David R. Francis, combining and confederating with other officers of the said defendant corporations and with divers other persons at present unknown to your orator (but whose names, when discovered, your orator prays may be inserted herein with apt words to charge them as parties defendant hereto) and contriving how to wrong and injure your orator and numerous other citizens of the United States in the premises, he, the said David R. Francis, and the officers and paid mercenaries of the said defendant corporations, wrongfully and fraudulently, in violation of the statute above quoted, sold, assigned and transferred the ownership and control of the said Merchants' Bridge to the said defendant corporations who own and control the said Eads Bridge, and the said defendants further violated the said statute by pooling the earnings of the said Merchants' Bridge with the earnings of the said Eads Bridge, all as has been proven and admitted by the said defendants in another suit between substantially the same parties, now pending on appeal from this Court in the Supreme Court of the United States and entitled and designated as follows, to-wit:

No. 686. The United States, Appellant, vs. The Terminal Railroad Association of St. Louis, et al.

13. And your orator says that the said defendants, like unto Benedict Arnold, shamefully betrayed their fellow citizens in the premises, as is shown by the following recital of the facts:

The said defendants, supposing they could vitiate the provisions of the said statute relative to forfeiture, deceived and fraudulently advised Congress, and thereby procured an amendment to said act of Congress against the wishes and rights of the citizens of the United States, intending and contriving to defeat the object for which said Merchants' Bridge was built; the said amendment striking out the word "stockholder" in said Section 11, wherever it occurred; but, as was truthfully said by the illustrious and lamented (but deceived) George G. Vest, on the floor of the Senate, and the lamented (but deceived) Congressman O'Neill, on the floor of the House, at the time of the passage of said amendment:

"THE RIGHTS OF THE PEOPLE ARE AMPLY PROTECTED IN OTHER 'PROVISIONS OF THE BILL.'"

14. The clause in the statute in relation to forfeiture of the bridge still stands, like Gibraltar, a bulwark of the people's rights and as a shining mark of the said defendants' perfidy and corruption. (Amendment approved Sept. 10, 1888. Stat. at Large, vol. 25, p. 474).

15. The whole story of the deception is set forth in detail in the Congressional Record, Vol. 19, part 8, pp. 7861 and 7948.

16. But defendants pretend that because the said amendment permitted stockholders in other bridge companies to become stockholders in said St. Louis Merchants' Bridge Company, the existing unlawful combination could not be averted, when, as a matter of fact, such unlawful combination could readily have been prevented.

and would have been prevented, had the officers of the said defendant corporations performed their usual and expected duty to the people of the United States, but which they failed to do, as aforesaid.

17. Your orator is a member of the bar of this Court and that of the Supreme Court of the United States.

18. He, since the unlawful combination complained of, and prior to the beginning of this suit, invested in an automobile manufacturing business, located in the said City of St. Louis, Missouri, the savings of many years' labor, but the said concern, your orator avers on information and belief, owing in a great measure to the said unlawful acts of the said defendant corporations, as aforesaid, was forced to retire from business and is now engaged in settling up its affairs and endeavoring to begin business anew, the amount of your orator's loss being fully fifteen thousand dollars ($15,000).

19. Your orator, on information and belief, charges that his said loss was indirectly caused by the unlawful acts of the said defendants, and each of them; that the said loss included your orator's family residence at 5561 Von Verson avenue in the City of St. Louis, where he had continuously resided with his family for the period of seventeen years; that by reason of said loss your orator has been reduced to almost a condition of absolute want; that he has been threatened with expulsion from clubs and fraternal organizations, because he has failed to pay his dues therein; and finally he has been compelled to borrow the money necessary to deposit with the Clerk of this Court, as security for costs herein.

20. All this, after almost a lifetime of honest professional activity.

21. Notwithstanding this state of affairs, your orator avers that the said defendants and their cohorts, upon the filing of this suit, will promptly charge your orator with

all sorts of perfidy, misdemeanors and immorality, although your orator has never even thought of approaching any of the defendants in any way, assiduously refraining from even the appearance of such evil; and your orator avers that in filing and prosecuting this suit he is lacking in any desire for personal aggrandizement, and during his many years' practice as a patent lawyer, has had very many opportunities to purloin valuable inventions and otherwise to profit at the expense of his fellow men, but has declined them all, and he does not intend to begin wrongdoing at this late day, the anticipated accusations of the said defendants to the contrary notwithstanding.

22. And, on information and belief, your orator's fate is that of hundreds of other citizens and business men of the City of St. Louis and State of Missouri, whose living expenses have been enormously increased; whose business has been driven across the Mississippi River into the State of Illinois; or has been entirely destroyed by the said unlawful acts of the said defendants.

23. Your orator further avers on information and belief that the representatives of the said defendants will make every unfair effort to impede the progress of this suit, and they will pretend that your orator has no legal or equitable right to bring this suit without the authority of the Attorney General of the United States, and they will pretend that this suit should have been brought by the United States District Attorney, instead of a private citizen.

But your orator shows that he has under the constitution of the United States, and by the authority of the Supreme Court of the United States a legal and equitable right to bring a suit of this nature on behalf of the citizens of the United States, as well as for himself. (Hall vs.

Union Pac. Ry. 3 Dillon 515, Iowa 1875, *Affirmed* by Sup. Ct. Union Pac. Ry. vs. Hall, 1 Otto, 343).

"Living as we do under a common government, charged with the great concerns of the whole Union, every citizen of the United States, from the most remote states or territories, *is entitled to free access not only to the principal departments established at Washington, but also to the judicial tribunals and public offices in every state and territory of the Union.*" .. .. "For all the great purposes for which the federal government was formed, *we are one people, with one common country.*"

"We are all citizens of the United States; and as members of the same community, must have the right to pass and repass through every part of it, without interruption, as freely as in our own states."

"And a tax imposed by a state (or by a corporation of a state) for entering its territories or harbors, is inconsistent with the rights which belong to the citizens of other states as members of the Union, and with the objects which that Union was intended to attain."

2. "Such a power in the states could produce nothing but discord and mutual irritation, *and they very clearly do not possess it.*"

(Justice Miller in pronouncing the opinion of the Supreme Court of the United States, as he did in the case of Crandall vs. State of Nevada, 6 Wallace 35). (Passenger cases, 7 Howard 283).

In this connection your orator shows on information and belief that he duly requested the honorable United States District Attorney for the Eastern District of Missouri, to bring this suit against the Terminal Railway Association of St. Louis for an injunction and accounting of profits since the year 1893, on behalf of himself "and all other citizens of the United States."

In this connection your orator shows that he duly notified the honorable Attorney General of the United States to bring mandamus proceedings against the honorable Secretary of War to compel him to take possession of the said Merchants' Bridge, as provided by law in the act of September 10, 1888; and he further requested him, on behalf of himself and the people, to bring suit in the proper court against said combination, for an injunction and an accounting.

Your orator further shows on information and belief that he duly notified the honorable Secretary of War of the rights of the people in the United States in the premises, and requested him to carry out the said law, and take possession of said Merchants' Bridge as the property of the United States.

24. Your orator further avers, on information and belief that owing to the said unlawful acts of the said defendants, the State of Missouri has long been and is now known by the disgraceful appellation of "Poor old Missouri," and has been reduced from its prior position of fifth in population among the states to the seventh position, as shown by the last official report of the Census Bureau.

25. Your orator further shows that singlehanded and alone he began this fight for the people's rights, as against the wily octopus whose slimy tentacles have so long strangled the commerce of said State of Missouri; but now that the conflict has begun, your orator hopes that the soulful press, the real representatives of the people, the business men of St. Louis, the patriotic officers of the Business Men's League, the Missouri Manufacturers' Association, the St. Louis Million Population Club and other business organizations of St. Louis, will give him their moral support.

26. Your orator further shows that it is the duty of his brother lawyers to volunteer their services and come to your orator's assistance in his efforts to uphold the people's rights in the premises.

27. Your orator further avers on information and belief that the said defendants have already subsidized a portion of the press of the State of Missouri; the said defendant, David R. Francis, being the owner or controller of a majority of the stock of the "St. Louis Republic;" the said defendants have unlawfully controlled the Legislature of the State of Missouri, as witness the monstrous amendments to Section 1164-1165 of the Revised Statutes of the State of Missouri, unlawfully procured in 1903, about the time of the unlawful combination hereinbefore complained of, said amendments making it lawful for the said defendant, the Terminal Railway Company of St. Louis, to "acquire and hold the stock of such other companies." Sess. Acts 1903, p. 130; and finally the said defendants have, by said amendments, rendered powerless the faithful efforts of the Attorney General of the State of Missouri.

28. But for the said fraudulent and inequitable acts of the said defendants, the citizens of said State of Missouri would have enjoyed the benefits of free and untrammeled interstate commerce across the Mississippi River at St. Louis for the past seventeen years, and thereby have added great wealth and population to the commercial interests of the said city and state, as was admitted by the said defendant, David R. Francis, when on May 6th, 1887, at which time he was Mayor of St. Louis and a director in the said St. Louis Merchants' Bridge Company, and also chairman of the Transportation Committee of the St. Louis Merchants' Exchange, he made a report to the people in which he stated that an abolition of the bridge trust would bring about a saving to the City of St. Louis of not less than $1,000,000 annually, making a total of $17,000,000 during the past seventeen years approximately, which amount, by reason of the said unlawful combination, has been diverted from the business interests of your orator and other citizens of St. Louis, but of the exact amount your orator is ignorant and cannot say.

29. Your orator further charges that by reason of the unlawful acts of the said defendants in illegally retaining possession of and in the operation of the said Merchants' Bridge for the period of seventeen years last past, your orator and the other numerous parties complainant hereto have sustained approximate damages in amounts believed to be approximately as follows:

Value of the St. Louis Merchants' Bridge and easements (approaches)	$ 3,500,000
Rents and profits earned by the Merchants' Bridge for seventeen years, at $2,750,000 per annum	46,750,000
The damages admitted by the said defendant, David R. Francis, at $1,000,000 per annum	17,000,000
Total	$67,250,000

Thus estimated, approximately, the amount due your orator and the other citizens of the United States from said defendants, and in controversy hereunder, exclusive of interest and costs is $67,250,000, but of the exact amount your orator is ignorant and cannot say.

30. Your orator did not acquire knowledge or notice of the fraudulent acts hereinbefore set forth before the first day of January, 1910.

31. Your orator is without any adequate relief at law.

32. Your orator offers to do whatever equity requires in the premises.

33. Your orator further shows that he fears and has reason to fear that unless the said defendants are restrained by a writ of injunction issuing out of this Court, that they will continue to practice the said unlawful acts by retaining possession of the said Merchants' Bridge and by operating the same in violation of the law to the great detriment of your orator and all other citizens of the United States, and therefore will cause irreparable injury to your orator's and other citizens' aforesaid rights in the premises.

PRAYER.

Wherefore, your orator on behalf of himself and the people of the United States, prays as follows:

1. That a subpoena may issue out of this honorable Court, directed to said defendants, St. Louis Merchants' Bridge Company, David R. Francis, St. Louis Merchants' Terminal Railway Company, St. Louis Bridge Company and the Terminal Railroad Association of St. Louis, requiring and commanding them to appear in this cause upon a day certain and answer the several allegations in this bill of complaint contained, an answer under oath being hereby expressly waived.

2. That it may be adjudged and decreed by this honorable Court that the combination and conspiracy hereinbefore described are unlawful, and that all acts done or to be done in carrying it out are in derogation of the common rights of the people of the United States, and a violation of the said acts of Congress of February 3, 1887, and September 10, 1888, hereinbefore referred to.

3. That it may be adjudged and decreed by this honorable Court that Section 11 of the said acts of Congress of 1887 and 1888 have been violated by the said defendants in performing the unlawful acts hereinbefore described, and that they have thereby forfeited all right to the said Merchants' Bridge, and the necessary easements thereunto belonging, and together with all rents and profits derived therefrom since said unlawful combination was made in the year 1893.

4. That it may be adjudged and decreed by this honorable Court that the said Merchants' Bridge has by reason of the said unlawful acts of the said defendants, been for-

feited to, and did on the 17th day of August, 1893, become the property of the United States; and that this honorable Court further decree that the Secretary of War shall take possession of the said Merchants' Bridge in the name and for the use of the United States.

5. That it may be adjudged and decreed by this honorable Court that the said defendants be compelled to render a full, true and perfect account under the direction of this honorable Court for all money, assets, rents and profits of whatever nature, which have been received by it since the date, August 17, 1893, to the present time, inclusive, or of the income thereon together with all payments and dispositions made by it of moneys, assets and property of every nature and description since date.

6. That for the purpose of preserving intact the assets of said defendants, and for the purpose of recovering possession of the said Merchants' Bridge or its reasonable value in money, your orator prays that one or more suitable persons may be appointed interlocutory receiver or receivers of the assets, effects and credits of the said defendants, the St. Louis Merchants' Bridge Company, the St. Louis Merchants' Terminal Railway Company, the St. Louis Bridge Company and the Terminal Railroad Association of St. Louis, to preserve their said assets until the final decree herein, with all the usual powers conferred by all, and such other powers in the premises as to this honorable Court shall seem fit; and that said receiver or receivers herein be continued in the final decree to carry the same into effect.

7. That the said defendants and their officers, directors, agents, attorneys and servants may be perpetually enjoined and restrained by injunction of this honorable Court from selling, alienating or in any manner disposing of any of the property, money choses in action, securities, assets or effects whatsoever of the said defendants, or from removing from the State of Missouri or otherwise dispos-

ing of any documents, contracts, obligations, records, books, accounts or papers belonging to or in the possession or control of the said defendant or its officers, directors, agents, attorneys or servants, and that a preliminary injunction may issue out of this honorable Court enjoining and restraining the said defendant, its officers, directors, agents, attorneys and servants in like manner until the further order of the Court.

8. That your orator may have for it other and further remedy in the premises as may be just, including its costs.

And your orator will ever pray, etc.

JOHN C. HIGDON,

On behalf of numerous other citizens of the United States, as well as for himself.

JOHN C. HIGDON,
of Counsel.

JOHN C. HIGDON,
Solicitor for Complainant.

United States of America,
Eastern Division of the Eastern Judicial District of Missouri.

John C. Higdon, being duly sworn, deposes and says: I am the said complainant in the above entitled action; I have read the foregoing bill of complaint, and know the contents thereof, and the same is true to my own knowledge, except as to the matters therein stated to be alleged on information and belief, and as to those matters, I believe it to be true.

(Signed) JOHN C. HIGDON.

Subscribed and sworn to before me, this 3rd day of November, 1910.

(Signed) JAS. R. GRAY,
(Seal) United States Commissioner.

UNITED STATES *v.* TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF MISSOURI.

No. 386. Argued October 20, 23, 1911.—Decided April 22, 1912.

Whether the unification of terminals in a railroad center is a permissible facility in aid of interstate commerce, or an illegal combination in restraint thereof, depends upon the intent to be inferred from the extent of the control secured over the instrumentalities which such commerce is compelled to use, the method by which such control has been obtained, and the manner in which it is exercised.

The unification of substantially every terminal facility by which the traffic of St. Louis is served is a combination in restraint of interstate

trade within the meaning and purposes of the Anti-Trust Act of July 2, 1890, as the same has been construed by this court in *Standard Oil Co.* v. *United States*, 221 U. S. 1, and *United States* v. *American Tobacco Co.*, 221 U. S. 106.

The history of the unification of the railroad terminal systems in St. Louis in the Terminal Railroad Association shows an intent to destroy the independent existence of the terminal systems previously existing, to close the door to competition, and to prevent the joint use or control of the terminals by any non-proprietary company.

A provision in an agreement for joint use of terminals by non-proprietary companies on equal terms does not render an illegal combination legal where there is no provision by which the non-proprietary companies can enforce their right to such use.

Although the proprietary companies of a combination unifying terminals may not use their full power to impede free competition by outside companies, the control may so result in methods inconsistent with freedom of competition as to render it an illegal restraint under the Sherman Act.

This court bases its conclusion that the unification of the terminals in St. Louis is an illegal restraint on interstate traffic, and not an aid thereto, largely upon the extraordinary situation at St. Louis and upon the physical and topographical conditions of the locality.

A combination of terminal facilities, which is an illegal restraint of trade by reason of the exclusion of non-proprietary companies, may be modified by the court by permitting such non-proprietors to avail of the facilities on equal terms.

In this case *held* that the practices of the Terminal Association in not only absorbing other railroad corporations but in doing a transportation business other than supplying terminal facilities operated to the disadvantage of interstate commerce.

One of the fundamental purposes of the Anti-Trust Act is to protect, and not to destroy, the rights of property; and, in applying the remedy, injury to the public by the prevention of the restraint is the foundation of the prohibitions of the statute. *Standard Oil Co.* v. *United States*, 221 U. S. 1, 78.

Where the illegality of the combination grows out of administrative conditions which may be eliminated, an inhibition of the obnoxious practices may vindicate the statute, and where public advantages of a unified system can be preserved, that method may be adopted by the court.

In this case the objects of the Anti-Trust Act are best attained by a decree directing the defendants to reorganize the contracts unifying

the terminal facilities of St. Louis under their control so as to permit the proper and equal use thereof by non-proprietary companies, and abolishing the obnoxious practices in regard to transportation of merchandise.

Unless defendants, whose combination has been declared illegal by reason of administrative abuse, modify it to the satisfaction of the court so as to eliminate such abuse in the future, the court will direct a complete disjoinder of the elements of the combination and enjoin the defendants from exercising any joint control thereover.

THE facts, which involve the validity under the Sherman Anti-trust Act of the Terminal Railroad Association of St. Louis, are stated in the opinion.

Mr. E. C. Crow, Special Assistant to the Attorney General, with whom *The Attorney General* and *Mr. Charles A. Houts*, United States Attorney, were on the brief, for appellant:

The record shows a plain violation of the Sherman Act of July 2, 1890.

Every contract, combination in the form of trust or otherwise, or conspiracy, in undue restraint of trade or commerce among the several States or foreign nations, is illegal. See § 1.

Monopolizing, or attempting, combining or conspiring to monopolize interstate or foreign trade or commerce is illegal. See § 2.

Certain fundamental considerations control. The statute is aimed at restrictions upon interstate commerce. Given a reasonable construction, as it must receive, its purpose is to permit commerce between the States and with foreign nations to flow in its natural channels unrestricted by any combinations, contracts, conspiracies, or monopolies whatsoever. *Hopkins* v. *United States*, 171 U. S. 586; *Loewe* v. *Lawlor*, 208 U. S. 274.

Combinations between competing railroads engaged in interstate commerce to unduly restrain commerce and combinations between *media* or instruments of interstate

commerce fall within the prohibition of the act. *United States* v. *Trans-Missouri Freight Association*, 166 U. S. 319; *United States* v. *Joint Traffic Association*, 171 U. S. 505; *Addyston Pipe &c. Co.* v. *United States*, 175 U. S. 244; *Northern Securities Co.* v. *United States*, 193 U. S. 197; *Anderson* v. *United States*, 171 U. S. 604; *Standard Oil Co.* v. *United States*, 221 U. S. 1.

To monopolize interstate commerce, or the *media*, or instruments of interstate commerce, is to secure, or adopt measures which may bring about an exclusive control of such commerce or of such instruments of commerce so as to prevent others from engaging therein, or using such instruments of commerce. *In re Green*, 52 Fed. Rep. 115; *Northern Securities Co.* v. *United States*, 193 U. S. 197, 402; *United States* v. *American Tobacco Co.*, 164 Fed. Rep. 700; *United States* v. *Knight*, 156 U. S. 1.

It is not necessary to bring a combination within the act, that the result of its operation shall be complete restraint or monopoly, or that it shall have resulted in actual injury to the public. It is sufficient if it really tends to that end and to deprive the public of the advantages which flow from free competition. *United States* v. *Chesapeake &c. Fuel Co.*, 115 Fed. Rep. 610; *United States* v. *E. C. Knight Co.*, 156 U. S. 16; *Northern Securities Co.* v. *United States*, 193 U. S. 197; *Chattanooga &c. Works* v. *Atlanta*, 203 U. S. 390.

The Terminal Association is necessarily engaged in interstate commerce. *United States* v. *Union Stock Yards*, 161 Fed. Rep. 919; *United States* v. *Colorado &c. R. R.*, 157 Fed. Rep. 321; *United States* v. *R. P. T. Co.*, 144 Fed. Rep. 861.

Mr. H. S. Priest, with whom *Mr. T. M. Pierce* was on the brief, for appellees:

The terminal service necessary to be done in a great city may, any or all of it, be done by the railroad com-

panies for themselves. A company may build its own line connecting with another road on the other side of the city, and it may use its own wagons to receive and deliver freight at store doors.

This, and no more, the railroad companies of St. Louis have done. They have acquired the terminal facilities of St. Louis for themselves and are operating them as a part of the instrumentalities of their business. That each one might do this if the instrumentalities employed were its own is conceded, but it is denied that they may combine with each other for that purpose.

The unitary system is in accord with public policy.

Terminal service is a matter of internal economy which the companies may adjust to mutual advantage and no arrangement respecting it operates to restrict competition between them as to the transportation service for the public in which they are engaged.

Whatever facility railroad companies may use in common they may own in common. Common arrangements affecting internal economy have never been held to be in violation of public policy and whenever, in the advance of civilization, they have suggested themselves as feasible, they have been recognized by law, and appropriate regulations have been prescribed for them. In the country every man builds independently. In the crowded section of a great city, however, if all construction were done independently, the waste in space and the increase in cost of construction would be very great.

Community of use of terminals in a large city is more than a matter of convenience, or economy; it is an absolute public necessity.

Under the Interstate Commerce Law, and indeed under the common law of the land, tolls must be reasonable, and the Government has the power to make them so if they are not. The charges of extortion and that the proprietary railroad companies compel all other railroad companies to

use the facilities are not true. There is, indeed, a compulsion, but it is inherent in the situation. The other companies use the terminal property because it is not possible to acquire adequate facilities for themselves. The cost to any one company is prohibitive.

Every consideration of a public nature points to a consolidation of the terminals and to a common use of them by all the railroad companies coming into the city. But to avoid the odious phases of a monopoly, this use must be open to all upon equal terms. The charge for service in any case can be stated in one word—cost. No money received for the service rendered goes to any other purpose than paying expenses of operation, taxes, fixed charges, and proper maintenance. No dividends are paid upon terminal shares, and no proprietary railroad company is a beneficiary of fixed charges. Any new railroad built into St. Louis now has but to secure a way to a terminal track and it has at once the advantages of the entire terminal system.

The public policy of the country as indicated by statutory enactments has been in favor of combination by railroad companies whenever any common matter of internal economy is involved, and also where the combination is in the nature of connecting lines of railroad for the purposes of continuous transportation. Two bridges across a great river, where one will serve, do not facilitate commerce, but burden it with an unnecessary charge.

Common use of the same facilities by different railroad companies has not only been approved, but has been enforced whenever there has been good reason therefor. Act of March 3, 1875, 18 Stat. 510; §§ 1164, 1165, Rev. Stat. Missouri; Union Depot acts of the State of Illinois; April 7, 1875; of Alabama; of February 15, 1907, of Indiana; Burns' Ann. Stat., Col. 2, §§ 5345, 5374; of Iowa, §§ 2099 to 2102, Annotated Code of 1897; of Maine, 60, 51, Rev. Stat. 1903; and of Michigan, Chap.

166, Comp. Laws, 1897; of Minnesota, Act of March 5, 1879; of Nebraska, Chap. 20, Laws of 1887, § 1816, Comp. Stat. 1901; of Ohio, Chap. 3, Tit. 2, 2 Bates' Ann. Stats.; of South Carolina, Code of 1902, Vol. 1, 813; of Tennessee, §§ 2429 to 2437, Code of 1896; of Texas, Chap. 16a, Civil Stat. 1897; of Virginia, § 1294, Code 1904. See Acts of Congress relating to Union Station in Washington, D. C.

It would be singular indeed, if all of the States severally, and the United States as well, were giving their sanction to arrangements and agreements which are in violation of the Sherman Act, and it is much more probable that a construction of that act leading to such a result is entirely without warrant.

Union terminals have been frequently before the courts for consideration, and have always been recognized and approved as legitimate agencies in the work of railroad transportation. *State* v. *Terminal R. R. Assn.*, 182 Missouri, 284; *Bernard* v. *Cheeseman*, 7 Colorado, 376; *Central Railroad Company* v. *Perry*, 58 Georgia, 461; *Birdwell* v. *Gate City Terminal Co.* (Ga.), 10 L. R. A. (N. S.) 909; *Indianapolis Union Railway Co.* v. *Cooper*, 6 Ind. App. 202; *Reisner* v. *Strong*, 24 Kansas, 410; *State* v. *Martin*, 51 Kansas, 462; *Mayor* v. *Norwich R. R. Co.*, 109 Massachusetts, 103; *Mayor* v. *Railroad Commissioners*, 113 Massachusetts, 161; *Union Depot Co.* v. *Morton*, 83 Michigan, 265; *Detroit Station* v. *Detroit*, 88 Michigan, 347; *State* v. *St. Paul Union Depot Co.*, 42 Minnesota, 142; *St. Paul Union Depot Co.* v. *M. & N. R. Co.*, 47 Minnesota, 154; *Chicago, St. Paul & Kansas C. Ry. Co.* v. *Union Depot Ry. Co.*, 54 Minnesota, 411; *Dewey* v. *Railroad*, 142 N. Car. 392; *Riley* v. *Union Station Co.*, 71 S. Car. 457; *Ryan* v. *Terminal Co.*, 102 Tennessee, 124; *Collier* v. *Union Railway Co.*, 113 Tennessee, 96; *Joy* v. *St. Louis*, 138 U. S. 1; *C., R. I. & P. Ry. Co.* v. *U. P. Ry. Co.*, 47 Fed. Rep. 15; *S. C.*, 51 Fed. Rep. 309, and 163 U. S. 564.

The arrangement in question is not in restraint of trade or commerce among the several States, or a monopoly of any part of the trade or commerce among the several States.

Counsel for the Government confuse the operation of the railroad and the cost of it, with the service rendered to the public and the charge for it. The Sherman Act has nothing to do with the former; its restrictions fall altogether upon the latter. No matter how many subordinate agencies of transportation different railroad companies employ in common, no matter how many combinations they may make to secure economy in operation, so long as they do not pool their business or their earnings, so long as they are left free in their relations to the shipping and traveling public, every motive of self-interest remains to incite to competition. And when economy of operation, however accomplished, reduces costs, the end hoped for, through competition, commerce is aided, and charges are reduced to a still lower level.

Mr. John C. Higdon, by leave of the court, filed a brief as *amicus curiæ*.

MR. JUSTICE LURTON delivered the opinion of the court.

The United States filed this bill to enforce the provisions of the Sherman Act of July 2, 1890, c. 647, 26 Stat. 209, against thirty-eight corporate and individual defendants named in the margin,[1] as a combination in re-

[1] The Terminal Railroad Association of St. Louis; The St. Louis Merchants' Bridge Terminal Railway Company; The Wiggins Ferry Company; The St. Louis Bridge Company; The St. Louis Merchants' Bridge Company; The Missouri, Kansas & Texas Railway Company; The St. Louis & San Francisco Railway Company; The Chicago & Alton Railway Company; The Baltimore & Ohio Southwestern Railroad Company; The Illinois Central Railroad Company; The St. Louis, Iron Mountain & Southern Railway Company; The Chicago, Burling-

straint of interstate commerce and as a monopoly forbidden by that law. The cause was heard by the four Circuit Judges, who, being equally divided in judgment, dismissed the bill, without filing an opinion. From this decree the United States has appealed.

The principal defendant is the Terminal Railroad Association of St. Louis, hereinafter designated as the Terminal Company. It is a corporation of the State of Missouri, and was organized under an agreement made in 1889 between Mr. Jay Gould and a number of the defendant railroad companies for the express purpose of acquiring the properties of several independent terminal companies at St. Louis with a view to combining and operating them as a unitary system.

The terminal properties first acquired and combined into one system by the Terminal Company comprised the following: The Union Railway & Transit Company of St. Louis and East St. Louis; The Terminal Railroad of St. Louis and East St. Louis; The Union Depot Company of St. Louis; The St. Louis Bridge Company, and the Tunnel Railroad of St. Louis. These properties included the great union station, the only existing railroad bridge—the Eads or St. Louis Bridge—and every connecting or terminal company by means of which that bridge could be used by railroads terminating on either side of the river. For a time this combination was operated in com-

---

ton & Quincy Railway Company; The St. Louis, Vandalia & Terre Haute Railroad Company; The Wabash Railroad Company; The Cleveland, Cincinnati, Chicago & St. Louis Railway Company; The Louisville & Nashville Railroad Company; The Southern Railway Company; The Chicago, Rock Island & Pacific Railway Company; The Missouri Pacific Railway Company; The Central Trust Company of New York; A. A. Allen, S. M. Felton, A. J. Davidson, W. M. Green, J. T. Harahan, C. S. Clarke, H. Miller, Benjamin McKean, Joseph Ramsey, George E. Evans, C. E. Schaff, T. C. Powell, J. F. Stevens, A. G. Cochran, W. S. McChesney, Julius Walsh, V. W. Fisher and S. D. Webster.

petition with the terminal system of the Wiggins Ferry Company, and upon the completion of the Merchants' Bridge, in competition with it, and a system of terminals which were organized in connection with it. The Wiggins Ferry Company had for many years operated car transfer boats by means of which cars were transferred between St. Louis and East St. Louis.

Upon each side of the river it owned extensive railway terminal facilities, with which connection was maintained with the many railroads terminating on the west and east sides of the river, which gave such roads connection with each other, as well as access to many of the industrial and business districts on each side. In 1890 a third terminal system was opened up by the completion of a second railroad bridge over the Mississippi River at St. Louis, known as the Merchants' Bridge. This was a railroad toll bridge, open to every railroad upon equal terms. That it might forever maintain the potentiality of competition as a railroad bridge, the act of Congress authorizing its construction provided that no stockholders in any other railway bridge company should become a stockholder therein. But as this was a mere bridge company, it was essential that railroad companies desiring to use it should have railway connections with it on each side of the river. For this purpose two or more railway companies were organized and lines of railway were constructed connecting each end of the Merchants' Bridge with various railroad systems terminating on either side of the river. The Merchants' Bridge and its allied terminals were thereby able to afford many, if not all, of the railroads coming into St. Louis, access to the business districts on both sides of the river, and connection with each other.

Thus, for a time, there existed three independent methods by which connection was maintained between railroads terminating on either side of the river at St. Louis: First, the original Wiggins Ferry Company, and

its railway terminal connections; second, The Eads Railroad Bridge and the several terminal companies by means of which railroads terminating at St. Louis were able to use that bridge and connect with one another, constituting the system controlled by the Terminal Company, and, third, The Merchants' Bridge and terminal facilities owned and operated by companies in connection therewith.

This resulted in some cases in an unnecessary duplication of facilities, but it at least gave to carriers and shippers some choice, a condition which, if it does not lead to competition in charges, does insure competition in service. Important as were the considerations mentioned, their independence of one another served to keep open the means for the entrance of new lines to the city, and was an obstacle to united opposition from existing lines. The importance of this will be more clearly seen when we come to consider the topographical conditions of the situation.

That the promotors of the Terminal Company designed to obtain the control of every feasible means of railroad access to St. Louis, or means of connecting the lines of railway entering on opposite sides of the river, is manifested by the declarations of the original agreement, as well as by the successive steps which followed. Thus, the proviso in the act of Congress authorizing the construction of the Merchants' Bridge, which forbade the ownership of its stock by any other bridge company or stockholder in any such company, was eliminated by an act of Congress, and shortly thereafter the Terminal Company obtained stock control of the Merchants' Bridge Company, and of its related terminal companies, and likewise a lease.

The Wiggins Ferry Company owned the river front on the Illinois shore opposite St. Louis for a distance of several miles. It had on that side and on its own property, switching yards and other terminal facilities. From these yards extended lines of rails which connected with its car transfer boats and with the termini of railroads on the Illinois side.

On the St. Louis side of the river it had like facilities by which it was in connection with railway lines terminating on that side. That company was, consequently, able to interchange traffic between the systems on opposite sides of the river and to serve many industries. In 1892 the Rock Island Railroad Company endeavored to obtain an independent entrance to the city. For this purpose it sought to acquire the facilities owned by the Wiggins Ferry Company by securing a control of its capital stock. This was not deemed desirable by the railroad companies which jointly owned the Terminal Company's facilities, and to prevent this acquisition effort was made to secure control of the stock. The competition was fierce and the market price of the shares pushed to an abnormal price. The final result being in doubt, an agreement was reached by which the Rock Island Company was admitted to joint ownership with the other proprietary companies in all of the terminal properties which were operated by the Terminal Company or which should be acquired by it. The shares in the Ferry Company bought by the Rock Island were transferred to the Terminal Company at cost and were paid for by that company. These shares, united with those which had been acquired by the Terminal Company, enabled the latter to absorb the properties of the Ferry Company, and thus the three independent terminal systems were combined into a single system.

We come, then, to the question upon which the case must turn: Has the unification of substantially every terminal facility by which the traffic of St. Louis is served resulted in a combination which is in restraint of trade within the meaning and purpose of the Anti-trust Act?

It is not contended that the unification of the terminal facilities of a great city where many railroad systems center is, under all circumstances and conditions, a combination in restraint of trade or commerce. Whether it is a facility in aid of interstate commerce or an unreason-

able restraint forbidden by the act of Congress, as construed and applied by this court in the cases of *The Standard Oil Company* v. *The United States*, 221 U. S. 1, and *The United States* v. *American Tobacco Company*, 221 U. S. 106, will depend upon the intent to be inferred from the extent of the control thereby secured over instrumentalities which such commerce is under compulsion to use, the method by which such control has been brought about and the manner in which that control has been exerted.

The consequence to interstate commerce of this combination cannot be appreciated without a consideration of natural conditions greatly affecting the railroad situation at St. Louis. Though twenty-four lines of railway converge at St. Louis, not one of them passes through. About one-half of these lines have their termini on the Illinois side of the river. The others, coming from the west and north, have their termini either in the city or on its northern edge. To the river the city owes its origin, and for a century and more its river commerce was predominant. It is now the great obstacle to connection between the termini of lines on opposite sides of the river and any entry into the city by eastern lines. The cost of construction and maintenance of railroad bridges over so great a river makes it impracticable for every road desiring to enter or pass through the city to have its own bridge. The obvious solution is the maintenance of toll bridges open to the use of any and all lines upon identical terms. And so the commercial interests of St. Louis sought to solve the question, the system of car ferry transfer being inadequate to the growing demands of an ever-increasing population. The first bridge, called the Eads Bridge, was, and is, a toll bridge. Any carrier may use it on equal terms. But to use it there must be access over rails connecting the bridge and the railway. On the St. Louis side the bridge terminates at the foot of the great hills upon which the city is built; on the Illinois side it

ends in the low and wide valley of the Mississippi. This condition resulted in the organization of independent companies which undertook to connect the bridge on each side with the various railroad termini. On the Missouri side it was necessary to tunnel the hills, that the valley of Mill Creek might be reached, where the roads from the west had their termini. Thus, though the bridge might be used by all upon equal terms, it was accessible only by means of the several terminal companies operating lines connecting it with the railroad termini.

This brought about a condition which led to the construction of the second bridge, the Merchants' Bridge. This, too, was, and is, a toll bridge, and may be used by all upon equal terms. To prevent its control by the Eads Bridge Company, it was carefully provided that no stockholder in any other bridge company should own its shares. But this Merchants' Bridge, like the Eads Bridge, had no rail connections with any of the existing railroad systems, and these facilities, as in the case of the Eads Bridge, were supplied by a number of independent railway companies who undertook to fill in the gaps between the bridge ends and the termini of railroads on both sides of the river. It must be also observed that these terminal companies were in many instances so supplied with switch connections as not only to connect with the bridge, but also served to connect such roads with each other and with the industries along their lines. Now, it is evident that these lines connecting railroad termini with the railroad bridges dominated the situation. They stood, as it were, just outside the gateway, and none could enter, though the gate stood open, who did not comply with their terms. The topographical situation making access to the city difficult does not end with the river. The city lies upon a group of great hills which hug the river closely and rapidly recede to the west. These hills are penetrated on the west by the narrow valley of Mill Creek, which crosses the city about

its center. Railways coming from the west use this valley, but its facilities are very restricted and now quite occupied. North of the city the hills drop back from the river gradually, and there exists a valley formed by the Mississippi and Missouri rivers. Railroads coming from the north on the west side of the river come by this valley. As we have stated before, the valley of the Mississippi at St. Louis is on the Illinois side of the river. Railroads coming from the east, northeast and southeast have their termini in that valley. As a consequence, there have grown up numerous cities and towns of some consequence as manufacturing places, the chief of which is East St. Louis.

The result of the geographical and topographical situation is that it is, as a practical matter, impossible for any railroad company to pass through, or even enter St. Louis, so as to be within reach of its industries or commerce, without using the facilities entirely controlled by the Terminal Company. The averment of the bill that the railroad companies, here defendants, being the sole stockholders of the Terminal Company, as we shall later see, compel all other railroad companies converging at St. Louis to use the facilities owned and operated by the Terminal Company, is, therefore, borne out by the facts of the situation. Nor is this effect denied, for the learned counsel representing the proprietary companies, as well as the Terminal Company, say in their filed brief: "There indeed is compulsion, but it is inherent in the situation. The other companies use the terminal properties because it is not possible to acquire adequate facilities for themselves. The cost to any one company is prohibitive." Obviously, this was not true before the consolidation of the systems of the Wiggins Ferry Company and the Merchants' Bridge Company with the system theretofore controlled by the Terminal Company. That the non-proprietary companies might have been compelled to use the instrumentalities of one or the other of the three systems then available, and

that the advantages secured might not have been so great as those offered by the unified system now operated by the Terminal Company, must be admitted. But that there existed before the three terminal systems were combined a considerable measure of competition for the business of the other companies, and a larger power of competition, is undeniable. That the fourteen proprietary companies did not then have the power they now have to exclude either existing roads not in the combination, or new companies, from acquiring an independent entrance into the city, is also indisputable. The independent existence of these three terminal systems was, therefore, a menace to complete domination as keeping open the way for greater competition. Only by their absorption or some equivalent arrangement was it possible to exclude from independent entrance the Rock Island Company, or any other company which might desire its own terminals. To close the door to competition large sums were expended to acquire stock control. For this purpose the obligations of the absorbed companies were assumed and new funds obtained by mortgages upon the unified system.

The physical conditions which compel the use of the combined system by every road which desires to cross the river, either to serve the commerce of the city or to connect with lines separated by the river, is the factor which gives greatest color to the unlawfulness of the combination as now controlled and operated. If the Terminal Company was in law and fact the agent of all, the mere unification which has occurred would take on quite a different aspect. It becomes, therefore, of the utmost importance to know the character and purpose of the corporation which has combined all of the terminal instrumentalities upon which the commerce of a great city and gateway between the East and West must depend. The fact that the Terminal Company is not an independent corporation at all is of the utmost significance. There

are twenty-four railroads converging at St. Louis. The relation of the Terminal Company is not one of impartiality to each of them. It was organized in 1889, at the instance of six of these railroad companies, for the purpose of acquiring all existing terminal instrumentalities for the benefit of the combination, and such other companies as they might thereafter admit to joint ownership by unanimous consent, and upon a consideration to be agreed upon. From time to time other companies came to an agreement with the original proprietors until, at the time this bill was filed, the properties unified were held for the joint use of the fourteen companies made defendants. In the contract of 1889, above referred to, the purpose of acquiring the first terminals combined, is declared to be, "that said properties may be held in perpetuity as a unit and developed and improved in the interest of the proprietary companies, for the purpose of furnishing adequate terminal facilities in St. Louis and East St. Louis." This purpose was carried out by the conveyance to "each of the proprietary companies . . . forever a right of joint use with each other and such other companies as may be admitted as proprietary lines to joint use thereof, of all said terminal properties . . . now held or that may be hereafter acquired in St. Louis and East St. Louis, . . . it being understood that the right herein granted to each proprietary company is not transferable to any extent whatever, but is to remain as an appurtenant to the railroad now owned by each proprietary company"

That these facilities were not to be acquired for the benefit of any railroad company which might desire a joint use thereof was made plain by a provision in the contract referred to which stipulated that other railroad companies not named therein as proprietary companies might only be admitted "to joint use of said terminal system on unanimous consent, but not otherwise, of the

directors of the first party, and on payment of such a consideration as they may determine, and on signing this agreement," etc. Inasmuch as the directors of the Terminal Company consisted of one representative of each of the proprietary companies, selected by itself, it is plain that each of said companies had and still has a veto upon any joint use or control of terminals by any non-proprietary company.

By that and the supplemental agreement of December, 1902, the Ferry Company and the Merchants' Bridge Company having then been absorbed, the proprietary companies prescribed that the charges of the company shall be so adjusted as to produce no more revenue than shall equal the fixed charges, operating and maintenance expenses. Deficiencies for those purposes the proprietary companies guarantee to make good, though such payments are to be reimbursed by an increase in charges, if necessary.

We fail to find in either of the contracts referred to any provision abrogating the requirement of unanimous consent to the admission of other companies to the ownership of the Terminal Company, though counsel say that no such company will now find itself excluded from joint use or ownership upon application. That other companies are permitted to use the facilities of the Terminal Company upon paying the same charges paid by the proprietary companies seems to be conceded. But there is no provision by which any such privilege is accorded.

By still another clause in the agreement the proprietary companies obligate themselves to forever use the facilities of the Terminal Company for all business destined to cross the river. This would seem to guarantee against any competitive system, since the companies to the agreement now control about one-third of the railroad mileage of the United States.

In acquiring these properties the Terminal Company has assumed mortgage and stock dividend obligations of

the constituent companies aggregating about twenty-five million dollars. It has executed its own mortgage upon all of its property to secure an issue of fifty million dollars of bonds, of which twenty million dollars worth have been sold, and the proceeds used in construction or in paying for the properties acquired. It has thus about forty-five million dollars of mortgage or fixed charges or liabilities. The company has an authorized capital stock of fifty million dollars. Of this about twenty-eight million dollars has been issued in equal proportions, to the several owning railroad companies. No dividends have ever been paid, and the company disclaims any purpose to pay dividends. We fail to find any obligation by which they may be prevented from paying dividends upon the stock held by the proprietary companies, or that in its treasury, if ever issued. Undoubtedly, the major part of this revenue arises from the business done by the proprietary companies through the Terminal Company, but that coming from other companies is, however, a large contribution. That no direct profit is derived by the owning companies from the operation of the terminals, may be true. But it is not clear that the proprietary companies do not make an indirect profit through ownership of obligations of the absorbed companies.

That through their ownership and exclusive control they are in possession of advantages in respect to the enormous traffic which must use the St. Louis gateway, is undeniable. That the proprietary companies have not availed themselves of the full measure of their power to impede free competition of outside companies, may be true. Aside from their power under all of the conditions to exclude independent entrance to the city by any outside company, their control has resulted in certain methods which are not consistent with freedom of competition. To these acts we shall refer later.

We are not unmindful of the essential difference be-

tween terminal systems properly so described and railroad transportation companies. The first are but instrumentalities which assist the latter in the transfer of traffic between different lines, and in the collection and distribution of traffic. They are a modern evolution in the doing of railroad business, and are of the greatest public utility. They, under proper conditions, do not restrain, but promote commerce.

The argument that the combination of the instrumentalities operated by the Terminal Company with those of the Merchants' Bridge Company was a combination of two competing lines of railroad, such as was condemned in *Northern Securities Company* v. *United States*, 193 U. S. 197, is not well founded. This combination if properly regarded as of parallel and competing lines would have been obnoxious to the seventeenth section of the constitution of Missouri. For the purpose of enforcing this Missouri prohibition, the State instituted a proceeding to dissolve the combination of the properties of the Merchants' Bridge Terminal Railroad Company with the Terminal Railroad Association of St. Louis, upon the ground that the railroads operated by those companies were parallel and competing lines of railroad. Relief was denied. The Missouri court held that the merger of mere railway terminals used to facilitate the public convenience by the transfer of cars from one line of railway to another, and instrumentalities for the distribution or gathering of traffic, freight or passenger, among scattered industries, or to different business centers of a great city, were not properly railroad companies within the reasonable meaning of the statutes forbidding combinations between competing or parallel lines of railroad. Referring to the legitimate use of terminal companies, the Missouri court said:

"A more effectual means of keeping competition up to the highest point between parallel or competing lines could not be devised. The destruction of the system would re-

sult in compelling the shipper to employ the railroad with which he has switch connection, or else cart his product to a distant part of the city, at a cost possibly as great as the railroad tariff.

"St. Louis is a city of great magnitude in the extent of its area, its population, and its manufacturing and other business. A very large number of trunk line railroads converge in this city. In the brief of one of the well-informed counsel in this case it is said that St. Louis is one of the largest railroad centers in the world. Suppose it were required of every railroad company to effect its entrance to this city as best it could and establish its own terminal facilities, we would have a large number of passenger stations, freight depots and switch yards scattered all over the vast area and innumerable vehicles employed in hauling passengers and freight to and from those stations and depots. Or suppose it became necessary in the exigency of commerce that all incoming trains should reach a common focus, but every railroad company provide its own track; then not only would the expense of obtaining the necessary rights of way be so enormous as to amount to the exclusion of all but a few of the strongest roads, but, if it could be accomplished, the city would be cut to pieces with the many lines of railroad intersecting it in every direction, and thus the greatest agency of commerce would become the greatest burden." 182 Missouri, 284, 299.

Among the cases in which the public utility of such companies has been recognized are: *Bridwell* v. *Gate City Terminal Co.* (Georgia), 10 L. R. A. (N. S.) 909; *Indianapolis Union Railroad Company* v. *Cooper*, 6 Ind. App. 202; *State ex rel.* v. *Martin*, 51 Kansas, 462; *Mayor* v. *Norwich E. W. Railroad Co.*, 109 Massachusetts, 103; *Union Depot Company* v. *Morton*, 83 Michigan, 265; *State* v. *St. Paul Union Depot Co.*, 42 Minnesota, 142; *Ryan* v. *Terminal Co.*, 102 Tennessee, 111, 124.

While, therefore, the mere combining of several independent terminal systems into one may not operate as a restraint upon the interstate commerce which must use them, yet there may be conditions which will bring such a combination under the prohibition of the Sherman Act. The one in question, counsel say, is not antagonistic to but in harmony with the Anti-trust Act, "because it expands competition by extending equal conveniences and advantages to all shippers located upon each of the three systems for all traffic to and from St. Louis; expedites and economizes the service." It is justified, they argue by "(1) the physical or topographical conditions peculiar to the locality; by (2) its commercial, industrial and railroad development and history; by (3) public opinion expressed legislatively and judicially, and (4) by the judgment of experienced railroad engineers and managers." From which consideration the same counsel say that the issue presented by this record is, "whether the common control or ownership of all the terminal facilities (mechanical devices for the exchange, receipt and distribution of traffic) of a large commercial and manufacturing center by all of the railroad companies, and for the benefit of all upon equal terms and facilities, without discrimination, is condemned by the Sherman act."

Let us analyze the proposition included in the issue, as stated by counsel, quoted above: Counsel assume that the combined terminals have come under a "common control or ownership." But this is not the case. That the instrumentalities so combined are not jointly owned or managed by all of the companies compelled to use them is a significant fact which must be taken into account for the purpose of determining whether there has been a violation of the Anti-trust Act. The control and ownership is that of the fourteen roads which are defendants. The railroad systems and the coal roads converging at St. Louis, which are not associated with the proprietary companies are

under compulsion to use the terminal system, and yet have no voice in its control.

It cannot be controverted that, in ordinary circumstances, a number of independent companies might combine for the purpose of controlling or acquiring terminals for their common but exclusive use. In such cases other companies might be admitted upon terms or excluded altogether. If such terms were too onerous, there would ordinarily remain the right and power to construct their own terminals. But the situation at St. Louis is most extraordinary, and we base our conclusion in this case, in a large measure, upon that fact. The "physical or topographical condition peculiar to the locality," which is advanced as a prime justification for a unified system of terminals, constitutes a most obvious reason why such a unified system is an obstacle, a hindrance and a restriction upon interstate commerce, unless it is the impartial agent of all who, owing to conditions, are under such compulsion, as here exists, to use its facilities. The witness upon whom the defendants chiefly rely to uphold the advantages of the unified system which has been constructed, Mr. Albert L. Perkins, gives this as his unqualified judgment. He was and is an experienced railroad engineer and manager and is the railway expert of the Municipal Bridge and Terminal Board, a commission appointed under a city ordinance, headed by the mayor, to study and report legislation needed to relieve the terminal conditions of St. Louis. From his study of the local situation he expresses the opinion that the terminals of railway lines in any large city should be unified as far as possible, and that such unification may be of the greatest public utility and of immeasureable advantage to commerce, state and interstate. Neither does he find in the conditions at St. Louis any insurmountable objection to such unification. The witness, however, points out that such a terminal company should be the agent of every

company, and, furthermore, that its service should not be for profit or gain. In short, that every railroad using the service should be a joint owner and equally interested in the control and management. This, he thinks, will serve the greatest possible economy, and will give the most efficient service without discrimination. When thus jointly owned and controlled, whether through the medium of a mere holding or operating company, such as the Terminal Company is, or by other means, the facilities would belong to each relatively to its own business and delivery would be made by each company over its own tracks to connecting lines or places of destination in the city. The charge for the haul thus lengthened would then be properly absorbed by the through rate, leaving nothing to be added to that to be charged the shipper or consignee but switching and storage charges proper.

The terminal properties in question are not so controlled and managed, in view of the inherent local conditions, as to escape condemnation as a restraint upon commerce. They are not under a common control and ownership. Nor can this be brought about unless the prohibition against the admission of other companies to such control is stricken out and provision made for the admission of any company to an equal control and management upon an equal basis with the present proprietary companies.

There are certain practices of this Terminal Company which operate to the disadvantage of the commerce which must cross the river at St. Louis, and of non-proprietary railroad lines compelled to use its facilities. One of them grows out of the fact that the Terminal Company is a terminal company and something more. It does not confine itself to supplying and operating mere facilities for the interchange of traffic between railroads and to assistance in the collecting and distributing of traffic for the carrier companies. It, as well as several of the absorbed

terminal companies, were organized under ordinary railroad charters. If the combination which has occurred is to escape condemnation as a combination of parallel and competing railroad companies, it is because of the essential difference between railroad and terminal companies proper—differences pointed out by the Missouri Supreme Court in the case heretofore referred to. Indeed, the defense to this proceeding is based upon the insistence that the Terminal Company is solely engaged in operating terminal facilities, defined in the briefs, "as mechanical devices for the exchange, receipt and distribution of traffic." This Terminal Company, in addition to its schedule for terminal charges proper, such as switching, warehousing, etc., files its rate-sheets for the transportation of every class of merchandise from the termini of the railroads on the Illinois side of the river to destinations across the river over its lines. These rates are applied to all traffic destined to cross the river, with certain exceptions to which we shall later refer, which originates within an irregular area of which St. Louis is the center, and having a diameter of from one to two hundred miles. This arbitrary operates to cast a burden upon short hauls, which has led to much complaint, as being both discriminatory and extortionate. An exception is made as to traffic originating within so much of this area as constitutes what is called "Green Line Territory," or which is destined to points within "Green Line Territory." This seems to be based upon competitive conditions caused by the great toll railway bridge at Memphis, Tennessee, the bridge toll being treated by lines using the bridge as a part of the through rate.

Another exception to the rule imposing this arbitrary is that it does not apply to traffic which originates in East St. Louis, whether it is destined to cross the river or not. The reason for this exemption, where such traffic does cross the river, is not apparent. Possibly, it may be said

that it is because the traffic of St. Louis and East St. Louis should be treated as arising in the same commercial area. But this reason does not seem to apply to the traffic originating in St. Louis, which is bound east, though that of East St. Louis is altogether free from this arbitrary charge. The effect of this arbitrary discrimination is obviously injurious to the commerce and manufacturers of St. Louis, and is among the chief causes of complaint against the Terminal Company. Mr. Perkins, to whom we have before referred as a capable and impartial expert, says of the consequence of this curious exception out of the one hundred mile area rule, that "the effect of these charges was, of course, to put the man doing business in St. Louis at a disadvantage to that extent with the man doing business at East St. Louis on his eastern business." Again he says, that the practical operation was to give East St. Louis a distinct advantage in the manufacturing lines. Another practice which marks this Terminal Company as a transportation company which interposed itself between railroads having their termini on opposite sides of the river, and between the city itself and the roads terminating on the east side of the river, is that all traffic destined to cross the river at St. Louis, whether bound east or west, or destined for the city if coming from the east, is billed only to East St. Louis, and there rebilled to destination.

The practice of rebilling and of making a distinct hauling charge is an evident survival of the methods which existed when the eastern lines had no termini in St. Louis. They then billed to East St. Louis, and there turned the traffic over to one of the existing terminal companies, who made their own specific charges for the haul to places of delivery within the city. The practice has been continued after the reason for it has disappeared. The effect of this practice of rebilling at East St. Louis and of imposing this arbitrary upon traffic originating within

one hundred miles of the city, destined to cross the river, seems to have been also applied to the large coal traffic between the Illinois coal mines, upon which the city is largely dependent.

We come now to the remedy. In determining what this should be we, as said by this court in *Standard Oil Company* v. *United States*, 221 U. S. 1, 78, must not overlook the fact that in applying a remedy "that injury to the public by the prevention of an undue restraint on, or the monopolization of trade or commerce is the foundation upon which the prohibitions of the statute rest, and moreover that one of the fundamental purposes of the statute is to protect, not to destroy, rights of property." If, as we have already said, the combination of two or more mere terminal companies into a single system does not violate the prohibition of the statute against contracts and combinations in restraint of interstate commerce, it is because such a combination may be of the greatest public utility. But when, as here, the inherent conditions are such as to prohibit any other reasonable means of entering the city, the combination of every such facility under the exclusive ownership and control of less than all of the companies under compulsion to use them violates both the first and second sections of the act, in that it constitutes a contract or combination in restraint of commerce among the States and an attempt to monopolize commerce among the States which must pass through the gateway at St. Louis.

The Government has urged a dissolution of the combination between the Terminal Company, the Merchants' Bridge Terminal Company and the Wiggins Ferry Company. That remedy may be necessary unless one equally adequate can be applied.

But the illegal restraint upon commerce among the States which we here find to exist consists in the possession acquired by the proprietary companies through the

means and with the object we have stated of dominating commerce among the States carried on by other railroads entering or seeking to enter the city of St. Louis and by which such railroads are compelled either to desist from carrying on interstate commerce or to do so upon the terms imposed by the proprietary companies. This control and possession constitutes such a grip upon the commerce of St. Louis and commerce which must cross the river there, whether coming from the east or west as to be both an illegal restraint and an attempt to monopolize.

The power resulting from the combination even before completed by the acquisition of the Wiggins Ferry Company and its related terminals was exhibited when the Rock Island sought an independent entrance.

Some of its abuses are shown by the imposition of the arbitrary hauling charge imposed upon the artificially limited trade districts described. It is shown also by the maintenance of the system of billing traffic destined to cross the river at St. Louis, either east or west, or to St. Louis, if from points on the east side of the river, a practice so galling and universal as to practically "eliminate St. Louis from the railroad map," to quote the graphic, if extravagant, language of counsel for the United States, as respects the great traffic subject to the regulation.

Plainly the combination which has occurred would not be an illegal restraint under the terms of the statute if it were what is claimed for it, a proper terminal association acting as the impartial agent of every line which is under compulsion to use its instrumentalities. If, as we have pointed out, the violation of the statute, in view of the inherent physical conditions, grows out of administrative conditions which may be eliminated and the obvious advantages of unification preserved, such a modification of the agreement between the Terminal Company and the proprietary companies as shall constitute the former the *bona fide* agent and servant of every railroad line which

shall use its facilities, and an inhibition of certain methods of administration to which we have referred, will amply vindicate the wise purpose of the statute, and will preserve to the public a system of great public advantage.

These considerations lead to a reversal of the decree dismissing the bill. This is accordingly adjudged and the case is remanded to the District Court, with directions that a decree be there entered directing the parties to submit to the court, within ninety days after receipt of mandate, a plan for the reorganization of the contract between the fourteen defendant railroad companies and the Terminal Company, which we have pointed out as bringing the combination within the inhibition of the statute.

First. By providing for the admission of any existing or future railroad to joint ownership and control of the combined terminal properties, upon such just and reasonable terms as shall place such applying company upon a plane of equality in respect of benefits and burdens with the present proprietary companies.

Second. Such plan of reorganization must also provide definitely for the use of the terminal facilities by any other railroad not electing to become a joint owner, upon such just and reasonable terms and regulations as will, in respect of use, character and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies.

Third. By eliminating from the present agreement between the Terminal Company and the proprietary companies any provision which restricts any such company to the use of the facilities of the Terminal Company.

Fourth. By providing for the complete abolition of the existing practice of billing to East St. Louis, or other junction points, and then rebilling traffic destined to St. Louis, or to points beyond.

Fifth. By providing for the abolition of any special or

so-called arbitrary charge for the use of the terminal facilities in respect of traffic originating within the so-called one hundred mile area, that is not equally and in like manner applied in respect of all other traffic of a like character originating outside of that area.

Sixth. By providing that any disagreement between any company applying to become a joint owner or user as herein provided for and the Terminal or proprietary companies which shall arise after a final decree in this cause, may be submitted to the District Court, upon a petition filed in this cause, subject to review by appeal in the usual manner.

Seventh. To avoid any possible misapprehension, the decree should also contain a provision that nothing therein shall be taken to affect in any wise or at any time the power of the Interstate Commerce Commission over the rates to be charged by the Terminal Company, or the mode of billing traffic passing over its lines, or the establishing of joint through rates or routes over its lines, or any other power conferred by law upon such Commission.

Upon failure of the parties to come to an agreement which is in substantial accord with this opinion and decree, the court will, after hearing the parties upon a plan for the dissolution of the combination between the Terminal Company, The Wiggins Ferry Company, the Merchants' Bridge Company, and the several terminal companies related to the Ferry and Merchants' Bridge Company, make such order and decree for the complete disjoinder of the three systems, and their future operation as independent systems, as may be necessary, enjoining the defendants, singly and collectively from any exercise of control or dominion over either of the said terminal systems, or their related constituent companies, through lease, purchase or stock control, and enjoining the defendants from voting any share in any of said companies or receiving dividends, directly or indirectly, or from any future

combination of the said systems in evasion of such decree or any part thereof.

Reversed and remanded accordingly.

MR. JUSTICE HOLMES took no part in the hearing or determination of this case.
